Basis for proposed no significant hazards consideration determination: The proposed changes to Technical Specifications 3.10, 4.1.D, Table 3.1.1 and Bases 3.1 would allow flexibility in disarming control rods by allowing a variety of disarming methods (any one of which is sufficient to ensure that the control rods remain fully inserted). The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870, April 6, 1983). The proposed change is most closely enveloped by example (vi), a change which either may result in some increase to the probability or consequences of a previously-analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan.

The licensee has determined that the proposed change involves a modest relaxation in the operability requirement of the existing Technical Specifications, but is within acceptable criteria as defined in Standard Technical Specifications, will decrease the probability of an error and improve the availability of equipment or improve the system performance. The staff agrees.

The licensee has reviewed the proposed change pursuant to 10 CFR 50.59 and has determined that it does not constitute an unreviewed safety question. Specifically, the margins of safety as defined in the existing

VOL
51
ISS
38
FE
26
1986
UMI

Technical Specification Bases are maintained. In addition, the probability of occurrence or the consequences of a previously analyzed accident have not been increased and the possibility for a new type of accident not previously evaluated has not been created.

The licensee has also reviewed the proposed change, in accordance with 10 CFR 50.92, and has concluded that it does not involve a significant hazards consideration. The basis for this conclusion is that the criteria of 10 CFR 50.92(c) are not compromised, a conclusion which is supported by its determinations made pursuant to 10 CFR 50.59. Since the staff has previously reviewed the requirements for disarming G. E. BWR control rods and approved the Standard Technical Specifications that allow either electrical or hydraulic disarming of fully inserted control rods, the staff proposes to determine that the license amendment request involves no significant hazards considerations.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

NRC Project Director: Christopher I. Grimes.

Northern States Power Company, Docket Nos. 50–282 and 50–306, Prairie Island Nuclear Generating Plant Units 1 and 2, City of Red Wing, Goodhue County, Minnesota

Date of amendment request: January 13, 1986.

Description of amendment request: The proposed amendments would:

1. Add reference to the WRB–1 DNB correlation for Westinghouse fuel and identify that the W–3 DNB correlation will be used for Exxon fuel.

2. Delete reference to the "moderator temperature coefficient" in Specification 3.1.F.1. In place of the existing restriction on isothermal temperature coefficient, require the isothermal temperature coefficient to be below 5 pcm/°F when below 70% power and negative above 70% power.

Change the associated bases.

Replace the existing action statement, specification 3.1.F.3, with the Standard Technical Specification action statements, specification 3.1.1.3, except the requirement to submit a special report in 10 days has been changed to allow 30 days to submit the report.

3. Change the volume requirement for the accumulators from "between 1250 and 1282.9" to "1270 ±20" in specification 3.3.A.1.b.(2).

4. Change the peaking factors limits in Section 3.10 as shown below:

	Old value	New value
F_Q	2.22	2.30
FdH	1.55	1.60
FdH equation	1+0.2(1–P)	1+0.3(1–P)

Note.—The old F_Q for Westinghouse fuel was 2.21.

Revise the peaking factor equations on page TS.2.1–2.

Delete definitions of BU(E_i) and E_i in the specification and references to them in the bases.

Increase the required high neutron flux trip setpoint reduction from 1% to 3.33% for each percent that measured FdH exceeds the limit.

Revise the bases of Section 3.10 as necessary for the peaking factor changes. The bases have also been edited to removed some outdated information, e.g. deletion of the definition of the term $F_Q(Z)$, deletion of a description of the FdH uncertainties and deletion of a discussion of rod bow.

Delete Figure TS.3.10–7, renumber the next sequentially numbered curve and delete references to the curve.

5. On Figure TS.3.10–5, delete the third line segment and extend the second line segment to the 12 foot level. Change the associated bases.

Basis for proposed no significant hazards consideration determination: The proposed changes have been reviewed against the criteria of 10 CFR 50.92, namely that the proposed changes would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

The proposed changes referencing the WRB–1 DNB correlation are related to methodology changes currently under review by the staff. While these changes may change the consequences of a previously-analyzed accident or may change a safety margin, the results are clearly within all acceptable criteria. The proposed changes relating to the isothermal temperature coefficient have been supported by the licensee's safety evaluation contained in their application.

While the temperature coefficient revision may change the consequences of a previously-analyzed accident or may change a safety margin, the results are clearly within all acceptable criteria and the changes are not considered significant.

The proposed changes related to accumulator level have been reviewed by the licensee including their effect on the Westinghouse LOCA analysis.

While this change may result in some change in the consequences of a previously-analyzed accident, the results would be clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan.

The licensee has reviewed the proposed peaking factor changes and has submitted analyses supporting the proposed changes.

A revised large break LOCA analysis has been performed for the worst case break (CD–0.4) for Exxon fuel. This analysis (submitted November 4, 1985) assumed an F_Q of 2.32, FdH of 1.60, thimble plug removal and the new upper internals.

While this change may result in some change in the consequences of a previously-analyzed accident or may change in some way a safety margin, the results are clearly within all acceptable criteria.

With regard to the proposed change of removing the third line segment of the K(z) curve, this change is supported by recent small break LOCA analyses performed by Westinghouse on Westinghouse and Exxon fuel assemblies. Both analyses show that the small break LOCA peak cladding temperature is approximately 1000°F and support the removal of the third line segment of the K(z) curve.

While this revision may change the consequences of a previously-analyzed accident or may change in some way a safety margin, the results are clearly within all acceptable criteria.

Based on the above, the staff has determined that the proposed changes will not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

Therefore, the staff proposes to determine that the amendments would not involve a significant hazards consideration.

Local Public Document Room location: Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota.

Attorney for licensee: Gerald Charoff, Esq., Shaw, Pittman, Potts & Trowbridge, 1800 M Street NW., Washington, DC 20036.

NRC Project Director: George E. Lear.

Pacific Gas and Electric Company, Docket Nos. 50–275 and 50–323, Diablo Canyon Nuclear Power Plant, Unit Nos. 1 and 2, San Luis Obispo County, California

Date of amendment request: October 24, 1985 (Reference LAR 85–11).

Description of amendments request: The proposed amendment would revise the Diablo Canyon combined Technical Specifications for Units 1 and 2 in four areas as follows:

1. Loose-part Detection System: This change would add a new Technical Specification 3/4.3.3.11, "Loose-Part Detection System," requiring the system to be operable in Modes 1 and 2 and establishing surveillance requirements for each channel of the system. An associated Bases section would also be added.

2. Reactor Coolant System Relief Valves: This change to Technical Specification 3/4.4.4 would revise the Actions to be taken when PORV(s) or block valve(s) are inoperable by: (1) Making Action a. apply to PORV(s) that are inoperable because of excessive seat leakage; (2) adding a new Action b. that applies to PORV(s) that are inoperable due to causes other than excessive seat leakage; (3) changing existing Action b. to Action c. and replacing that part of the Action dealing with plant shutdown with a new requirement related to PORV(s) isolation and appropriate compliance with new Action b; (4) changing existing Action c. to Action d.; and (5) adding additional information to the Bases section on the safety-related function and operability of the PORVS.

3. Reactor Coolant System (RCS) Pressure/Temperature Limits: This change to Technical Specification 3/4.3.4 would revise Figures 3.4–2 and 3.4–3 on Heatup and Cooldown Limitations to reduce the service life period from 6 effective full power years (EFPY) to 5 EFPY. The associated Bases section would also be revised to reflect the reduction from 6 EFPY to 5 EFPY.

4. Reporting Requirements for Startup Reports: This change would clarify the requirements in Administrative Control 6.9.1.2 for initial startup reports and would add a requirement for subsequent reports to address tests necessary to demonstrate acceptability of changes and/or modifications.

These changes had been requested by the NRC staff as stated in the Diablo Canyon Safety Evaluation Report, Supplement No. 32, July 1985.

Basis for Proposed No Significant Hazards Consideration Determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has determined that the proposed revisions do not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated because the proposed changes to add a specification for the loose-part detection system, to provide more restrictive actions in the event of inoperable PORVs, and to reduce the service life period applicable to the RCS heatup and cooldown limitations all constitute additional restrictions not presently included in the Technical Specifications and because the proposed change to clarify and supplement the requirements for startup reports is administrative in nature.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed changes do not involve physical alteration of the plant and either further restrict or have no affect on plant operations.

(3) Involve a significant reduction in the margin of safety because the proposed changes either involve additional restrictions not presently included in the Technical Specifications or are administrative.

Accordingly, the licensee has determined that the proposed changes to the Technical Specifications involve no significant hazards consideration. The NRC staff has reviewed the proposed amendment and the licensee's determination and finds it acceptable.

Therefore, the staff proposes to determine that no significant hazards consideration is involved in the proposed amendment.

NRC Project Directorate: Steven A. Varga.

Pennsylvania Power and Light Company, Docket No. 50–388, Susquehanna Steam Electric Station, Unit 2, Luzerne County, Pennsylvania

Date of amendment request: December 19, 1985.

Description of amendment request: The purpose of the amendment is to request a change to the Unit 2 Technical Specifications, Table 3.3.2–2. The licensee is proposing that the setpoint for MSIV isolation on reactor vessel water level be changed from Level 2 (L2) to Level 1 (L1) in order to reduce the number of challenges to the Safety Relief Valves (SRV). The change is consistent with the NRC recommendations in Item 16 of NUREG–0737 Section II.K.3, "Reduction of Challenges and Failures of Relief Valves—Feasibility Study and System Modification." This exact change was issued on May 28, 1985, for Unit 1.

Basis for Proposed No Significant Hazards Consideration Determination: The licensee in his letter dated December 19, 1985, stated that the proposed change does not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated. FSAR Chapters 5, 6, and 15 were reviewed to determine the impact of changing the MSIV closure setpoint on the transient and accident analyses. Seven MCPR transients and the loss of coolant accidents result in MSIV closure on L2 water level.

The transient events include generator load rejection with and without bypass, turbine trip with and without bypass, recirculation pump trip (both pumps), recirculation pump seizure, and loss of feedwater flow. The first six events result in a loss of feedwater flow due to the Level 8 (L8) feedwater pump trip followed by a rapid drop in water level due to the void collapse after the L8 turbine trip and scram. The L2 setpoint is reached approximately 30 seconds later since the water level decreases slowly following the initial drop. Changing the MSIV closure setpoint to L1 will result in HPCI and RCIC initiation at 30 seconds with no MSIV closure. Water level will increase following HPCI and RCIC injection, and MSIV closure is not expected to occur for these six transients. Since the reactor is scrammed 30 seconds prior to the L2 trip, the MCPR has increased well above the safety limit. Therefore, changing the MSIV closure setpoint does not affect the thermal margin for the first six transients listed above. The loss

VOL
51
ISS
38
FE
26
1986
UMI

of feedwater flow event results in a slightly different scenario. Upon loss of feedwater flow, the reactor water level decreases to the Level 3 (L3) setpoint which results in a reactor scram. Because the water level is at the L3 setpoint, the void collapse following the scram causes the water level to drop to the L2 setpoint. Changing the MSIV closure setpoint to L1 will result in HPCI and RCIC initiation with no MSIV closure. Water level will increase following the HPCI and RCIC injection, and the MSIV closure is not expected to occur. Because reactor power decreases prior to the scram due to the reduced core inlet subcooling and because the reactor scrammed a few seconds prior to water level reaching the L2 setpoint, the MCPR has increased well above the safety limit prior to the time L2 is reached. Therefore, changing the MSIV closure setpoint does not affect the thermal margin evaluation for the loss of feedwater flow event.

The loss of coolant accidents also result in a rapid drop in reactor water level. As stated in FSAR Table 6.3–1, a loss of offsite power is assumed coincident with the LOCA. Chapter 15 of the FSAR shows MSIV closure will occur upon a loss of auxiliary power. Therefore, changing the MSIV closure setpoint from L2 to L1 does not affect the LOCA analysis because the MSIVs close due to the loss of offsite power. For a LOCA with offsite power available, changing the MSIV closure setpoint from L2 to L1 will result in a faster pressure decrease which results in earlier low pressure ECCS injection and lower peak clad temperature.

(2) The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated. As described above, the change involves revising the setpoint of a previously evaluated trip function. This item can change the results of a previous analysis, but cannot create a different type of accident.

(3) The proposed change do not involve a significant reduction in a margin of safety. This proposed modification reduces the probability of a malfunction of equipment. It will delay or eliminate MSIV closures for many transient events which reduce the number of SRV openings and MSIV closure. Challenges to the HPCI and RCIC systems are reduced by preserving the availability of the feedwater system which allows the operator to suppress those systems' cyclical operation. This likely reduces the probability of a stuck open relief valve and failure of HPCI, RCIC, or MSIVs.

The NRC staff agrees with the licensee's evaluation in this regard and, based on the above, proposes to find the proposed changes to Technical Specification Table 3.3.2–2 do not involve a significant hazards consideration.

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701.

Attorney for licensee: Jay Silberg, Esquire, Shaw, Pittman, Potts and Trowbridge, 1800 M Street, NW., Washington, DC 20036.

NRC Project Director: E. Adensam.

Tennessee Valley Authority, Docket Nos. 50–259, 50–260 and 50–296, Browns Ferry Nuclear Plant, Units 1, 2 and 3, Limestone County, Alabama

Date of amendment request: January 17, 1986.

Description of amendment request: The proposed amendment would revise the technical specifications (TS) of Browns Ferry Nuclear Plant Units 1, 2, and 3 to provide various improvements and clarifications to the Administrative Controls section. The changes include:

(1) Revise section 6, Administrative Controls, to incorporate the format of Standard Technical Specifications (STS). This includes the use of the STS page numbering system, revised index/table of contents and relocation of several requirements, revising all the references within TS to sections in section 6, incorporating STS language for actions to be taken in the event of a safety limit violation or reportable event, changing the title of the Special Work Permit (SWP) to the Radiological Work Permit (RWP), and allowing 15 days to submit the monthly report to NRC as is allowed in STS.

(2) Revise the minimum plant staffing requirements to reflect the guidance of STS and requirements of 10 CFR 50.54(m). This includes deletion of the note requiring that the Shift Technical Advisor be onsite at all times, deletion of the note requiring senior operator license (SRO) training for managers, adding a note that requires an SRO to be in the control room of a unit whenever it is in an operational mode other than cold shutdown or refueling, clarifying the requirement for an SRO to directly supervise fuel handling, addition of requirements for the site fire brigade and the STS note regarding the minimum requirements for the fire brigade and health physics technician, and finally to revise the table for minimum shift crew requirements to reflect guidance of STS and requirements of 10 CFR 50.54(m).

(3) Organizational changes within TVA have resulted in revisions to the offsite and facility organization charts.

(4) Deletion of unnecessary and/or obsolete notes and requirements. Two footnotes at the end of the Reporting Requirements section which defined the terms, "forced outage" and "forced reduction in power" are deleted by this amendment since they are not referenced anywhere in these TS or in STS. Two other notes which were unreferenced at the end of this section were moved to the proper locations and referenced similar to STS. The requirement for the Annual Operating Report specifies that operation of the "safety/relief valves" should be included in the report. However, "safety valves" were deleted from the TS by previous amendments, therefore, this reference is being changed to only "relief valves". Similarly the amendment will delete a requirement to maintain records "which are covered under the provisions of paragraph 6.10," since paragraph 6.10 was deleted by previous amendments.

(5) The section that describes the Plant Operations Review Committee (PORC) has been revised to reflect a new emphasis on matters that relate to nuclear safety. The PORC membership and meeting requirements have been more clearly defined and the responsibilities revised to reflect the new emphasis and the proposed change in the technical review of modifications and procedures. The PORC section is also revised to reflect the new TVA organization and guidance of STS.

(6) The technical review and approval of procedures and proposed modifications has been changed to incorporate the use of members of the site supervisory staff designated by the plant manager to perform the required technical and cross-disciplinary review responsibilities. The procedures section has been revised to more clearly delineate those procedures which are required to be established, implemented, and maintained by referencing Appendix A of Regulatory Guide 1.33.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance for the application of criteria for no significant hazards consideration determination by providing examples of amendments that are considered not likely to involve significant hazards consideration (48 FR 14870). These examples include: (i) A purely administrative change to technical specifications: for example a change to achieve consistency throughout the

technical specifications, correction of an error, or a change in nomenclature.

The Commission has also provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

Changes No. 1 and 4 apply to simple changes in nomenclature and editorial changes. These changes are purely administrative in nature and are encompassed by example (i) of actions not likely to involve significant hazards considerations.

Changes 2, 3, 5 and 6 reflect a licensee management reorganization which has been implemented for the purpose of improving management overview of facility operations, modifications, and maintenance activities. In addition the technical review and approval of procedures and modifications has been changed. Because the changes to the TS do not modify or delete any TS Definitions, Safety Limits, Limiting Safety System Settings, Limiting Conditions for Operation, or Surveillance Requirements they will not increase the possibility or consequences of a previously analyzed accident, introduce the possibility of a new kind of accident, or reduce a safety margin. Because the changes will improve management overview of plant activities, they are likely to have the indirect effect of improving the margin of safety and reducing the possibility of an accident.

Since the application for amendment involves proposed changes that are encompassed by the standards or an example for which no significant hazards consideration exists, the staff has made a proposed determination that the application involves no significant hazards consideration.

Local Public Document Room location: Athens Public Library, South and Forrest, Athens, Alabama 35611.

Attorney for licensee: H.S. Sanger, Jr., Esquire, General Counsel, Tennessee Valley Authority, 400 Commerce Avenue, E 11B 33C, Knoxville, Tennessee 37902.

NRC Project Director: Daniel R. Muller.

Union Electric Company, Docket No. 50–483, Callaway Plant, Unit 1, Callaway County, Missouri

Date of application for amendment: November 15, 1985 as supplemented by submittals dated December 13, 1985 and January 28, 1986.

Brief description of amendment: The purpose of the proposed amendment is to revise the Technical Specifications which are necessary to support a transition from a Westinghouse 17 × 17 low-parasitic (LOPAR) fueled core to a Westinghouse 17 × 17 optimized fuel assembly (OFA) fueled core. These revisions are the result of several changes to design and analytical methodology as compared to those employed for the Cycle 1, LOPAR core.

Basis for proposed no significant hazards consideration determination:

Design Changes

Optimized Fuel Assembly (OFA). This amendment incorporates the technical specification changes which are necessary for the replacement of Westinghouse 17 × 17 LOPAR fuel assemblies with Westinghouse 17 × 17 OFAs. This replacement will be performed over a number of cycles. In Cycle 2, the core will include one reload region of OFA. In subsequent cycles, additional regions of OFAs will be used until the core is completely OFA. Detailed descriptions of the OFA fuel and the Westinghouse reload methodology can be found in WCAP–9500–A, "Reference Core Report 17 × 17 Optimized Fuel Assembly", and WCAP–9272–P–A, "Westinghouse Reload Safety Evaluation Methodolgy", respectively. Both of these reports have received generic approval from the staff and have been referenced in connection with the approval of similar license amendments for other facilities.

The use of OFA fuel increases the efficiency of the core by reducing the amount of parasitic material and reduces fuel cycle costs by optimizing the water to uranium ratio.

1. This change does not involve a significant increase in the probability or consequences of an accident previously evaluated. The OFA is mechanically compatible with the LOPAR fuel assembly, reactor internal interfaces, fuel handling and refueling equipment, and spent fuel storage racks. This facilitates the transition. The assembly envelope and grid centerline elevations for both designs are identical, thereby minimizing mechanical and hydraulic interaction. However, there are several design differences between the OFA and LOPAR assemblies. The OFA has reduced fuel rod, guide thimble, and instrumentation tube diameters, and has six intermediate zircaloy (mixing vane) grids instead of six intermediate inconel (mixing vane) grids in the LOPAR assembly.

The zircaloy grids have thicker and wider straps than the inconel grids which compensate for differences in material strength properties. The overall 17 × 17 OFA pressure drop is essentially the same as that for the 17 × 17 LOPAR assembly.

2. This change does not create the possibility of a new or different kind of accident from any accident previously evaluated. This is based on the fact that the method and manner of plant operation is unchanged.

3. This change does not involve a significant reduction in a margin of safety. In a mixed core of OFA and LOPAR assemblies, the different grid structures and rod diameters result in a localized flow redistruibution between an adjacent OFA and LOPAR assembly. The effect of this localized flow redistribution is bounded by applying to the OFAs a 2% departure from nucleate boiling ration (DNBR) and 10 degrees-Fahrenheit loss of coolant accident (LOCA) peak clad temperature (PCT) transition penalties which are used in the design and safety analyses. As a result of the smaller OFA fuel rod diameter, for the same power level the OFA rod has a higher volumetric heat generation and surface heat flux than the LOPAR assembly rods. In addition, the reduction in the OFA guide thimble tube diameter results in an increase in the control rod scram time to the dashpot from 2.2 to 2.4 seconds. This increase, as well as the other effects of changes in design, have been incorporated in the non-LOCA transient analyses. The results of these new analyses indicate that the ANS Condition II acceptance criteria for faults of moderate frequency (no fuel or clad failure) are still met. The results of the new LOCA analyses, presented in Attachments D and G, indicate that the acceptance criteria of 10 CFR 50.46 are still met.

In summary, the physics characteristics for the OFA fuel are only slightly different from those of the LOPAR fuel. The differences are within the normal range of variations seen from cycle to cycle and are well within the envelope of conditions analyzed. Therefore, there is no significant reduction in the safety margin.

Wet Annular Burnable Absorbers (WABA). A Wet Annular Burnable Absorber rod will be used in the Callaway reload cores which utilize 17 × 17 OFA fuel. The WABA design has

VOL
51
ISS
38
FE
26
1986
UMI

annular aluminum oxide—boron carbide absorber pellets contained within two concentric zircaloy tubes with water flowing through the center tube as well as outside the outer tube. The burnable absorber used for Cycle 1 was an annular borosilicate glass burnable absorber with a gass filled central tube and outer stainless steel clad. There are improved fuel cycle benefits associated with the WABA design. These result from lower parasitic neutron absorption of zircaloy as compared with stainless steel tubes, the increase in water fraction in the burnable absorber cell, and a reduction in the boron penalty at the end of each cycle. The design of the WABA is discussed in detail in WCAP–10021–P–A–Rev. 1, "Westinghouse Wet Annular Burnable Absorber Evaluation Report", which has received generic staff approval and has been referenced in connection with the approval of similar license amendments for other facilities. For the WABA rods, there is a larger core bypass flow than that for the glass absorber rod. In order to assure that the total core bypass flow remains within its design basis limit, the number of WABA rods used for Cycle 2 and subsequent reloads will be limited to less than the allowable number of WABA rods approved in WCAP–10021–P–A–Rev. 1.

1. This change does not involve a significant increase in the probability or consequences of an accident previously evaluated. The referenced WCAP evaluates the material properties and mechanical performance of the WABA design. The WABA design requirements are satisfied and the cladding integrity is maintained throughout the design lifetime.

2. This change does not create the possibility of a new or different kind of accident from any accident previously evaluated. This is based on the fact that the method and manner of plant operation is unchanged.

3. This change does not involve a significant reduction in a margin of safety. The referenced WCAP evaluates the nuclear and thermal-hydraulic design and concludes that the WABA rods satisfy all performance and design requirements for their design life.

The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870). This amendment request is similar to example (vi), a change which either may result in some increase to the probability or consequences of a previously-analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan, NUREG–0800. The design changes specified do not involve a significant increase in the probability or consequences of an accident or other adverse condition over previous evaluations; nor create the possibility of a new or different kind of accident or condition over previous evaluations; nor involve a significant reduction in the margin of safety. Based on the above, the design changes do not present a significant hazard.

Analytical Changes

Improved Thermal Design Procedure (ITDP) And WRB–1 DNB Correlation. The design method employed with OFA fuel to satisfy the departure from nucleate boiling (DNB) design basis is the Improved Thermal Design Procedure (ITDP). This methodology is described in WCAP–8567, "Improved Thermal Design Procedure," which has received generic approval from the staff and has been referenced in connection with the approval of similar license amendments for other facilities. This methodology is also discussed in WCAP–9500–A. The ITDP treats plant operating and fuel parameters in a statistical manner to asure that DNBR limits are met. For Cycle 1 with LOPAR fuel, a standard thermal-hydraulic methodology was used which considered plant and fuel best-estimate parameters and their uncertainties in a non-statistical manner to assure that DNBR limits were met.

The new analyses also utilize the WRB–1 DNB Correlation instead of the W–3 R-Grid Correlation which was utilized for Cycle 1. The WRB–1 Correlation provides a more accurate critical heat flux prediction than the W–3 R-Grid Correlation. This methodology is described in WCAP–8762–P–A, "New Westinghouse Correlation WRB–1 for Predicting Critical Heat Flux in Rod Bundles with Mixing Vane Grids", which has received generic staff approval and has been referenced in connection with the approval of similar license amendments for other facilities. This methodology is also discussed in WCAP–9500–A, referenced above in connection with the discussion of OFA.

Use of the ITDP model and WRB–1 Correlation in the non-LOCA analysis makes available additional DNBR margin without encroaching on required safety margins. A portion of the additional margin, assuming a maximum core thermal power of 3565 MWt instead of the licensed rated thermal power of 3411 MWt, is used in the safety analyses required for the change to OFA. These evaluations and analyses of the applicable DNB-limiting transients were carried out at the assumed higher and, therefore, conservative maximum core thermal power level of 3565 MWt.

The W–3 R-Grid DNB Correlation used in the analysis of the Callaway Cycle 1 design was developed from experimental DNB studies conducted with fluid flowing inside heated tubes, modified so as to be applicable to the test results for the LOPAR fuel design. Following development of the W–3 R-Grid DNB Correlation, Westinghouse developed the WRB–1 Correlation. The WRB–1 Correlation, based exclusively on rod bundle tests with fluid flowing outside the heated tubes, a condition which is much more representative of the actual core configuration than the single tube tests on which the W–3 R-Grid Correlation was based, is a better predictor of DNB for actual nuclear reactor geometries. The DNBR acceptance limit for the WRB–1 Correlation is therefore lower than that for the W–3 R-Grid Correlation since the data scatter is smaller. Using the same statistical methods used to calculate the W–3 R-Grid DNBR acceptance limit of 1.30, the WRB–1 Correlation acceptance limit is 1.17. The 1.17, DNBR acceptance limit has been accepted by the staff as satisfying the DNB design basis when utilizing the WRB–1 correlation.

The change in the DNBR acceptance limit associated with the change in the DNB correlations in no way implies a reduction in the safety margin for Callaway. This is true because the DNB design basis that there is a 95% probability with a 95% confidence level that the hottest rod does not experience DNB remains unchanged.

The ITDP methodology is employed to show that the DNB design basis is satisfied. Uncertainties in plant operating parameters, nuclear and thermal parameters, and fuel fabrication parameters are considered statistically such that there is at least a 95% probability with a 95% confidence level that the minimum DNBR will be greater than or equal to 1.17 for the limiting power rod under normal and abnormal operating conditions. Plant parameter uncertainties are used to determine the plant DNBR uncertainty. This DNBR uncertainty, combined with the DNBR acceptance limit, establishes a DNBR value which must be met in plant safety analyses. Since the parameter uncertainties are considered in determining the design DNBR value, the plant safety analyses are performed using nominal values of input parameters without uncertainties.

In addition to the above considerations, a plant specific DNBR margin has been considered in these analyses. In particular, the DNBR values of 1.42 and 1.45, for thimble and typical cells, respectively, were employed in the safety analyses. The DNBR margin between the DNBRs used in the safety analyses (1.42 for thimble cells and 1.45 for typical cells) and the design DNBR values (1.32 for thimble cells and 1.34 for typical cells) is more than sufficient to compensate for the DNBR penalties associated with transition core and rod bow effects and allows for design flexibility

1. This change does not involve a significant increase in the probability or consequences of an accident previously evaluated. This is based on the fact that the DNB design basis and correlation do not involve any design change but only analytical changes.

2. This change does create the probability of a new or different kind of accident from any accident previously evaluated. This is based on the fact that the method and manner of plant operation is unchanged.

3. This change does not involve a significant reduction in a margin of safety described in the discussions provided above and the WCAPs referenced therein. The change in the DNBR limit associated with the change in the DNB correlations in no way implies a reduction in the safety margin for Callaway. This is true because the DNB design basis (i.e., that there is a 95% probability with a 95% confidence level that the hottest rod does not experience DNB) remains unchanged.

PAD. The revised PAD fuel performance code is used to perform the fuel temperature calculations for the Callaway reload cores. The termal safety model within the new PAD code includes a modified annular gap conductance model, isotropic burnup-dependent fuel densification, a 0.7 multiplier on the creep rate, best-estimate basis modeling techniques, and uncertainties obtained from a statistical combination of model uncertainty and uncertainties due to manufacturing variations which are added to the calculated temperatures.

The revised PAD code, based in part on more test data, is described in WCAP–8720, Addendum 2, "Westinghouse Revised PAD Code Thermal Safety Model", which has received generic approval from the staff and has been referenced in connection with the approval of similar license amendments for other facilities. Use of the revised PAD code thermal safety model provides more realistic initial fuel temperatures for the safety analyses. The use of these more realistic temperatures has also been approved by the staff in their SER for WCAP–8720. The fuel temperatures calculated with the new PAD code are lower than those calculated with the code used for the Cycle 1 analyses.

1. This change does not involve a significant increase in the probability or consequences of an accident previously evaluated. This is based on the fact that no design change is involved, but only analytical modeling techniques are changed.

2. This change does not create the possibility of a new or different kind of accident from any accident previously evaluated. This is based on the fact that the method and manner of plant operation is unchanged.

3. This change does not involve a significant reduction in a margin of safety. The revised PAD code thermal safety model is an NRC-approved methodology which results in more realistic temperature predictions, lower than those calculated for the Cycle 1 analyses.

Small Break LOCA Analyses. The change to OFA from LOPAR requires reanalysis of the small break loss of coolant accidents (LOCAs) to demonstrate compliance with the requirements of 10 CFR 50.46 and to develop OFA specific peaking factor limits.

Because Union Electric desired that these analyses be applicable to Callaway over the long term, they were performed at an assumed upper bound design thermal power level of 3565 MWt and with the assumption that 10% of the tubes in the steam generators have been plugged. This also involved the use of fuel data based upon the revised PAD code fuel model (WCAP–8720, Addendum 2) as described above. In Cycle 2, Callaway will operate at a core power level of 3411 MWt. Only a few of the tubes in the steam generators have been plugged and the likelihood that as many as 10% will have to be plugged in considered to be very low. These assumptions lead to higher peak clad temperatures (PCT) than would otherwise be predicted and are therefore very conservative.

The small break LOCA analysis was performed using the Westinghouse NOTRUMP model described in WCAP–10054–P–A, which has been approved generically by the staff and been referenced in connection with the approval of similar amendments for other facilities.

1. This change does not involve a significant increase in the probability or consequences of an accident previously evaluated. This is based on the fact that no design change is involved, but analytical models have been updated to the most recently approved versions.

2. This change does not create the possibility of a new or different kind of accident from any accident previously evaluated. This is based on the fact that the method and manner of plant operation is unchanged.

3. This change does not involve a significant reduction in a margin of safety in that the results of this analysis show the PCT is well below the 2200 degree F limit of 10 CFR 50.46.

Large Break LOCA Analysis. The change to OFA from LOPAR requires reanalysis of the large break loss of coolant accident (LOCA) to demonstrate compliance with the requirements of 10 CFR 50.46 and to develop OFA-specific peaking factors.

The large break LOCA analysis performed using the NRC approved, Westinghouse BART model described in WCAP–9562–P–A was submitted by letter dated January 28, 1986. The results of this analysis show the peak clad temperature (PCT) from the BART analysis to be below the 2200 degree-F limit of 10 CFR 50.46.

During the transition from LOPAR to OFA, because the hydraulic resistances of these assemblies differ slightly, the possibility of flow redistribution during the reflood phase of a LOCA exists. This can lead to a PCT for the transition core that is somewhat higher than that for a full core of LOPAR or OFA. Westinghouse studies performed using the BART model show that in a transition core, the effect of the difference in hydraulic resistance between a LOPAR assembly and an OFA assembly is to reduce the steam flow velocity in the OFA at the elevation of the mixing vane grid during the reflood phase of the LOCA transient. This effect is offset somewhat by the improvement in heat transfer attributable to the effects of the mixing vane grids. The net effect is an increase of not more than 10 degrees-Fahrenheit. This penalty is applicable only during the transition core period and is only applied to the results of the large break LOCA analyses, which are performed assuming a full core of either LOPAR or OFA fuel.

The OFA-specific peaking factor limits were developed in a manner consistent with the methodology described in the NRC approved "Reference Core Report 17 x 17 Optimized Fuel Assembly", WCAP–9500–A.

1. This change does not involve a significant increase in the probability or consequences of an accident previously evaluated. This is based on the fact that no design changes are involved with the exception of a bounding assumption that

VOL
51
ISS
38
FE
26
1986
UMI

up to 10% of the tubes in the steam generators have been plugged. This assumption has been used in the revised LOCA analyses, using the NRC approved BART model, and the PCT remains below the regulatory limit and the radiological consequences are not significantly affected as reported in Attachment F to Reference 1.

2. This change does not create the possibility of a new or different kind of accident from any accident previously evaluated. This is based on the fact that the method and manner of plant operation is unchanged.

3. This change does not involve a significant reduction in a margin of safety in that the analyses, using the NRC-approved BART model, show the PCT is below the regulatory limit of 2200 deg-F.

Analytical Changes Significant Hazards Summary. The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870). This amendment request is similar to example (vi), a change which either may result in some increase to the probability or consequences of a previously-analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the *Standard Review Plan*, NUREG–0800. The analysis changes specified do not involve a significant increase in the probability or consequences of an accident or other adverse conditions over previous evaluations; nor create the possibility of a different kind of accident or condition over previous evaluations; nor involve a significant reduction in the margin of safety. In addition, the analysis changes, have all received generic approval from the staff and have been referenced in connection with the approval of similar license amendments for other facilities. Based on the above, the analysis changes do not present a significant safety hazard.

Based on the foregoing, the requested amendment does not present a significant hazard.

PREVIOUSLY PUBLISHED NOTICES OF CONSIDERATION OF ISSUANCE OF AMENDMENTS TO OPERATING LICENSES AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices because time did not allow the Commission to wait for this bi-weekly notice. They are repeated here because the bi-weekly notice lists all amendments proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the Federal Register on the day and page cited. This notices does not extend the notice period of the original notice.

Niagara Mohawk Power Corporation, Docket No. 50–220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of amendment request: January 15, 1986.

Brief description of amendment: The amendment would modify Technical Specification Sections 3.6.2 and 4.6.2 to allow Yarway water level column No. 12 to be out of service during the Spring 1986 refueling outage.

Date of publication of individual notice in Federal Register: February 12, 1986 (51 FR 5285).

Expiration date of individual notice: March 14, 1986.

Local Public Document Room location: State University College at Oswego, Penfield Library—Documents, Oswego, New York 13126.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE

During the period since publication of the last bi-weekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the Federal Register as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see: (1) The applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Licensing.

Boston Edison Company, Docket No. 50–293, Pilgrim Nuclear Power Station, Plymouth, Massachusetts

Date of application for amendment August 9, 1985.

Brief description of amendment: Technical Specifications Table 3.1.1 has been revised by changing a formula for the APRM high flux scram setpoint and by restoring a missing reference to note (13).

Date of issuance: February 4, 1986.

Effective date: 30 days after date of issuance.

Amendment No.: 92.

Facility Operating License No. DPR–35. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: September 25, 1985 (50 FR 38910). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 4, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Plymouth Public Library, 11 North Street, Plymouth, Massachusetts 02360.

Carolina Power & Light Company, Docket Nos. 50–325 and 50–324, Brunswick Steam Electric Plant, Units 1 and 2, Brunswick County, North Carolina

Date of application for amendment September 6, 1985.

Brief description of amendment: The amendments change the Technical Specifications (TS) to include administrative corrections to both BSEP–2 and BSEP–2 and a minor technical correction to BSEP–1. The administrative corrections include misspellings, inadvertent omissions, mislabeling, incorrect referencing of TS Tables and sections, and deletion of footnotes. The technical correction deals with the time of operation of the fire suppression system pumps to determine operability.

Date of issuance: January 30, 1986.

Effective date: January 30, 1986.

Amendment Nos.: 94 and 119.

Facility Operating License Nos. DPR–71 and DPR–62. Amendments revised the Technical Specifications.

Date of initial notice in Federal Register: October 9, 1985 (50 FR 41244) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated January 30, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Southport, Brunswick County Library, 109 W. Moore Street, Southport, North Carolina 28461.

Commonwealth Edison Company, Docket No. 50–454, Byron Station, Unit No. 1, Ogle County, Illinois

Date of Application for Amendment: September 27, 1985.

Brief Description of Amendment: The Amendment approves changes to the Technical Specifications to correct typographical and grammatical errors on six pages.

Date of Issuance: February 13, 1986.

Effective: February 13, 1986.

Amendment No.: 2.

Facility Operating License No. NPF–37: Amendment revised the Technical Specification.

Date of Initial Notice in Federal Register: October 23, 1985 (50 FR 43022).

No significant hazards consideration comments received: No.

Local Public Document Room Location: Rockford Public Library, 215 N. Wyman Street, Rockford, Illinois.

Commonwealth Edison Company, Docket No. 50–373, La Salle County Station, Unit 1, La Salle County, Illinois

Date of application for amendment: November 13, 1985

Brief Description of amendment: This amendment revises the La Salle Unit 1 Technical Specifications to reflect a reactor scram on low control rod drive pump discharge pressure modification as required for completion by License Condition 2.C.(15).

Date of issuance: February 4, 1986.

Effective date: Upon startup following the first refueling outage.

Amendment No.: 33.

Facility Operating License No. NPF–11. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: December 4, 1985 (50 FR 49784).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 4, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Public Library of Illinois Valley Community College, Rural Route No. 1, Oglesby, Illinois 61348.

Commonwealth Edison Company, Docket No. 50–373, La Salle County Station, Unit 1, La Salle County, Illinois

Date of amendment request: November 13, 1985.

Brief Description of amendment request: This amendment would add an excess flow check valve to the instrument line for the containment flood-up measurement system, to the La Salle, Unit 1 Technical Specifications. This excess flow check valve is a primary containment isolation valve, and therefore, must be added to Table 3.6.3–1 of the Technical Specifications.

Date of Issue: February 10, 1986.

Effective date: Upon startup following the first refueling outage.

Amendment No.: 34.

Facility Operating License No. NPF–11: Amendment revised the Technical Specifications.

Date of inital notice in Federal Register: December 4, 1985 (50 FR 40783).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 10, 1986.

No significant hazards consideration comments received: None.

Local Public Document Room location: Public Library of Illinois Valley Community College, Rural Route No. 1, Oglesby, Illinois 61348.

Commonwealth Edison Company, Docket Nos. 50–254 and 50–265, Quad Cites Nuclear Power Station, Units 1 and 2, Rock Island County, Illinos

Date of application for amendment: May 2, 1983.

Brief description of amendment: The amendments authorize changes to the Technical Specifications which specify what the reactor pressure should be when conducting scram testing following a refueling outage and revise the requirement of isolating the control rod drive pumps to apply only to single rod scram testing.

Date of issuance: February 7, 1986.

Effective date: February 7, 1986.

Amendment Nos.: 92 and 89.

Facility Operating License Nos. DPR–29 and DPR–30. Amendments revised the Technical Specifications.

Date of initial notice in Federal Register: December 21, 1983 (48 FR 56500).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 7, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Moline Public Library, 504–17th Street, Moline, Illinois 61265.

Consolidated Edison Company of New York, Docket No. 50–247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of application for amendment: April 10, 1985.

Brief description of amendment: The amendment changes the Technical Specification to revise the limits for total nuclear peaking factor (F_Q) and accumulator water volume to accommodate plant operation at steam generator plugging levels up to 25%. The change permits a maximum F_Q of 2.32 up to 25% steam generator tube plugging with norminal accumulator values of 822 ft^3.

Date of issuance: January 29, 1986.

Effective date: Immediately to be implemented within 30 days.

Amendment No.: 109.

Facilities Operating License No. DPR–26: Amendment revised the Technical Specifications.

Date of intial notice in Federal Register: June 4, 1985 (50 FR 23546).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated January 29, 1986.

No significant hazards consideration comments received; No.

UMI

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York, 10610.

Consumers Power Company, Docket No. 50-155, Big Rock Point Plant, Charlevoix County, Michigan

Date of application for amendment: June 7, 1985 as revised September 3, 1985 and Supplemented December 4, 1985.

Brief description of amendment: The amendment incorporates the requirement to adhere to the "Plan for the Big Rock Point Integrated Assessment" and the terms therein for implementing changes to its contents. Included with the amendment are the plan and a complete listing of all known safety-related modifications to be implemented during the next 3 years.

Date of issuance: February 12, 1986.

Effective date: February 12, 1986.

Amendment No.: 82.

Facility Operating License No. DPR-6. This amendment revised the license.

Date of initial notice in Federal Register: August 14, 1985 (50 FR 32792).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation date February 12, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: North Central Michigan College, 1515 Howard Street, Petoskey, Michigan 49770.

Consumers Power Company, Docket No. 50-255, Palisades Plant, Van Buren County, Michigan

Date of application for amendment: October 22, 1985.

Brief description of amendment: The amendment revised the method for performing the monthly operability test of the Containment High Radiation Monitors.

Date of issuance: January 30, 1986.

Effective date: January 30, 1986.

Amendment No.: 94.

Provisional Operating License No. DPR-20. The amendment revised the Technical Specifications.

Date of initial notice in Federal Register: December 30, 1985 (50 FR 53230).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated January 30, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Van Zoeren Library, Hope College, Holland, Michigan 49423.

Consumers Power Company, Docket No. 50-255, Palisades Plant, Van Buren County, Michigan

Date of application for amendment: April 30, 1985.

Brief description of amendment: The amendment clarified the action required by the Technical Specification for primary coolant system leakage when the leakage exceeds the specified limits, and deleted a specification on leakage that was only applicable to cycle 2 operation which ended several years ago.

Date of issuance: January 30, 1986.

Effective date: January 30, 1986.

Amendment No.: 95.

Provisional Operating License No. DPR-20. The amendment revised the Technical Specifications.

Date of initial notice in Federal Register: December 30, 1985 (50 FR 53230).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated January 30, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Van Zoeren Library, Hope College, Holland, Michigan 49423.

Consumers Power Company, Docket No. 50-255, Palisades Plant, Van Buren County, Michigan

Date of application for amendment: September 17, 1984 with supplements dated May 31, June 21, and October 28, 1985.

Brief description of amendment: The amendment revised the Technical Specifications for the Auxiliary Feedwater System to reflect modifications made to the pump. These changes are consistent with the NRC guidance in Generic Letter 83-37 and Item II.E.1.1 of NUREG-0737, Long Term Auxiliary Feedwater Evaluation. All change requests, as modified by supplemental submittals were approved except for the extension of allowable outage time for an auxiliary feedwater pump from 72 hours to 7 days. That request will be the subjet of separate, future licensing action.

Date of issuance: January 30, 1986.

Effective date: January 30, 1986.

Amendment No.: 96.

Provisional Operating License No. DPR-20. The amendment revised the Technical Specifications.

Date of initial notice in Federal Register: December 30, 1985 (50 FR 53231).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated January 30, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Van Zoeren Library, Hope College, Holland, Michigan 49423.

Duke Power Company, et. al., Docket No. 50-413, Catawba Nuclear Station, Unit 1, York County, South Carolina

Date of amendment request: April 29, 1985.

Description of amendment request: The amendment changes the Technical Specifications to revise surveillance requirement 4.3.4.2 from a turbine control valve testing frequency of once in seven days to at least once in 31 days.

Date of issuance: February 12, 1986.

Effective date: February 12, 1986.

Amendment No.: 3.

Facility Operating License No. NPF-35. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: November 20, 1985 (50 FR 47880).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 12, 1986.

No significant hazards consideration comments received: No.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 4, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Appling County Public Library, 301 City Hall Drive, Baxley, Georgia 31513.

GPU Nuclear Corporation, Docket No. 50-219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of application for amendment: November 7, 1985.

Brief description of amendment: This amendment authorizes a change to Section 3.7, Auxiliary Electric Power, of the Appendix A Technical Specifications (TS) to: (1) Decrease the minimum amount of diesel fuel in the standby diesel generator fuel tank required in TS 3.7.C from 14,500 gallons to 14,000 gallons and (2) revise the Bases for this TS.

Date of issuance: February 4, 1986.

Effective date: February 4, 1986.

Amendment No.: 98.

Provisional Operating License No. DPR-16. Amendment revised the Technical Specifications.

Date of initial notice in the Federal Register; December 18, 1985 (50 FR 51624).

The Commission's related evaluation of this amendment is contained in a Safety Evaluation dated February 4, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room Location: Ocean County Library, 101 Washington Street, Toms River, New Jersey 08753.

GPU Nuclear Corporation, et al., Docket No. 50-289, Three Mile Island Nuclear Station, Unit No. 1, Dauphin County, Pennsylvania

Date of application for amendment: December 9, 1985.

Brief description of amendment: This amendment modifies Section 4.4.1.2.5 of the TMI-1 TSs to state that local leak detection tests shall be performed at a frequency as required by 10 CFR 50, Appendix J. The amendment also states that if an exemption from the test frequency as specified by 10 CFR 50, Appendix J, is granted by the NRC, the frequency as specified by the exemption shall apply.

Date of issuance: Febraury 5, 1986.

Effective date: February 5, 1986.

Amendment No.: 113.

Facility Operating License No. DPR-50. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: December 30, 1985 (50 FR 53232) The Commission's related evaluation of the amendment is contained in a Safety Evaluation Dated February 5, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126.

Northeast Nuclear Energy Company, et al., Docket No. 50-336, Millstone Nuclear Power Station Unit No. 2, Town of Waterford, Connecticut

Date of application for amendment: May 28, 1985 as supplemented October 1, 1985.

Brief description of amendment: This amendment changed the Technical Specifications to:

—Add fire detectors which have recently been installed and change certain action statements and surveillance requirements for fire detectors;

—Change the wording of the surveillance requirements for the diesel driven fire pump to reflect the as-built design;

—Add sprinkler systems which have recently been installed;

—Add fire hose stations which have recently been installed and change the operability requirements for fire hose stations in Containment; and

—Revise the technical specifications pertaining to penetrations of fire barriers.

Date of issuance: February 4, 1986.

Effective date: February 4, 1986.

Amendment No.: 110

Facility Operating License No. DPR-65. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: July 3, 1985 (50 FR 27508 at 27507) and supplemented December 30, 1985 (50 FR 52336 at 53233) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 4, 1986.

No significant hazards consideration comments received: No.

Attorney for licensee: Gerald Garfield, Esq., Day, Berry and Howard, One Constitution Plaza, Hartford, Connecticut 06103.

Local Public Document Room Location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut.

Omaha Public Power District, Docket No. 50-285, Fort Calhoun Station, Unit No. 1, Washington County, Nebraska

Date of application for amendment: March 30, 1977, as supplemented by letters dated May 15, 1980, September 3, 1982, November 5, 1982, January 28, 1983, and November 27, 1985.

Brief description of amendment: The amendment revised the surveillance technical specifications to ensure that

the reactor building leak rate testing (Types A, B, and C) is performed in accordance with and as specified by 10 CFR Part 50, Appendix J, Primary Coolant Leakage Testing for Water-Cooled Power Reactors. The November 27, 1985 letter from the applicant withdrew a portion of its request related to an increase in leakage rate and revised the other proposed specifications to reflect the currently approved leakage rate. This change does not affect the substance of that portion of the proposed amendment granted by the amendment.

Date of issuance: February 3, 1986.

Effective date: February 3, 1986.

Amendment No.: 95.

Facility Operating License No. DPR–40. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** November 22, 1983 (48 FR 52804 at 52818). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 3, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: W. Dale Clark Library, 215 South 15th street, Omaha, Nebraska 68102.

Pennsylvania Power and Light Company Dockets Nos. 50–387 and 50–388 Susquehanna Steam Electric Station, Units 1 and 2, Luzerne County, Pennsylvania

Date of application for amendments: November 26, 1985, supplemented January 15, 1986.

Brief Description of amendments: These amendments revise the operability requirements for three separate effluent radiological monitoring systems: 1) Refueling Floor Wall Exhaust Duct Radiation Monitoring System, 2) Refueling Floor High Exhaust Duct Radiation Monitoring System, and 3) Railroad Access Exhaust Duct Radiation Monitoring System. Based on the licensee's proposal and the staff's review, it was determined that the monitors were not used as a basis to support any safety analysis in operational condition 1, 2, and 3. Therefore, the requirement for operability of the above-mentioned radiation monitoring systems during conditions 1, 2, and 3 has been deleted.

Date of issuance: February 14, 1986.

Effective date: Upon issuance.

Amendment Nos.: 54 and 22.

Facility Operating License Nos. NPF–14 and NPF–22: Amendments revise the Technical Specifications.

Date of initial notice in **Federal Register:** January 15, 1986 (51 FR 1879). The Commission's related evaluation of the amendments is contained in a Safety Evaluation Dated February 15, 1986.

No comments on the proposed determination were received: No.

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701.

Philadelphia Electric Company, Docket No. 50–352, Limerick Generating Station, Unit 1, Montgomery County, Pennsylvania

Date of Amendment Request: December 18, 1985.

Brief Description of Amendment: The amendment to Operating License NPF–39 revises the Limerick Generating Station Unit 1 Technical Specification to provide a one-time-only extension of 14 weeks on the surveillance testing interval for certain excess flow check valves in instrumentation lines. The purpose of the amendment is to allow a combination of the excess flow checkvalve testing, which must be performed with the reactor in a shutdown condition, with other surveillance testing and maintenance activities to take place in an outage beginning on or before May 26, 1986. The primary basis for the safety of the requested change is that inventory loss due to a rupture of instrumentation lines would be limited to small amounts, the lines can be manually isolated if required and that the probability of detecting a leaking excess flow checkvalve will not be significantly reduced by the one-time extension of the surveillance test interval of less than 20 percent.

Date of Issuance: February 6, 1986.

Effective Date: February 6, 1986.

Amendment No.: 1.

Facility Operating License No. NPF–39: Amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** December 26, 1985 (50 FR 52874).

Comments Received: No timely comments were received. The Commission's related evaluation of the amendment is contained in Safety Evaluation dated February 6, 1986.

No Significant Hazards considerations comments received: No public comments were received within the time provided by the **Federal Register** notice of consideration of this amendment request.

Local Public Document Room Location: Pottstown Public Library, 500 High Street, Pottstown, Pennsylvania 19464.

Portland General Electric Company, Docket No. 50–344, Trojan Nuclear Plant, Columbia County, Oregon

Date of application for amendment: April 19, 1985.

Brief description of amendment: The amendment revises the Technical Specifications definition of Operational Mode (Section 1.4) and Operable-Operability (Section 1.6) to reduce ambiguity in the definition of the words "Mode" and "Operable".

The April 19, 1985 application also forwarded a request for an amendment to the structural integrity of ASME Class 1, 2, and 3 components section of the Technical Specifications (Section 3.4.10). By letter dated November 8, 1985, the licensee requested a withdrawal of this request. The staff concludes that, since the current Technical Specifications are more conservative than those proposed, the withdrawal is acceptable. However, the staff has requested the licensee to review Section 3.4.10 of their Technical Specifications and to propose revised Technical Specifications.

Finally, the April 19, 1985 application forwarded a request for an amendment to the surveillance requirements of the Control Room Emergency Ventilation System. The review of this request is being handled separately and will be the subject of a future notice.

Date of issuance: February 10, 1986.

Effective date: February 10, 1986.

Amendment No.: 109.

Facilities Operating License No. NPF–1: Amendment revised the Technical Specifications.

No significant hazards consideration comments received: No.

Local Public Document Room location: Rochester Public Library, 115 South Avenue, Rochester, New York 14610.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND FINAL DETERMINATION OF NO SIGNIFICANT HAZARDS CONSIDERATION AND OPPORTUNITY FOR HEARING (EXIGENT OR EMERGENCY CIRCUMSTANCES)

During the period since publication of the last bi-weekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual 30-day Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing. For exigent circumstances, a press release seeking public comment as to the proposed no significant hazards consideration determination was used, and the State was consulted by telephone. In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant, a shorter public comment period (less than 30 days) has been offered and the State consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the application for amendment, (2) the amendment to Facility Operating License, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Licensing.

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendments. By

VOL 51
ISS 38
FE 26
1986
UMI

March 28, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

Since the Commission has made a final determination that the amendment involves no significant hazards consideration, if a hearing is requested, it will not stay the effectiveness of the amendment. Any hearing held would take place while the amendment is in effect.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to *(Branch Chief)*: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

Consumers Power Company, Docket No. 50–255, Palisades Plant, Van Buren County, Michigan

Date of application for amendment: January 10, 1986, as supplemented by letter dated January 14, 1986.

Brief description of amendment: The amendment changed the technical specifications dealing with the inservice inspection program for mechanical shock suppressors (snubbers) such that the maximum drag force acceptance criterion (break away friction) is equal to 2% of the rated load of the mechanical snubber, instead of 1%.

Date of issuance: January 30, 1986.

Effective date: January 30, 1986.

Amendment No.: 93.

Provisional Operating License No. DPR–20. The amendment revised the Technical Specifications. Public comments requested as to proposed no significant hazards consideration: No. The Commission's related evaluation of the amendment, finding of emergency circumstances, and final determination of no significant hazards considerations are contained in a Safety Evaluation dated January 30, 1986.

Local Public Document Room location: Van Zoeren Library, Hope College, Holland, Michigan 49423.

Niagara Mohawk Power Corporation, Docket No. 50–220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of application for amendment: January 23, 1986, as supplemented and clarified by letter dated January 24, 1986.

Brief description of amendment: The amendment revises the license to permit operation of the facility on a temporary basis during the remainder of Cycle 8 or until March 31, 1986, whichever occurs first, with certain hot fluid line penetrations not fully in conformance with original FSAR design criteria.

Date of issuance: January 28, 1986.

Effective date: January 28, 1986.

Amendment No.: 78.

Facility Operation License No. DPR–63. Amendment revised the license.

Public comments requested as to proposed no significant hazards consideration: No.

The Commission's related evaluation of the amendment and final no significant hazards considerations determination are contained in a Safety Evaluation dated January 28, 1986.

Local Public Document Room location: State University College at Oswego, Penfield Library—Documents, Oswego, New York 13126.

Northeast Nuclear Energy Company, Docket No. 50–423, Millstone Nuclear Power Station, Unit No. 3, New London County, Connecticut

Date of Application for Admendment: January 15, 1986.

Brief Description of Amendment: Revises Technical Specification Table 3.3–9, Remote Shutdown Instrumentation, by deleting the transfer switches associated with Valves FWA*AOV–61A, 61B, 62A, and 62B (items 7, 8, 9, and 10 in the table). The change would resolve an administrative error made in the compilation of Table 3.3–9 by making the table reflective of the actual plant configuration.

Date of issuance: January 22, 1986.

Effective date: January 22, 1986.

Amendment No. 1.

Facility Operating License No: NPR–44: Amendment revised the Technical Specifications.

Public comments requested as to proposed no significant hazars consideration: No.

The Commission's related evaluation of the amendment and final determination of no significant hazards consideration are considered in a Safety Evluation dated January 22, 1986.

Attorney for Licensee: Gerald Garfield, Esq., Day, Berry and Howard, City Place, Hartford, Connecticut 06103–3499.

Local Public Document Room Location: Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut 06385.

Virginia Electric and Power Company, et al., Docket No. 50–339, North Anna Power Station, Unit No. 2, Louisa County, Virginia

Date of application for amendment: January 20, 1986.

Brief description of amendment: The amendment allowed suspension of further moderator temperature coefficient measurements once an equilibrium boron concentration of 20 ppm or less is reached for the current fuel cycle No. 4.

Date of issuance: February 12, 1986.

Effective date: January 21, 1986.

Amendment No. 61.

Facility Operating License No. NPR–7: Amendment revised the Technical Specifications.

Public comments requested as to proposed no significant hazards consideration: No.

The Commission's related evaluation of the amendment, finding of emergency circumstances, and final determination of no significant hazards considerations are contained in a Safety Evaluation dated February 12, 1986.

Local Public Document Room locations: Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia 23093, and the Alderman Library, Manuscript Department, University of Virginia, Charlottesville, Virginia 22901.

Dated at Bethesda, Maryland, this 20th day of February, 1986.

For The Nuclear Regulatory Commission.

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

Federal Civilian Employee and Contractor Travel Expenses Act of 1985; Study

AGENCY: Office of Federal Procurement Policy, OMB.

ACTION: The Office of Federal Procurement Policy (OFPP) is requesting comments and suggestions about the study on contractor relocation and transportation costs required by section 202, Pub. L. 99–234. Any comments on the study, including issues or options it should address, should be submitted to the Office of Federal Procurement Policy, 726 Jackson Place, NW., Washington, DC 20503.

Public Meeting

A public meeting will be held in Room 2008, New Executive Office Building, 726 Jackson Place, NW., Washington, DC, on March 17, 1986, at 10 a.m. Persons or organizations wishing to present views, ideas, and suggestions about the study are encouraged to attend the meeting. Written statements will be accepted by OFPP, and persons or organizations wishing to make oral statements will be given 5 minutes each to present their views. Persons and organizations with similar views are encouraged to select a common spokesman for the presentation of their views. Persons wishing to attend and/or present statements at the public meeting should contact Teresa Hrabe, telephone number (202) 395–3501, prior to 3 p.m., March 14, 1986, in order to be cleared for admittance to the New Executive Office Building. Entrance to the building is on 17th Street, NW., between Pennsylvania Avenue and H Street.

Background

Section 202, Federal Civilian Employee and Contractor Travel Expenses Act of 1985, Pub. L. 99–234, requires that:

> The Adminstrator for Federal Procurement Policy, in consultation with the Secretary of Defense and the Administrator of General Services, shall undertake a study to determine whether limitations should be placed on payments by executive agencies to Government contractors for costs incurred by contractor employees for transportation and relocation. The Administrator for Federal Procurement Policy shall submit 180 days after the enactment of this Act a report thereon to the appropriate committees of the Congress.

DATE: Comments and suggestions in response to this **Federal Register** notice must be received in OFPP by close of business, April 1, 1986. Two copies of any statements to be presented at the public meeting should be received by March 14, 1986.

ADDRESS: Comments and statements should be submitted to the Office of Management and Budget, Office of Federal Procurement Policy, Room 9013, New Executive Office Building, 726 Jackson Place, NW., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Charles W. Clark, Deputy Associate Administrator for Policy Development, (202) 395–6803.

Dated: February 14, 1986.

David F. Baker,

Acting Administrator.

PEACE CORPS

Agency Information Collection Activities Under OMB Review

AGENCY: Peace Corps.

ACTION: Notice of submission of public use form review request to the Office of Management and Budget.

SUMMARY: Pursuant to the Paperwork Reduction Act of 1981 (44 U.S.C. Chapter 35), the Peace Corps has submitted to the Office of Management and Budget, a request to approve the use of the Withdrawal Information Card through February 1, 1989. The card is completed voluntarily by those nominated for Peace Corps service and who withdraw their applications after that application reaches the Washington Placement Office and prior to invitation to an actual program. The card provides information concerning the reasons for withdrawal as well as suggestions as to how the Volunteer Delivery System could be improved. This information is necessary for Peace Corps to evaluate the effectiveness of the Volunteer Delivery System and to adjust it as necessary. The information provided will not/cannot be used to identify specific individuals who have filled out the card.

VOL 51
ISS 38
FE 26
1986
UMI

Information About the Form

Agency Address: Peace Corps, 806 Connecticut Avenue, NW., Washington, DC 20526
Title: Withdrawal Information Card
Type of Request: Approval of Use
Frequency of Collection: On occasion
General Description of Respondent: Individuals who were nominated to a Peace Corps program, but who withdrew their application prior to receipt of an invitation.
Estimated Number of Responses: 176 annually
Estimated Hours for Respondents to Furnish Information: Fifteen (15) minutes each
Respondents' Obligations to Reply: Voluntary

Comments: Comments on this form request should be directed to Francine Picoult, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

A copy of the form may be obtained from Phillip Seder, Office of Placement, Peace Corps, 806 Connecticut Avenue, NW., Room 908, Washington, DC 20526. Mr. Seder may be called at 202–632–6594.

This is not a request to which 44 U.S.C. 3504(h) applies. This notice is issued in Washington, DC on February 20, 1986.

Linda Gregory,

Associate Director for Mangement.

BILLING CODE 6051-01-M

POSTAL RATE COMMISSION

[Order No. 669; Docket No. N86–1]

Request of the United States Postal Service for an Advisory Opinion on Change in Service, 1986, Collect on Delivery Service and Order Fixing Date for Intervention and Designating Officer of the Commission

Issued February 20, 1986.

Before Commissioners: Janet D. Steiger, Chairman; Henry R. Folsom, Vice-Chairman; John W. Crutcher; Bonnie Guiton; Patti Birge Tyson.

On February 12, 1986, the United States Postal Service (Postal Service or Service) filed a Request for an Advisory Opinion that has been docketed as N86–1. The Request, accompanied by supporting testimony and one library reference, stems from a Postal Service determination that there should be a change in the nature of postal services which will generally affect service on a nationwide or substantially nationwide basis within the meaning of 39 U.S.C. 3661(b).

The Postal Service intends to implement certain changes in the regulations affecting COD service, which it believes are justified given the increasing use of COD service for fraudulent or deceptive purposes.

Under current regulations, COD packages must be paid for either in cash or by check made payable to the Postal Service. The Service then sends the mailer a postal money order for the COD charges. The changes in the regulations would allow payment by either cash or a check made payable to the mailer. The Service believes the new procedures will give the American consumer additional recourse if he/she is a victim of fraud.

The Service states that these changes regarding COD mail will be made through notice and comment rulemaking "not sooner than 90 days after the filing of the Postal Service's request in this proceeding." USPS–T–2 at 3.

Intervention. Persons desiring to participate as a party should file a notice of intervention with the Secretary of the Commission on or before March 5, 1986, in accordance with section 20 of the rules of practice (39 CFR 3001.20). Notices of intervention shall affirmatively state whether the person filing requests a hearing, or in lieu thereof, a conference; whether such person intends to participate actively in a hearing; and shall set forth the nature of such person's interest in the issues, to the extent such interest is known. Persons seeking limited participation but not party status may, on or before March 5, 1986, file a written notice of intervention as a limited participator, pursuant to § 20a of the rules of practice (39 CFR 3001.20b). In addition, persons wishing to express their views informally, but not to become a party or limited participator, may file comments pursuant to § 20b of the rules of practice (39 CFR 3001.20b).

Possible collateral matter. Preliminary review indicates that if the proposed change is ultimately implemented, the existing language of Domestic Mail Classification Schedule § 6.021 might be read as making the Postal Service an ensurer of payment on checks tendered by addressees. This is not the intent of the filing. Indeed, Postal Service witness Dillman states that under the change, the Postal Service will no longer ensure payment when payment is made by check. *See* USPS–T–2, at 7. Participants should therefore be prepared to address the need for changes to the DMCS.

Officer of the Commission. Pursuant to 39 U.S.C. 3661(c) the officer of the Commission charged with representing the interests of the general public in this docket is Stephen A. Gold, Director, Office of the Consumer Advocate. During this proceeding, he will direct the activities of the Commission personnel assigned to assist him and neither he nor such personnel will participate in nor advise as to any Commission decision (39 CFR 3001.8). The Officer of the Commission shall supply for the record, at the appropriate time, the names of all Commission personnel assigned to assist him in this case.

The Officer of the Commission shall be separately served with three copies of all filings in this case, in addition to and simultaneously with service on the Commission of the 25 copies required by section 10(c) of the rules of practice [39 CFR 3001.10(c)].

The Commission orders:

(A) Notices of Intervention as full or limited participators in this docket shall be sent to Charles L. Clapp, Secretary, Postal Rate Commission, 1333 H Street, NW., suite 300, Washington, DC 20268–0001 on or before March 6, 1986.

(B) Stephen A. Gold is designated officer of the Commission to represent the interests of the general public in this proceeding. Service of documents on the Commission shall not constitute service on the Officer of the Commission who shall separately be served three copies of all documents.

(C) The Secretary shall cause this Notice and Order to be published in the Federal Register.

By the Commission.

Cyril J. Pittack,

Acting Secretary.

BILLING CODE 7715-01-M

SECURITIES AND EXCHANGE COMMISSION

[File No. 1-7902]

Issuer Delisting; Application To Withdraw From Listing and Registration; MacMillan Bloedel Ltd.; Common Stock, No Par Value

February 20, 1986.

The above name issuer has filed an application with the Securities and Exchange Commission pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the New York Stock Exchange, Inc.

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

The Board of Directors of the issuer decided to withdraw its shares from listing on the New York Stock Exchange because in the Board's judgment continuation of the listing is not justified in light of the costs and other potential burdens involved.

Any interested person may, on or before March 13, 1986, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34-22914; File No. SR-Amex-86–3]

Self-Regulatory Organizations; Proposed Rule Change by American Stock Exchange Relating to Amendment of Article II, Section 1(e) of the Amex Constitution Regarding Eligibility of Former Public Governors To Serve on the Board

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 7, 1986, the American Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange is proposing to amend Article II, section 1(e) of the Exchange Constitution to allow public governors to be eligible for reelection to the Board after an interval of one year from the end of their term.[1] The text of the proposed rule change is available at the Exchange, care of the office of the Secretary, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

Article II, Section 1(e) of the Exchange Constitution provides that both industry and public governors must retire from the Board after two consecutive terms and thereafter remain ineligible for reelection for a minimum of two years. Prior to 1972, only industry governors, i.e., members and representatives of member firms, were required to leave the Board for a two-year period before again being eligible for reelection. The reason for this two-year hiatus was to insure that one or more members would not serve indefinitely on the Board and thereby dominate the governing body of the Exchange. Public governors, however, were not limited as to the number of terms they were permitted to serve and, indeed, were appointed by the Exchange President who was also chief executive and a member of the Board. With the reorganization of the Board in 1972, all governors were elected by the membership and the two-year reelection provision was applied to both industry and public governors, without taking into account that the issue of Board domination was unlikely to apply to public governors.

The Exchange is proposing to amend Article II, section 1(e) of the Constitution to allow public governors to be eligible for reelection after a one-year interval. The two-year reelection restriction would be retained as it pertains to industry governors. In considering issues critical to its future growth, it is vital that the Exchange be in a position to use the talents of people who have had significant experience with the Board, and who have built solid working relationships with other governors and Exchange members. Many public governors have immersed themselves in committee work, and their backgrounds in government, industry, finance, and management have conferred enormous benefits on the Exchange. The Exchange needs people like that on its Board, and would like its Nominating Committee to be free to select from this pool of experienced and talented former public governors without having to await the passage of two years from the end of their prior Board service.

In addition, the Exchange is proposing to delete transitional language which permitted the orderly implementation of amendments which reorganized the Board in 1979, increasing its size from 21 to 25 governors.

(2) Basis

The proposed amendment is consistent with Section 6(b) in general and furthers the objectives of Section 6(b)(3) in particular in that it is intended to facilitate the nomination and election of qualified individuals to serve as public governors of the Exchange.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will create no burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing of Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

---

[1] On February 18, 1986, the American Stock Exchange filed Amendment No. 1 to the proposed rule change indicating that the rule change was approved by the Exchange membership at a special membership meeting held on February 14, 1986.

VOL 51 ISS 38 FE 26 1986 UMI

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted March 19, 1986.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: February 18, 1986.

John Wheeler,

Secretary.

[FR Doc. 86-4101 Filed 2-25-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-22910; SR-CBOE-48]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Order Approving Proposed Rule Change

The Chicago Board Options Exchange, Incorporated ("CBOE") submitted on December 2, 1985, copies of a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 12b-4 thereunder to amend Exchange Rule 19.2 to extend the time limit for filing an application for review of an action of the Exchange before the Exchange's Appeals Committee.

Notice of the proposed rule change together with its terms of substance was given by the issuance of a Commission release (Securities Exchange Act Release No. 22765, January 3, 1986) and by publication in the Federal Register (51 FR 1460, January 13, 1986). No comments were received with respect to the proposed rule filing.

The rule change will give any person aggrieved by an action of the Exchange, who desires to have an opportunity to be heard with respect to such action, thirty days from the date of such action to file a written application for a hearing with the Secretary of the Exchange (pursuant to Rule 19.2). This effectively doubles the previous time limit of fifteen days.

The rule change requires strict observance of this extended time limit. Applications not filed within the thirty day period will not be considered by the Appeals Committee unless an applicant files an application within such extension of time as allowed by the Chairman of the Appeals Committee. In order to obtain an extension of time within which to file an appeal, an applicant must file an application for an extension with the Secretary of the Exchange within the thirty day period running from the date of the Exchange action which has aggrieved the applicant. Applications for extensions will be ruled upon by the Chairman of the Appeals Committee, and his ruling will be given in writing. Rulings on applications for extensions are not subject to appeal under Chapter XIX of the Rules.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of section 6, and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: February 14, 1986.

John Wheeler,

Secretary.

[FR Doc. 86-4102 Filed 2-25-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-22927; File No. SR-NSCC-86-03]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by National Securities Clearing Corp. Modifying Its Fee Structure for Automated Communication Access

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 7, 1986, the National Securities Clearing Corporation ("NSCC") filed with the Commission the proposed rule change described below. The Commission is publishing this notice to solicit comments on the proposed rule change.

The proposed rule change modifies NSCC's fee structure to provide that participants who communicate with NSCC in an automated fashion via CPU-to-CPU will now be responsible for their communications costs. To encourage the use of such transmission vehicle during the developmental stage, NSCC had previously absorbed these costs. Included within the cost of each service is the cost of producing one hard copy output of each relevant report. Participants opting to receive output in machine readable form will be credited for this copy, while participants who request to be provided with more than one hard copy output will be charged accordingly.

The proposal also would clarify that NSCC's discount policy will not apply to transaction fees for the Fund/Serv System [1] until the initial start-up and development costs are amortized.

In its filing, NSCC states that the proposed rule change is consistent with section 17A(b)(3)(D) of the Act because it provides for the equitable allocation of reasonable dues, fees and other charges.

The foregoing rule has become effective pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such change if it appears to the Commisson that such action is necessary or appropriate in the public interest, for the protection of investors or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the proposal. Persons making written submissions should file six copies with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the filing, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section,

---

[1] NSCC's Fund/Serv System was the subject of a previous filing, SR-NSCC-85-08.

450 Fifth Street, NW., Washington, DC 20549. Copies of the filing will also be available for inspection and copying at the principal office of NSCC. All submissions should refer to the file number in the caption above and should be submitted by March 19, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: February 19, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-22913; SR-NYSE-86-5]

Self-Regulatory Organizations; New York Stock Exchange, Inc., Order Approving Proposed Rule Change on an Accelerated Basis

On January 22, 1986, the New York Stock Exchange, Inc., ("NYSE" or the "Exchange") filed with the Commission a proposed rule change (File No. SR-NYSE-86-5) that revises and expands the interpretations under NYSE Rule 412. The Commission is publishing this Order to request public comment on the proposal and, for reasons described below, is approving the proposal on an accelerated basis.

Background

The Commission on November 26, 1985, approved new NYSE Rule 412 and related explanatory and exemptive interpretations.[1] That Rule and related interpretations generally provide that when a customer gives written notice to his carrying firm to transfer the customer's account to a designated receiving firm, both firms must expedite the transfer. The Rule and interpretations describe in detail how customer account transfers are effected.

NYSE Rule 412 and its interpretations for the first time inject a comprehensive regulatory discipline in the customer account transfer process. To ensure that NYSE members have an efficient means to process customer account transfers, National Securities Clearing Corporation ("NSCC") has designed its Automated Customer Account Transfer System ("ACATS"). ACATS provides NYSE/NSCC member firms a centralized, uniform, automated mechanism to enable efficient customer account transfers.[2] ACATS communicates customer account transfer information among carrying and receiving firms, helps to monitor firms' compliance with NYSE Rule 412 and facilitates actual transfer of customer assets within required time frames by book-entry movement or other appropriate methods.

The NYSE initially implemented Rule 412 on a voluntary, limited pilot basis. Since November 1985, a NYSE committee of member firm representatives has monitored the pilot phase of ACATS to help the Exchange fine-tune Rule 412 and ACATS. The Exchange also conducted a series of programs across the country to educate member firms about the new account transfer requirements and to gather information from member firms about the ACATS process. The information gathered in these efforts is reflected in this proposed rule change.

At this time, the NYSE plans to make fully effective the Rule and related interpretations on February 24, 1986. On that date, NYSE members will be required to comply with NYSE Rule 412 and to use NSCC's ACATS to effect customer account transfers. Implementation of the program, however, will continue to be phased in over the next several months. The Exchange will limit each carrying broker's daily total number of customer account transfer requests to be processed through ACATS and each receiving broker's total daily number of requests received from any single carrying broker.[3] At reasonable time periods thereafter, the Exchange will increase the maximum number of requests to be processed within ACATS. The NYSE indicated that Rule 412 should be fully implemented 120 days after the February 24, 1986 implementation date, *i.e.*, by June 17, 1986. The Exchange believes that such a stepped approach is necessary to accommodate NYSE members' needs to adjust their internal automated systems to the Rule's requirements. The NYSE notes that while 100 member firms have participated in the limited ACATS pilot program, about 150 additional member firms have not had any real operational experience with Rule 412 requirements or ACATS.

Description of the Proposed Rule Change

The proposal includes several new interpretations to Rule 412 and refines a number of existing interpretations.[4] First, the proposal requires NYSE-member firms to develop written procedures for customer account transfers that ensure their implementation of, and compliance with, Rule 412's requirements.

Second, upon receipt of a customer account transfer instruction from a customer, a carrying broker must "freeze" all activities in that account, *e.g.*, cancel all open orders and not take any new orders.

Third, a receiving broker should reject a carrying broker's delivery of a security against a fail to receive that is designated as a "safeguarding position" when the delivered security does not qualify for safeguarding under the interpretations. (Safeguarding positions are securities registered in customer name, even if they are unendorsed or have attached stock/bond powers).

Fourth, "nontransferable" [5] customer assets must be liquidated, retained by the carrying broker for the customer, or shipped, physically and directly, in the customer's name to the customer, in accordance with the customer's instructions. The carrying broker must contact the customer in writing prior to, or at the time of, validation of the transfer instruction to request such further specific instructions regarding the disposition of nontransferable assets. If the customer authorizes liquidation or shipment, the carrying broker will be required either to distribute the resulting money balance to the customer or to initiate the shipment, as appropriate, within five business days after receipt of the customer's instructions concerning asset disposition.

Fifth, a customer must authorize the custodian/trustee for a retirement plan account (a) to deduct outstanding fees due the custodian/trustee from the

---

[1] *See* File No. SR-NYSE-85-17, approved in Securities Exchange Act Release No. 22662 (November 26, 1985), 50 FR 49949 (December 2, 1985).

[2] For a complete description of ACATS, see Securities Exchange Act Release No. 22481 (September 30, 1985), 50 FR 41274 (October 8, 1985) in which the Commission approved File No. SR-NSCC-85-7.

[3] According to the Exchange, the total daily customer transfer activity initially will be limited to fifteen requests a day, with no more than three requests to any one receiving firm.

[4] Several technical, nonsubstantive, and clarifying revisions of the interpretations also are proposed, in particular regarding the type of information that must be included for customer assets in an account to be transferred and the captioning of fail contracts established under NYSE Rule 412.

[5] Interpretation (b)(1)/05 defines a "nontransferable asset" to be "incapable of [transfer] from the carrying organization to the receiving organization because it is [:] 1. an asset that is a proprietary product of the [carrying broker] or 2. an asset that is a product of a third party (e.g. a mutual fund or money market fund) with which the receiving organization does not maintain a relationship or arrangement necessary to receive and carry the asset for the customer account."

VOL 51

FE 26
1986
UMI

credit balance in the account; or (b) to liquidate assets in the account to the extent necessary to satisfy those fees if the account does not contain a credit balance or if the credit balance is insufficient to satisfy those outstanding fees. If liquidation is not practicable, the fees would need to be transferred to, and accepted by, the receiving broker as a debit item.

Sixth, a receiving broker must deem receipt of a duly-executed mutual fund re-registration form as adequate delivery for purposes of transferring mutual fund shares.

Seventh, NYSE-member firms could agree to close-out fail contracts established under Rule 412 by delivering securities that are substantially comparable to those owed.

Last, fail-to-deliver contracts will not need to be established for nontransferable assets and assets in transfer to the customer, *i.e.*, in possession of a transfer agent at the time of the carrying organization's receipt of a customer account transfer instruction carrying organization for shipment, physically and directly, to the customer.

The NYSE's Rationale

In its filing, the NYSE represented that the proposed rule change is consistent with the requirements of the Act in that it is designed to protect investors and the public interest by requiring expeditious customer account transfers, and is intended to promote cooperation and coordination with persons engaged in clearing, settling, and processing information with respect to transactions in securities, in accordance with section 6(b)(5) of the Act. In addition, the Exchange states that the proposed rule change is consistent with Congress's finding in section 17A(a)(1)(A) of the Act, that "[t]he prompt and accurate clearance and settlement of securities transactions, including the transfer of record ownership and the safeguarding of securities and funds related thereto, are necessary for the protection of investors and persons facilitating transactions by and acting on behalf of investors."

The NYSE's Request for Accelerated Effectiveness

The Exchange believes good cause exists for accelerating effectiveness of the proposed rule change under section 19(b)(2) of the Act. In support of its request, the Exchange states that expedited action is appropriate to meet the industry target date of February 24, 1986. To ensure that, as of that date, NYSE member firms have an adequate procedural framework for expeditious transfers, the Exchange needs some lead time to publish the revisions, and member organizations require sufficient lead time to implement effective programs.

Discussion

For the reasons below, the Commission agrees with the NYSE that its proposed interpretations are consistent with the Act. Therefore, the Commission is approving the proposal.

The proposed interpretations represent a useful fine-tuning, based on experience during the pilot period. These fine-tunings should help ensure successful implementation of a permanent, automated, customer account transfer process. These modifications are the result of close NYSE/user community communications during the program's pilot phase and reflect a careful and responsive approach by the NYSE.[6]

The proposal enhances NYSE Rule 412 operations in several respects. First, the interpretations refine how the Rule will apply to certain investment products. The interpretations describe in detail how carrying firms are to handle "nontransferable assets." [7] They also address how to identify customer-owned municipal securities that have not been assigned CUSIP numbers.[8] The interpretations additionally clarify how member firms must treat customer assets that: (1) Have been placed "in transfer"; [9] (2) are "safekeeping positions"; or (3) are in retirement plan securities accounts for which custodian/trustee fees remain outstanding. In addition, regarding mutual fund shares, the interpretations provide that member firms must accept as good delivery under Rule 412 a duly-executed mutual fund re-registration form regarding mutual fund shares.

Second, the interpretations provide additional guidelines that should facilitate broker compliance and customer protection. For example, the interpretations require a carrying broker to freeze a customer's account by cancelling open orders and declining acceptance of new orders upon receipt of the customer's account transfer request. Moreover, to ensure the integrity of customer "safekeeping positions" maintained as carrying brokers, a new interpretation provides that a receiving broker should reject securities deliveries against a safekeeping position when delivered securities cannot qualify as a "safekeeping position."

Third, the new interpretations offer NYSE member firms needed flexibility. For example, receiving brokers generally have a limited ability to reject account transfers [10] and carrying brokers cannot reject fail contracts in connection with customer account assets that have not been delivered to the receiving broker.[11] New interpretation (c)/02, however, enables them to agree to close-out Rule 412 fail contracts through delivery of securities that are "substantially identical to those owed."

Fourth, the proposal should enhance NYSE's and its member firms' ability to oversee member compliance with Rule 412. New Interpretation (a)/02 requires member firms to develop written procedures for Rule 412 implementation and compliance. This requirement not only should help prepare firms for the February 24, 1986 effective date, it also should help ensure continuing compliance with the Rule. Those written procedures should provide each firm with a blueprint for rule compliance and a means to ensure that firm personnel understand rule requirements and processing mechanics. For NYSE and Commission inspection staffs, those written procedures should facilitate oversight review.

---

[6] The Commission is assured that the NYSE will continue its careful and responsive approach while resolving the few remaining processing questions and any new questions uncovered during the phase-in period. For example, the NYSE, NSCC and Options Clearing Corporation must resolve how to transfer options positions in customer accounts. The Exchange has informed the Commission that until that time, customer accounts that contain options positions will be temporarily exempt from Rule 412's requirements. The Commission hopes this situation is resolved quickly.

[7] Under the Rule and existing interpretations, "bankrupt issues" are treated as "delayed delivery asset." Valued fails to deliver and receive need not be established in the customer's account, but "zero value" fail instructions must be generated. A new interpretation further requires those fail instrucitons to be reflected on member books and records, unless the bankrupt issue is "non-deliverable," and it defines "non-deliverable" in this context to mean that the carrying broker does not have enough shares in its in-house and depository accounts to effect delivery and no transfer agent is servicing the issue. *See* note 4 *supra* for a definition of a "non-deliverable asset."

[8] To determine the minimum elements of municipal securities description, NYSE representatives consulted with representatives of the Municipal Securities Rulemaking Board.

[9] An "in transfer" asset is in the possession of a transfer agent at the time the carrying broker receives a customer transfer request.

[10] Under amended interpretation (b)(2)/09, a receiving broker can reject an account transfer only if the account does not comply with the firm's credit policies or meet minimum assets requirements.

[11] *See* Interpretation (b)(3)/01.

Commission Approval on an Accelerated Basis

The Commission finds that good cause exists to approve the proposal prior to the thirtieth day after publication of this release for comment in the Federal Register and therefore is granting NYSE's request to approve the proposal on an accelerated basis. We agree with the NYSE that accelerated approval of the proposal is appropriate. Accelerated effectiveness should ensure that when NYSE Rule 412 becomes fully effective on the industry target date of February 24, 1986, NYSE member firms will be able to look to effective Rule 412 interpretations for guidance. Further, by granting accelerated effectiveness, the Exchange should have sufficient time to notify its members about the most recent changes, and members, in turn, should be able to adjust their internal procedures accordingly before the Rule's full inplementation date. Finally, the proposal is the product of NYSE's active effort to solicit member comments and recommendations. Accordingly, the Commission finds that it is in the public interest to accelerate the proposal's effectiveness and that no purpose would be served were the Commission to delay the effective date of the proposal beyond the industry target date, *i.e.*, until the thirtieth day after publication of this release in the Federal Register.

Request for Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will be available for inspection and copying at the NYSE's principal office. All submissions should refer to the file number in the caption above and should be submitted by March 19, 1986.

Conclusion

For the reasons discussed above, the Commission finds that the proposal is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and in particular, section 6 and 17A.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: February 14, 1986.

John Wheeler,

Secretary.

[FR Doc. 86-4104 Filed 2-25-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 22906; SR-NYSE-85-46]

Self-Regulatory Organizations; New York Stock Exchange, Inc., Order Approving Proposed Rule Change

February 14, 1986.

The New York Stock Exchange, Inc. ("NYSE") submitted on November 29, 1985, copies of a proposed rules change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4, to modify rates of reimbursement specified in Supplementary Material to Rules 451 and 465 for the forwarding of proxy and annual report mailings to beneficial shareowners. Specifically the rules changes propose to: (1) Increase, effective July 1, 1986, the approved reasonable rate of the reimbursement for initial mailings of proxy material by $.10 per set (from $.50 to $.60 for those meetings which do not include a proposal which requires beneficial owner instructions and from $.60 to $.70 for those meetings which include a proposal requiring beneficial owner instructions); (2) increase, effective January 1, 1986, the approved reasonable rate of reimbursement for follow-up mailings of proxy material by $.10 per set (from $.50 to $.60 for a selective mailing); (3) increase, effective January 1, 1986, the approved reasonable rate of reimbursement for separately mailed copies of annual reports by $.10 per report (from $.10 to $.20); and (4) establish, effective January 1, 1986, as a reasonable rate of reimbursement, a minimum charge of $3.00 per issuer for mailing annual reports.[1]

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission release (Securities Exchange Act Release No. 227401, December 23, 1985) and by publication in the Federal Register (50 FR 53413, December 31, 1985). No written comments were received by the Commission on the proposed rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of section 6, and the rules and the regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rules change be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-22912; File No. SR-NYSE-86-7]

Self-Regulatory Organizations; Proposed Rule Change by New York Stock Exchange, Inc., Relating to Options Joint Accounts

February 14, 1986.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 5, 1986, the New York Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

---

[1] The Commission recently approved another rule change by the NYSE which amended the Supplementary Material to NYSE's Rule 451 (Proxies) and Rule 465 (Company Reports to Stockholders) concerning approved charges by member organizations to issuers in connection with the requirements of Rules 14b-1(c) and 17a-3(a)(9)(ii) under the Act. These changes authorized: (1) the second, and final, surcharge that may be charged issuers in connection with proxy solicitations, which is intended to complete recoupment of start-up costs incurred in complying with the shareholder notification requirements of Rules 14b-1(c) and 17a-3(a)(9)(ii); and (2) a change intended to ensure that NYSE member organizations received a fair and reasonable rate of reimbursement for costs incurred in providing beneficial ownership information to requesting issuers pursuant to Rule 14b-1(c). Securities Exchange Act Release No. 22909 (February 11, 1986) (File No. SR-NYSE-85-43).

VOL 51 ISS 38 FE 26 1986 UMI

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is proposing to revise its rules governing joint accounts on the options floor, as follows: (Brackets indicate language deleted; italics indicate language added.)

Joint Accounts

Rule 749.

(a) No member or member organization who is approved by the Exchange to initiate transactions on the Floor shall, directly or indirectly, hold any interest or participate in any joint account for buying or selling any option contract or related security unless (1) each participant in such joint account is registered as a broker or a dealer under the Securities Exchange Act of 1934, (2) each participant in such joint account is registered as a Competitive Options Trader pursuant to Rule 758(a) and (3) such joint account applies to the Exchange and is approved for trading. The application shall contain the following information:

(1) name of the joint account;

(2) names of all participants;

(3) the participants's respective interests in the initial capital, profits and losses of the joint account;

(4) name of the member organization carrying and clearing the joint account and the accounts of the participants;

(5) copies of any written agreements or instruments relating to the joint account.

(b) The option trading accounts of all participants in the joint account and the joint account itself must be carried by the same clearing member. The joint account must comply with the provisions of Rule 758 (a)(ii)(A) or (B). The provisions of Rule 758 (a)(ii) regarding revocation of a clearing member's guarantee shall apply to joint accounts.

(c) No joint account may have more than three participants nor may a single participant be associated with more than two joint accounts.

(d) Participants in the joint account must keep current all information regarding the joint account filed with the Exchange. Each joint account must keep its own books and records, separate from the books and records of its participants. Each joint account must provide an account statement to the Exchange's Market Surveillance Division on a monthly basis, in a format acceptable to the Exchange.

(e) No participant in a joint account shall effect a transaction, either for his own account or for the joint account, with another member acting on behalf of the joint account.

(f) Participants in the joint account may not concurrently represent orders for the joint account in the same option series.

(g) Joint accounts are not permitted to enter opening transactions from off the floor for option contracts listed on the Exchange. Positions in the joint account may be closed from off the floor.

(h) Orders for options contracts, futures contracts and securities that are not listed on the Exchange or traded on the New York Futures Exchange Inc. may be entered for the joint account only if the positions created by such orders are a bona fide hedge with positions in option contracts listed on the Exchange that are held in the account. This restriction shall not apply to orders entered for securities underlying Exchange option contracts.

(i) For purposes of determining compliance with Rules 704 (Position Limits) and 705 (Exercise Limits) by the joint account and each participant in the joint account, the Exchange shall compute the positions or exercises attributable to each participant and to the joint account by aggregating all the positions or exercises of the joint account with all the positions or exercises which any participant controls.

(j) Each participant in the joint account and each member organization associated with a participant is jointly and severally responsible for assuring that the account complies with all applicable provisions of the Exchange's Constitution and Rules.

. . . *Supplementary Material:*

.10 Participants in joint accounts should note that the requirements imposed on Competitive Options Traders by the provisions of Rule 758, in particular, paragraphs (b) and (c) and the supplementary material to Rule 758, apply to trading for the joint account. However, the joint account need not meet the assignment and trading volume requirements of Rule 758, Supplementary Material .60 and .65.

.20 Should the Exchange suspend the registration of a Competitive Options Trader pursuant to Rule 758(d), such Competitive Options Trader will not be allowed to enter any orders on behalf of the joint account.

The Exchange will also delete references to Rules 93 and 94 from Rule 750(b).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of the basis for the proposed rule change and discussed any comments it received on the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

The Exchange is modifying its Rules governing joint accounts as applied to the Options Floor. Currently, Rules 93 and 94, through the incorporation provisions of Rule 750(b), govern joint accounts. The proposed rule change replaces Rules 93 and 94 as applicable to options with a new Rule 749 which is tailored solely for joint accounts operating on the Options Floor. The Exchange believes the proposed rule change will benefit members on the Options Floor by providing a clearer statement of their obligations with respect to joint accounts.

The provisions of Rule 749(a) closely parallel the requirements of Rule 93(a) requiring the joint account to provide certain information to the Exchange and receive approval for the joint account prior to commencing trading. Rule 749(a) requires each participant in the joint account to be registered as a broker or dealer under the Securities Exchange Act of 1934 (the "Act") and a Competitive Options Trader ("COT") under Rule 758(a).

Since the formation of joint accounts is only for proprietary trading on the Options Floor, it serves the interest of a fair and orderly market to have all participants in a joint account meet the affirmative and negative obligations and other requirements imposed on COTs. Supplemenary Material .10 and .20 to Rule 749 also remind members that their obligations as COTs extends to trading in and for the joint account.

Paragraph (b) of rule 749 requires that the joint account be carried by the same clearing member as the accounts of all the participants. Further, each joint account must either have a letter of

gurantee from such clearing member, or if the COT is self-clearing, meet all applicable requirements of The Options Clearing Corporation. The provisions of Rule 759 regarding revocation of the letter of guarantee also apply to joint accounts. These requirements protect the marketplace by providing financial guarantees for the account.

Rule 749(c) limits the number of participants in a joint account to three and prohibits a COT from participating in more than two joint accounts. These restrictions will prevent proliferation of joint accounts. Members desiring to pool capital and other resources remain free to form partnerships or corporations to do so.

Rule 749(d) requires the joint account to maintain books and records separate from those of its participants and to keep all information on file with the Exchange updated. The joint account is also required to submit monthly account statements to the Exchange.

Rule 749(e) prohibits participants in the joint account from trading with the joint account, preventing any pre-arranged or wash trading using the joint account.

Rule 749(f) prevents the participants from using the joint account to gain an unfair priority over other members in the crowd, through the representation of the same order for two accounts in which the participant holds an interest.

Paragraph (g) prohibits joint accounts from establishing opening positions from off the Options Floor; positions already established while on the Floor may be closed through orders entered from off the Floor.

Rule 749(h) restricts orders and positions in the joint account to only (1) those options and futures traded on the Exchange or the New York Futures Exchange, Inc., (2) options and futures traded on other exchanges if the resulting positions is a bona fide hedge with Exchange options or positions, and (3) securities underlying Exchange option contracts. These restrictions will allow the joint account to adequately hedge the risk of its positions while not encouraging trading in instruments not regulated by the Exchange or its subsidiaries.

Rule 749(i) aggregates the option positions and exercises of the joint account and its participants. To illustrate the effect of this provision, assume a limit of 8,000 contracts on the same side of the market for XYZ options and two participants in the joint account, A and B. If A holds 2,000 XYZ option contracts in a regular COT account, and B the same, then the joint account could hold a maximum of 4,000 XYZ options contracts.

Paragraph (j) provides that each participant in the joint account is fully responsible for any activities conducted by and on behalf of the joint account.

The statutory basis of the proposed change is section 6(b)(5) of the Act, in particular, its requirements that the rules of a national securities exchange prevent fraudulent and manipulative practices, promote just and equitable principles of trade, and protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes the proposed rule change does not impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Comments have neither been solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such if it finds such longer period to be appropriate and publishes its reason for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by March 19, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-22909; Amdt. No. 1 to File No. SR-NYSE-83-13]

Self-Regulatory Organizations; Proposed Rule Change by New York Stock Exchange, Inc. Relating to Fidelity Insurance Requirements

February 14, 1986.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 10, 1986, the New York Stock Exchange, Inc. filed with the Securities and Exchange Commission a proposed rule change as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The purpose of the amendment is to clarify certain provisions of the proposed amendments to Rule 319. In addition, the amendment responds to questions raised by commentators and the Commission staff on certain aspects of the original filing.

The specific amendments to Rule 319 as filed with SR-NYSE-83-13 and a discussion of these changes follows: [1]

- *Rule 319(d)*—elimination of the word "unassociated".
- *Rule 319(d)(ii)*—Reinstatement of a requirement for introducing members and member organizations to carry securities forgery coverage. This provision was originally planned to be rescinded since an introducing firm would not, under normal circumstances, perform the securities handling functions which would give rise to claims under this provision. However, there may be instances where coverage for securities forgery could be required if

---

[1] The proposed rule change was noticed in a Commission release (Securities Exchange Act Release No. 19721, May 2, 1983), and its terms of substance were published in the **Federal Register** (48 FR 20637, May 6, 1983).

VOL
51
ISS
38
FE
26
1986
UMI

an introducing broker acts even in the capacity of forwarding securities to its clearing organization. Thus, it is believed that such coverage should be retained by introducers.

- *Rule 319(d)(iv)*—Removal of this paragraph relating to the use of the Disclosed Account Rider by introducing members and member organizations. This provision was originally proposed in order to provide an alternative to acquiring coverage directly by introducers through use of a Disclosed Accounts Rider which would make the introducers employees agents of the carrying organization and provide coverage under the carrying organization's bond. However, the insurance industry has indicated that such rider was never intended for or appropriate for such use.
- *Rule 319(e)(ii)*—Removal of the alternate method of calculating required insurance for carrying member organizations. The amendments to Rule 319 as originally filed would permit carrying organizations to calculate the approximate value of securities under their possession and control by use of figures submitted on Part II of the FOCUS report.[8] This calculation would then serve as the basis for figuring the required amount of fidelity insurance as outlined in paragraph (e)(i) of the rule. This calculation was thought to provide a good approximation of securities values at depositories which typically hold the vast majority of a carrying member organization's securities. (The substitute method projected applying a multiplier of six to a FOCUS report item which covered the value of customers' fully and partly secured debit balances.) Subsequent review of this alternative, however, has shown that this relationship can vary by more than what can be considered a normally acceptable margin for reliability.

The Exchange believes that its account carrying member organizations are able to provide a reasonably accurate approximation of the securities and money values under their possession and control through their own in-house computer systems, service bureau records and depository records or some combination thereof. The Exchange notes that it never intended for this figure to be exact, but to serve the purpose of falling into a range of values in order to determine the level of fidelity insurance required. (See Rule 319(e)(i) for these ranges and requirements.) The Exchange will work with its member organizations to establish these values in any instance where a claim of inability to calculate an insurance requirement is made.

- *Rule 319.10*—A provision which will require recalculation of a firm's insurance requirement on an annual or "for cause" basis is proposed to be added to the rule. This provision is meant to address situations where a member organization's business may have changed significantly and an increased or decreased level of insurance is forecast. It will require member organizations to notify the Exchange in such instances. The Exchange will review the circumstances surrounding the projected change in required insurance.
- *Rule 319.13*—Three minor wording changes are proposed in this section of the rule. One will clarify that fidelity insurance coverage will be required only for those commodities broker/dealer affiliates or subsidiaries whose obligations or liabilities are guaranteed by the member organization. Another change will conform a section of the rule dealing with coverage for designated messenger services to language used within the insurance bond forms. The third is a change regarding when coverage for associated broker/dealers will be required from "automatic" to "prompt".

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed amendment to the filing is consistent with section 6(b)(5) of the Securities Exchange Act of 1934 (The "Act") in that Rule 319 will protect investors and the public interest by insuring that members and member organizations comply with certain prescribed minimum fidelity insurance standards. The proposed amendment is also consistent with section 6(c)(3)(A) of the Act which permits a national securities exchange to deny or condition the membership of a broker or dealer that does not meet such standards of financial responsibility as are prescribed by the rules of the Exchange.

All other items required by Form 19b-4 remain as stated in SR-NYSE-83-13.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by March 19, 1986.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-22911; File No. SR-PSE-86-01]

Self-Regulatory Organizations; Pacific Stock Exchange, Inc.; Order Granting Accelerated Approval of Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on January 14, 1986, The Pacific Stock Exchange Incorporated ("PSE" or the "Exchange") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

---

[8] Form X-17A-5.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Pacific Stock Exchange Incorporated ("PSE" or the "Exchange") proposes to amend Commentary .01 to Rule VI, Section 55, "Reporting Duties" of the Rules of the Board of Governors, to state specifically that an account origin code is required on all cards or tickets for agency orders. The Exchange also intends to amend .02 of said Commentary to specify the proper account origin codes which are as follows: *"C" for non-broker-dealer customer accounts; "F" for firm proprietary accounts; "M" for member Market Maker accounts; and "B" for firm orders of non-member broker-dealer accounts, stock specialist accounts, or customer account trades of the broker-dealer or non-member broker-dealer.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for the Proposed Rule change

The proposed rule change will ensure an effective audit trail and compliance procedure in light of the recent Securities and Exchange Commission Release No. 21710 which allows specialists to use listed options. In addition, it will also facilitate Exchange Rule VI, section 43, requiring that orders contain the account designation for which such orders are to be executed.

Furthermore, this proposed rule change is designed to protect the integrity that the Book must maintain in receiving orders from the members as defined in Section 66 of Exchange Rule VI. Under section 66, only public customer orders (origin code "C") may be placed on the Book. This designation will ensure that that limitation will be enforced.

Section 63 of Exchange Rule VI, allows for a facilitation of a customer order by a firm proprietary account (origin code "F".) This proposed rule change will ensure that the customer order and firm proprietary account will be disclosed in a facilitation transaction. In addition, under Section 49 of Exchange Rule VI, customer market orders are entitled to priority over limit orders at the same opening price on the Book. Therefore, to facilitate this Rule, the origin code "F", as proposed will be utilized.

Finally, Options Floor Procedure Advice ("OFPA") B-6, states that the Exchange believes that the special obligation and role of the Market Maker warrant that the crowd be fully aware of the Market Makers' trading activity. Accordingly, OFPA B-6 lists special procedures as to how a ticket should be marked, indicating that it is a Market Maker's order (origin code "M"). This proposed rule change will ensure that this procedure will be utilized, and will aid in contributing to the maintenance of a fair and orderly market.

The proposed rule change is consistent with section 6(b)(5) of the Securities Exchange Act of 1934, in that it will remove impediments to the creation of a free and open market.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change imposes no burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Comments on the proposed rule change were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange requests that the proposed rule change be given accelerated effectiveness pursuant to section 19(b)(2) of the Securities Exchange Act of 1934 to facilitate the maintenance of a fair and orderly market in PSE options.

The Commission finds that the proposed rule change is consistent with the requirements of the Securities Exchange Act of 1934 and the rules and regulations thereunder applicable to a national securities exchange, and in particular, the requirements of Section 6 and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof because the proposed rule change will better ensure an effective audit trial and compliance procedure, thereby facilitating the maintenance of a fair and orderly market. In addition, the proposed rule change is similar to a rule change proposed by the Chicago Options Exchange, Inc. which was approved by the Commission (File No. SR-CBOE-85-6), Securities Exchange Act Release No. 34-21944, April 12, 1985.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by March 18, 1986.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: February 14, 1986.

John Wheeler,

Secretary.

DEPARTMENT OF STATE

[Public Notice 954]

Certain Foreign Passports Validity

Under the provisions of section 212(a)(26) of the Immigration and Nationality Act, a nonimmigrant alien who makes application for a visa or for admission into the United States is required to be in possession of a passport which is valid for a minimum period of six months from the date of expiration of the initial period of his admission into the United States of his

VOL 51
ISS 38
FE 26
1986
UMI

contemplated initial period of stay authorizing him to return to the country from which he came or proceed to and enter some other country during such period. By reason of the foregoing requirement, certain foreign governments have entered into agreements with the Government of the United States whereby their passports are recognized as valid for the return of the bearer to the country of the foreign-issuing authority for a period of six months beyond the expiration date specified in the passport. These arrangements have the effect of extending the validity period of the foreign passport an additional six months notwithstanding the expiration date indicated in the passport.

This order adds Hong Kong and Singapore to those countries which have concluded such agreements subsequent to Public Notice 918 of October 1, 1984. The following foreign governments have concluded agreements with the Government of the United States:

Algeria, Antigua and Barbuda, Australia, Austria (Reisepass only), The Bahamas, Bangladesh (travel permits and passports), Belgium, Bolivia, Brazil, Cambodia, Canada, Chile, Colombia, Costa Rica, Cuba, Cyprus, Denmark, Dominican Republic, Ecuador, Egypt, El Salvador, Ethiopia, Finland, France, Germany (FRG) (Reisepass and Kinderausweis), Greece, Guatemala, Guinea, Guyana.

Honduras, Hong Kong, Iceland, India, Iran, Ireland, Israel, Italy, Ivory Coast, Jamaica, Japan, Korea, Kuwait, Laos, Lebanon, Libya, Liechtenstein, Luxembourg, Madagascar, Mauritius, Mexico, Monaco, Morocco, Netherlands, New Zealand, Nicaragua (diplomatic and official passports only), Nigeria, Norway.

Pakistan, Panama, Paraguay, Peru, Philippines, Portugal, Qatar, St. Vincent and the Granadines, Senegal, Singapore, Soviet Union (U.S.S.R.) (Seamen only), Spain, Sri Lanka, Sudan, Sweden, Switzerland, Syria, Thailand, Togo, Trinidad and Tobago, Tunisia, Turkey, United Arab Emirates, United Kingdom, Uruguay, Venezuela, Yugoslavia.

In addition, travel documents issued by the Government of the Trust Territory of the Pacific Islands are considered to be valid for the return of the bearer to the Trust Territory for a period of six months beyond the expiration date specified therein.

Public Notice 918 of October 1, 1984 issued at 49 FR 38780 is hereby superseded.

Dated: February 19, 1986.

Joan M. Clark,

Assistant Secretary for Consular Affairs.

BILLING CODE 4710-06-M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Reports, Forms, and Recordkeeping Requirements; Submittals to OMB January 27, 1986–February 19, 1986

AGENCY: Department of Transportation (DOT), Office of the Secretary.

ACTION: Notice.

SUMMARY: This notice lists those forms, reports, and recordkeeping requirements imposed upon the public which were transmitted by the Department of Transportation, during the period January 27, 1986—February 19, 1986, to the Office of Management and Budget (OMB) for its approval in accordance with the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

FOR FURTHER INFORMATION CONTACT: John Chandler or Annette Wilson, Information Requirements Division, M-34, Office of the Secretary of Transportation, 400 7th Street, SW., Washington, DC 20590, telephone (202) 426-1887, or Gary Waxman or Sam Fairchild, Office of Management and Budget, New Executive Office Building, Room 3228, Washington, DC 20503, (202) 395-7340.

SUPPLEMENTARY INFORMATION:

Background

Section 3507 of Title 44 of the United States Code, as adopted by the Paperwork Reduction Act of 1980, requires that agencies prepare a notice for publication in the Federal Register, listing those information collection requests submitted to the Office of Management and Budget (OMB) for initial, approval, or for renewal under that Act. OMB reviews and approves agency submittals in accordance with criteria set forth in that Act. In carrying out its responsibilities, OMB also considers public comments on the proposed forms, reporting and recordkeeping requirements. OMB approval of an information collection requirement must be renewed at least once every three years.

Information Availability and Comments

Copies of the DOT information collection requests submitted to OMB may be obtained from the DOT officials listed in the "For Further Information Contact" paragraph set forth above. Comments on the requests should be forwarded, as quickly as possible, directly to the OMB officials listed in the "For Further Information Contact" paragraph set forth above. If you anticipate submitting substantive comments, but find that more than 10 days from the date of publication are needed to prepare them, please notify the OMB officials of your intent immediately.

Items Submitted for Review by OMB

The following information collection requests were submitted to OMB from January 27, 1986—February 19, 1986.

DOT No: 2690.
OMB No: 2115-0138.
By: United States Coast Guard.
Title: Records and Reports of Inspections.
Form(s): CG-840-AA, CG-840-BB, CG-2832.
Frequency: On Occasion.
Respondents: Owners and operators of U.S. Merchant Vessels.
Need/Use: This information collection contains a recordkeeping requirement which is needed to enforce the Coast Guard's commercial vessel safety program as described in 46 CFR. The Coast Guard uses these records to document the construction, alteration, repair and maintenance of said vessels to insure the safety of life and property at sea.

DOT No: 2697.
OMB No: 2127-0044.
By: National Highway Traffic Safety Administration.
Title: Names and Addresses of First Purchasers of Motor Vehicles.
Form(s): None.
Frequency: On Occasion.
Respondents: Motor vehicle manufacturers and dealers.
Need/Use: Motor vehicle manufacturers are required to record and retain the names and addresses of first purchasers of new motor vehicles, so that the manufacturer can directly notify those persons if the vehicle is recalled.

DOT No: 2698.
OMB No: 2125-0023.
By: Federal Highway Administration.
Title: Defense Bridges and Critical Highway Facilities Reports.
Form(s): None.
Frequency: Annually.
Respondents: State highway agencies.
Need/Use: To meet requirements of the Federal Emergency Management Agency (FEMA), Department of Defense (DOD), and the FHWA in carrying out responsibilities related to National emergencies, disaster relief, and defense activities.

DOT No: 2699.
OMB No: 2138-0016.
By: Research and Special Program Administration.

Title: Report of Extension of Credit to Political Candidates.
Form(s): RSPA-183.
Frequency: On Occasion.
Respondents: Air carriers holding section 401 certificates.
Need/Use: This report fulfills the Department's requirement under the Election Campaign Act to collect data on the extension of unsecured credit to candidates for Federal office by certificated air carriers.

DOT No: 2700.
OMB No: 2115-0520.
By: United States Coast Guard.
Title: Plan Approval and Records for Existing Tank Vessels of 20,000 to 40,000 Deadweight Tons (DWT) Carrying Oil in Bulk.
Form(s): None.
Frequency: On Occasion.
Respondents: Existing tank vessels of 20,000-40,000 DWT carrying oil in bulk.
Need/Use: This information collection is needed and used by the Coast Guard to ensure that: (1) U.S. and foreign vessels comply with the minimum standards; (2) documentation is on board to determine compliance with equipment and design standards; and (3) authorized classification societies meet the applicable requirements to conduct third-party certifications and inspections.

DOT No: 2702.
OMB No: 2132-0530.
By: Urban Mass Transportation Administration.
Title: Nondiscrimination on the Basis of Handicap in Programs Receiving Financial Assistance from the Department of Transportation.
Form(s): None.
Frequency: Annually and Triennially.
Respondents: State/Local Governments and public transit authorities.
Need/Use: The information is needed to ensure that UMTA recipients are complying with the statutory provisions concerning transportation services for elderly and handicapped persons. In addition, the information will indicate whether these recipients are providing the services planned. UMTA's recipients are providers of mass transportation service.

DOT No: 2703.
OMB No: 2133-0006.
By: Maritime Administration.
Title: Documentation, Transfer, or Charter of Vessels.
Form(s): MA-29, MA-29A, MA-29B.
Frequency: On Occasion.
Respondents: Charterers/owners of vessels.
Need/Use: Information is needed to provide approval of certain charters to noncitizens and of the sale or other transfer to noncitizens of certain vessels.

DOT No: 2704.
OMB No: None.
By: Urban Mass Transportation Administration.
Title: Charter Bus Operations.
Form(s): None.
Frequency: Annually (with each grant application).
Respondents: State and Local Governments.
Need/Use: UMTA needs to require applicants to submit an agreement and to restrict its recipients to provide charter service only where there is no willing and able private operator to ensure that the UMT Act's protections for UMTA equipment and for private operators are complied with.

DOT No: 2705.
OMB No: 2120-0065.
By: Federal Aviation Administration.
Title: Certification and Operations—FAR 125.
Form(s): None.
Frequency: On Occasion.
Respondents: Air Carriers operating under FAR 125.
Need/Use: Federal Aviation Act of 1958, authorizes issuance of Air Carrier Operating Certificates. 14 CFR 125 will prescribe requirements for leased aircraft, aviation service firms, air travel clubs. Information collected shows compliance and applicants eligibility.

DOT No: 2706.
OMB No: 2125-0508.
By: Federal Highway Administration.
Title: Hazardous Materials Instructions and Documents.
Form(s): None.
Frequency: On Occasion.
Respondents: Motor Carriers.
Need/Use: Requirement that motor carriers transporting Class A or Class B explosives are required to provide drivers with written instructions.

DOT No: 2707.
OMB No: None.
By: National Highway Traffic Safety Administration.
Title: Impact of Public Information and Education Campaign on Driver Perception of Motor Vehicle Accident Injury Risk and Emergency Medical Services Awareness.
Form(s): None.
Frequency: On Occasion.
Respondents: Industries/Households.
Need/Use: PI&E involves a public information and education campaign to increase public knowledge and appropriate use of the EMS System. A telephone survey will be used for the test and comparison sites. It will measure public knowledge and awareness of EMS before and after the campaign.

Issued in Washington, DC, on February 20, 1986.

John E. Turner,

Director of Information Systems and Telecommunications.

Urban Mass Transportation Administration

[Docket No. 86-A]

Guidance on Documentation of Private Enterprise Participation of Urban Mass Transportation Programs; Extension of Comment Period

AGENCY: Urban Mass Transportation Administration, DOT.

ACTION: Extension of Comment Period.

SUMMARY: On January 24, 1986, the Urban Mass Transportation Administration (UMTA) announced in the Federal Register (51 FR 3306) its guidance on documentation of private enterprise participation in urban mass transportation programs. That notice provided a 30-day period for public comments. Since then requests have been received for an extension of the public comment period. The purpose of this notice is to extend the public comment period of an additional 30 days.

DATE: The comment period on UMTA Docket No. 86-A, Guidance on Documentation of Private Enterprise Participation in Urban Mass Transportation Programs (51 FR 3306), is extended from February 24, 1986 to March 26, 1986.

ADDRESS: Comments on this policy should be submitted to UMTA Docket Number 86–A, Urban Mass Transportation Administration, Room 9228, 400 Seventh Street, SW., Washington, D.C. 20590. All comments and suggestions received will be available for examination at the above address between 8:30 a.m. and 5:30 p.m., Monday through Friday. Receipt of comments will be acknowledged by UMTA if a self-addressed, stamped postcard is included with each comment.

FOR FURTHER INFORMATION CONTACT: Mr. Douglas Birnie, Acting Director, Office of Private Sector Initiatives, Room 9310, telephone (202) 426–6385, UMTA, 400 Seventh Street, SW., Washington, DC 20590.

Dated: February 18, 1986.

Ralph L. Stanley,

Administrator.

BILLING CODE 4910–57–M

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Supplement to Dept. Circ.—Public Debt Series—No. 10–86]

Treasury Notes, Series W–1988

Washington, February 20, 1986.

The Secretary announced on February 19, 1986, that the interest rate on the notes designated Series W–1988, described in Department Circular—Public Debt Series—No. 10–86 dated February 13, 1986, will be 8 percent. Interest on the notes will be payable at the rate of 8 percent per annum.

Gerald Murphy,

Fiscal Assistant Secretary.

[FR Doc. 86–4145 Filed 2–25–86; 8:45 am]

BILLING CODE 4810–40–M

[Dept. Circ.—Public Debt Series—No. 11–86]

Treasury Notes of May 15, 1991, Series J–1991

Washington, February 19, 1986.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $7,500,000,000 of United States securities, designated Treasury Notes of May 15, 1991, Series J–1991 (CUSIP No. 912827 TJ 1), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The notes will be dated March 5, 1986, and will accrue interest from that date, payable on a semiannual basis on November 15, 1986, and each subsequent 6 months on May 15 and November 15 through the date that the principal becomes payable. They will mature May 15, 1991, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next-succeeding business day.

2.2. The Notes are subject to all taxes imposed under the Internal Revenue Code of 1954. The Notes are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Notes will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

2.4. Notes in registered definitive form will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Notes in book-entry form will be issued in multiples of those amounts. Notes will not be issued in bearer form.

2.5. Denominational exchanges of registered definitive Notes, exchanges of Notes between registered definitive and book-entry forms, and transfers will be permitted.

2.6. The Department of the Treasury's general regulations governing United States securities apply to the Notes offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239, prior to 1:00 p.m., Eastern Standard time, Wednesday, February 26, 1986. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, February 25, 1986, and received no later than Wednesday, March 5, 1986.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively

higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at a 1/8 of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 98.750. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in section 3.5. must be made or completed on or before Wednesday, March 5, 1986. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Monday, March 3, 1986. In addition, Treasury Tax and Loan Note Option Depositaries may make payment for the Notes allotted for their own accounts and for accounts of customers by credit to their Treasury Tax and Loan Note Accounts on or before Wednesday, March 5, 1986. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted are not required to be assigned if the new Notes are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the Notes are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (Notes offered by this circular) in the name of (name and taxpayer identifying number)". Specific instructions for the issuance and delivery of the new Notes, signed by owner or authorized representative, must accompany the securities presented. Securities tendered in payment must be delivered at the expense and risk of the holder.

5.4. Registered definitive Notes will not be issued if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (e.g., an individual's social security number or an employer identification number) is not furnished. Delivery of the Notes in registered definitive form will be made after the requested form of registration has been validated, the registered interest account has been established, and the Notes have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, to issue and deliver the Notes of full-paid allotments, and to maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

Gerald Murphy,

Fiscal Assistant Secretary.

BILLING CODE 4810–40–M

UNITED STATES INFORMATION AGENCY

Advisory Board for Radio Broadcasting to Cuba; Meeting

The Advisory Board for Radio Broadcasting to Cuba will conduct a meeting on March 4, 1986, in Room 3557, 400 Sixth Street SW., Washington, DC. Below is the intended agenda.

Tuesday, March 4, 1986

Part 1—Closed to the Public

9:00 a.m.—1. Discussion of suggested Board By-Laws prepared by Staff.
10:00 a.m.—2. Selection of a Board Vice-Chairman.
10:30 a.m.—3. Technical Responses by the Cuban government to the Radio Marti Program.
11:30 a.m.—4. Evaluation and analysis of the audience.
12:30 p.m.—5. Lunch.
2:30 p.m.—6. Impact of the "Gramm-Rudman" spending legislation on the Radio Marti Program.

Part 2—Open to the Public

3:30 p.m.—7. Discussion of the Annual Report to be sent to President Reagan on the Program's first broadcasting anniversary, May 20, 1986.
4:30 p.m.—8. Testimony of members of the public attending the meeting.
5:30 p.m.—9. Adjournment.

The first five items of the seven item agenda, which will be discussed from 9:00 a.m. to 3:30 p.m., will be closed to the public. Items 1 and 2 concern (1) the adoption of Board by-laws and (2) the selection of a Vice-Chairman. These two items fall under 5 U.S.C. 552b(c)(2) of the Government in the Sunshine Act which permits meetings to be closed during "discussion of internal personnel rules and practices." Items 3, 4, and 5 cover (3) technical responses by the Cuban government to the Radio Marti Program, (4) the determination of the existing size and nature of the Cuban audience, and (5) the impact of the Gramm-Rudman bill. All will involve discussion of classified information. Closing such deliberations to the public is also justified by the Sunshine Act under 5 U.S.C. 552b(c)(1)). Premature disclosure of some of this information would be likely to significantly frustrate implementation of proposed Agency action.

Members of the public interested in attending the meeting should contact Mr. Stuart Sweet on (202) 485-6312 to make prior arrangements, as access to the building is controlled.

Dated: February 21, 1986.

Charles Z. Wick,

Director.

VETERANS ADMINISTRATION

Privacy Act of 1974; Amended System of Records

Notice is hereby given that the Veterans Administration is amending the system of records entitled 27VA047, "Personnel and Accounting Pay System—Va." Specifically, VA field facilities will be granted access to the data stored in this system.

This expanded access is being provided in order to give authorized field and Central Office employees more current information on personnel and payroll data stored at the Austin DPC. Access to the data will be by one of two methods. The first method is an on-line (query) database designed for users with a personal computer or an interactive terminal connected by a dial-in capability with the Austin DPC. The other method is for Department of Medicine and Surgery facilities with a Decentralized Hospital Computer Program (DHCP) to down-load their accessible data to a storage device located at the facility.

Access to data within this system will be limited to authorized employees. Security access procedures will be by the means of unique user identifications and passwords.

Accordingly, the VA is amending the paragraphs pertaining to storage and safeguards.

A "Report of Intention to Publish a Federal Register Notice of a New System of Records" and an advance copy of the new system notice have been provided to the Speaker of the House, President of the Senate, and the Director, Office of Management and Budget (OMB), as required by the provisions of 5 U.S.C. 552a(o) and the Privacy Act Guidelines issued by OMB on October 3, 1975 (40 FR 45877).

These changes are administrative in nature, therefore, no public comment is required.

Approved: February 18, 1986.

Everett Alvarez, Jr.,

Acting Administrator.

Notice of Amendments to System of Records

In the system identified as 27VA047, "Personnel and Accounting Pay System-VA", in Office of the Federal Register, Privacy Act Insurances, 1984 Compilation, Vol. V., p. 713, as amended at 50 FR 23100 (May 30, 1985), the system notice is revised as follows:

27VA047

SYSTEM NAME:

Personnel and Accounting Pay System—Va

* * * * *

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM.

* * * * *

STORAGE:

Paper documents, magnetic tape, disks.

* * * * *

SAFEGUARDS:

Physical Security: Access to Payroll Folder Files is restricted to fiscal officers and employees of the Payroll Section. Access to Official Personnel Folder Files is restricted to personnel officers and employees authorized access under Federal Personnel Manual and VA Manual, MP-5, Personnel Policy. Personnel and Fiscal offices are locked after working hours and are protected from outside access by the Federal Protective Service and other security officers. Access to data by means of on-line (query) data base or down-loading with a Decentralizing Hospital Computer Program (DHCP) is restricted to authorized employees by means of unique user identifications and passwords. User identifications and passwords will be seven (7) characters in length. These codes are to be mailed in a sealed envelope to an employee's business address and will be opened only by the addressed employee. No user identification or password will be given to an employee except those authorized access under Federal Personnel Manual and VA Manual, MP-5, Personnel Policy.

NUCLEAR REGULATORY COMMISSION

DATE: Weeks of February 24, March 3, 10, and 17, 1986.

PLACE: Commissioners' Conference Room, 1717 H Street, NW, Washington, DC.

STATUS: Open and Closed.

MATTERS TO BE CONSIDERED:

Week of February 24

Tuesday, February 25

10:00 a.m.
Briefing by Incident Investigation Team on Status of Rancho Seco (Public Meeting)

Wednesday, February 26

2:00 p.m.
Briefing on NUMARC Initiatives (Public Meeting)

Thursday, February 27

10:00 a.m.
Discussion of DOE High Level Waste Program (Public Meeting)
2:00 p.m.
Affirmative/Discussion and Vote (Public Meeting
a. Review of ALAB-819 (In the Matter of Philadelphia Electric Company)
2:30 p.m.
Discussion of Management-Organization and Internal Personnel Matters (Closed—Ex. 2 & 6) (if needed)

Week of March 3

Tentative

Wednesday, March 5

11:30 a.m.
Affirmation Meeting (Public Meeting) (if needed)

Week of March 10

Tentative

Tuesday, March 11

10:00 a.m.
Briefing by TVA on Status, Plans and Schedules (Public Meeting)
2:00 p.m.
Briefing by DOE on R&D Results from TMI-2 Cleanup (Public Meeting)

Wednesday, March 12

10:00 a.m.
Status of Pending Investigations (Closed—Ex. 5 & 7)
2:00 p.m.
Status Briefing on Fermi (Open/Portion may be Closed—Ex. 5 & 7)

Thursday, March 13

10:00 a.m.
Briefing by Staff and Licensee on Status of Kerr-McGee Sequoyah Fuel Facility (Public Meeting)
11:30 a.m.
Affirmation Meeting (Public Meeting) (if needed)

Friday, March 14

10:00 a.m.
Periodic Meeting with Advisory Committee on Reactor Safeguards (Public Meeting)

Week of March 17

Tentative

Monday, March 17

2:00 p.m.
Discussion/Possible Vote on Palo Verde-2 Full Power Operating License (Public Meeting)

Tuesday, March 18

2:00 p.m.
Briefing by Southern California Edison Co. on San Onofre-1 (Public Meeting)

Wednesday, March 19

10:00 a.m.
Periodic Briefing by Regional Administrators (Public Meeting)

Thursday, March 20

2:00 p.m.
Discussion of Management-Organization and Internal Personnel Matters (Closed—Ex. 2 & 6)
3:30 p.m.
Affirmation Meeting (Public Meeting) (if needed)

Friday, March 21

10:00 a.m.
Advisory Commitee on Reactor Safeguards (ACRS) Meeting on Safety Goals (Public Meeting) (Tentative)

ADDITIONAL INFORMATION: Affirmation of "Final Rule Establishing Criteria for Reopening Records to Formal Licensing Proceedings" scheduled for February 20 was *postponed.*

RAILROAD RETIREMENT BOARD

Notice is hereby given that the Railroad Retirement Board will hold a meeting on March 4, 1986, 9:00 a.m., at the Board's meeting room on the 8th floor of its headquarters building, 844 North Rush Street, Chicago, Illinois, 60611.

The agenda for this meeting follows:

(1) Proposed Changes in the RUIA Regulations.
(2) Canadian Service.

The entire meeting will be open to the public. The person to contact for more information is Beatrice Ezerski, Secretary to the Board, COM No. 312-751-4920, FTS No. 387-4920.

Dated: February 21, 1986.

Beatrice Ezerski,

Secretary to the Board.

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of February 24, 1986.

Closed meetings will be held on Tuesday, February 25, 1986, at 2:30 p.m. and on Thursday, February 27, 1986, following the 2:30 p.m. open meeting.

Open meetings will be held on Wednesday, February 26, 1986, at 2:00 p.m. and on Thursday, February 27, 1986, at 10:00 a.m. and 2:30 p.m., in Room 1C30.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain staff members who are responsible for the calendered matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C.

VOL

552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at closed meetings.

Commissioner Peters, as duty officer, voted to consider the items listed for the closed meetings in closed session.

The subject matter of the closed meeting scheduled for Tuesday, February 25, 1986, at 2:30 p.m., will be:

Formal orders of investigation.
To amend formal orders of investigation.
Institution of administrative proceedings of an enforcement nature.
Institution of injunctive actions.
Settlement of administrative proceedings of an enforcement nature.

The subject matter of the open meeting scheduled for Wednesday, February 26, 1986, at 2:30 p.m., will be:

The Commission will meet with representatives of self-regulatory organizations and state securities commissions to discuss issues of mutual interest and concern, including, but not limited to, coordination of enforcement and surveillance programs. For further information, please contact Alan L. Dye at (202) 272-2014.

The subject matter of the opening meeting scheduled for Thursday, February 27, 1986, at 10:00 a.m., will be:

1. Consideration of whether to grant an application filed by David Lerner Associates, Inc. for an order exempting it from the provisions of section 9(a) of the Investment Company Act. For further information, contact Gary Sundick at (202) 272-2344.

2. Consideration of whether to adopt rules to require registrants to: (1) Present certain industry segment information for interim periods; and (2) focus on reportable segments within Management's Discussion and Analysis of Financial Condition and Results of Operations. The Commission will also consider whether to adopt certain other amendments to its requirements for interim financial reporting. For further information, please contact John W. Albert at (202) 272-2130.

The subject matter of the open meeting scheduled for Thursday, February 27, 1986, at 2:30 p.m., will be:

The Commission will hear oral argument on an appeal by Owen V. Kane, the vice president of a registered broker-dealer, from an administrative law judge's intial decision. For further information, please contact R. Moshe Simon at (202) 272-7400.

The subject matter of the closed meeting scheduled for Thursday, February 27, 1986, following the 2:30 p.m. open meeting, will be:

Post oral argument discussion.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Judith Axe at (202) 272-2092.

Dated: February 20, 1986.

John Wheeler,

Secretary.

Part II

Department of Health and Human Services

Food and Drug Administration

21 CFR Part 882

Medical Devices; Invitation for Offers To Submit or To Develop a Performance Standard for Central Nervous System Fluid Shunt and Components; Notice of Inquiry

VOL 51 ISS 38 FE 26 1986 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 882

[Docket No. 83N-0192]

Medical Devices; Invitation for Offers To Submit or To Develop a Performance Standard for Central Nervous System Fluid Shunt and Components

AGENCY: Food and Drug Administration.

ACTION: Notice of inquiry.

SUMMARY: The Food and Drug Administration (FDA) is issuing this notice to invite interested persons, including any Federal agency, to submit any existing standard as a proposed performance standard for the central nervous system fluid shunt and components, or to submit an offer to develop such a proposed standard. If FDA does not receive any response to this notice, or receives a response but does not accept any existing standard or offer to develop a standard, the agency will proceed to develop a performance standard or take other appropriate action to facilitate the development of a performance standard for the device.

DATE: Existing standards or offers shall be submitted on or before April 28, 1986.

ADDRESS: Existing standards or offers shall be submitted to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Charles E. MacNeill, Center for Devices and Radiological Health (HFZ-83), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3426.

SUPPLEMENTARY INFORMATION:

Background Introduction

Under section 513 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360c), FDA is required to classify each medical device into one of three regulatory categories: Class I (general controls), class II (performance standards), or class III (premarket approval).

In the **Federal Register** of September 4, 1979 (44 FR 51769), FDA published a final rule (21 CFR 882.5550) classifying the central nervous system fluid shunt and components into class II. In the **Federal Register** of July 8, 1983 (48 FR 31396), FDA initiated a proceeding to establish for the device a performance standard under section 514 of the act (21 U.S.C. 360d). As required by section 514(b) of the act, the proceeding was initiated by publishing in the **Federal Register** a notice of opportunity to submit to the agency, within 15 days of the date of publication of the notice, a request for a change in the classification of the device based on new information relevant to its classification. FDA did not receive any request for a change in the classification of the device or any comments on the notice. Therefore, further action is not required under section 514(b) of the act.

As provided by section 514(c) of the act and Part 861 of the regulations governing performance standards development (21 CFR Part 861), FDA is continuing the proceeding to establish a performance standard for the central nervous system fluid shunt and components by inviting interested persons to submit an exisiting standard as a proposed performance standard for the device or to submit an offer to develop such a proposed standard.

Current Action

Section 514(c)(1)(A) of the act and § 861.20(c) of the regulations provide that in the event further action is not required under section 514(b) of the act, FDA shall publish in the **Federal Register** a notice inviting any interested person, including any Federal agency, to submit to FDA, within 60 days after the date of publication of the notice, an existing standard as a proposed performance standard or an offer to develop a proposed performance standard.

Section 514(c)(2)(B) of the act and § 861.22 of the regulations provide that the notice is to include: (1) A description or other designation of the device; (2) a statement of the risk or risks associated with the use of the device and which are intended to be controlled by a performance standard, including pertinent portions of the recommendations of FDA's advisory committees with respect to the device; (3) a summary of the data on which FDA has found a need for initiation of the proceeding to develop a performance standard, including pertinent portions of the recommendations of FDA's advisory committees with respect to the device; (4) identification of any existing performance standard known to FDA which may be relevant to the proceeding; (5) the approximate number of products (i.e., kinds of models) within the generic type of device; and (6) the time period within which the standard is to be developed, which may be extended by the Commissioner of Food and Drugs for good cause shown.

Device Description

The central nervous system fluid shunt is identified in § 882.5550 as a device or a combination of devices used to divert central nervous system fluid from the brain or other part of the central nervous system to an internal delivery site or to an external receptacle for the purpose of relieving elevated intracranial pressure or fluid volume (e.g., due to hydrocephalus). Components of the central nervous system fluid shunt may include catheters, valved catheters, valves, connectors, and other accessory components intended to facilitate use of the shunt or evaluation of a patient with a shunt.

Scope of the Standard; Models of the Device

FDA intends that any proposed performance standard for the central nervous system fluid shunt and its components to be offered or developed at this time would apply to internal totally implanted shunts, external temporary devices that drain cerebrospinal fluid to an external receptacle, and components of both internal and external shunts.

Of the various central nervous system fluid shunt device products, the commonly used shunts fall into the following models which are distinguished by the placement of the proximal or the distal end of the catheter:

(1) *Ventriculo-Atrial Shunt:* A widely used model of the shunt consisting of a variety of catheters, valves, reservoirs, and flushing components. The ventricular segment of the shunt is inserted into a lateral cerebral ventricle, preferably on the right side through a parietal burr hole. The cardiac segment of the shunt is directed subcutaneously to the neck where it is inserted into the internal jugular vein directly or through one of its branches and down the superior vena cava into the right atrium of the heart.

(2) *Ventriculo-Peritoneal Shunt:* A model of the shunt in which the ventricular catheter and components are similar to those of the ventriculo-atrial shunt, but the distal end of the catheter is directed subcutaneously into the peritoneal cavity where absorption of the cerebrospinal fluid takes place.

(3) *Lumbo-Peritoneal Shunt:* A model of the shunt which drains cerebrospinal fluid from the lumbar subarachnoid space to the peritoneal cavity.

(4) *Ventriculo-Ureteral Shunt:* A model of the shunt which drains cerebrospinal fluid from one of the ventricles of the brain to a ureter and into the urinary bladder.

(5) *Ventriculo-Lymphatic Shunt:* A model of the shunt which drains cerebrospinal fluid from one of the ventricles of the brain to one of the lymphatic vessels.

(6) *Ventriculo-Pleural Shunt:* A model of the shunt which drains cerebrospinal fluid from one of the ventricles of the brain to one of the plura cavities.

(7) *External-Receptacle Shunt:* A model of the shunt which drains cerebrospinal fluid from the lateral cerebral ventricle to a receptacle external to the body, generally for diagnostic purposes or for temporary drainage of the fluid.

Risks Associated With the Device and Which Are To Be Controlled by a Performance Standard

In the **Federal Register** of November 28, 1978 (43 FR 55714), FDA published a proposed rule to classify into class II the central nervous system fluid shunt and components. FDA listed in the preamble to the proposal the risks to health which its advisory committee identified as presented by the device.

The Neurological Devices Panel (then the Neurological Device Classification Panel), an FDA advisory Committee, identified the following risks to health:

(a) *Abnormal intracranial pressure:* Mechanical malfunctioning of the shunt or its components (e.g., blockage of the catheter or valve) may result in elevated intracranial pressure and the return of symptoms of hydrocephalus.

(b) *Tissue toxicity:* Adverse tissue reactions may result if the shunt or component materials are not biocompatible.

(c) *Perforation of viscus:* The tip of the catheter may puncture the bladder or other organs if the catheter material is too stiff.

(d) *Infection:* Infection may result if the shunt or its components are not sterile or introduce contaminants into the patient.

A further discussion of the risks identified by the Panel is included in the section of this notice "Summary of the Data Supporting the Need for a Performance Standard."

Based on the Panel's recommendation and on additional reviews of the scientific literature (Ref. 14), FDA has identified the following specific risks associated with the use of the central nervous system fluid shunt and components and that need, as a minimum, to be controlled by a performance standard:

(1) *Elevated intracranial pressure.* Due to mechanical malfunction of a valve or obstruction (clogging) of one of the shunt components, fluid pressure inside the cranium may rise to levels that are life threatening. A performance standard for the device should address requirements such as controls on valve malfunctions, catheter kinking, component clogging, or separation of shunt components to protect against the risk of elevated intracranial pressure.

(2) *Insufficient ventricular volume.* Due to mechanical malfunction of a valve or separation of a shunt component, excessive fluid drainage may cause the ventricle to collapse resulting in subdural bleeding which may be fatal. A performance standard for the device should address requirements such as controls on valve malfunction or separation of shunt components to protect against the risk of insufficient ventricular volume.

(3) *Perforation of a body organ.* Due to the use of catheter material which is too hard or which contains sharp edges, the catheter tip may puncture the bladder or other body organs leading to sepsis or hemorrhage which are life threatening. A performance standard for the device should address this risk by establishing requirements on materials and configuration controls.

(4) *Migration of components.* Due to inadequacies in component attachments, the implanted shunt components may become disconnected and migrate to various parts of the body resulting in life-threatening conditions. This risk may be compounded by the lack of radiopaque markers in the components which prevents location of migrated components in the body. A performance standard for the device should establish requirements and appropriate test methods applicable to component attachments. Provision of any such standard should include radiopaque marking requirements.

(5) *Skin erosion.* A shunt or its components that are implanted subcutaneously may cause erosion of the skin. Erosion can lead to open wounds which are vulnerable to infection and require reconstructive surgery. A standard should address the size, configuration, and material employed in shunts which may contribute to the frequency of erosion.

(6) *Revision trauma.* Periodic revision surgery to replace a shunt or its components, devices which are not easily removed, may result in excessive patient trauma due to component configuration, such as flanged catheters. Avulsion of brain tissue associated with the surgery may lead to hemorrhage or permanent neurological deficit. A standard should address the risk of revision trauma by establishing requirements for component configuration to control tissue damage associated with revision surgery.

(7) *Infection.* Infection resulting from implanation of a shunt or its components may be life threatening and may necessitate revision surgery and antibiotic treatment. A standard should address the risk of infection associated with use of the device by establishing requirements for sterility of the device and for related labeling.

(8) *Tissue toxicity.* Adverse tissue reaction and fever may result from the use of nonbiocompatible materials in a shunt or its components. The adverse effect may be correctable only by revision surgery. A standard should address the risk of tissue toxicity by establishing biocompatibility requirements for shunt and component materials. A standard should include associated test methods to assure reasonable compatibility of materials.

(9) *Thromboembolism.* Ventriculo-atrial shunts, in particular, present the potential for thrombus formation which may block a blood vessel resulting in a life-threatening infarction and the need of revision surgery. A standard should address the risk of thromboembolism by establishing requirements and associated test methods to ensure reasonable freedom from thrombus formation.

Summary of the Data Supporting the Need for a Performance Standard

The need to establish a performance standard for the central nervous system fluid shunt and components is based on information from several sources. These sources include FDA's advisory committee, reports in professional medical journals, a contract study by the University of Missouri on the design and functon of shunt valves (Ref. 13), a comprehensive literature search on neurosurgical implant devices conducted for FDA under another agency contract (Ref. 14), reports received through the agency's Device Experience Network (DEN), and information submitted to FDA under 21 CFR Part 803, the agency's regulations governing medical device reporting. FDA believes that the data presented in this notice support the need for a performance standard to address the risks described under the section of this notice "Risks Associated with the Device and Which are to be Controlled by a Performance Standard."

The Neurological Devices Panel summarized the reasons for recommending that FDA classify the

VOL
51
ISS
38
FE
26
1986
UMI

central nervous system fluid shunts and components into class II (see 43 FR 55714, 55715). The Panel made its recommendation because the Panel members believed that there is sufficient information available to establish a performance standard that will assure the safety and effectiveness of the device. Shunts have been used for many years to treat hydrocephalus. Hydrocephalus is a condition, usually in children, characterized by an accumulation of cerebrospinal fluid in the head. The cerebrospinal fluid causes the head to enlarge and may produce brain damage by fluid pressure. The Panel members believed that the characteristics of the central nervous system fluid shunt and components are reasonably well established and that the conditions being treated are reasonably well understood. Although the Panel believed that the materials that have been used in the device are generally regarded as safe, it recommended the establishment of standards to ensure consistency in the composition of the materials.

In addition, the Panel members believed that it is important for the physician to know the pressure-flow characteristics of the valves used in shunts, to compare available valves, and to select the correct valve for a particular patient. Accordingly, the Panel recommended that the manufacturers of shunt valves be required to state, in standard form, the pressure-flow characteristics of their valves and to use standard test procedures to obtain measurements of those characteristics.

The Panel members believed that general controls will not provide sufficient control over the characteristics cited above; that a performance standard will provide reasonable assurance of the safety and effectiveness of the generic type of device, which includes internal, totally implanted shunts; external temporary devices that drain cerebrospinal fluid to an external receptacle; and components of both internal and external shunts.

The Panel based its recommendation in part on a review of the literature on fluid shunts. The published literature shows that the use of shunts is associated with relatively high death rates and mental retardation rates. These rates are lower, however, than the death rates and mental retardation rates for patients with untreated hydrocephalus. For example, Milhorat reported that the death rate for patients with untreated hydrocephalus is 40 to 70 percent, compared with a death rate of 5 to 35 percent for patients treated with ventriculo-atrial shunts (Ref. 1). The mental retardation rate among survivors with untreated hydrocephalus is 50 to 85 percent compared with a mental retardation rate of 20 to 50 percent among treated survivors (Ref. 1).

The use of central nervous system shunt products for treating hydrocephalus has been accompanied by a large number of complications. The complications vary depending upon the shunting technique and the anatomical site to which the cerebrospinal fluid is delivered. Complications common to most shunting techniques include obstruction or malfunction of the shunt, infection, and tissue reaction, e.g., formation of a fibrous sheath around the catheter or erosion of tissue over the shunt (Refs. 1, 5, and 7).

Ventriculo-atrial shunts have been associated with unique cardiopulmonary complications attributed to the placement of one end of the catheter in the blood stream. Among these complications are pulmonary emboli caused by clotting at the catheter tip or by breakage or separation and release of the catheter into the blood stream (Refs. 1, 2, and 3), and perforation of the heart wall by the catheter tip (Refs. 1 and 3). Glomerulonephritis (inflammation of the kidneys) has been reported in patients with ventriculo-atrial shunts (Ref. 4). Ventriculo-peritoneal shunts also have been associated with unique complications, such as perforation of the bladder or other organs by the catheter tip (Refs. 8, 9, and 10), development of inguinal (groin) hernias (Ref. 8), intra-abdominal cysts (Refs. 6 and 8), and ascites (cerebrospinal fluid collection in the abdominal cavity) (Ref. 6). Lumbo-peritoneal shunts have been associated with scoliosis (deviation in the straightness of the spine), leg pain or atrophy, and restricted back movement (Refs. 11 and 12). The Panel members believed that there have been few reports of complications associated with the use of ventriculo-ureteral, ventriculo-lymphatic, and ventriculo-pleural shunts because these methods are rarely used.

In 1979, the University of Missouri conducted an FDA-sponsored contract study on the central nervous system fluid shunt and components. The study's specific objectives were: (1) Preparation of a comprehensive critical review of the scientific literature that is directly applicable to the design and function of all shunt valves; (2) determination of the kind of test (or tests) that is necessary and sufficient to demonstrate that a given valve will perform its intended function; (3) identification of valve characteristics or parameters that appear to be of primary inportance to the prescribing physician in his or her selection of the proper device for the patient; (4) the design and documentation of simple, practical, and economical test methods which can be used to measure the characteristics and parameters that are found to be of primary importance; (5) a review of the findings and proposed test methods by independent experts, industry representatives, representatives of voluntary (consensus) standards groups, and others in an open seminar; and (6) the preparation of a final report which draws conclusions based on an analysis of the literature and comments obtained during the seminar (Ref. 13).

The University of Missouri reported that hydrocephalus shunt failures are usually associated with one of the following device complications:

(1) Blockage of shunt components (catheters, valves, connectors).

(2) Disconnection and separation of shunt components.

(3) Hydraulically and mechanically mismatched valves:

(i) Over drainage, which may produce ventricular collapse, hemorrhage, and over-riding of cranial sutures;

(ii) Inadequate drainage, which produces elevated ventricular pressure and the symptoms associated with hydrocephalus.

(4) Infection or inflammatory response of the host.

(5) Corrosion, abnormal calcification, and deterioration of the materials.

The contract study reports that very little quantitative data in the literature relate to blockage of shunt components or disconnection and separation of the components. The report also concludes that, according to the literature, infection or inflammatory response of the host and corrosion, abnormal calcification, or deterioration of the materials used in the shunt valves may be managed by using proper aseptic procedures and by selection of appropriate shunt materials. The complications associated with mismatched valves, however, have been seriously compounded by the lack of uniform standards on the pressure-flow characteristics of shunt valves. According to the study, most valves are described by the closing pressure of the valve and there is considerable overlap between the definitions of common pressure ranges used by various manufacturers. The results of flow tests performed by several investigators showed that the flow characteristics within each class (low, medium, and high flow) varied dramatically between

valve types. Such vastly different flow characteristics between similarly labeled devices indicate a need for standard test methods for pressure-flow characterization of shunts.

The University of Missouri also conducted research on shunt test methods. The contract study indicates that pressure-flow characteristics of shunt valves were determinable by two steady state flow tests: (1) Fixed pressure and flow measurement and (2) fixed flow and pressure measurement. Both methods may be used and, if the measuring equipment is properly selected, should produce the same results. The University of Missouri concluded, however, that such tests do not provide information respecting the performance characteristics of valves in a dynamic environment. The study notes that when designing tests to evaluate the shunt flow characteristics, the following need to be considered:

(1) The shunt assembly transfers fluid between two fluid reservoirs in which the pressures are not steady;

(2) The volume of fluid which is to be transferred by an assembly varies considerably from case to case, but is nearly always in the range of 0 to 2 milliliters per minute;

(3) The pressure within the ventricular cavity is to be maintained within desired limits (usually considered to be 80 to 180 millimeters of water depending on the size and age of the patient); and

(4) The test fluid should have physical properties which can be accurately related to the properties of cerebrospinal fluid.

The University of Missouri purchased five identical shunts from five manufacturers of the device product. The shunts were assembled according to manufacturers' instructions and tested under both steady state and dynamic test conditions. Graphs were plotted for both steady flow and dynamic flow pressure-flow data. A seminar on hydrocephalus shunts was held by the FDA contractor on April 20, 1980, to review these shunts and aspects of steady and dynamic bench test methods. The contract study contains: (1) A description of the equipment and test procedures, (2) data from the bench test of commercially available shunts, (3) a discussion of the test results, (4) conclusions on the value of the proposed bench tests, and (5) recommendations concerning appropriate labeling for cerebrospinal fluid shunt systems. Based on these findings, a standard bench test method was proposed for determining the dynamic pressure-flow characteristics of a shunt assembly.

The contract study concludes that based on an analysis of the literature and on comments obtained during the seminar, dynamic state testing as well as the previously established steady state test methods are necessary to characterize valve performance.

Under another FDA contract, a literature search was performed on neurosurgical implant devices (Ref. 14). The portion of the report of the literature search pertaining to the central nervous system fluid shunt and components identified a number of complications associated with the use of the device. The major complications are summarized below according to the frequency with which the complication was noted in the literature searched (generally in the order from the most to the least often noted).

(1) Obstruction of flow of the cerebrospinal fluid resulting in elevated intracranial pressure was reported most often. The purpose of the surgical procedure is to relieve elevated intracranial pressure; therefore, obstruction of flow returns the patient to the original condition that the surgical procedure was intended to relieve.

(2) Infection is reported often as a major complication and concern of surgeons. An otherwise successful surgical procedure with early indications of patient recovery is complicated with the onset of infection, an event often requiring revision procedures.

(3) Inappropriate dynamic flow characteristics of shunts and their components was cited as a common concern. Many of the components are similar in purpose, if not in design and function; therefore, many of the adverse effects associated with shunts can be related to the pressure-flow characteristics of the device implanted in the patient.

(4) Disconnects, or fracture, of the components comprising the shunt system are a major complication. Loss of integrity of the flow system may result in elevated intracranial pressure, insufficient ventricular volume, or migration through the body of components (or pieces of components in the case of fractures). Pieces of components, or even the components, are difficult to identify in revision surgery in the absence of radiopaque markers.

(5) Perforation of body organs, or body tissue, is caused by hard shunt materials or sharp edges remaining on components. Perforation of the kidney by the ventriculo-peritoneal shunt is often noted. This complication, which requires revision surgery to correct may not be readily diagnosed in the absence of radiopaque markers.

(6) Nonbiocompatible shunt and component materials leading to a toxic reaction or high fever developing in the patient was expressed as a major concern. The use of nonbiocompatible, or marginally biocompatible, materials results in a complication correctable only by revision surgery.

(7) Skin erosion by the shunt subcutaneously implanted at the head/neck region was commonly noted in the literature. Corrective surgery is indicated for this complication which may lead to infection.

(8) Thrombosis is a concern often noted in the literature for ventriculo-atrial shunts because the distal portion of a ventriculo-atrial shunt is inserted into the jugular vein or through one of its branches into the right atrium of the heart. The use of non-thrombo-resistant materials in the distal component of these shunts may lead to thrombosis.

Based on the contract studies (Refs. 13 and 14), FDA concludes that the data support the need for a standard and that sufficient information and data exist to develop a performance standard that will provide reasonable assurance of the safety and effectiveness of the central nervous system fluid shunt and its components.

FDA concludes that the data support the need for characterizing the pressure-flow characteristics of central nervous system fluid shunt products using standard test procedures so that the physician may compare available device products and select the product which best resolves the patient's condition. Also, a shunt product needs to correct the imbalance in the rate of a patient's cerebrospinal fluid formation and drainage to yield a "normal" net accumulation of fluid within the cerebral ventricles to return the patient to a near normal physiological condition. For these reasons, FDA believes that pressure-flow values included in the labeling for the device need to be defined under conditions simulating the dynamic characteristics of the human body and that a standard for the device should so provide.

In addition, based on retrospective studies of patient populations, FDA concludes that common failure/defects of the central nervous system fluid shunt and components relate to disconnection, dislocation, migration, catheter kinking, device rupture, tissue or organ damage, infection, and tissue reaction adjacent to the device. FDA believes that a standard needs to address such risks to provide reasonable assurance of the safe and effective performance of the device when implanted into the human body.

VOL 51
ISS 38
FE 26
1986
UMI

Under FDA's Device Experience Network (DEN) and the agency's medical device reporting (MDR) regulations (21 CFR Part 803), FDA receives reports on medical devices when a death, serious injury, or malfunction of a device occurs. The DEN system is voluntary, which limits the reliability of the data and does not provide quantitative information. The MDR regulations are mandatory and require a report whenever a manufacturer or importer of a device receives or otherwise becomes aware of oral or written information that a device may have caused or contributed to a death or serious injury, or malfunctioned and if the malfunction were to recur, it would be likely to cause or contribute to a death or serious injury.

FDA has reviewed recently received DEN and MDR reports to identify deaths, serious injuries, and malfunctions associated with the device. Eighteen DEN reports were received and provided specific information on labeling (three reports), infections (three reports), tissue trauma (one report), fractures (one report), connections (three reports), valve malfunctions (five reports), and radiopacity (two reports). Sixteen MDR reports were received and classified under the MDR regulations as malfunctions (11 reports) and serious injuries (5 reports). No deaths were reported to date. The MDR reports are initial reports submitted over a period of 12 months following the effective date of the MDR regulations. The trend of both the DEN and MDR reports confirms the findings on the safety and performance of vascular grafts previously reported under the FDA classification proceedings data discussed above and FDA contract safety and performance study.

Invitation for Offers to Submit Existing Standards

In accordance with section 514(c)(1)(A) of the act and § 861.20(c), FDA invites any interested person, including any Federal agency, to submit by April 28, 1986, an existing standard as a proposed performance standard for the central nervous system fluid shunt and components. Any such person may also submit pertinent portions of an existing standard, including completed portions of any standard that is under development.

FDA has identified two voluntary standards that are applicable to the central nervous system fluid shunt and components: The American Society for Testing Materials (ASTM), ASTM F647-79, "Standard Practice for Evaluating and Specifying Implantable Shunt Assemblies for Neurosurgical Application" (Ref. 15); and the International Organization for Standardization (ISO), "Draft Proposal ISO/DP 7197, Implants for Surgery—Neurosurgical Implants—Shunt Assemblies" (Ref. 16).

ASTM F647-79 is intended to establish minimum requirements for the assurance of safety and effectiveness for implantable shunt assemblies. This voluntary standard establishes requirements for the evaluation and specification of implantable shunts relating to flow, direction of flow, materials, radiopacity, mechanical properties, finish, sterility, and labeling. Devices to which the standard is applicable include, but are not limited to, those that are: (1) Temporarily implanted to provide external drainage; or (2) permanently implanted to shunt cerebrospinal fluid from (a) a cerebral ventricle, (b) a cyst, (c) the subarachnoid space, or (d) the subdural space, to the peritoneal cavity, the venous circulation, or some other suitable internal delivery site. Although ASTM F647-79 includes a test method for the evaluation of pressure-flow characteristics of shunts or shunt components, it does not include specific pressure-flow requirements.

Draft proposed ISO/DP7197 is intended to provide definitions of terms pertaining to neurosurgical shunt assembly implants means of size designation, and the evaluation of shunt performance. This draft voluntary foreign standard includes, but is not limited to, devices that are: (1) Temporarily implanted to provide external drainage; or (2) permanently implanted to shunt cerebrospinal fluid from (a) a cerebral ventricle, or (b) the subarachnoid space, to the peritoneal cavity, the venous circulation or right atrium of the heart, an intracranial bypass, or some other suitable internal delivery site. According to this draft voluntary foreign standard, the components which, individually or in combination, comprise shunt assemblies are: inflow catheters, outflow catheters, connectors, reservoirs, antisyphon devices, valves, valved catheters, and other accessory devices. The draft standard includes provisions respecting definitions, type and size designations, materials, finish, freedom from extraneous matter, sterility, performance, packaging, instructions for use, and marking requirements and test methods.

The ASTM national and ISO international standards provide many useful and worthwhile concepts regarding the central nervous system fluid shunt and components, but the agency does not believe that these standards in their current forms would be acceptable as performance standards to assure the safety and effectiveness of the device. The reason for this finding is that the standards do not establish minimum, or reasonable, performance requirements for these devices or cover specific pressure-flow requirements pertaining to these devices. FDA advises, however, that all, or parts, of these existing standards may be submitted as a proposed performance standard because these standards contain relevant concepts that would be considered in the development of a standard for the central nervous system fluid shunt and components.

Section 861.24 sets forth the conditions under which FDA may accept an existing standard or a standard under development as a proposed performance standard. Accordingly, FDA advises that any such submission is to include the following:

1. A description of the procedures used to develop the standard and a list of persons and organizations that participated in, or in the event the standard is under development, to the extent that such information is available or reasonably obtainable;

2. An identification of the specific portions of the existing standard, or standard under development, that the person submitting the standard believes are appropriate for adoption as, or inclusion in, the proposed standard;

3. A summary of the test data and other information, including rationales, necessary to support each specific portion of the standard identified by the person submitting the standard. More detailed information may be requested concerning certain portions of the standard if FDA determines that the summary is inadequate.

In accordance with section 514(d)(2) of the act, if an existing standard or one that is under development is submitted to FDA in response to this notice and FDA does not accept the standard, the agency will publish a notice of that fact together with the reasons therefor. In accordance with § 861.24(b), if an existing standard or one that is under development is submitted to FDA in response to this notice and FDA accepts the standard, or accepts the standard with modification, as a proposed standard, the agency will publish a notice of that fact. FDA advises that in the latter event, it may publish the notice as a notice of proposed rulemaking to establish a performance standard under section 514(g) of the act and § 861.20(e)(1). FDA expects to make such determination and publish the notice of its decision within 180 days after the close of the comment period on this notice.

Invitation for Offers to Develop Proposed Standards

In accordance with section 514(c)(1)(B) of the act and §§ 861.20(c) and 861.22, FDA invites any interested person, including any Federal agency, to offer by April 28, 1986 to develop a performance standard for the central nervous system fluid shunt and components, as described in this notice, to control the risks associated with the device.

Section 514(c)(3) of the act sets out certain criteria applicable to any offeror. Section 514(e)(3) of the act provides that if an offer is accepted, FDA may, upon application which may be made before the acceptance of the offer, agree to contribute to the offeror's cost in developing a proposed standard if FDA determines that such contribution is likely to result in a more satisfactory standard than would be developed without such contribution. Therefore, in accordance with section 514(c)(3) and (e) of the act and § 861.26, FDA advises that any offer to develop a proposed performance standard is to include:

1. Information on the offeror's expertise and experience that qualifies the offeror to develop the standard.

2. Sufficient information on the offeror's financial stability to establish its capability to conduct adequate standards development either with or without contribution by FDA to the offeror's costs. Any request for contribution by FDA to the offeror's cost of developing the standard is to include:

(i) A list of the items of expense for which contribution is sought and the amount requested for each item;

(ii) A justification of each item of expense, including an explanation of how the contribution is likely to ensure development of a more satisfactory standard;

(iii) A statement that the offeror will employ an adequate accounting system (one in accordance with generally accepted accounting principles) to record the costs and expenditures allocable to development of the standard; and

(iv) A statement requesting an advance payment of funds, if necessary to enable the offeror to meet operating expenses during the development period.

3. Information relating to any potential conflicts of interest on the part of the offeror, its directors or officers, or any employees or consultants who may particpate in the development of the standard, including any financial interest in the particular device or in the device industry generally, current industrial or commercial affiliates of the offeror, current sources of financial support for research, and all business entities in which the offeror has a financial interest that may be relevant to the offeror's qualifications to develop a standard for the particular device.

4. Information regarding the offeror's compliance with Federal, State, and local environmental regulations.

5. A detailed description of the procedures the offeror intends to utilize in developing the standard.

6. A description of how the offeror intends to provide interested persons adequate and reasonable notice of their right and opportunity to participate in the development of the standard.

7. A description of the method whereby interested persons who respond to the notice may participate, either in person or through correspondence, in the development of the standard.

8. A statement describing the facilities or equipment the offeror intends to utilize in developing the standard, and how the offeror intends to gain access to them.

9. An estimate of the time required to develop the standard, including a detailed schedule for each phase of the procedure.

10. A description of the method the offeror intends to use or has used to acquire test data or other information needed to support the standard.

11. A description of the method the offeror intends to use to maintain records of the development of the standard and other relevant matters and to make such records available for disclosure during development, and a schedule for meeting the periodic reporting requirements of § 861.30(b).

FDA advises that under section 514(c)(3) of the act and § 861.26(b), information included in an offer to develop a proposed standard is to be made available to the public only if the offer is accepted (except for information exempt from disclosure under 21 CFR 20.61), or if disclosure is required under 21 CFR Part 20.

Time Period to Develop a Standard

FDA estimates the time period to develop a proposed standard and rationale for the central nervous system fluid shunt and its components will be 2 years. The 2-year period may be extended by the Commissioner for good cause shown.

Acceptance by FDA

As required by section 514(e)(1) of the act and § 861.28(a), in determining whether to accept an offer to develop a performance standard, FDA will evaluate the qualifications of the offeror on the basis of the offeror's expertise, experience, financial stability, and potential conflicts of interest. In choosing among competing offerors, the offeror without any financial interest in the particular device for which a proposed standard is sought or in the device industry generally will be preferred, all other things being equal. More than one offer, however, may be accepted.

As required by section 514(e)(2) of the act and § 861.28(c), FDA will publish in the **Federal Register** the name and address of each person whose offer to develop a standard is accepted and a summary of the terms of the accepted offer, including a statement of the extent to which FDA will contribute, if at all, to the cost of developing the proposed standard. As required by section 514(e)(5) of the act and § 861.28(d), if FDA does not accept an offer, the agency will publish in the **Federal Register** a notice of that fact and the reasons for its decision.

Future Actions

Following the expiration of the 60-day time period provided by this notice for interested persons to submit an existing standard or to develop a proposed standard, FDA will:

1. Authorize a Federal agency to develop a proposed performance standard if FDA determines that a performance standard can be developed by a Federal agency, based on the personnel, expertise, and resources of the agency; or

2. Accept an existing standard as a proposed performance standard or as a basis upon which a proposed performance standard may be developed provided FDA determines that such standard is based upon scientific data and information and has been subjected to adequate scientific consideration. An existing standard may be one that is submitted in response to the invitation for standards, or it may be a standard that has been issued or adopted (or is being developed) by any Federal agency or any other qualified entity; or

3. Accept one or more offers to develop a proposed standard; or

4. Proceed to develop a proposed standard; or

5. Take other appropriate action to facilitate development of a performance standard for the device.

The agency has determined under 21 CFR 25.24(e)(3) (April 26, 1985; 50 FR 16636) that this action is of a type that

VOL 51 ISS 38 FE 26 1986 UMI

does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

In any notice of proposed rulemaking that includes a proposed performance standard for the central nervous system fluid shunt and components, FDA will announce its initial determination whether the proposed rule is a major rule under Executive Order 12291 and will consider the requirements of the Regulatory Flexibility Act (5 U.S.C. 601–612). Until the provisions of any proposed standard are known, FDA cannot determine the economic consequences of the promulgation of such standard.

Part III

Department of Transportation

Office of Commercial Space Transportation

14 CFR Ch. III

Commercial Space Transportation; Licensing Regulations; Interim Final Rule and Request for Comments

VOL 51 ISS 38 FE 26 1986 UMI

DEPARTMENT OF TRANSPORTATION

Office of Commercial Space Transportation

14 CFR Ch. III

[Docket No. 43810]

Commercial Space Transportation; Licensing Regulations

AGENCY: Office of Commercial Space Transportation, DOT.

ACTION: Interim final rule and request for comments.

SUMMARY: This interim final rule amends Title 14, Code of Federal Regulations, by adding a new Chapter III that sets forth the regulations governing commercial space transportation. The Commercial Space Launch Act of 1984, Pub. L. 98–575 (the Act) authorizes the Secretary of Transportation (the Secretary) to oversee and coordinate commercial launch activities. The Secretary's mandate embraces the authority to license and otherwise regulate such activities, consistent with public health and safety, the safety of property, and the national security and foreign policy interests of the United States, as well as the responsibility to exercise this authority in a manner that encourages, facilitates and promotes a commercial space transportation industry. The Department of Transportation (the Department) is currently implementing its authority in this area through a policy statement published by the Office of Commercial Space Transportation (the Office) on February 25, 1985. Recognizing the need for detailed regulatory guidance upon which prospective applicants can immediately rely, the Office is replacing that policy statement with new regulations. The regulations establish general procedures for the Office, set forth policies and procedures for licensing commercial launch activities, and prescribe general standards and information requirements for launch license applications. Taken together, these provisions constitute the Office's administrative framework for ensuring safe and responsible commercial launch activities and eliminating regulatory obstacles to the development of private launch and launch support services.

DATES: This interim rule becomes effective February 26, 1986. The Office is interested in receiving comments, which should be received by April 28, 1986.

ADDRESS: Comments should be submitted to the Documentary Services Division, Attention: Docket Section/C-55, Room 4107, Docket Number 43810, U.S. Department of Transportation, 400 Seventh Street SW., Washington, DC 20590.

Comments received will be available for examination at the above address, between 9:00 a.m. and 5:00 p.m., E.t., Monday through Friday, except Federal holidays. Receipt of comments will be acknowledged only if a self-addressed, stamped postcard is included with the comment. All written comments received on or before the comment period closes will be considered before these rules are made final.

FOR FURTHER INFORMATION CONTACT: Gerald Musarra, Office of the General Counsel, U.S. Department of Transportation, 400 Seventh Street SW., Room 10424, Washington, DC 20590, (202) 426-4723.

SUPPLEMENTARY INFORMATION:

Background

Section 7 of the Commercial Space Launch Act grants the Secretary authority to license commercial launch activities. Section 9 authorizes the Secretary to prescribe the form and manner for license applications and to establish procedures and timetables that will expedite the review of applications and reduce applicants' regulatory burdens. These statutory provisions are presently being implemented by a policy statement published February 25, 1985, by the Office of Commercial Space Transportation. Intended as interim guidance for license applicants, the policy statement outlined the contours of the regulatory framework developed by the Office to accommodate the broadest range of proposals for private launch activities and to safeguard important national interests associated with those activities. These interests are stated explicitly in the Act: public health and safety, the safety of property, national security interests and foreign policy interests of the United States. The licensing process described in the policy statement addressed these concerns through two reviews, Launch Safety Review and Mission Review. Additionally, the policy statement provided for streamlined inter-agency consultation procedures that would assure fast, well-defined reviews by those Federal agencies with expertise or authority relating to a proposed launch activity.

The Office provided the public with an opportunity to comment on the policy statement and, in developing the interim rule, carefully considered the comments received. The interim rule represents a more detailed and refined treatment of the licensing concepts first introduced in the policy statement and reflects the Office's greater practical experience with licensing issues.

Because comments were taken on the policy statement and because prospective applicants need to have more specific guidance in effect, the Office has determined that notice and further comment prior to issuing these regulations is unnecessary and impracticable. However, comments are invited on these regulations and the Office will make necessary and appropriate changes to the regulations in light of comments received.

Comments on the Policy Statement

The Office received 22 comments on the policy statement. Of this total, 14 were submitted by private individuals, three from launch companies, two from trade associations, one from a rocket motor manufacturer, one from a Federal agency and one from a trade newsletter. In addition, by letter dated April 4, 1985, the Chairman of the Advisory Committee on Commercial Space Transportation transmitted to the Secretary the following recommendation adopted during a meeting of the Committee held on March 28, 1985: "Recognizing that each member of the Committee can submit comments on the "Notice of Policy and Request for Comments" on the "Licensing Policy for Commercial Space Activities," the Committee as a whole supports the thrust and direction of the policy and recommends that it be adopted by DOT."

Mission Review

A significant number of commenters (19) expressed concerns about Mission Review. Some suggested that, to the extent the Federal Government's interest in the nature of private launches and payloads arises from U.S. ratification of multilateral space treaties (in particular, the Outer Space Treaty, 18 U.S.T. 2410, 610 U.N.T.S. 205, and the Liability Convention, 24 U.S.T. 2389), such ratification was unwise and those treaties should be "scrapped." Still others argued that the sole purpose of these treaties is to establish responsibility and accountability for space activities and for possible damages resulting from those activities. These comments contended that responsibility/accountability and liability for damages are purely safety concerns. As such, according to these respondents, they provide no basis for any Federal interest in the mission review factors specified in the Notice. Safety concerns, they maintained, could be more than adequately addressed in the context of Launch Safety Review.

Other objections to Mission Review were directed more to the provisions of the Act itself. These comments asserted that the Act fails to define precisely what is meant by the recurring phrase "national security interests and foreign policy interests." One commenter expressed concern that uncertainties created by undefined references to national security and foreign policy interests could have a substantially chilling effect upon the exercise of protected First Amendment rights. That is, news media organizations seeking to place satellites in orbit or to lease transponder capacity might be deterred due to this concern. Specifically, such uncertainties could thwart efforts to secure commitment of the substantial amounts of investment capital needed for the launch activities associated with such undertakings. Thus, this legislative vagueness could indirectly deter the exercise of constitutionally protected activities involving news gathering and distribution. In this context, the commenter asserted, Mission Review could ultimately become a vehicle for effecting prior restraint on free speech.

The Department of Transportation can unilaterally identify in advance only general examples of U.S. foreign policy or national security interests relevant to commercial space launch activities.

The Act expressly commits to the Departments of State and Defense, respectively, responsibility for defining such interests in the context of individual license applications and for informing the Secretary of Transportation of their significance. It is not intended or anticipated that national security or foreign policy interests would be casually invoked by these agencies as a reason for preventing a launch.

Two commenters expressed concern about the process, mandated by the Act, whereby other Federal agencies are consulted on aspects of individual license applications. They expressed some apprehension that these consultations might not occur in good faith and that they may provide a means by which agencies conducting their own commercial space activities could protect their competitive interests.

Given its charter to foster a healthy environment for commercial growth, the Office intends to ensure that Mission Review affords no such opportunity. The Office is directed by the Act to utilize the expertise of other agencies where appropriate. The Act specifically mandates only two specific consultations, the State Department's role in issues affecting foreign policy and the Defense Department's role in matters of national security. Other consultations are left to the discretion of the Office, as it deems appropriate or necessary. These could include assistance requested of the Federal Communications Commission regarding a foreign telecommunications satellite or of the National Aeronautics and Space Administration concerning a proposed mission's effect on existing spacecraft. Mission Review is designed expressly to prevent the interagency review process from becoming an unbridled opportunity for agencies to judge, in areas beyond their particular competence, whether proposed launch activities conflict with national interests.

One commenter suggested that the Office's jurisdiction to weigh national security and foreign policy interests in connection with private space launches does not encompass factors associated with the operations of a payload to be launched. This interpretation is grounded in the language of the Act which gives the Office authority for the launch of a payload but is silent on matters relating to the operation of a payload in orbit. This commenter suggested that the Office's regulatory procedures focus only on the national security and foreign policy implications attending the proposed launch of a payload and not on the payload's operation in orbit.

We question this interpretation, both as a matter of law and in terms of its practical effect. The Act gives the Office authority to determine whether the launch of a payload is inimical to the national interests specified in the Act and does not exclude any relevant factor from the Office's consideration. Thus, the Office will exercise its authority by determining whether any circumstances exist under which the proposed launch of a payload would jeopardize national interests.

Two other commenters who objected to specific aspects of Mission Review expressed concern that it constitutes a requirement for a separate review of each payload in routine launches. Again, this is not the purpose of the review nor do we believe it will have this effect. The Office will make this activity routine to the maximum extent possible. Mission Review focuses chiefly upon aspects of launch proposals not previously considered in the licensing process. Its aim is to provide regulatory certainty for both license applicants and agencies.

Moreover, Mission Review is designed as a means for enabling prospective applicants to ascertain, in the initial stages of commercial planning, whether any problems might exist for a new payload concept. As such, the procedure for obtaining payload determinations or actual approvals for a launch license is designed expressly to avoid situations in which significant capital might be committed to launch proposals which ultimately cannot be implemented. The procedure encourages early consultation with the Office to identify problems with a launch proposal and to thereby avoid any negative investment consequences. One commenter articulated a concern that, if applied to each payload, Mission Review could have an especially devastating effect upon the development of reusable commercial launch vehicles, especially those whose primary payloads may consist of propellants, materials, and components used to support ongoing activities in space (such as space stations). We agree. The growth of commercial airlines, trucking companies or railroads would have been hindered if every item of cargo required Federal approval. Again, Mission Review will not interfere with routine space activities which do not adversely affect the national interests specified in the Act.

Vehicle Reliability

One commenter raised questions regarding vehicle reliability, vehicle and payload hardening, and certification. The concept of vehicle certification and its relationship to public safety was addressed by the Senior Interagency Group/Space Working Group tasked with developing the assignment of a "lead agency" for commercial launch industry promotion and regulation, and subsequently by the Department as part of its development of the licensing process. Both efforts concluded that for the present, public safety with unmanned launch vehicles was best addressed by continuing the current practice of ensuring that adequate safety resources and procedures are in place to protect the public in the event of any unexpected vehicle failure. At the same time, the Office is initiating a major research effort directed toward identifying appropriate safety standards for launch activities where the United States Government may be neither range operator nor mission sponsor. Should this research identify other effective, less burdensome alternatives to protecting public safety, such alternative approaches will be given appropriate consideration.

Consultation

One commenter expressed concern that the discussion in the policy statement of interagency coordination of license applications seemed to indicate that the Secretary of Transportation has the final determination in those cases

VOL 51
ISS 38
FE 26
1986
UMI

where the Act's consultation requirements fail to produce agreement. This commenter noted that the only section of the Act in which Congress made its intent clear in this regard involves the Secretary's ultimate authority under section 8(a) to establish the regulatory framework for commercial launch licensing. According to this commenter, the accompanying report, however, rather than the Act itself, clarifies Congress' intentions vis-a-vis section 8(a).

The Office believes this issue is more hypothetical than real. The Office works closely with the Defense and State Departments on all matters involving licensing of non-governmental space launch activities. No action by the Secretary of Transportation would derogate in any way from the Secretary of State's authority in matters involving foreign policy or from the Secretary of Defense's in matters involving national security. In the unlikely event of a genuinely irreconcilable disagreement between the Department and either of these agencies, the issue would be resolved in the same manner as any such matter is handled (including interagency disagreements over matters *not* subject to statutory consultation requirements): Through appropriate discussions within the Executive Branch.

International Agreements

Two commenters suggested that the policy statement may have failed to reference all of the international agreements to which the U.S. is party that cover space activities. These commenters suggested that consideration of U.S. international obligations should be a more prominent requirement for a launch license. The statement about U.S. treaty obligations in the policy statement was intended to illustrate the independent bases, beyond the requirements of the Act, for significant Federal interests in space launch activities by private citizens and by others for whom the U.S. has accepted responsibility. This statement was not intended as an exhaustive inventory of all such obligations. The Office recognizes that it and other Federal agencies have additional international responsibilities for space transportation, including compliance with procedures for registration of privately launched U.S. space objects. As legal authorities have repeatedly noted, however, the precise meaning of provisions in several of the treaties is unclear. As a result, a comprehensive list of all provisions of international law and treaty obligations which may apply to specific factual circumstances involving space activities by non-governmental entities cannot be compiled at this time. Thus, the regulations refer to international obligations in general.

Section-by-Section Analysis

Part 400—Basis and Scope

Section 400.1 indicates that the commercial space transportation regulations reflect both the Federal Government's domestic responsibilities for commercial launch activities and the Federal Government's international obligations, particularly its obligation under Article VI of the 1967 Outer Space Treaty to provide authorization and continuing supervision for such activities.

Section 400.2 stipulates that these regulations are intended to guide all United States launch activities except amateur rocket activities and the launch activities of the United States Government.

As stated in the initial policy statement on licensing, the Office's policies and procedures have been developed for the private commercial launch activities that are currently being proposed, but, consistent with the legislative history of the Act, provide adequate supervision for any other non-governmental launch activities as well. Thus, the launch activities falling within the scope of the Office's licensing and regulatory authority may include activities conducted for profit as well as those conducted for experimental or research purposes, or for any other purpose without an apparent profit motive. However, neither the Act nor its legislative history evinces an intention to require licenses for amatuer rocket launches, which number annually in the millions, and it is doubtful that such intention can be inferred. Further, these activities are currently subject to state and local regulation, self-regulation by the organizations sponsoring these activities, and Federal airspace requirements. In the Office's view, existing guidelines and requirements are adequate for protecting public safety, as well as any other national interests that may be associated with these activities. The Office requests comments specifically addressing this subject.

Part 401—Organization and Definitions

Section 401.1 identifies the operating unit within the Department with primary responsibility for implementing the Department's authority under the Act, the Office of Commercial Space Transportation. Section 401.3 identifies the Director of Commercial Space Transportation as the official within the Department to whom the Secretary's authority for commercial space transportation has been delegated.

Section 401.5 contains definitions of the major terms used in the regulations. The definitions of "launch" and "operation of a launch site" are intended to convey the complementary, but nevertheless distinct, nature of these two activities. A launch centers on the placement, or attempted placement, of a specified launch vehicle and/or its payload in a suborbital trajectory or in space. A launch license authorizes a launch to be conducted in order to achieve certain mission obectives. The license holder is legally responsible for the proper conduct of such a launch. Although a launch license would seem to be oriented toward singular events, one license could cover a specified series of launches where the same safety resources will support several identical or similar missions.

In contrast, the operation of a launch site involves continuing operations at a permanent location. A license covering such operations authorizes a person to operate a launch range facility and to offer approved services to launch companies for compensation or hire.

Part 404—Regulations and Licensing Requirements

The Commercial Space Launch Act establishes the regulatory framework for commercial launch activities. Section 9(b) of the Act directs the Office to issue a license once it has determined that an applicant meets the requirements for a license identified in section 8(a)(1) of the Act. These include requirements currently applied by Federal agencies to launch activities. If, however, the Office determines, in consultation with the appropriate agencies, that any such Federal requirement is not needed to protect public safety, the safety of property or the national security and foreign policy interests of the United States, then section 8(a)(2) permits the Office to eliminate that particular requirement as a requirement for a license. Moreover, section 6(b) authorizes the Office to prescribe new requirements specifically for commercial launch activities. Together these provisions confer broad authority upon the Office to craft the simplified regulatory framework intended by the Act.

If the Office wishes to either eliminate an existing Federal requirement or prescribe new ones in order to implement the provisions of the Act, a rulemaking must be conducted that would involve notice to and comment by the public. Part 404 of the regulations

sets out the procedures the Office will follow in conducting rulemaking proceedings and explains how interested parties may participate.

Section 6(c) of the Act gives the Office discretionary authority to waive a licensing requirement for a license applicant if that waiver would be in the public interest and would not jeopardize public health and safety, safety of property, or any national security or foreign policy interest of the United States. Part 404 also establishes procedures for waiver requests by individual applicants.

With regard to existing Federal requirements, the Office has determined that the only provisions with direct applicability to private launches are those of Part 101, Subpart C, of the Federal Aviation Regulations, 14 CFR 101.21–101.25, regulating all unmanned rocket activities. The Office of Commercial Space Transportation and the Federal Aviation Administration have agreed that, henceforth, requirements pertaining to the use of domestic United States airspace for commercial launch purposes will be handled by the Office as an intradepartmental matter on behalf of licensees.

It should be noted that the Office's safety authority extends to protecting workers at commercial launch sites. For the present, however, the Office will not prescribe any standards or requirements for worker safety in the context of licensed launch activities. Instead, the appropriate requirements of the Department of Labor's Occupational Safety and Health Administration will apply to privately conducted launch activities unless the Office determines that direct exercise of its safety authority in this area is appropriate. The Office requests comments specifically addressing the desirability of any future exercise of its safety authority in this area.

Part 405—Investigations and Enforcement

The Office will rely on the provisions of Part 405 to ensure compliance with the terms and conditions of licenses. Section 405.1 requires licensees to cooperate with anyone acting on behalf of the Office to monitor licensed activities or payload-related activities which are covered by section 6(b)(2) of the Act. Monitoring will be conducted in the least intrusive manner possible and only for the purpose of determining whether such activities conform to applicable requirements.

Section 405.3 deals with the modification, suspension or revocation of licenses. The Office may modify a license either on its own initiative or pursuant to a request by the licensee. All modifications must conform to the same standards, identified in the Act, that apply to initial licenses.

Paragraph (b) of § 405.3 indicates that an act of noncompliance with any requirement applicable to a licensed activity is grounds for suspension or revocation of a license. Moreover, § 405.5 provides for emergency orders to halt any launch activity detrimental to national interests, and § 405.7 provides that acts of noncompliance may be punishable by civil penalties.

With regard to the Director's emergency order authority, which is explicitly mandated by section 11 of the Act, the Office is aware of the concern, expressed through the Commercial Space Transportation Advisory Committee, associated with the exercise of this authority. One of the Office's major goals has been to encourage and promote the industry through carefully considered policies and procedures designed to eliminate, wherever possible, regulatory uncertainties. Thus, the Office wishes to emphasize that it views the exercise of this authority as an extraordinary measure to be relied upon in truly emergency circumstances.

Part 406—Administrative Review

Part 406 describes the Office's procedures for implementing the Act's administrative review provisions. Section 12 of the Act requires that an opportunity for a hearing be accorded persons seeking reconsideration of certain decisions concerning activities within the Office's responsibility. Specifically, persons who have applied for a license may challenge a decision not to issue a license or challenge the conditions attached to a license that has been granted. In addition, a person holding a license may dispute a decision to modify, suspend or revoke that license or to issue an emergency order. Similarly, a payload operator or owner may request a review of the facts or issues pertaining to a payload whose launch the Office has decided to prevent, as may a person against whom the Office has assessed a civil penalty. In these circumstances the Office will, if so requested, provide an opportunity for an impartial hearing on the matter at issue. Part 406 sets out the procedures governing the initiation and conduct of such proceedings.

Part 411—Policy

Part 411 establishes the policies of the Office of Commercial Space Transportation for licensing commercial launch activities, including launches, launch site operations, or some combination of the two activities. These policies augment the general application procedures set out in Part 413 of the regulations and the launch license review procedures contained in Part 415 of the regulations.

Section 411.3 identifies the two reviews, Safety Review and Mission Review, through which the Office will evaluate license requests for proposed unmanned launches. Requests for licenses authorizing manned launches may involve issues that require reviews different from or in addition to these two reviews. Although the Office will be responsive to license requests for manned launches, specific implementation of its authority in this area will be addressed in a future rulemaking.

It should be noted that the policy statement under which the Office is currently operating refers to "Launch Safety Review." The Office has decided to use instead the term "Safety Review" in order to avoid confusion with the launch safety approval that must be obtained by the vehicle operator from the appropriate range operator prior to launch.

In order to accord the industry both flexibility and certainty in the course of developing commercial launch proposals, the Office may conduct Safety Review and Mission Review independent of each other and in the order, sequential or concurrent, appropriate to the applicant's needs. For example, an applicant may secure approval for a proposed mission early in the planning stages of a launch activity and apply later for approval of the safety operations proposed to support an actual launch. The record upon which to base licensing decisions thereby can be developed in a manner that responds to the planning needs of applicants.

Section 411.3 also discusses requests for licenses authorizing the operation of commercial launch sites. Although such licenses are mandated by the Act, the interim rule was not specifically developed for implementing the Office's authority in that area. Devising an appropriate regulatory framework for commercial launch site operations involves careful consideration of a range of issues, particularly those relating to requirements or standards for implementing the Office's safety authority. The Office has begun investigating these issues and will initiate a separate rulemaking on this subject early in 1986.

At the same time, the Office has received a number of inquiries and expressions of interest in commercial

VOL 51 ISS 38 FE 26 1986 UMI

launch site operations and wishes to be responsive to any proposals that might be submitted in the near future. In order to do so, the Office will rely on its review process, discussed below, for evaluating the safety operations of launch license applicants as an appropriate framework for beginning to assess commercial launch site proposals.

Section 411.5 addresses safety approval. Safety Review is technical in nature and focuses only on an applicant's proposed safety operations. At present, there are no published safety standards or requirements applicable to safety operations conducted at sites other than Federal launch ranges. Therefore, pending completion of efforts to develop these standards or requirements, the Office will make case by case determinations regarding proposed safety operations conducted by commercial firms at non-government sites using all available resources including those of other Federal agencies.

Section 411.7 discusses mission approval. In the course of Mission Review the Office will assess the proposed launch from the standpoint of both the national interests and international obligations of the United States. The review will encompass such factors as the nature and purpose of the proposed payload, the impact of the payload on existing uses of space, and the proposed flight plan.

With specific regard to national security and foreign policy interests, the Office is required to consult with the Departments of Defense and State, the Executive Branch agencies with primary responsibility for safeguarding U.S. national security and foreign policy interests, respectively. The Office must ensure that these agencies are apprised of potential commercial launch activities in order that their views may be taken into account. However, the Office wishes to emphasize that, as a general matter, Congress has declared privately conducted commercial launches to be consistent with the national security and foreign policy interests of the United States. The Office also recognizes that the commercial viability of providing such services on a routine basis requires that review of proposed missions not be encumbered by unnecessary process. Therefore, the Office will not seek to determine *de novo* that each launch proposal is consistent with United States interests. Approval will be granted unless there is clear evidence that some aspect of a mission poses a distinct threat to national security or foreign policy interests.

The mission of most proposed orbital launches will be to place payloads in space; thus, the most significant part of Mission Review pertains to the payload to be launched. The Commercial Space Launch Act defines the Office's responsibility for payloads in the context of a licensed commercial launch activity: First, the Office is directed by section 6(b)(1) of the Act to determine whether any license, authorization, or permit required by Federal law has been obtained for the payload to be launched. For such payloads, the Office will not duplicate any review conducted by the agency with primary authority for addressing the Federal interests associated with a given class of payloads. This includes reviews by the Federal Communications Commission for telecommunications satellites, the Department of Commerce for remote-sensing satellites, and other Federal agencies for their own payloads.

Second, section 6(b)(2) of the Act provides the Office an effective mechanism for addressing issues pertaining to new payload classes not covered by existing Federal regulation. The Office is authorized to determine whether the launch of such payloads would jeopardize public safety, the safety of property, or any national security or foreign policy interest. If necessary, the Office may act to prevent the launch of the payload in question. The Office has carefully molded its policies and procedures in this area so that these Federal interests are not served at the unnecessary expense of commercial space enterprise. Thus, the Office will exercise its authority under section 6(b)(2) in a manner that minimizes regulatory uncertainties for those planning or sponsoring new space applications.

Section 411.9 discusses the information the Office will require applicants to submit in order to initiate the review of applications. The Office's approach to this information corresponds to its goal of fostering reliable, low-cost space transportation services. Commercial firms may develop new approaches to the design of launch vehicles, the delivery of launch services, or the location and organization of launch operations. Thus, the information requirements have been intentionally organized into general categories that identify the basic information needed to initiate a license application review. Although all the requested data must be provided for an application to be considered complete, the Office has not prescribed any particular format for submitting it. Submissions may reflect the structure or organization of launch operations as determined by the applicant. The Office is particularly interested in receiving comments that address both the form and content of the information requirements.

Part 413—Applications

Part 413 sets out general license application procedures. These procedures apply to all commercial launch activities, regardless of whether an applicant seeks a license to launch a vehicle, operate a launch site, or for a combination of the two. The application procedures in Part 413 are supplemented by the provisions of Part 415, which contains a detailed description of the review procedures and information requirements for launch license applications. A separate part has been reserved for future regulations addressing applications for licenses authorizing launch site operations.

Since the nature of a proposed launch activity affects the timing and scope of the Office's review, as well as the degree to which other Federal agencies will be involved, section 413.3 encourages prospective applicants to initiate preapplication consultations with the Office of Commercial Space Transportation.

Section 413.9 outlines the process for reviewing all applications. Section 413.9(a) states that applications should contain information that the Director of Commercial Space Transportation has prescribed for the type of application being submitted. For applications pertaining to launch licenses, the required information is set forth in Part 415. The Office views this information as basic to any proposed launch activity; in many cases, it may constitute virtually all the information needed to evaluate the application. To the extent that the Office requests additional information, it will be for novel, unconventional or unfamiliar launch or payload elements.

Section 413.9(b) states that an application is accepted for review by the Director if it is substantially complete, that is, if it contains sufficient information to make such review meaningful. Once an application is accepted for review, § 413.9(d) indicates that the Director will initiate an appropriate interagency review. The Office, not the applicant, will assume the burden of shepherding the application through the review process. Additionally, the reference in § 413.9(d) to an "appropriate" review is intended to make clear that the administrative response to an application may not be standard or uniform in all circumstances; the Office has taken great care to insure that each review is tailored to the application's particular characteristics. In this fashion, the Office intends to avoid any unnecessary regulatory stumbling blocks to proposed launch activities.

Part 413 does not provide for a fee to cover all or part of the costs involved in processing an application. However, the Office has not developed a final position regarding license fees. Comments are requested specifically addressing this subject.

Section 413.9(e) indicates that a determination on a license application will be made within 180 days of receipt. As a matter of policy, however, the Office intends to conduct all application reviews on a expedited basis and anticipates that most determinations will be made well before this statutory deadline.

All licenses issued will contain terms defining the activity authorized by the license and the person responsible for conducting that activity. In addition, conditions will be incorporated into all licenses to ensure compliance with statutory and regulatory requirements. Section 413.15 addresses certain standard conditions, including the need for an on-site mechanisum to verify that the licensed activity conforms to information that was submitted to and reviewed by the Office during the application review process.

The Act preserves the existing authority of Federal agencies with primary responsibility for payload regulation. At present, two Federal agencies, the Federal Communications Commission and the Department of Commerce, are the exclusive licensing authorities for telecommunications satellites and remote sensing satellites, respectively. Section 413.17 indicates that a license for the launch activity is separate from the license for the satellite itself, and thus, in these two instances, has no effect on the exclusive authority of the Federal Communications Commission and the Department of Commerce to issue licenses for such a satellite.

Section 413.19 establishes the applicant's responsibility for the continuing accuracy of information submitted as part of an application review.

Part 415—Launch Licenses

Part 415 establishes procedures for reviewing launch license applications and the general standards for approving such applications. The provisions of this part apply only to prospective launch license applications and should be read together with the general application procedures in Part 413. A future regulatory proposal addressing commercial launch site operations will establish procedures and standards specifically for license applicants seeking authorization for that activity in a separate part.

Section 415.3 identifies the proposed launch activities that will require a launch license. Any person proposing to launch from U.S. territory must obtain a license authorizing the launch. A U.S. citizen proposing to launch from any site, whether inside or outside U.S. territory, must also obtain such a license.

Section 415.5 identifies the two approvals that must be secured in order for a launch license to be issued: safety approval and mission approval. Safety Review and Mission Review are conducted to determine whether these approvals can, in fact, be given. Once secured, no other approval is required from the Office in order for an applicant to be granted a license for an unmanned launch.

The Office will accept applications for Safety Review, Mission Review, or for a determination that the launch of a payload covered by section 6(b)(2) of the Act will not be prevented, independent of one another and before submission of an application for a license. Section 415.7 makes clear that any approval or determination made on such applications will be made part of a licensing record. Thus, when an applicant does apply for a launch license, any approval or determination previously made that relates to the activity for which a license is sought remains valid. The Office will not duplicate a relevant review as long as no significant or substantial changes have been made in matters previously reviewed and approved.

Section 415.9 identifies standard conditions for launch licenses. One of these is purchasing third-party liability insurance coverage. The Office requested comments on third party liability issues in an Advance Notice of Proposed Rulemaking published May 7, 1985.

Subpart B of Part 415 focuses on Safety Review. Section 415.13 identifies the major elements of Safety Review: the proposed launch site, procedures, personnel and equipment. Section 415.15 notifies applicants that Safety Review can be requested either as part of the license request or before a license request is submitted. This provision responds to the need some prospective licensees may have for explicit approval of their safety operations at an early planning stage.

Section 415.17 identifies the information required for a Safety Review. It should be noted that launches from approved sites will be treated differently from those occurring at other sites. Approved sites include both Federal launch ranges and commercial sites operated under the authority of a license issued by the Office. At the present time, however, no licensees are authorized to operate a commercial launch site.

The information requirements for applicants proposing to launch from a site that has not been previously approved by the Office are considerably more detailed. In consultation with other Federal agencies, the Office has attempted to identify the components of safe launch operations for such applicants.

Subpart C of Part 415 focuses on Mission Review. Section 415.23 states that for Mission Review, as for Safety Review, applicants may request approval either as part of a license request or before such a request is made. With regard to required information, the nature of the proposed mission will, once again, affect both the nature and the quantity of information needed by the Office to conduct its review. For proposals which involve licensed payloads, the payload requirements of Mission Review will be satisfied by the issuance of a license by the responsible Federal agency. Proposals involving unlicensed or foreign payloads must be accompanied by more extensive information reflecting the more extensive review such payloads must receive from the Office.

Subpart D of Part 415 identifies circumstances wherein applicants may be required to submit information to the Office as part of Safety Review, Mission Review, or both, in order to satisfy the requirements of the National Environmental Policy Act. This information will be needed when some element of a proposal is not covered or addressed by existing environmental documentation on the effects of launch activities.

Executive Order 12291, Regulatory Flexibility Act, and Paperwork Reduction Act

The interim regulations were evaluated under Executive Order 12291, "Federal Regulation," dated February 17, 1981, and the Department of Transportation's Regulatory Policies and Procedures, dated February 26, 1979. The regulations are not considered to be "major," as defined by E.O. 12291, because they will not have an annual cost impact exceeding $100 million; they will not cause a major increase in costs or prices for consumers, individual

VOL
51
ISS
38
FE
26
1986
UMI

industries, government agencies, or regions; and they will not have a significant adverse impact on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. The regulations are considered to be "significant" as defined by the Department's Regulatory Policies and Procedures because of the novelty of space transportation as a private sector activity, the interest of the public and other Federal agencies, and the effect of the regulations on the competitive position of United States launch firms. The Office has prepared a Regulatory Evaluation to accompany these regulations which is available for public review and comment in the rulemaking docket.

The regulations are largely procedural in nature and are intended to eliminate regulatory obstacles to private launch firms, large or small. Small entities are likely to be involved in launch activities and, as a consequence, affected by the regulations. The regulations do not impose significant economic costs on them, however, and the economic benefits associated with the regulations are minimal. Therefore, it is certified that the regulations will not have a significant economic impact on a substantial number of small entities.

The regulations include information requirements that must be reviewed and approved by the Office of Management and Budget. Comments on the information requirements should be directed to the Office of Information and Regulatory Affairs; OMB, Attention: Desk Officer for the Department of Transportation; Office of Commercial Space Transportation.

National Environmental Policy Act

The Office has completed an environmental assessment of the commercial space transportation program. This programmatic assessment has not identified any significant impacts that the conduct of commercial launch activities would have on the human environment. However, certain factors associated with individual launch proposals were not addressed in the assessment and may require further review during the licensing process. These include use of new propellants, new site development, or environmental effects associated with some payloads in the event of a launch accident. The assessment is available for public inspection and the public is invited to comment on it. The assessment and any comments received may be inspected in the Documentary Services Division, Room 4107, Department of Transportation, 400 Seventh Street SW., Washington, DC, from 9:00 a.m. to 5:00 p.m. ET, Monday through Friday except Federal holidays. Copies of the assessment may be requested from: Office of Commercial Space Transportation, S-50, Washington, DC 20590. Comments will be accepted until March 28, 1986, and may be sent to: Documentary Services Division; Attention: Docket Section, Docket No. 43810, Department of Transportation, C-55, Washington, DC 20590.

List of Subjects in 14 CFR Ch. III

Administrative practice and procedure, Space transportation and exploration.

Accordingly, Title 14, Code of Federal Regulations is amended to add a new Chapter III, to read as set forth below.

(Commercial Space Launch Act of 1984; Pub. L. 98-575, October 30, 1984)

Issued in Washington, DC on February 19, 1986.

Madeline Johnson,

Director, Office of Commercial Space Transportation.

CHAPTER III—OFFICE OF COMMERCIAL SPACE TRANSPORTATION, DEPARTMENT OF TRANSPORTATION (PARTS 400-499)

SUBCHAPTER A—GENERAL

Part
400 Basis and Scope.
401 Organization and Definitions.

SUBCHAPTER B—PROCEDURE

404 Regulations and Licensing Requirements.
405 Investigations and Enforcement.
406 Administrative Review.

SUBCHAPTER C—LICENSING

411 Policy.
413 Applications.
415 Launch Licenses.

SUBCHAPTER A—GENERAL

PART 400—BASIS AND SCOPE

Sec.
400.1 Basis.
400.2 Scope.

Authority: Secs. 3, 6, 13 and 21, Pub. L. 98-575 (49 U.S.C. App. 2601 note).

§ 400.1 Basis.

The basis for the regulations in this chapter is the Commercial Space Launch Act of 1984, and applicable treaties and international agreements to which the United States is party.

§ 400.2 Scope.

These regulations set forth the procedures and requirements applicable to the authorization and supervision of all space launch activities conducted from United States territory or by United States citizens. The regulations in this chapter do not apply to amateur rocket activities, or to United States Government ranges, launches, payloads carried by such launches, or to United States Government payloads.

PART 401—ORGANIZATION AND DEFINITIONS

Sec.
401.1 The Office of Commercial Space Transportation.
401.3 The Director of Commercial Space Transportation.
401.5 Definitions.

Authority: Sec. 4, Pub. L. 98-575 (49 U.S.C. App. 2601 note), § 1.68 Regulations of the Office of the Secretary of Transportation, 49 CFR 1.68.

§ 401.1 The Office of Commercial Space Transportation.

The Office of Commercial Space Transportation, referred to in these regulations as the "Office," is a unit within the Office of the Secretary of Transportation and is located in the Department of Transportation Headquarters, 400 Seventh Street, SW., Washington, DC 20590

§ 401.3 The Director of Commercial Space Transportation.

The Office is headed by a Director appointed by the Secretary of Transportation to exercise the Secretary's authority to license and otherwise regulate commercial space launch activities and to discharge the Secretary's responsibility to encourage, facilitate and promote commercial space launches by the United States private sector.

§ 401.5 Definitions.

As used in this chapter—

Act—means the Commercial Space Launch Act of 1984, Pub. L. 98-575.

Amateur Rocket Activities—means launch activities involving rockets powered by a motor or motors having a total impulse of 200,000 pound—seconds or less and a total burning or operating time of less than 15 seconds, and a rocket having a ballistic coefficient—i.e., gross weight in pounds divided by frontal area of rocket vehicle—less than 12 pounds per square inch.

Commercial Launch Activities—means the launch activities subject to the authority of the Department of Transportation regardless of whether such activities are conducted by a private or public entity, or for profit.

Director—means the Director of the Office of Commercial Space

Transportation, or any person designated by the Director to exercise the authority or discharge the responsibilities of the Director.

Launch—means to place, or attempt to place, a launch vehicle and/or payload in a suborbital trajectory, in Earth orbit in outer space, or otherwise in outer space.

Launch Activity—means the launch of a launch vehicle and any payload, the operation of a launch site, or both.

Launch Vehicle—means any vehicle constructed for the purpose of operating in, or placing a payload in, outer space, and any suborbital rocket.

Licensee—means the person authorized by a license to conduct specified commercial launch activities and responsible for conducting such activities in conformance with applicable requirements.

Operation of a Launch Site—means the conduct of approved safety operations at a permanent site for purposes of supporting, for compensation or hire, the launching of launch vehicles and payloads.

Mission—means the objective to be accomplished by a proposed launch and includes the general plan for achieving that objective.

Payload—means an object which a person undertakes to place in outer space by means of a launch vehicle, and includes subcomponents of a launch vehicle specifically designed or adapted for that object.

Person—means any individual and any corporation, partnership, joint venture, association, or other entity organized or existing under the laws of any State or Nation.

Safety Operations—means the personnel, equipment, facilities, documented plans and procedures, and any other resource needed for safe preparation and launch of a launch vehicle and its payload.

State and United States—when used in a geographical sense, mean the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, The United States Virgin Islands, Guam, and any other commonwealth, territory, or possession of the United States; and

United States Citizen—means:

(a) Any individual who is a citizen of the United States;

(b) Any corporation, partnership, joint venture, association, or other entity organized or existing under the laws of the United States or any State; and

(c) Any corporation, partnership, joint venture, association, or other entity which is organized or exists under the laws of a foreign nation, if the controlling interest in such entity is held by an individual or entity described in paragraphs (a) or (b) of this definition. "Controlling interest" means ownership of an amount of equity in such entity sufficient to direct management of the entity or to void transactions entered into by management. Ownership of at least fifty-one percent of the equity in an entity by persons described in paragraphs (a) or (b) of this definition creates a rebuttable presumption that such interest is controlling.

SUBCHAPTER B—PROCEDURE

PART 404—REGULATIONS AND LICENSING REQUIREMENTS

Subpart A—General

Sec.
404.1 Scope.
404.3 Filing of petitions to the Director.
404.5 Action on petitions.

Subpart B—Rulemaking

404.11 General.
404.13 Contents of notices.
404.15 Petitions for extension of time to comment.
404.17 Consideration of comments received.
404.19 Additional rulemaking proceedings.
404.21 Hearings.
404.23 Adoption of final rules.

Authority: Secs. 8 and 13, Pub. L. 98-575 (49 U.S.C. App. 2601 note).

Subpart A—General

§ 404.1 Scope.

Pursuant to sections 8 and 13 of the Act, this part sets forth the procedures for issuing regulations to implement the Act, and for eliminating or waiving requirements of Federal law otherwise applicable to the licensing of commercial space launch activities.

§ 404.3 Filing of petitions to the Director.

(a) Any interested person may petition the Director to issue, amend or repeal a regulation, to eliminate as a requirement for a license any requirement of Federal law applicable to commercial launch activities, or to waive any such requirement in the context of a specific application for a license.

(b) Each petition filed under this section must:

(1) Be submitted in duplicate to the Documentary Services Division, Attention Docket Section, Room 4107, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590;

(2) Set forth the text or substance of the regulation or amendment proposed, the regulation to be repealed, or the licensing requirement to be eliminated or waived;

(3) In the case of a petition for a waiver, explain the nature and extent of the relief sought;

(4) Contain any facts, views, and data available to the petitioner to support the action requested; and

(5) In the case of a petition for a waiver, be submitted at least 60 days before the proposed effective date of the waiver unless good cause is shown in the petition.

(c) A petition for rulemaking filed under this section must contain a summary, which may be published in the Federal Register, which includes:

(1) A brief description of the general nature of the action requested; and

(2) A brief description of the pertinent reasons presented in the petition for instituting the rulemaking.

§ 404.5 Action on petitions.

(a) *General.* No public hearing, argument or other proceeding is held on a petition before its disposition under this section.

(b) *Grants.* In the case of a petition for a waiver, the Director may grant the waiver if the Director determines that the waiver is in the public interest and will not jeopardize public health and safety, the safety of property, or any national security or foreign policy interest of the United States. In all other cases, if the Director determines that the petition contains adequate justification, the Director initiates a rulemaking action under Subpart B of this part.

(c) *Denials.* If the Director determines that the petition does not justify initiating rulemaking action or granting the waiver, the petition is denied.

(d) *Notification.* Whenever the Director determines that a petition should be granted or denied, the petitioner is notified of the Director's action and the reasons supporting it.

Subpart B—Rulemaking

§ 404.11 General.

(a) Unless the Director finds, for good cause, that notice is impractical, unnecessary, or contrary to the public interest, a notice of proposed rulemaking is issued and interested persons are invited to participate in the rulemaking proceedings related to each substantive rule proposed.

(b) Unless the Director determines that notice and comment is necessary or desirable, interpretive rules, general statements of policy, and rules relating to organization, procedure, or practice are issued as final rules without notice or other proceedings.

(c) In the Director's discretion, interested persons may be invited to

BEST COPY AVAILABLE

VOL
51
ISS
38
FE
26
1986
UMI

participate in the rulemaking proceedings described in § 404.19 of this subpart.

§ 404.13 Contents of notices.

(a) Each notice of proposed rulemaking is published in the **Federal Register**, unless all persons subject to it are named and are personally served with a copy of it.

(b) Each notice, whether published in the **Federal Register** or personally served, includes:

(1) A statement of the time, place, and nature of the proposed rulemaking proceeding;

(2) A reference to the authority under which it is issued;

(3) A description of the subjects or issues involved and, in most cases, a description of the substance or terms of the proposed rule;

(4) A statement of the time within which written comments must be submitted and the required number of copies; and

(5) A statement of how and to what extent interested persons may participate in the proceeding.

§ 404.15 Petitions for extension of time to comment.

(a) Any person may petition the Director for an extension of time to submit comments in response to a notice of proposed rulemaking. The petition must be submitted in duplicate not less than three days before expiration of the time stated in the notice. The filing of the petition does not automatically extend the time for petitioner's comments.

(b) The Director grants the petition only if the petitioner shows a substantive interest in the proposed rule and good cause for the extension, and if the extension is in the public interest. If an extension is granted, it is granted as to all persons and is published in the **Federal Register**.

§ 404.17 Consideration of comments received.

All timely comments are considered before final action is taken on a rulemaking proposal. Late filed comments may be considered to the extent possible, provided they do not cause undue additional expense or delay.

§ 404.19 Additional rulemaking proceedings.

The Director may initiate any additional rulemaking proceedings, if necessary or desirable. For example, the Director may invite interested persons to present oral arguments, participate in conferences, appear at informal hearings, or participate in any other proceeding.

§ 404.21 Hearings.

(a) Sections 556 and 557 of Title 5, United States Code, do not apply to hearings held under this part. As a fact-finding proceeding, each hearing held under this part is nonadversary and there are no formal pleadings or adverse parties. Any rule issued in a proceeding in which a hearing is held is not based exclusively on the record of the hearing.

(b) The Director designates a representative to conduct any hearing held under this part. The General Counsel designates a legal officer for the hearing.

§ 404.23 Adoption of final rules.

Final rules are prepared by the appropriate representatives of the Director and the Office of the General Counsel. The rule is then submitted to the Director for consideration. If the Director adopts the rule, it is published in the **Federal Register**, unless all persons subject to it are named and are personally served with a copy of it.

PART 405—INVESTIGATIONS AND ENFORCEMENT

Sec.

405.1 Monitoring of licensed and other activities.
405.3 Authority to modify, suspend or revoke.
405.5 Emergency orders.
405.7 Civil penalties.

Authority: Secs. 14, 17 and 19 Pub. L. 98–575 (49 U.S.C. App. 2601 note).

§ 405.1 Monitoring of licensed and other activities.

Each licensee shall allow and cooperate with Federal officers or employees or other individuals authorized by the Director to observe licensed activities, including launch sites, production facilities or assembly sites used by any contractor of a licensee in the production or assembly of a launch vehicle and in the integration of a payload with its launch vehicle. Such observance is conducted in order to monitor the activities of the licensee or contractor at such time and to such extent as the Director considers reasonable and necessary to determine compliance with the license or to carry out the Director's responsibilities pertaining to payloads for which no Federal license, authorization, or permit is required.

§ 405.3 Authority to modify, suspend or revoke.

(a) Upon application by the licensee or upon the Director's own initiative, the Director may modify a license issued under this chapter if the Director finds that the modification is consistent with the requirements of the Act.

(b) If the Director finds that a licensee has substantially failed to comply with any requirement of the Act, the terms and conditions of the license, any DOT commercial space launch regulation, or other applicable requirement, or that public health and safety, the safety of property or any national security or foreign policy interest of the United States so require, the Director may suspend or revoke any license issued under this chapter.

(c) Unless otherwise specified by the Director, any modification, suspension or revocation made by the Director under this section:

(1) Takes effect immediately; and

(2) Continues in effect during any review of such action under this part.

(d) Whenever the Director takes any action under this section, the Director immediately notifies the licensee in writing of the Director's finding and the action which the Director has taken or proposes to take regarding such finding.

§ 405.5 Emergency orders.

The Director may immediately terminate, prohibit or suspend a licensed launch or launch site operation if the Director determines that—

(a) Such launch or operation is detrimental to public health and safety, safety of property, or any national security or foreign policy interest of the United States; and

(b) The detriment cannot be eliminated effectively through the exercise of other authority of the Director.

§ 405.7 Civil penalties.

(a) Pursuant to section 19 of the Act, any person found by the Director, after notice and opportunity to be heard on the record in accordance with section 554 of title 5, United States Code, to have violated a requirement of the Act, a regulation issued under the Act, or any term, condition or restriction of any license issued or transferred by the Director, shall be liable to the United Stated for a civil penalty. Each day of a continuing violation shall constitute a separate violation. The amount of such civil penalty shall be assessed by the Director by written notice. The Director may compromise, modify, or remit with or without conditions, any civil penalty which is subject to imposition or which has been imposed under this section.

(b) if any person fails to pay a civil penalty assessed against such person after the penalty has become final or if such person appeals an order of the

Director, and the appropriate court has entered final judgment in favor of the Director, the Director shall recover the civil penalty assessed in any appropriate district court of the United States.

(c) For purposes of conducting any hearing under this section, the Director may: (1) Issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, documents, and other records; (2) seek enforcement of such subpoenas in the appropriate district court of the United States; and (3) administer oaths and affirmations.

PART 406—ADMINISTRATIVE REVIEW

Sec.

406.1 Hearings.
406.3 Submission; oral presentation.
406.5 Administrative law judge's recommended decision.

Authority: Sec. 12, Pub. L. 98–575 (49 U.S.C. App. 2601, note).

§ 406.1 Hearings.

(a) Pursuant to section 12 of the Commercial Space Launch Act, the following are entitled to a determination on the record after an opportunity for a hearing in accordance with section 554 of title 5, United States Code:

(1) An applicant for a license and a proposed transferee of a license regarding any decision to issue or transfer a license with conditions or to deny the issuance or transfer of such license;

(2) An owner or operator of a payload regarding any decision to prevent the launch of such payload;

(3) A licensee regarding any decision to suspend, modify, or revoke a license, or to terminate, prohibit, or suspend any licensed launch activity; and

(4) A person found by the Director to have violated a requirement of the Act, a regulation issued under the Act, or any term, condition or restriction of any license issued or transferred by the Director if the Director seeks civil penalties.

(b) An administrative law judge will be designated to preside over any hearing held under this part.

§ 406.3 Submission; oral presentation.

(a) Determinations under this part will be made on the basis of written submissions unless the administrative law judge, on petition or on his or her own initiative, determines that an oral presentation is required.

(b) Submissions shall include a detailed exposition of the evidence or arguments supporting the petition.

(c) Petitions shall be filed as soon as practicable, but in no event more than 30 days after issuance of the Director's decision or finding under § 406.1.

§ 406.5 Administrative law judge's recommended decision.

(a) The recommended decision of the administrative law judge shall be reviewed by the Director, who shall make the final decision on the matter at issue. The Director shall make such final decision within thirty days of issuance of the recommended decision.

(b) The authority and responsibility to review and decide rests solely with the Director and may not be delegated.

SUBCHAPTER C—LICENSING

PART 411—POLICY

Sec.

411.1 General.
411.3 Review procedures.
411.5 Safety approval.
411.7 Mission approval.
411.9 Information requirements.

Authority: Secs. 3, 5, and 6, Pub. L. 98–575 (49 U.S.C. App. 2601, note).

§ 411.1 General.

The Office of Commercial Space Transportation may issue and transfer licenses authorizing launches, the operation of launch sites, or both. The policies and procedures in this subchapter apply primarily to launch license applicants.

§ 411.3 Review procedures.

(a) The evaluation of license requests for unmanned launches involves two reviews, Safety Review and Mission Review, designed to address in the most effective and least burdensome manner the two general areas of Federal concern: (1) The efficacy of the proposed safety operations to support safe preparation and launch of a launch vehicle and any payload; and (2) significant issues affecting United States national interests and international obligations that might be associated with the proposed launch. These reviews may be conducted independently of each other and in whichever order, sequential or concurrent, is more appropriate to the needs of the applicant.

(b) Requests for licenses authorizing the operation of a launch site will be reviewed on the basis of the applicant's capability to conduct safety operations on a continuing basis as support for the launching of launch vehicles and payloads.

§ 411.5 Safety approval.

(a) Applicants proposing to launch from sites whose operations are neither licensed by the Office nor supervised by another Federal agency must demonstrate that they possess the capability and resources for safely conducting the preparation and launch of a launch vehicle and any payload to be carried by such vehicle. In these circumstances, a comprehensive review of the applicant's proposed safety operations must be performed in order to determine whether safety approval can be granted.

If an applicant proposes to launch from an established Federal range, as the Act encourages, it is the Office's view that the launch services provided by these ranges clearly provide an appropriate assurance of safety. As a general matter, commercial launch sites operated under the authority of a license issued by the Office should also be capable of providing an appropriate assurance of safety. If an applicant proposes to contract for the services of a Federal range or a private launch site operated under the authority of a license issued by the Office, safety approval will ordinarily be given once the applicant has been accepted by a range or site capable of handling the launch activity proposed. All launch licenses issued under these circumstances will be conditioned by the requirements that the applicant: (1) Comply with all applicable safety requirements and procedures of the range or launch site in question and (2) inform the Office of and obtain approval for any planned or proposed deviations from or alternatives to such requirements or procedures.

§ 411.7 Mission approval.

(a) Mission approval will be granted absent clear evidence that some aspect of the proposed launch poses a threat to distinct U.S. national security or foreign policy interests, constitutes a hazard to public health and safety or safety of property, or is inconsistent with international obligations of the United States.

(b) The Department will not duplicate the substance of a review conducted by a Federal agency with primary authority for addressing the Federal interests associated with a given class of payloads. This includes, for example, reviews conducted by the Federal Communications Commission for telecommunication satellites, the Department of Commerce for remote-sensing satellites, or other Federal agencies for their own payloads. A proposal to launch a foreign telecommunications or remote-sensing payload will be reviewed in consultation with the Departments of Defense and State. A proposal to launch a payload not covered by an existing Federal regulatory regime must be

VOL 51
ISS 38
FE 26
1986
UMI

reviewed by the Department in consultation with other appropriate Federal agencies in order to determine that the launch of such payload will not jeopardize public health and safety, safety of property, or any national security or foreign policy interest of the United States. In order to provide the certainty needed for new commercial space applications, whether domestic or foreign, the Office, when requested to do so, will provide payload operators or owners with this determination in advance of a launch license request. Subsequent reviews of payloads within the same category will be considered on a routine basis and will focus on new or distinctive elements of the specific payload to be launched.

§ 411.9 Information requirements.

Sections 415.17, 415.25, and 415.27 identify the basic information an applicant must submit in order to initiate an appropriate review. These information requirements are not intended to be all-inclusive and the submission of the required information does not, in itself, demonstrate the qualifications of an applicant. Rather, the information requirements are intended to ensure prompt and efficient review. The nature of individual launch proposals may require the submission of additional information.

PART 413—APPLICATIONS

Sec.
413.1 Scope.
413.3 Pre-Application consultation.
413.5 Application.
413.7 Confidentiality.
413.9 Review of applications.
413.11 Issuance of license.
413.15 Terms and conditions of license.
413.17 Certain rights not conferred by license.
413.19 Substantial and significant changes in information furnished to the Director.

Authority: Secs. 9, 10, 11 and 20, Pub. L. 98–575 (49 U.S.C. App. 2601 note).

§ 413.1 Scope.

The regulations in this part prescribe the application procedures common to licensing all commercial space launch activities. The regulations applying exclusively to launch licenses are contained in Part 415 of this subchapter.

§ 413.3 Pre-application consultation.

(a) Applicants are encouraged to consult with the Office of Commercial Space Transportation at the earliest possible planning stages. Such consultation may reveal potential problems with a proposal and allow changes to be made when they are less likely to result in significant delay or costs to the applicant. Consultations later in the planning process may prove useful in defining informational requirements for appliations and expediting review.

(b) *Consultation.* Upon request, the Director will consult with any prospective applicant to assist the applicant in: (1) Properly preparing the application; and (2) contacting other Government agencies involved in the application review process in order to discuss the prospective application.

§ 413.5 Application.

(a) *Form.* Applications must be in writing and filed in duplicate with the Director, Office of Commercial Space Transportation, S–50, 400 Seventh, SW., Washington, DC 20590.

(b) *Types.* Applications to the Director may request issuance or transfer of a license authorizing a launch or the operation of a launch site. Applications may also be made, separately and in advance of a license application, requesting an approval or determination that must be secured before a license can be issued or transferred.

(c) *Signature.* Applications must be signed as follows:

(1) For a corporation: By an officer authorized to act for the corporation in licensing matters.

(2) For a partnership or a sole proprietorship: By a general partner or proprietor, respectively; or

(3) For an association or other entity: By a principal executive officer.

§ 413.7 Confidentiality.

(a) Applicants who submit with an application or as part of the application review process information that is considered to be a trade secret or commercial or financial information that is privileged or confidential may request in writing that the information be given confidential treatment.

(b) Such a request should be made at the time of submission of the information and state the period of time for which confidential treatment is desired.

(c) A request for confidential treatment will be associated with previously submitted information to the extent that it is practicable in light of prior distribution of such information.

(d) Information requested to be treated confidentially must be clearly marked with an identifying legend such as "Proprietary Information" or "Confidential Treatment Requested." Where this marking proves impracticable, a cover sheet containing the identifying legend must be securely attached to the compilation of information for which confidential treatment is requested.

§ 413.9 Review of applications.

(a) Each application shall contain the information prescribed by the Director.

(b) The Director determines whether an application is substantially complete and, if so, accepts the application for review.

(c) Applications found by the Director to be incomplete or so speculative or frivolous as to make review inappropriate will be returned to the applicant with a statement of the reasons therefor.

(d) Once an application is accepted, the Director initiates an appropriate review in light of the specific action requested in the application.

(e) The Director makes a determination on an application as expeditiously as possible but, in the case of a license application, not later than 180 days after receipt of such application. If the Director has not made a determination within 120 days after receipt of such application, the Director informs the applicant of any pending issues and of actions required to resolve such issues.

§ 413.11 Modifications.

Applications may be modified, supplemented, or corrected by the applicant at any time prior to issuance of the Director's decision to grant or deny, whether in whole or in part, the approval, determination, or license requested.

§ 413.13 Issuance of license.

The Director issues or transfers a license authorizing the conduct of commercial space launch activities by the applicant if the Director determines, after review, that the applicant has, and will continue to have, the ability to comply with all requirements for a license, including the ability to conduct safe launch or launch site operations.

§ 413.15 Terms and conditions of license.

(a) Each license issued or transferred under this section shall specify the activities authorized by the license, the name of each person responsible under the license for the conduct of such activities, the period of time for which the license is valid, and such other terms and conditions as may be required to protect public safety, the safety of property, and national security and foreign policy interests of the United States.

(b) All licenses shall specify, as a condition of such license, that the licensee maintain an effective on-site means for verifying that the licensed launch activity conforms to representations made in the license application.

§ 413.17 Certain rights not conferred by license.

No license shall confer any proprietary, property, or exclusive right in the use of any airspace, Federal launch facility, or Federal launch support facility. Issuance of a license does not affect the authority of the Federal Communications Commission under the Communications Act of 1934 (47 U.S.C. 151 *et seq.*) or the authority of the Secretary of Commerce under the Land Remote-Sensing Commercialization Act of 1984 (15 U.S.C. 4301 *et seq.*).

§ 413.19 Substantial and significant changes in information furnished to the Director.

(a) Each applicant is responsible for the continuing accuracy and completeness of information furnished to the Director to support a pending application or which formed the basis for any approval, determination of licensing action by the Director. Whenever such information is no longer substantially accurate and complete in all significant respects, or whenever there has been a substantial change as to any matter of decisional significance to the Director, the applicant shall, as promptly as possible, submit a statement furnishing such additional or corrected information as may be appropriate.

(b) Willful false statements made in applications and documents relating to applications or licenses are punishable by fine and imprisonment, U.S. Code, Title 18, section 1001, and by appropriate administrative sanctions, including license revocation and civil penalties.

PART 415—LAUNCH LICENSES

Subpart A—General

Sec.
415.1 Scope.
415.3 When a launch license is required.
415.5 Approvals required for a license.
415.7 Incorporation of approvals.
415.9 Conditions.

Subpart B—Safety review

415.11 Scope.
415.13 General standards for reviewing safety operations.
415.15 When to request safety approval.
415.17 Required information.
415.19 Incorporation of safety approval.

Subpart C—Mission review

415.21 Scope.
415.23 When to request mission approval.
415.25 Required information.
415.27 Payload determinations.
415.29 Advance determinations on payloads.
415.31 Incorporation of Mission approval.

Subpart D—Environmental Impacts of Launch Activities

415.41 General.
415.43 Environmental information.

Authority: Secs. 6, 7, 8, and 9, Pub. L. 98–575 (49 U.S.C. App. 2601, note).

Subpart A—General

§ 415.1 Scope.

This part contains the procedures and information requirements which apply exclusively to launch license applications and supplements the general application procedures in Part 413.

§ 415.3 When a launch license is required.

(a) The launch of a launch vehicle and any payload carried by such vehicle by any person from U.S. territory or by a U.S. citizen from outside U.S. territory must be authorized by a license issued under this part.

(b) The launch of a launch vehicle, and any payload carried on such vehicle, by a foreign corporation or other entity controlled by a United States citizen, as defined in § 401.5 of this chapter, at any place which is both outside the United States and outside of the territory of any foreign nation when there is no agreement in force between the United States and a foreign nation which provides that such foreign nation shall exercise jurisdiction over such launch must be authorized by a license issued under this part.

(c) The launch of a launch vehicle and any payload carried on such vehicle by any foreign citizen described in paragraph (b) of this section, from the territory of a foreign nation when there is in force an agreement between the United States and such foreign nation concerning the exercise of jurisdiction by the United States over such launch must be authorized by a license issued under this part.

§ 415.5 Approvals required for a license.

A license authorizing an unmanned launch will be issued or transferred after the Director grants an applicant both mission and safety approval. These approvals may be requested separately and in advance of a license request as provided in §§ 415.15 and 415.23.

§ 415.7 Incorporation of approvals.

(a) Any approval or payload determination made by the Director before a license has been requested, as provided in § 413.5 of this subchapter, will be made part of the record upon which the Director will make a decision to issue a launch license with conditions or to deny a launch license.

(b) An approval or payload determination remains valid, and the Director will not reopen any part of a review which formed the basis for an approval or payload determination, as long as the information submitted as part of the review and other matters of decisional significance to the Director remain accurate and valid.

§ 415.9 Conditions.

All launch licenses will contain those conditions which the Director determines to be necessary and appropriate to protect public health and safety, the safety of property, and national security and foreign policy interests of the United States. Failure to comply with any license condition may be cause for revocation of the license or the initiation of other enforcement actions by the Director. Standard conditions will require the licensee to:

(a) Secure at least the minimum amount of third-party liability insurance specified by the Department;

(b) Adhere strictly to specified range safety regulations and procedures;

(c) Comply with requirements concerning pre-launch record keeping and notifications, including those pertaining to Federal airspace restrictions and military tracking operations; and

(d) Comply with Federal inspection, verification and enforcement requirements.

Subpart B—Safety Review

§ 415.11 Scope.

Safety Review is the procedure for determining whether an applicant can safely conduct the preparation and launch of the proposed launch vehicle and any payload. This review focuses on the elements of an applicant's safety operations, including the proposed launch site, procedures, personnel, and equipment. A safety approval granted by the Director does not confer any approval or authorization an applicant or licensee must obtain from the operator of the range from which the launch vehicle and any payload are approved for launch, or create any presumption or inference that such approval or authorization will be granted.

§ 415.13 General standards for reviewing safety operations.

(a) *Launch Site.* The location, size and design configuration of the proposed site must ensure that off-site persons and property are not exposed to an unreasonable risk of harm.

VOL
51
ISS
38
FE
26
1986
UMI

(b) *Procedures.* User and range operator procedures must be appropriate for assuring pre-launch check-out and validation of all launch safety systems (ground or flight); control of prelaunch and launch hazards to the public; trajectory flight safety analysis; and safe flight operations from ignition through impact for suborbital launches and through orbital injection or escape velocity for orbital launches.

(c) *Personnel.* Range safety personnel must be qualified and possess appropriate training and experience.

(d) *Equipment.* Range safety equipment and instrumentation and vehicle safety systems must be adequate and appropriate to support safe operations.

§ 415.15 When to request safety approval.

An application for safety approval may be made as a part of a launch license request or, in the alternative, in advance of a launch license request.

§ 415.17 Required information.

(a) *Launches from Approved Launch Sites.* Applicants proposing to launch from Federal launch ranges or commercial sites operated under the authority of a license issued by the Director must provide a statement:

(1) Verifying that the applicant has been accepted by the operator of a launch range or site appropriate for the proposed mission; and

(2) Identifying the party (operator or applicant) responsible for conducting or providing, whether in whole or in part, any element of launch operations discussed in §§ 415.11 and 415.13. In instances where the applicant has assumed primary responsibility for one of these elements, a statement must be provided describing how responsibility and accountability for safety will be assigned between the operator and applicant.

(b) *Other Launches.* All applicants not covered by paragraph (a) of this section must provide the following information in sufficient detail for the Office to begin an assessment of the applicant's competency, experience and capability to conduct a launch safely:

(1) An identification and description of the launch site from which the proposed launch will take place, specifically describing:

(i) The location, size, shape and geographic characteristics of the site;

(ii) The proximity to populated areas;

(iii) Any local activities that may be affected by the launch, such as air traffic, shipping, and offshore fishing; and

(iv) Proposed launch corridors from the site and predicted impact areas.

(2) A description of the role and responsibilities of personnel performing safety or safety related functions for the proposed launch operation. Details should include:

(i) A description of the planned organization, key personnel, and lines of authority and responsibility for accomplishing pre-launch and launch safety functions.

(ii) The methodology proposed for selection, training and testing of the Launch Safety Office and other key personnel critical to assuring Launch Safety System readiness for launch, as well as prior experience, training, etc. of such personnel.

(iii) Description and explanation of how the methodology proposed relates to assuring the successful control of the proposed launch.

(3) A description of tracking and/or data acquisition equipment to be used for safety purposes. This description should include:

(i) An identification of the types of tracking equipment to be used and their performance capabilities;

(ii) The location and placement of equipment; and

(iii) The types, performance capabilities and specifications of other aids to be used including computational equipment, display systems, and recording systems.

(4) A description of proposed flight safety systems including:

(i) The type, design and performance specifications of the flight termination system including transmitters, receivers, ordinance, etc.;

(ii) Schematics and wiring diagrams; and

(iii) Certification and verification procedures for the proposed flight safety system.

(5) Documents outlining the proposed process and procedures to be followed for prelaunch ground safety, flight safety analysis, and flight safety operations, including copies of safety analyses performed to determine potential impacts, establish destruct criteria, unique hazards identified, etc. Examples of documents to be included are set forth below:

(i) Description of ground safety measures taken to protect public safety;

(ii) Flight safety analysis performed, analytical models used, etc. In order to demonstrate efficacy of the proposed process, the applicant is requested to provide examples of safety analyses it has performed to determine potential impacts, establish flight termination criteria, identify/control unique hazards, etc.;

(iii) Flight safety operation to be conducted, criteria proposed for flight termination, practice and testing exercises to be performed, emergency procedures, etc.;

(iv) Quality control and testing procedures for critical safety equipment components including tracking and flight termination; and

(v) Recovery procedures if applicable.

(6) Flight plan data as a function of time for launch vehicle and spacecraft including trajectory, azimuth, flight profile, and orbital elements. Examples of data to be included are set forth below:

(i) Profile plot of the planned flight trajectory, showing altitude versus range and trajectory for each expended stage;

(ii) A plan view of the flight trajectory, showing launch and trajectory azimuth, impact points for each stage, jettisoned component, or other impacting body;

(iii) Launch vehicle ground and IIP ground tracks with respect to all significant land masses shown in true geographical location; and

(iv) Description and definition of orbit.

(7) Description of the launch vehicle and its performance characteristics, as well as a description of any payload with a particular emphasis on hazardous systems. Examples of descriptions to be included are set forth below:

(i) Description of the launch vehicle configuration; major sections and components; weights and dimensions of each; rocket motors and propulsion systems, guidance system for each stage; and destruct system(s);

(ii) Description of payload design sufficient to determine unique flight hazards, hazardous materials involved, etc.; and

(iii) Thrust time history of each stage, maximum turn rates, plot of estimated vehicle weight versus time, analysis of vehicle integrity to meet flight environment.

(8) Other categories of data as determined by the applicant to demonstrate unique capabilities.

§415.19 Incorporation of safety approval.

A safety approval made by the Director under this part may be made part of a licensing record pursuant to § 415.7.

Subpart C—Mission Review

§ 415.21 Scope.

Mission Review is the procedure for identifying significant issues affecting United States national interests and international obligations that may be associated with a proposed launch. A review conducted under this part covers all aspects of a proposed launch, including any payload to be launched, except the safety operations an applicant will use to prepare and launch a launch vehicle and any payload.

§ 415.23 When to request mission approval.

An application for mission approval may be made as part of a launch license request or, in the alternative, in advance of a launch license request.

§415.25 Required information.

(a) The applicant must describe the launch vehicle and the location of the launch site.

(b) The applicant must submit a flight plan and staging data sufficient for evaluating such factors as the potential for land overflight, impacts of spent stages, and debris issues.

(c) The applicant must identify any unique hazards that may be posed by the launch derived from the nature of materials to be launched or potential abort or re-entry hazards.

(d) The applicant must identify the nature and ownership of any payload to be launched.

(e) The applicant must—

(1) Provide proof of application for or issuance of any license, authorization or other permit required by Federal law for the payload which is to be launched; or

(2) If no payload license, authorization or permit is required by any Federal law for the payload which is to be launched, indicate whether a determination, provided for in § 415.27, has been made by the Director concerning such payload.

§ 415.27 Payload determinations.

The Director must determine whether to prevent the launch of a payload for which no license, authorization, or permit is required by Federal law because to launch such payload would jeopardize public health and safety, the safety of property, or any national security or foreign policy interest of the United States. An applicant proposing to launch such a payload must provide:

(a) An assessment of safety issues anticipated by the applicant;

(b) A statement of the number of missions planned for payloads of the same or similar design;

(c) A description of the design and construction plans of the payload;

(d) A description and definition of the proposed orbit, including altitude and inclination; and

(e) Other information, as appropriate.

§ 415.29 Advance determinations on payloads.

Any person may request that the Director make a determination, pursuant to § 415.27, at any time prior to a request for mission approval or a request for a launch license.

§ 415.31 Incorporation of mission approval.

A launch mission approval or payload determination made by the Director under this part may be made part of a licensing record pursuant to § 415.7.

Subpart D—Environmental Impacts of Launch Activities

§ 514.41 General.

In accordance with the requirements of the National Environmental Policy Act, 42 U.S.C. 4321, *et seq.*, (NEPA), the Council on Environmental Quality Regulations for Implementing the Procedural Provisions of NEPA, 40 CFR Parts 1500–1506, and the Department of Transportation's Procedures for Considering Environmental Impacts, DOT Order 5610.1C, the environmental impacts of licensing commercial launch activities must be considered by the Office. The effects of most projected commercial launch activities are already addressed in the Office's programmatic environmental assessment or in environmental impact statements for existing launch sites. The Office will determine whether a proposed launch activity is adequately addressed in these documents. Applicants may be required to provide additional information concerning the environmental effects of a proposed launch activity.

§ 415.43 Environmental information.

Applicants will be required to submit environmental information concerning:

(a) Proposed new launch sites not covered by existing environmental documentation;

(b) A proposed new launch vehicle with characteristics falling measurably outside the parameters of existing environmental documentation;

(c) Proposed launches from established sites involving vehicles with characteristics falling measurably outside the parameters of the existing environmental impact statement covering those sites;

(d) A proposed payload that may have significant environmental impacts in the event of a launch accident; and

(e) Other factors as determined by the Office.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

21 CFR Part 868

[Docket No. 83N-0193]

Medical Devices; Invitation for Offers To Submit or To Develop a Performance Standard for Breathing Frequency Monitor (Neonatal Apnea Monitor)

AGENCY: Food and Drug Administration HHS.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing this notice to invite interested persons, including any Federal agency, to submit any existing standard as a proposed performance standard for the breathing frequency monitor intended for use on infants (also called the neonatal apnea monitor), or to submit an offer to develop such a proposed standard. If FDA does not receive any response to this notice, or receives a response but does not accept any existing standard or offer to develop a standard, the agency will proceed to develop a performance standard or take other appropriate action to facilitate the development of a performance standard for the device.

DATE: Existing standards or offers shall be submitted on or before April 28, 1986.

ADDRESS: Existing standards or offers shall be submitted to the Dockets Management Branch (HFA-305), Food and Drug Administration, Room. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Glenn E. Conklin, Center for Devices and Radiological Health (HFZ-84), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4874.

SUPPLEMENTARY INFORMATION:

Background/Introduction

Under section 513 of the Federal Food, Drug and Cosmetic Act (the act) (21 U.S.C. 360c), FDA is required to classify each medical device into one of three regulatory categories: class I (general controls), class II (performance standards), or class III (premarket approval).

In the **Federal Register** of July 16, 1982 (47 FR 31130), FDA published a final rule (21 CFR 868.2375) classifying the breathing frequency monitor into class II. In the **Federal Register** of October 21, 1980 (45 FR 69684), FDA published a final rule classifying the neonatal ventilatory effort monitor (apnea monitor) into class II and codifying the classification under 21 CFR 880.2440. Subsequently, the agency determined that the neonatal ventilatory effort monitor (apnea monitor) is essentially the same generic type of device as the breathing frequency monitor and in a final rule published in the **Federal Register** of September 10, 1982 (47 FR 39816), removed § 880.2440, consolidating both generic types of devices under § 868.2375.

In the **Federal Register** of July 8, 1983 (48 FR 31392), FDA initiated a proceeding to establish for the breathing frequency monitor a performance standard under section 514 of the act (21 U.S.C. 360d). As required by section 514(b) of the act, the proceeding was initiated by publishing in the **Federal Register** a notice of opportunity to submit to the agency, within 15 days of the date of publication of the notice, a request for a change in the classification of the device based on new information relevant to its classification. FDA did not receive any request for a change in the classification of the device. Therefore, further action is not required under section 514(b) of the act.

As provided by section 514(c) of the act and Part 861 of the regulations governing performance standards development (21 CFR Part 861), FDA is continuing the proceeding to establish a performance standard for the breathing frequency monitor by inviting interested persons to submit an existing standard as a proposed performance standard for the device or to submit an offer to develop such a proposed standard.

As discussed under "Device Description," FDA has decided to limit the action, at this time, to the models of the breathing frequency monitor intended for use only on infants to detect cessation of breathing, and is commonly called the neonatal apnea monitor.

Comments

Although FDA did not receive any requests for a change in the classification of the breathing frequency monitor, the agency received two comments in response to the July 8, 1983 notice. One comment was from a research institute and the other was from a manufacturer of breathing frequency monitors.

1. One comment expressed the view that more than one standard for the breathing frequency monitor is needed to provide reasonable assurance of the safety and effectiveness of the device because of the variety of techniques for monitoring breathing. The comment argued, in addition, that rapidly changing technology will quickly make the provisions of a standard outdated unless the provisions are directly related to safety and the safety aspects of effectiveness. According to the comment, this problem has been experienced by several voluntary standards organizations.

FDA does not agree that more than one standard is necessary for the breathing frequency monitor intended for use on infants. All of the device products include a neonatal respiration sensor, a system for processing the respiration sensor signal, and a system for read-out. The critical issue in considering appropriate concepts for a standard applicable to the device has been the quantitative comparison of the effectiveness of respiration sensors. The feasibility of such comparison has been demonstrated by Mendenhall and Newman (Refs. 1 and 2).

Further, FDA does not agree that a performance standard for breathing frequency monitors should address only safety issues. FDA points out that section 514(a)(2)(A) of the act provides that a performance standard for a device "shall inlcude provisions to provide reasonable assurance of its safe *and effective* performance" (emphasis added). Thus, a performance standard for the breathing frequency monitor is required to address, as necessary, both the safety and the effectiveness of the device.

FDA agrees that a standard for the device will have to be carefully developed to prevent obsolescence of the provisions. To the extent, however, that the comment indirectly was arguing that a performance standard for the breathing frequency monitor should not include "design" features, FDA advises that section 514(a)(2)(B) of the act requires that a performance standard for a device include, to the extent "necessary to provide reasonable assurance of its safe and effective performance," provisions respecting both design and performance characteristics of the device. Thus, a performance standard for the breathing frequency monitor may include either design or performance features, or both, as necessary to provide reasonable assurance of the safety and of the effectiveness of the device. The Center for Devices and Radiological Health has considerable experience with performance standards issued under the Radiation Control for Health and Safety Act of 1968. FDA believes that the distinction, in this case, between performance requirements and design requirements lies primarily in the degree of specificity required to provide adequate protection against a particular health hazard. Close cooperation between all the parties in the standards-setting process is needed to select the appropriate balance between design and performance requirements in any standard that the agency may establish. FDA will work closely with all the parties in the standards-setting process to ensure that the provisions of any performance standard established under section 514 of the act do not become obsolete. In addition, FDA will amend such standards as required by changing technology.

2. One comment expressed the belief that there are insufficient data to allow any organization to develop a meaningful standard for the breathing frequency monitor and, therefore, it is premature to initiate a proceeding to establish a performance standard for the device. The comment argued that additional research is necessary to define better a variety of pertinent characteristics of device function and patient population before undertaking a standards-setting activity for the device.

FDA disagrees. The agency has considered the issues relating to the need for and development of a performance standard for breathing frequency monitors. FDA's advisory committees have concluded that there is sufficient information to establish a performance standard that will provide reasonable assurance of the safety and effectiveness of the device, and FDA agrees. The characteristics of a breathing frequency monitor that FDA believes would provide reasonable assurance of the safety and effectiveness of the device are described elsewhere in this notice under "Risks Associated With the Device and Which Are To Be Controlled by a Performance Standard."

Current Action

Section 514(c)(1)(A) of the act and § 861.20(c) of the regulations provide that in the event that further action is not required under section 514(b) of the act, FDA shall publish in the **Federal Register** a notice inviting any interested person, including any Federal agency, to submit to FDA, within 60 days after the date of publication of the notice, an existing standard as a proposed performance standard, or an offer to develop a proposed performance standard.

Section 514(c)(2)(B) of the act and § 861.22 of the regulations provide that the notice is to include (1) a description or other designation of the device; (2) a statement of the risk or risks associated with the use of the device and which are intended to be controlled by a performance standard, including pertinent portions of the recommendations of FDA's advisory committees with respect to the device; (3) a summary of the data on which FDA has found a need for initiation of the proceeding to develop a performance standard, including pertinent portions of the recommendations of FDA's advisory committees with respect to the device; (4) identification of any existing performance standard known to FDA which may be relevant to the proceeding; (5) the approximate number of products (i.e., kinds of models) within the generic type of device; and (6) the time period within which the standard is to be developed, which may be extended by the Commissioner of Food and Drugs for good cause shown.

Device Description

The breathing frequency monitor is identified in § 868.2375 as a device intended to measure or monitor a patient's respiratory rate. The device may provide an audible or visible alarm when the respiratory rate is outside predetermined limits. The agency notes that the term "alarm" includes any alarm that is appropriate to the manner of use of the breathing frequency monitor, e.g., aural, visual, tactile, or a signal to another machine.

The term breathing frequency monitor as defined for the purpose of § 868.2375 includes devices that utilize signals from a multiplicity of types of respiration sensors. The monitors can process the sensor signal to provide readouts or signals of respiration waveform, respiration events, or respiration rate. Breathing frequency monitors may be used on patients of any age and may be used in the home, as well as in the hospital.

Scope of the Standard; Models of the Device

FDA intends that any proposed performance standard to be offered or developed at this time would apply only to the breathing frequency monitor devices used on infants because different issues are raised by use in neonate and adult populations and a single standard covering both populations could not be easily written. FDA believes neonates are at the greatest risk from use of the device and is therefore proposing at this time to develop a standard applicable to this population. The monitoring device to be covered by this proposed standard is a subset of the generic type of device classified by § 868.2375 and is commonly called the neonatal apnea monitor, a term that will be retained because of common usage. FDA notes that adult and juvenile populations also are at risk. The agency believes, however, that concepts established in a performance standard for neonatal apnea monitors will carry into the design and construction of breathing frequency monitors for other populations. For these reasons, FDA concludes that the neonatal apnea monitor has the highest priority for establishing a standard.

Neonatal apnea monitor devices currently being marketed are primarily pneumographs that employ sensing for thoracic impedance and that include a heart rate monitor. A variety of respiration sensors have been developed (Ref. 3). Any standard that is offered or developed should cover all possible types of sensors. Several of these sensors are discussed briefly to illustrate the range of the various implementation techniques:

Acoustic transducer. A microphone is secured to the infant's neck to sense the sound of air movement in the airway.

Anemometer (thermistor). Direct sensing of the air flow is accomplished by placing a thermistor in a face mask, by the nares or mouth, or in the pharynx. The electrical resistance of the thermistor changes as it is warmed and cooled by the infant's breathing.

Barometer. Respiration is sensed by monitoring the barometric pressure changes which occur when an infant breathes freely within a closed chamber.

Carbon dioxide sensor. The rate of respiration and the degree to which carbon dioxide is removed from the body is measured using the partial pressure of carbon dioxide in the infant's exhalation.

Pneumotachograph. A fine mesh screen is placed across the infant's airway and detects air flow by sensing the pressure drop across the screen.

Reverse plethysmograph. The volume changes occurring in a reservoir into which an infant breathes by way of a face mask and tubing are measured with a strain gauge.

Spirometer. The volume of air that an infant exhales into a reservoir is measured.

Wet-test gas meter and mask. The infant breathes into a face mask with tubing connected to a wet-test gas meter, which measures the volume of air flowing into the face mask.

Air mattress. Body motion caused by breathing can be monitored by placing the infant on a pad or mattress which senses these motions and converts them to electrical signals. One technique uses a segmented air mattress. Tubing connects each air-filled segment to a common manifold which contains a thermistor. The mattress is placed under the infant with the segments perpendicular to the infant's length.

VOL
51
ISS
38
FE
26
1986
UMI

When the infant breathes, the distribution of his or her body weight shifts, causing air to be displaced from one mattress segment to another by way of the manifold. The moving air cools the thermistor differentially, and this temperature change is detected as a breath.

Air-filled rubber vest. The pressure variations inside an air-filled rubber vest surrounding the chest and abdomen correlate with respiration volume.

Capacitance pneumograph. Changes in the capacitance between conductive plates caused by breathing movements of the infant are detected.

Capacitance mattress. Another technique that senses body motion utilizes a mattress containing two capacitors which vary as the infant moves. The mattress contains several layers of foam with layers of fine wire mesh sandwiched between them to form the plates of two capacitors. The vertical force component of body motion associated with respiration changes the spacing between the mesh layers. These changes in spacing cause changes in capacitance which are interpreted as breathing.

Displacement magnetometer. Inductive means are used to detect chest and abdominal wall movements. Two coils are fixed to the infant's chest, and relative displacements produced by breathing vary the magnetic coupling between the coils. A derived voltage represents these displacements.

Displacement transducer. The elevation of various parts of the chest and abdomen is measured with linear displacement transducers attached by string. In another technique, the variation in separation between two points on the chest occurring with respiration is measured. One end of a guage is fixed to one point on the chest and the other end of the guage is allowed to move with respect to the second point which acts as a marker for the gauge.

Electret. The electret is an electrically polarizable material which acts as a pressure transducer. A pad containing a small, thin sheet of electret, when placed under the infant's mattress, detects the vertical component of force associated with respiratory motion. This force is converted by the transducer to an electrical signal and interpreted as breathing.

Electromyograph. Electrical activity associated with nerve and muscle activation occurring with breathing effort are sensed. Skin surface or needle electrodes are employed.

Impedance pneumograph. Changes in impedance across the thorax caused by the efforts of breathing are sensed. A 10 to 100 kilohertz electric current of about 50 microamperes is passed through electrodes taped to the infant's thorax. The voltage developed and measured is proportional to the transthoracic impedance, which varies during each breath.

Intraesophageal pressure. A catheter is placed in the esophagus to monitor the intraesophageal pressure, which reflects changes in intrathoracic pressure during breathing.

Permanent magnet. Breathing motions can be monitored with a permanent magnet taped to the infant's abdomen or back. A rigid pad containing a concentrically coiled wire is placed under the mattress. Movement of the magnet induces a voltage in the coiled wire which is amplified and interpreted as breathing.

Photoelectric plethysmograph (hemodensitometer). Alterations are detected in the absorption of particular wavelengths of incident light by the blood in the underlying tissue. Hemodensitometer signals from the plantar surface of the infant's foot correlate with his or her respiratory efforts.

Piezo-resistive mattress. A mattress, placed under the infant, changes resistance as the infant's weight redistributes with breathing.

Radar. Low/ amplitude, high-frequency radio transmitter and receiver signals reflected from the infant detect the breathing motion of the chest.

Strain gauge. There are two types of strain gauges. The mercury-in-rubber strain gauge encircles the abdomen or thorax and senses the expansion and contraction of the torso with each inspiration and expiration. The air-filled tubing pneumograph generally consists of two small, hollow, corrugated rubber tubes strapped to the abdomen and connected to an air-tambour to sense air displacement caused by abdominal motion during breathing.

Whole and partial body plethysmograph. The volume of air displaced with each breath is sensed by a pneumotachograph attached to a tube connected to a box in which all or a portion of the infant can be placed.

From data provided in premarket notifications under section 510(k) of the act (21 U.S.C. 360(k)), FDA is aware of about 33 different models of the breathing frequency monitor that potentially would be covered by a performance standard established for the device.

Risks Associated With the Device and Which Are To Be Controlled by a Performance Standard

FDA believes that the characteristics of the neonatal apnea monitor necessitating a performance standard concern the importance of accurate and reliable performance of the device. It is used in medical contexts in which its failure to work properly can have a significant negative effect on the health of the patient, or can, in some situations, be life threatening. In addition, there are general risks associated with the electrical and mechanical features of the device. The primary risk associated with the device is failure to detect reliably the lack of breathing (apnea) which can result in death of the infant patient.

A description of the risks identified by FDA's advisory committees is presented in the section of this notice entitled "Summary of the Data Supporting the Need for a Performance Standard."

Based upon the risks currently known the FDA, to agency is providing to interested persons guidance in the concepts that may be used in a performance standard and that FDA believes will provide reasonable assurance of the safety and effectiveness of the device.

A neonatal apnea monitor should accurately and reliably detect the absence of effective respiration and provide an alarm in such cases. As necessary, a standard for the device should address monitor design, including that of the respiration sensor, and the ability of the monitor to function in physiopathologic situations, such as when there is periodic breathing, disorganized breathing, shallow breathing, too low or too high a breathing rate, or an airway obstruction.

The neonatal apnea monitor may incorporate a secondary monitoring system in case the primary monitoring system fails to perform its intended function.

The labeling for the monitor should provide instructions for each intended use and prominently state the intended uses of the device, describe malfunctions, describe uses not intended for the device, and contain adequate maintenance and service information.

Summary of the Data Supporting the Need for a Performance Standard

The need to establish a performance standard for the neonatal apnea monitor is based on information from several sources. These sources include FDA's advisory committees, a report developed under contract with FDA regarding the

risks and hazards associated with the monitors (Ref. 3), reports received through the agency's Device Experience Network (DEN), information submitted to the agency under Part 803 of the regulations governing medical device reporting (21 CFR Part 803), recent papers presented at a scientific meeting (Refs. 6 through 11), and a report by the American Medical Association (AMA) (Ref. 12). FDA believes the data presented herein support the need for a performance standard to address the risks to health associated with the device. FDA notes that the National Institutes of Health is sponsoring a consensus conference on apnea and home monitoring in September 1986. The objectives of the conference are to determine the facts and recommendations that pertain to infant and neonatal breathing problems and their management insofar as experts in the field and the contributing public can determine. Although FDA will consider any recommendations made by the Panel members as a result of the conference the proceedings of the conference do not bear directly on this action.

The Anesthesiology and Respiratory Therapy Devices Panel, the General and Plastic Surgery Devices Panel, and the General Hospital and Personal Use Devices Panel (then the Anesthesiology Device Classification Panel, the General and Plastic Surgery Classification Panel, and the General Hospital and Personal Use Devices Classification Panel, respectively), FDA advisory committees, recommended that the breathing frequency monitor including the neonatal apnea monitor be classified into class II (see the **Federal Register** of August 24, 1979 and November 2, 1979; 44 FR 49856; 63340). The Panels made their recommendations because the Panel members believed that the device needs accurately and reliably to detect and to alert users to changes in a patient's breathing frequency. The Panels believed that general controls would not provide sufficient control over these characteristics, that a standard would provide reasonable assurance of the safety and effectiveness of the device, and that there is sufficient information to establish a standard to provide such assurance.

The Anesthesiology and Respiratory Therapy Devices Panel identified the following risks to health presented by the breathing frequency monitor: (a) Undetected abnormal respiratory conditions: failure of the device or alarm may cause abnormal conditions to go undiscovered and result in serious patient injury or death; and (b) Inappropriate therapy: the patient may receive incorrect therapy if the device does not monitor the patient's breathing frequency accurately and reliably. The General and Plastic Surgery Devices Panel did not offer reasons for its recommendation that the device be classified in class II.

The General Hospital and Personal Use Devices Panel identified the following risks to health presented by the neonatal ventilatory effort monitor (apnea detector) previously classified in § 880.2440: (a) Infant death: Poor device design, construction, or device malfunction may lead to the failure of the device to detect an abnormal pause in ventilatory efforts (apnea), which could result in infant death; (b) Electrical shock: Improper device design and construction or device malfunction could result in an electrical shock; and (c) Inappropriate therapy: Inappropriate therapy may result if the device is not accurate in determining the breathing rate.

FDA contracted with the Emergency Care Research Institute (ECRI) to study and report on the risks and hazards associated with infant apnea monitors (Ref. 3). In its problem definition study completed in 1978, ECRI concluded generally that several risks and hazards are associated with the devices and that the associated risks and hazards can be controlled by one or more standards.

The risks and hazards listed in the ECRI report are: Failure to alarm for apnea (false-negative); alarm when infant is breathing normally (false-positive); electrode malfunctions; other sensor malfunctions; connector-interchange incompatibility; inappropriate audible alarm level; silencing of audible alarm and failure to reset; excessive alarm delay; inadequate alarm delay; ratemeter inaccuracy; excessively long sampling time on ratemeter; failure of ratemeter to alarm at low or high limits; electromagnetic interference; environmental vibration induced artifact; poor construction techniques, such as sensitivity control knob slippage and incorrect setting leading to detection of spurious signals that are interpreted as breathing (artifact); poor workmanship that is manifest as electrical hazards (microshock, macroshock, and burns); and bacterial contamination.

DEN is an FDA system for reporting and tracking malfunctions in medical devices. The system is voluntary, which limits the reliability of the data. FDA assumes that: (1) Not all device malfunctions are reported; (2) a listing of reported kinds of malfunctions probably does not include all of the kinds of malfunctions that occur; and (3) the frequency of reported kinds of malfunctions does not provide quantitative information and should be regarded only qualitatively.

Specific reported malfunctions of the neonatal apnea monitor in the DEN system to September 11, 1985, are: (1) Erratic operation of the device due to various causes including failure to alarm and false alarms (17 reports); (2) misuse of monitor and incomprehensible terminology in labeling (3 reports); (3) complaints respecting power cords, including poor insulation, mislabeling, or weak construction (3 reports); (4) electromagnetic interference (2 reports); (5) complaints of refusal to provide repair service for nonfunctioning units (2 reports); and (6) electrical shorts inside device (1 report).

In the **Federal Register** of September 14, 1984 (49 FR 36348), FDA issued Part 803 effective December 13, 1984, that requires manufacturers and importers of medical devices, including diagnostic devices, to report to FDA whenever the manufacturer or importer receives or otherwise becomes aware of information that reasonably suggests that one of its marketed devices (1) may have caused or contributed to a death or serious injury or (2) has malfunctioned and that the device or any other device marketed by the manufacturer or importer would be likely to cause or contribute to a death or serious injury if the malfunction were to recur. Fifty-one such reports regarding apnea monitor products have been submitted to the agency under Part 803 as of July 16, 1985. Most reports list a failure to alarm for apnea or bradycardia, loose leads, or a fluctuating or low-volume audible alarm. These reports currently are being investigated by FDA and will be considered in the proceeding to establish a performance standard for the neonatal apnea monitor to the extent that they may bear on the provisions of any such standard.

FDA has received reports of one death and two electrical burns sustained when unsupervised children have plugged the connector pins of the sensor electrode lead from an impedance apnea monitor system into either AC power cords or a wall outlet. Because of these incidents, a warning alert has been sent to the medical and manufacturing community.

Several authors at the 1984 annual conference of the Alliance for Engineering in Medicine and Biology presented papers concerning monitoring for apnea (Refs. 6 through 11). In general, the papers presented at the conference affirm that hazards that the

VOL 51
ISS 38
FE 26
1986
UMI

1978 ECRI study identified still are presented by the device.

On October 17, 1983, AMA issued a diagnostic and therapeutic technology assessment regarding apnea monitoring for newborns at risk of sudden infant death syndrome (Ref. 12). The assessment establishes AMA's position regarding the neonatal apnea monitor. It states: "Of the monitors currently available only those that record both cardiac and respiratory activity should be used: either one may be helpful by itself but the combined monitoring of heart and respiratory rates is preferred. The principal difficulty with the monitoring systems presently available in their susceptibility to false alarms and the possible strain that such a monitoring system in the home may place upon a family. Physicians with experience in the use of home monitors have stated that parents are usually quite cooperative and gain reassurance from the presence of the monitor. In fact, it is quite possible that reassurance of the parent is the greatest benefit to be derived from monitoring these infants, because there is as yet scant proof that identification of apneic spells and stimulation of the infant will, in fact, allow interdiction of the sudden infant death syndrome (SIDS). Furthermore, the ideal monitor that recognizes apnea or bradycardia readily and without artifact has yet to be developed."

Invitation for Offers To Submit Existing Standards

In accordance with section 514(c)(1)(A) of the act and § 861.20(c), FDA invites any interested person, including any Federal agency, to submit by April 28, 1986, an existing standard as a proposed performance standard for the neonatal apnea monitor. Alternatively, any such person may submit pertinent portions of an existing standard, including completed portions of any standard that is under development.

FDA has not been able to identify any voluntary standard that is applicable specifically to either the breathing frequency monitor or the neonatal apnea monitor.

There are voluntary standards, some of which are in final form, that are relevant only in part to a performance standard for the neonatal apnea monitor. These include standards for electrical safety. No one of these standards by itself will provide reasonable assurance of the safety and effectiveness of the neonatal apnea monitor, but these standards contain many concepts that should be considered in the development of a performance standard under section 514 of the act for the device (Refs. 4 and 5).

Section 861.24 sets forth the conditions under which FDA may accept an existing standard or a standard under development as a proposed performance standard. Accordingly, FDA advises that any such submission is to include the following:

1. A description of the procedures used to develop the standard and a list of persons and organizations that participated in, or in the event the standard is under development, that such information is available or are participating in its development, to the extent that reasonably obtainable;

2. An identification of the specific portions of the existing standard, or standard under development, that the person submitting the standard believes are appropriate for adoption as, or inclusion in, the proposed standard; and

3. A summary of the test data and other information, including rationales, necessary to support each specific portion of the standard identified by the person submitting the standard. More detailed information may be requested concerning certain portions of the standard if FDA determines that the summary is inadequate.

In accordance with section 514(d)(2) of the act, if an existing standard or one that is under development is submitted to FDA in response to this notice and FDA does not accept the standard, the agency will publish a notice of that fact together with the reasons therefor. In accordance with § 861.24(b), if an existing standard or one that is under development is submitted to FDA in response to this notice and FDA accepts the standard, or accepts the standard with modification, as a proposed standard, the agency will publish a notice of that fact. FDA advises that in the latter event, it may publish the notice as a notice of proposed rulemaking to establish a performance standard under section 514(g) of the act and § 861.20(e)(1). FDA expects to make such determination and publish the notice of its decision within 180 days after the close of the comment period on this notice.

Invitation for Offers To Develop Proposed Standards

In accordance with section 514(c)(1)(B) of the act and §§ 861.20(c) and 861.22, FDA invites any interested person, including any Federal agency, to offer by April 28, 1986 to develop a performance standard for the neonatal apnea monitor, as described in this notice, to control the risks associated with the device.

Section 514(c)(3) of the act sets out certain criteria applicable to any offerors. Section 514(e)(3) of the act provides that if an offer is accepted, FDA may, upon application which may be made before the acceptance of the offer, agree to contribute to the offeror's cost in developing a proposed standard if FDA determines that such contribution is likely to result in a more satisfactory standard than would be developed without such contribution. Therefore, in accordance with section 514 (c)(3) and (e) of the act and § 861.26, FDA advises that any offer to develop a proposed performance standard is to include:

1. Information on the offeror's expertise and experience that qualifies the offeror to develop the standard.

2. Sufficient information on the offeror's financial stability to establish its capability to conduct adequate standards development either with or without contribution by FDA to the offeror's costs. Any request for contribution by FDA to the offeror's cost of developing the standard shall include:

(i) A list of the items of expense for which contribution is sought and the amount requested for each item;

(ii) A justification of each item of expense, including an explanation of how the contribution is likely to ensure development of a more satisfactory standard;

(iii) A statement that the offeror will employ an adequate accounting system (one in accordance with generally accepted accounting principles) to record the costs and expenditures allocable to development of the standard; and

(iv) A statement requesting an advance payment of funds, if necessary to enable the offeror to meet operating expenses during the development period.

3. Information relating to any potential conflicts of interest on the part of the offeror, its directors or officers, or any employees or consultants who may participate in the development of the standard, including any financial interest in the particular device or in the device industry generally, current industrial or commercial affiliates of the offeror, current sources of financial support for research, and all business entities in which the offeror has a financial interest that may be relevant to the offeror's qualifications to develop a standard for the particular device.

4. Information regarding the offeror's compliance with Federal, State, and local environmental regulations.

6

5. A detailed description of the procedures the offeror intends to utilize in developing the standard.

6. A description of how the offeror intends to provide interested persons adequate and reasonable notice of their right and opportunity to participate in the development of the standard.

7. A description of the method whereby interested persons who respond to the notice may participate, either in person or through correspondence, in the development of the standard.

8. A statement describing the facilities or equipment the offeror intended to utilize in developing the standard, and how the offeror intends to gain access to them.

9. An estimate of the time required to develop the standard, including a detailed schedule for each phase of the procedure.

10. A description of the method the offeror intends to use or has used to acquire test data or other information needed to support the standard.

11. A description of the method the offeror intends to use to maintain records of the development of the standard and other relevant matters and to make such records available for disclosure during development, and a schedule for meeting the periodic reporting requirements of § 861.30(b).

FDA advises that under section 514(c)(3) of the act and § 861.26(b), information included in an offer to develop a proposed standard is to be made available to the public only if the offer is accepted (except for information exempt from disclosure under 21 CFR 20.61), or if disclosure is required under 21 CFR Part 20.

Time Period To Develop a Standard

FDA estimates the time period to develop a proposed standard and rationale for the neonatal apnea monitor will be 2 years. This time span will enable the collection of existing information to consider in the development of the standard and will permit public comment on the drafts of the standard. The time period may be extended by the Commissioner for good cause shown.

Acceptance by FDA

As required by section 514(e)(1) of the act and § 861.28(a), in determining whether to accept an offer to develop a performance standard, FDA will evaluate the qualifications of the offeror on the basis of the offeror's expertise, experience, financial stability, and potential conflicts of interest. In choosing among competing offerors, the offeror without any financial interest in the particular device for which a proposed standard is sought or in the device industry generally will be preferred, all other things being equal. More than one offer, however, may be accepted.

As required by section 514(e)(2) of the act and § 861.28(c), FDA will publish in the **Federal Register** the name and address of each person whose offer to develop a standard is accepted and a summary of the terms of the accepted offer, including a statement of the extent to which FDA will contribute, if at all, to the cost of developing the proposed standard. As required by section 514(e)(5) of the act and § 861.28(d), if FDA does not accept an offer, the agency will publish in the **Federal Register** a notice of that fact and the reasons for its decision.

Future Actions

Following expiration of the 60-day time period provided by this notice for interested persons to submit an existing standard or to offer to develop a proposed standard, FDA will:

1. Authorize a Federal agency to develop a proposed performance standard if FDA determines that a performance standard can be developed by a Federal agency, based on the personnel, expertise, and resources of the agency; or

2. Accept an existing standard as a proposed performance standard or as a basis upon which a proposed performance standard may be developed provided FDA determines that such standard based upon scientific data and information and has been subjected to adequate scientific consideration. An existing standard may be one that is submitted in response to the invitation for standards or it may be a standard that has been issued or adopted (or is being developed) by any Federal agency or any other qualified entity; or

3. Accept one or more offers to develop a proposed standard; or

4. Proceed to develop a proposed standard; or

5. Take other appropriate action to facilitate development of a performance standard for the device.

The agency has determined under 21 CFR 25.24(e)(3) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

In any notice of proposed rulemaking that includes a proposed performance standard for the neonatal apnea monitor, FDA will announce its initial determination whether the proposed rule is a major rule under Executive Order 12291 and will consider the requirements of the Regulatory Flexibility Act (5 U.S.C. 601–612). Until the provisions of any proposed standard are known, FDA cannot determine the economic consequences of the promulgation of such standard.

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services

Auxiliary Activities; Innovative Programs for Severely Handicapped Children

AGENCY: Department of Education.

ACTION: Notice of final annual funding priorities.

SUMMARY: The Secretary announces annual funding priorities for the Auxiliary Activities—Innovative Programs for Severely Handicapped Children program. To ensure wide and effective use of program funds, the Secretary announces seven priorities to direct funds to the areas of greatest need for fiscal year 1986. A separate competition is established for each priority.

EFFECTIVE DATE: These final annual funding priorities will take effect either 45 days after publication in the **Federal Register** or later if Congress takes certain adjournments. If you want to know the effective date of these final annual priorities, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: R. Paul Thompson, Special Needs Section, Special Education Programs, Department of Education, 330 C Street SW., (Switzer Building, Room 3511—M/S 2313), Washington, DC 20202. Telephone: (202) 732–1177.

SUPPLEMENTARY INFORMATION: The Auxiliary Activities program, authorized by section 624 of the Education of the Handicapped Act, supports research, development or demonstration, training, and dissemination activities which meet the unique educational needs of handicapped children and youth, and are consistent with the purposes of Part C of the Act [20 U.S.C. 1424]. In accordance with this authority, the Secretary intends to fund projects under the following priorities for fiscal year 1986. These priorities identify target areas for project efforts within the scope of model projects and practices. They address the needs of deaf-blind and severely handicapped children which have been identified by professionals, paraprofessionals, and parents as being those most critical at this time. Projects will be funded for up to 36 months, except where otherwise indicated, subject to annual review of progress, the availability of Federal funds, and other factors [see 34 CFR 75.251–75.253].

Summary of Comments and Responses

A notice of proposed annual funding priorities was published in the **Federal Register** on October 9, 1985 (50 FR 41318). The public was given thirty days in which to comment. One comment was received in response to the notice of proposed annual funding priorities. The comment and the Department's response are summarized below:

Comment. One commenter expressed concern that Priority No. 6, "Education of Severely Handicapped (Including Deaf-Blind) Children and Youth in the Least Restrictive Environment," could have a negative impact on the extent to which children with special needs have a continuum of specialized services available to them. Concern was also expressed that placement decisions of educational services be based upon the appropriateness of the program for the individual child.

Response. No change has been made. The priority on "Education of Severely Handicapped (Including Deaf-Blind) Children and Youth in the Least Restrictive Environment," was included in the fiscal year 1985 competitions. Applications were submitted and awarded that presented a wide spectrum of approaches in varied settings for meeting the educational needs of severely handicapped and deaf-blind children. It is the infent of this priority to increase the availability of placement options in the least restrictive and least segregated environments. In the past, less restrictive options have often not been widely available.

The Education of the Handicapped Act requires that each placement decision be made based upon the appropriateness of the placement for the individual child and in accordance with the least restrictive environment requirements of section 612(5) of the Act. Increasing the range of placement options enhances the ability of grantees to make placements based upon the individual needs of the handicapped child.

Other Changes

Some additional technical and clarifying changes have been made in the priorities, but no substantive revision is intended. A technical change has been made to Priority Six to make clear that all projects funded under this priority must meet at least some needs of deaf-blind children in order to be eligible to be funded. Because these projects are funded with appropriations form the deaf-blind program, projects can only be funded if they are capable of meeting the needs of deaf-blind children.

Priorities

(1) *Non-directed Demonstration Projects for Severely (Other than Deaf-Blind) Handicapped Children and Youth.* This priority supports projects designed to demonstrate specific, viable procedures for meeting significant educational needs including vocational needs of severely handicapped (other than deaf-blind) children and youth. The content of the demonstration projects is limited only by the overall mission of the program—to demonstrate innovative and effective approaches to the education of severely handicapped children. Applicants proposing to conduct the projects must fully describe and justify the selection of the focus and particular approach to be demonstrated. Approximately $750,000 is expected to be available for issuing seven awards under this competition.

(2) *Supported Employment for Deaf-Blind Youth.* This priority supports projects which design, implement, and disseminate information about innovative practices in the job placement, job site training and follow-up of deaf-blind youth. The practices must extend beyond, expand upon, complement, or supplement existing successful practices. These projects are to focus on on-the-job skills and adaptations, employee-employer relations, job acquisition, retention skills, and, where appropriate, supplemental support for the employment of deaf-blind youth on a long term basis. These projects may also include feasible applications of techniques still in the development stage in research and other experimental programs. These projects are to provide services for severely handicapped deaf-blind youth who typically have not been eligible for vocational rehabilitation services.

The following provisions, which distinguish these projects from traditional vocational education programming for deaf-blind youth, must be incorporated into these projects: (1) Paid employment in regular job settings such as assisted competitive employment, mobile work crews, and work stations in industry; (2) opportunities for integration of these deaf-blind youth with nonhandicapped coworkers in their job setting and with relevant others in typical living environments external to the job; (3) ongoing financial and social services support for these deaf-blind youth throughout the course of the project; and (4) a plan cooperatively developed with

related State and local agencies for the continuation of such services for an appropriate period of time following termination of the project. The overall objective of these projects should be to provide an employment focus directed toward the achievement by these deaf-blind youth of the same goals (security, mobility, quality of life, and appropriate income level) sought for nonhandicapped workers. Approximately $1,000,000 is expected to be available for issuing up to eight awards under this competition.

(3) *Nondirected Demonstration Projects for Deaf-Blind Children and Youth.* This priority supports projects designed to demonstrate specific, viable procedures for meeting significant educational needs of deaf-blind children and youth. The content of these projects is limited only by the overall mission of the program—to demonstrate innovative and effective approaches to the education of deaf-blind children and youth in the least restrictive environment. Applicants proposing to conduct a project must describe and justify the selection of the focus and particular approach to be demonstrated. Approximately $1,963,000 is expected to be available for issuing 18 awards under this competition.

(4) *State-wide Systems Change.* This priority supports projects which design, implement, evaluate, and disseminate information about a model for the State-wide delivery of comprehensive special education and related services to severely handicapped children and youth (including deaf-blind children and youth), ages birth through 21, within a particular State. Such a design must utilize and enhance existing service delivery systems for these children. Particular attention should be placed on ensuring that deaf-blind children are properly integrated into these systems since services to this group are often provided through a combination of regional, Federal, State and local service providers. Federal programs with which the projects should be coordinated include Early Childhood State Plan projects (34 CFR 309.50–309.53), Services for Deaf-Blind Children programs (34 CFR Part 307), and vocational education. Each project must develop a system which will: (1) Develop a comprehensive description of services for severely handicapped children within a State; (2) complete an extensive analysis of the current service delivery system; (3) design an improved comprehensive State-wide model for the delivery of educational services to maximize the potential of severely handicapped children and youth; (4) implement the model of State-wide services on a pilot basis under systematic and carefully documented conditions; (5) design and implement an evaluation plan for each of the project components; (6) disseminate information about the model's findings and recommendations; (7) establish and utilize an advisory committee; and (8) maintain a performance measurement system to monitor all project activities. In the past few years, contracts and cooperative agreements have been awarded to establish similar State-wide service delivery systems. States receiving those contracts or cooperative agreements are not eligible to compete under this priority.

Projects under this priority will be funded through cooperative agreements with the Secretary. Approximately $815,000 is expected to be available for issuing seven cooperative agreements under this competition.

(5) *Transition Skills Development for Severely Handicapped (Including Deaf-Blind) Youth.* This priority supports projects which design, implement, and disseminate information about innovative practices which facilitate the transition of a small number of severely handicapped (which may include deaf-blind) youth from education to employment and other service options, in preparation for their integration into regular community environments as adults. Emphasis in these projects will be placed on the development of job-related skills, peer interactions, orientation and mobility, personal grooming, independent living skills and the development of a positive self-concept. Projects must include specific activities directed toward development of skills identified as those most needed by project participants in order to facilitate their effective transition. Each project must include procedures for initiating and maintaining on an on-going basis coordination and cooperation with State educational and rehabilitative agencies in the State where the project is located. Projects must have direct access and be providing direct service to the proposed project participants. Approximately $1,965,000 is expected to be available for issuing up to 25 awards at approximately $78,000 per year for up to three years under this competition.

(6) *Education of Severely Handicapped (Including Deaf-Blind) Children and Youth in the Least Restrictive Environment.* This priority supports projects which, on a district-wide basis (local educational agency) or cross-district basis, design, implement, and evaluate innovative approaches to meet the needs of severely handicapped (including deaf-blind) children and youth in the least restrictive and least segregated environments. Projects under this priority must:

1. Develop new models for delivery of integrated educational services, including changes in the location of instructional areas for provision of these services, for severely handicapped (including deaf-blind) children who currently are being educated in segregated environments;
2. Demonstrate through the provision of project services the clear movement of participating children and youth to and integration into less segregated environments, with the objective of facilitating the placement of these children in appropriate, regular school settings;
3. Provide inservice training of personnel, including principals, assistant principals and teaching staff, in local educational agencies which are planning to provide educational services to handicapped children of the project in the least restrictive and least segregated environments; and
4. Provide components which promote acceptance of these children and youth by administrators, teachers, parents, and other children and youth in the least restrictive and least segregated environments.

Approximately $809,000 is expected to be available for issuing up to eight awards for up to three years each under this competition.

(7) *Inservice Training—Services for Severely Handicapped (Including Deaf-Blind) Children and Youth.* This priority supports projects which utilize effective inservice training activities that focus on meeting the needs of qualified personnel to provide services to severely handicapped (including deaf-blind) children and youth. Although the projects may include training for a variety of severe handicapping conditions, they must include some training for meeting the unique needs of deaf-blind children and youth. Personnel receiving inservice training under this priority must be either: (a) Currently providing educational service to severely handicapped children and youth; or (b) formally committed to providing educational services to severely handicapped children and youth for at least a one-year period following the completion of the inservice training provided under this priority.

The inservice training provided must: (a) be appropriate for the attainment of knowledge and competencies that are necessary for the provision of quality educational services for these severely

FE
26
1986
UMI

handicapped children and youth; and (b) be based on innovative practices for the education of these children and youth in the least restrictive school and community environments. Projects could provide for release time of participants, payment for participation, options for academic credit, salary step credit, certification renewal, or updating professional skills.

Approximately $2,554,000 is expected to be available for issuing up to 16 awards at approximately $106,000 per year for up to three years under this competition.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 51, No. 39
Thursday, February 27, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Parts 420, 421, 424, 425, 431, 432, 438, and 448

[Doc. No. 0072A]

Crop Insurance Regulations—Various

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) hereby adopts, as a final rule, an interim rule which was published in the **Federal Register** on November 22, 1985 (50 FR 48168). The interim rule amended the Corn, Cotton, ELS Cotton, Grain Sorghum, Peanuts, Rice, Soybean and Canning and Processing Tomato Crop Insurance Regulations (7 CFR Parts 420, 421, 424, 425, 431, 432, 438, and 448), effective for the 1985 calendar year only, by extending the date for filing contract changes specified in the policies for insuring such crops. The intended effect of this rule is to provide additional time in which to file changes made in the contracts for such crops for actuarial purposes. The authority for the promulgation of this rule is contained in the Federal Crop Insurance Act, as amended.

EFFECTIVE DATE: February 27, 1986.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC, 20250, telephone (202) 447-3325.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established by Departmental Regulation 1512-1. This action does not constitute a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures.

Merritt W. Sprague, Manager, FCIC, (1) has determined that this action is not a major rule as defined by Executive Order 12291 because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) major increases in costs or prices for consumers, individual industries, federal, State, or local governments, or a geographical region; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) certifies that this action will not increase the federal paperwork burden for individuals, small businesses, and other persons.

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

On Friday, November 22, 1985, FCIC published an interim rule, effective upon publication in the **Federal Register** at 50 FR 48168, amending the Corn, Cotton, ELS Cotton, Grain Sorghum, Peanuts, Rice, Soybean and Canning and Processing Tomato Crop Insurance Regulations (7 CFR Parts 420, 421, 424, 425, 431, 432, 438, and 448), effective for the 1985 calendar year only, to change the date for filing contract changes specified in the policies for insuring such crops.

Written comments on the interim rule were solicited by FCIC for 60 days after publication of the rule in the **Federal Register**, and the rule was scheduled for review so that any amendments made necessary by public comment could be published in the **Federal Register** as quickly as possible.

No comments were received, therefore, the interim rule is hereby adpoted as final.

List of Subjects in 7 CFR Parts 420, 421, 424, 425, 431, 432, 438, and 448

Crop Insurance; Corn, Cotton, ELS Cotton, Grain Sorghum, Peanuts, Rice, Soybean, and Canning and processing tomato.

Final Rule

Accordingly, the Interim Rule published in the **Federal Register** on November 22, 1985, at 50 FR 48168, is hereby adopted as final.

Authority: Secs. 506, 516, Pub. L. 75-430, 52 Stat. 73, 77, as amended (7 U.S.C. 1506, 1516).

Done in Washington, DC, on February 12, 1986.

Edward Hews,
Acting Manager, Federal Crop Insurance Corporation.

[Doc. No. 3196S]

Tobacco (Guaranteed Production Plan) and Tobacco (Dollar Plan) Crop Insurance Regulations; Correction

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule and termination; correction.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) published a Final Rule and Termination in the **Federal Register** on Wednesday, February 12, 1986, at 51 FR 5154, amending the Tobacco (Guaranteed Production Plan) Crop Insurance Regulations (7 CFR Part 436), by expanding the provisions therein to incorporate insurance procedures for tobacco types formerly insured under the Tobacco (Dollar Plan) Crop Insurance Regulations (7 CFR Part 434). Section 436.7(d)9.e.(1) inadvertently contained the word "harvested" in the first line thereof which has the effect of changing the meaning of that section. This notice is published to correct that error.

ADDRESS: Written comments on this correction may be sent to the Office of the Manager, Federal Crop Insurance Corporation, Room 4096, South Building, U.S. Department of Agriculture, Washington, DC, 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC, 20250, telephone (202) 447–3325.

SUPPLEMENTARY INFORMATION: FR Doc. 86–3040, appearing at 51 FR 5154 is corrected in the following instance:

§ 436.7 [Corrected]

7 CFR 436.7(d)9.e.(1) introductory text is corrected to read as follows:

* * * * *

(1) Tobacco production which, due to insurable causes, have a value less than the market price for tobacco of the same type, will be adjusted by:

* * * * *

Done in Washington, DC on February 20, 1986.

Edward Hews,

Acting Manager, Federal Crop Insurance Corporation.

[FR Doc. 86–4240 Filed 2–26–86; 8:45 am]

BILLING CODE 3410-08-M

7 CFR Part 440

[Doc. No. 0063A]

Texas Citrus Tree Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) hereby revises and reissues the Texas Citrus Tree Crop Insurance Regulations (7 CFR Part 440), effective for the 1987 and succeeding crop years. The intended effect of this rule is to: (1) Add as a cause of loss the unavoidable failure of irrigation water supply after insurance attaches; (2) Change the method of calculating the insured's share of an indemnity at loss adjustment time; (3) Add a provision that insurance would not attach to acreage on which grafting on existing root stock was performed in the grove within one year prior to the date insurance attaches; (4) Add a provision to provide a coverage level if the insured does not select one; (5) Revise the schedules of coverage; (6) Add a provision to provide that damage to a grove of over 80 percent will be considered as 100 percent damaged; and (7) Add definitions for "Cyclone", and "Freeze". The authority for the promulgation of this rule is contained in the Federal Crop Insurance Act, as amended.

EFFECTIVE DATE: February 28, 1986.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department

of Agriculture, Washington, DC 20250, telephone (202) 447–3325.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established by Departmental Regulation 1512–1. This action constitutes a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for these regulations is November 1, 1990.

Merritt W. Sprague, Manager, FCIC, (1) has determined that this action is not a major rule as defined by Executive Order 12291 because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) Major increases in costs or prices for consumers, individual industries, Federal, State, or local governments, or a geographical region; or (c) Significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) certifies that the action will not increase the Federal paperwork burden for individuals, small businesses, and other persons.

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

On Thursday, December 5, 1985, FCIC published a Notice of Proposed Rulemaking in the **Federal Register** at 50 FR 49854, to revise and reissue the Texas Citrus Tree Crop Insurance Regulations (7 CFR Part 440), effective for the 1987 and succeeding crop years. The public was given 30 days in which to submit written comments on the proposed rule.

One comment was received relative to the Notice of Proposed Rulemaking (50 FR 49854). The commenter recommended three changes in the policy provisions as follows:

1. Section 2.d.(2)—The language in this section provides that FCIC does not insure any acreage on which grafting on existing root stock has been performed within one year prior to the date insurance attaches. Commenter recommended that FCIC specify that the limitation of one year apply to only those trees rebudded in the grove as opposed to those budded in a nursery and set out in the grove. The present language in this section makes no mention as to where the budding takes place and therefore fails to recognize the greater effectiveness of nursery rebudding. It thus fails to recognize the similarity between resetting of nursery rebudded stock and the setting of new nursery grown stock. FCIC considers this comment relevant since it clarifies that insurance should attach on all trees set out for production consistent with other provisions of the policy, while limiting coverage on trees rebudded in the grove. For this reason, FCIC adopts this recommendation.

2. Section 7.a.(2)—Commenter opposed the change to lengthen to the 20th day the date insurance against hurricane and freeze attaches after application is signed and recommended the 20-day waiting period be applied for new applications and not just for new plantings. After publication of the Notice of Proposed Rulemaking, FCIC determined that the reference to "hurricane" was an error and should have read "cyclone". The error does not appear to affect the substance of the comment which addresses the length of the waiting period. Commenter also suggested FCIC eliminate the present 10-day waiting period before coverage attaches when there is a threat of a freeze. Given the imprecision of long range weather forecasts (more than 3 days), FCIC believes that commenter has a valid comment with respect to the waiting period. However, FCIC needs time to inspect the crop to determine if the acreage is acceptable to the Corporation and, therefore will maintain the present 10-day waiting period.

3. Section 4.d.(1), (2), (3) and (4)—Commenter recommends the percent of coverage for different tree ages be changed from the current 25%, 40%, 60%, 70%, and 100% for the first through the fifth year to 35%, 60%, 85%, and 100% for the first through the fourth year. Commenter contends that with denser tree plantings and improved cultural practices, citrus groves have trees in full production considerably sooner than 5 years. In regard to the schedules of coverage, FCIC has determined to adopt, in part, commenters recommendation by revising the schedule of coverage to be 33%, 60%, 80%, 90%, and 100% for the first through the fifth year. An actuarial review indicates that production increases until the fifth or sixth year, then stabilizes.

This review shows that the groves have not achieved full production by the fourth year in all cases. Thus, FCIC believes that the full costs of bringing the trees into production are not fully apparent until at least the fifth year. For these reasons, FCIC adopts the proposed change, in part only, by limitedly increasing the percentage of coverage for the first through the fourth year. This change will be beneficial to producers by increasing the amount of insurance available for different tree ages.

In addition, the notice of proposed rulemaking defined "ASCS". This was included in error and has been removed from the definition section in this final rule. Because this crop is not under the Actual Production History (APH) program requiring the involvement of ASCS, there is no need for this definition. Also, the definition of "county" has been changed. The proposed rule identified "County" to include a definition of land identified by an ASCS farm serial number for the county but physically located in another county. Since this crop is not under APH, this reference has been removed in the final rule. Also, the proposed rule included "frost" as an insurable cause of loss and provided a definition. Because frost does not damage trees insurable under the Texas citrus tree policy, there is no need for that provision, and that provision has been removed in this final rule.

Therefore, with the exception of minor changes in language and format, the proposed rule, as discussed above, is adopted as a final rule. The principal changes in the Texas citrus tree policy are:

1. Section 1—Add the failure of irrigation water supply because of unavoidable cause as an insurable cause of loss. This clarifies intent since it is implied in Section 2.

2. Section 2—Add a clause to change the method of calculating the insured's share of an indemnity on crops at loss adjustment time. This limits the insured's indemnity to the insured's interest in the crop at the time of loss.

Add a provision to exclude from insurance any acreage of citrus trees on which grafting on existing root stock has been performed in the grove within one year prior to the date insurance attaches.

3. Section 4—Add a provision for a coverage level if the insured does not select one.

VOL 51
ISS 39
FE 27
1986
UMI

Revise the percent of coverage for different tree ages from 25%, 40%, 60%, 75%, and 100% to 33%, 60%, 80%, 90%, and 100% for the first through the fifth year. This change more closely reflects the actual cost of growing the trees and the value of the trees per acre.

4. Section 9—Add a provision to provide that any grove with over 80 percent damage will be counted as 100 percent damaged. This change is made because it is not cost effective to care for a grove damaged in excess of 80 percent.

5. Section 17—Add definitions of "Cyclone" and "Freeze".

Since policy changes must be on file by February 28, 1986, good cause is shown for making this rule effective in less than 30 days.

List of Subjects in 7 CFR Part 440

Crop Insurance; Texas Citrus Tree.

Final Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby revises and reissues the Texas Citrus Tree Insurance Regulations (7 CFR Part 440), effective for the 1987 and succeeding crop years, to read as follows:

PART 440—TEXAS CITRUS TREE INSURANCE REGULATIONS

Subpart—Regulations for the 1987 and Succeeding Crop Years

Sec.
440.1 Availability of Texas citrus tree insurance.
440.2 Premium rates, coverage levels, amounts of insurance, and prices at which indemnities shall be computed.
440.3 OMB control numbers.
440.4 Creditors.
440.5 Good faith reliance on misrepresentation.
440.6 The contract.
440.7 The application and policy.

Authority: Secs. 506, 516, Pub. L. 75–430, 52 Stat. 73, 77, as amended (7 U.S.C. 1506, 1516).

Subpart—Regulations for the 1987 and Succeeding Crop Years

§ 440.1 Availability of Texas citrus tree insurance.

Insurance shall be offered under the provisions of this subpart on citrus trees in counties within the limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended. The counties shall be designated by the Manager of the Corporation from those approved by the Board of Directors of the Corporation.

§ 440.2 Premium rates, coverage levels, amounts of insurance, and prices at which indemnities shall be computed.

(a) The Manager shall establish premium rates, coverage levels, amounts of insurance, and prices at which indemnities shall be computed for citrus trees which will be included in the actuarial table on file in the applicable service offices for the county and which may be changed from year to year.

(b) At the time the application for insurance is made, the applicant will elect a coverage level, amount of insurance, and price at which indemnities will be computed from among those levels and prices contained in the actuarial table for the crop year.

§ 440.3 OMB control numbers.

The OMB control numbers are contained in Subpart H of Part 440, Title 7 CFR.

§ 440.4 Creditors.

An interest of a person in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankruptcy, involuntary transfer or other similar interest shall not entitle the holder of the interest to any benefit under the contract.

§ 440.5 Good faith reliance on misrepresentation.

Notwithstanding any other provision of the Texas Citrus Tree insurance contract, whenever: (a) An insured under a contract of crop insurance entered into under these regulations, as a result of a misrepresentation or other erroneous action or advice by an agent or employee of the Corporation: (1) Is indebted to the Corporation for additional premiums; or (2) Has suffered a loss to a crop which is not insured or for which the insured is not entitled to an indemnity because of failure to comply with the terms of the insurance contract, but which the insured believed to be insured, or believed the terms of the insurance contract to have been complied with or waived; and (b) the Board of Directors of the Corporation, or the Manager in cases involving not more than $100,000.00, finds that: (1) An agent or employee of the Corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice; (2) Said insured relied thereon in good faith; and (3) To require the payment of the additional premiums or to deny such insured's entitlement to the indemnity would not be fair and equitable, such insured shall be granted relief the same as if otherwise entitled thereto. Requests for relief under this section must be submitted to the Corporation in writing.

§ 440.6 The contract.

The insurance contract shall become effective upon the acceptance by the Corporation of a duly executed application for insurance on a form prescribed by the Corporation. The contract shall cover the citrus trees as provided in the policy. The contract shall consist of the application, the policy, and the county actuarial table. Changes made in the contract shall not affect its continuity from year to year. The forms referred to in the contract are available at the applicable service offices.

§ 440.7 The application and policy.

(a) Application for insurance on a form prescribed by the Corporation must be made by any person to cover such person's share in the citrus trees as landlord or owner-operator if the person wishes to participate in the program. The application shall be submitted to the Corporation at the service office on or before the applicable sales closing date on file in the service office.

(b) The Corporation may discontinue the acceptance of applications in any county upon its determination that the insurance risk is excessive, and also, for the same reason, may reject any individual application. The Manager of the Corporation is authorized in any crop year to extend the sales closing date for submitting applications in any county, by placing the extended date on file in the applicable service offices and publishing a notice in the **Federal Register** upon the Manager's determination that no adverse selectivity will result during the extended period.

However, if adverse conditions should develop during such period, the Corporation will immediately discontinue the acceptance of applications.

(c) In accordance with the provisions governing changes in the contract contained in policies issued under FCIC regulations for the 1987 and succeeding crop years, a contract in the form provided for in this subpart will come into effect as a continuation of a citrus tree contract issued under such prior regulations, without the filing of a new application.

(d) The application for the 1987 and succeeding crop years is found at Subpart D of Part 400—General Administrative Regulations (7 CFR 400.37, 400.38) and may be amended from time to time for subsequent crop years. The provisions of the Texas Citrus Tree Crop Insurance Policy for the 1987 and succeeding crop years are as follows:

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Texas Citrus Tree—Crop Insurance Policy

(This is a continuous contract. Refer to section 15.)

AGREEMENT TO INSURE: We will provide the insurance described in this policy in return for the premium and your compliance with all applicable provisions.

Throughout this policy "you" and "your" refer to the insured shown on the accepted Application and "we," "us," and "our" refer to the Federal Crop Insurance Corporation.

Terms and Conditions

1. Causes of loss

a. The insurance provided is against unavoidable damage to citrus trees resulting from the following causes occurring within the insurance period:

(1) Freeze;
(2) Excess moisture;
(3) Hail;
(4) Fire;
(5) Cyclone;
(6) Tornado;
(7) Failure of the irrigation water supply due to unavoidable cause occurring after insurance attaches;

unless those causes are excepted, excluded, or limited by the actuarial table or section 9g.

b. We will not insure against any cause of loss or damage to the citrus trees due to:

(1) Fire, where weeds and other forms of undergrowth have not been controlled or tree prunings have not been removed from the grove;

(2) The neglect, mismanagement, or wrongdoing of you, any member of your household, your tenants, or employees;

(3) The failure to follow recognized good grove management practices;

(4) The failure or breakdown of irrigation equipment or facilities;

(5) The failure to follow recognized good citrus tree irrigation practices; or

(6) Any cause not specified in section 1a as an insured loss.

2. Crop, Acreage, and Share Insured

a. The crop insured will be any of the following insurable citrus tree types (hereafter called trees) you elect:

Type I, Early and midseason orange trees;
Type II, Late orange (including Temples) trees;
Type III, Grapefruit trees except Star Ruby trees;
Type IV, Star Ruby grapefruit trees;

which are set out for the purpose of harvesting citrus as fresh fruit or juice, which are located on insured acreage, and for which an amount of insurance and premium rate are provided by the actuarial table.

b. The acreage insured for each crop year will be trees located on insurable acreage as designated by the actuarial table and in which you have a share, as reported by you or as determined by us, whichever we elect.

c. The insured share is your share as landlord or owner-operator in the insured citrus trees at the time insurance attaches. However, only for the purpose of determining the amount of indemnity, your share will not exceed your share at the time of loss.

d. We do not insure any acreage:

(1) For the crop year the application for insurance is filed unless the acreage has been inspected and considered acceptable by us;

(2) On which grafting on existing root stock in a grove has been performed within 1 year prior to the date insurance attaches;

(3) Where the grove management practices carried out are not in accordance with those practices for which premium rates have been established;

(4) Maintained or set out for experimental purposes;

(5) In any established grove which does not have the potential to produce at least 70 percent of the area average yield for the type and age, unless we agree in writing to insure that acreage; or

(6) Which is not irrigated.

e. We may limit the insured acreage to any acreage limitation established under any Act of Congress, if we advise you of the limit prior to the time insurance attaches.

f. We may:

(1) Exclude from insurance; or
(2) Limit the amount of insurance on;

any acreage which was not insured by us the previous crop year.

3. Report of Acreage, Share, Number, Type, Age of Trees, and Practice

You must report on our form:

a. All the acreage of trees in the county in which you have a share;

b. The practice;

c. Your share at the time insurance attaches; and

d. The type, number of trees, and:

(1) date of original set out; or

(2) date of replacement and/or dehorning, if more than 10 percent of the trees on any unit have been replaced or dehorned in the previous 5 years; and

e. Within 72 hours of the completion of setout; the acreage, type, number of trees, and the date setout is completed for any insurable acreage of trees set out after June 1 of the crop year if you elect to insure such acreage during that crop year.

You must designate separately any acreage that is not insurable. You must report if you do not have a share in any trees located in the county. This report must be submitted annually on or before June 30. All indemnities may be determined on the basis of information you submit on this report. If you do not submit this report by June 30, we may elect to determine, by unit, the insured acreage, share, and practice or we may deny liability on any unit. Any report submitted by you may be revised only upon our approval.

4. Coverage Levels and Amounts of Insurance

a. The coverage levels and amounts of insurance are contained in the actuarial table.

b. Coverage level 2 will apply if you do not elect a coverage level.

c. You may change the coverage level and amount of insurance on or before the sales closing date set by the actuarial table for submitting applications for the crop year.

d. The amount of insurance will be reduced for any acreage which has not reached the fourth growing season after being set out or fifth year following dehorning. The amount of insurance will be the product obtained by multiplying the amount of insurance selected from the actuarial table by:

(1) 33 Percent the year of set out or the year following dehorning;

(2) 60 Percent the first growing season after being set out or the second year following dehorning;

(3) 80 Percent the second growing season after being set out or the third year following dehorning; or

(4) 90 Percent the third growing season after being set out or the fourth year following dehorning.

e. The amount of insurance will be reduced proportionately for any unit on which the stand is less than 90 percent, based on the original planting pattern.

5. Annual Premium

a. The annual premium is earned and payable on the date insurance attaches. The amount is computed by multiplying the amount of insurance per acre times the premium rate, times the insured acreage, times your share at the time insurance attaches.

b. Interest will accrue at the rate of one and one-half percent (1½%) simple interest per calendar month, or any part thereof, on any unpaid premium balance starting on the first day of the month following the first premium billing date.

6. Deductions for Debt

Any unpaid amount due us may be deducted from any indemnity payable to you or from any loan or payment due you under any Act of Congress or program administered by the United States Department of Agriculture or its Agencies.

7. Insurance Period

a. Insurance attaches on insured acreage on June 1 for each crop year except that for the first crop year and notwithstanding section 2d(1):

(1) If the application is accepted by us after June 1, the insurance against cyclone and freeze will attach the tenth day after the application is signed by you; and

(2) If any insurable acreage is set out after June 1, insurance will attach on the date set out is completed for the unit if the acreage is reported within 72 hours after the date of completion; except insurance against cyclone and freeze will attach the tenth day after you report such acreage.

b. The insurance period ends at the earlier of:

(1) May 31 following the beginning of the crop year; or

(2) Total destruction of the insured trees.

8. Notice of Damage or Loss

a. In case of damage or probable loss, you must give us written notice of:

(1) The dates of damage; and

(2) The causes of damage.

b. If you are going to claim an indemnity on any unit, we will have the right to inspect all insured acreage and damaged trees before pruning, dehorning, or removal.

c. We may reject any claim for indemnity if you fail to comply with any of the requirements of this section or section 9.

VOL 51
ISS 39
FE 27
1986
UMI

9. Claim for Indemnity

a. Any claim for indemnity on a unit must be submitted to us on our form not later than 60 days after the earliest of:

(1) Total destruction of the trees on the unit; or

(2) The calendar date for the end of the insurance period.

b. We will not pay any indemnity unless you:

(1) Furnish records concerning all trees on the unit;

(2) Show that any damage to the trees has been directly caused by one or more of the insured causes during the insurance period; and

(3) Furnish all information we require concerning the loss.

c. The indemnity will be determined on each unit by:

(1) Multiplying the insured acreage by the amount of insurance;

(2) Multiplying this result by the applicable percent of loss determined by subtracting from the actual percent of damage determined in accordance with section 9e, the following applicable amount:

(i) 25 percent (for Coverage Level 3) and dividing the result by 75 percent;

(ii) 35 percent (for Coverage Level 2) and dividing the result by 65 percent; or

(iii) 50 percent (for Coverage Level 1) and dividing the result by 50 percent; and

(3) Multiplying this result by your share.

d. If the information reported by you under section 3 of the policy results in a lower premium than the actual premium determined to be due, the amount of insurance on the unit will be computed on the information you reported, but all acreage of the insurable acreage planted, whether or not reported as insurable, will count against the amount of insurance.

e. The total amount of indemnity will include both trees damaged and trees destroyed due to an insurable cause.

(1) The actual percent of damage to count will be:

(a) The percent of damage determined by dividing the number of scaffold limbs (scaffold limbs are limbs directly attached to the trunk) damaged in an area from the trunk to a length equal to one-fourth (¼) the height of the tree, by the total number of scaffold limbs before damage occurred. Any trees with over 80 percent actual damage will be counted as 100 percent damaged unless the damage occurs within one year of set out;

(b) Any grove with over 80 percent actual damage will be counted as 100 percent damaged unless the damage occurs within one year of set out; or

(c) The percent of damage resulting from insurable causes occurring during the crop year of set out as follows:

(i) 100 percent if the trees are killed back to the root stock; or

(ii) 90 percent if the trees have less than 12 inches of live wood above the bud union. However, no damage will be considered if more than 12 inches of wood above the bud union is alive.

(2) Any percentage of damage by uninsured causes, will not be included in the actual percent of damage.

f. The amount of indemnity will be determined at the earlier of:

(1) Total destruction of the trees; or

(2) The calendar date for the end of the insurance period.

g. If you exclude hail and fire as insured causes of loss and the citrus trees are damanged by hail or fire, appraisals will be made in accordance with Form FCI-78-A, "Request to Exclude Hail and Fire."

h. You must not abandon any acreage to us.

i. Any suit against us for an indemnity must be brought in accordance with the provisions of 7 U.S.C 1508(c). You must bring suit within 12 months of the date notice of denial of the claim is received by you.

j. An indemnity will not be paid unless you comply with all policy provisions.

k. We have a policy for paying your indemnity within 30 days of our approval of your claim, or entry of a final judgment against us. We will, in no instance, be liable for the payment of damages, attorney's fees, or other charges in connection with any claim for indemnity, whether we approve or disapprove such claim. We will, however, pay simple interest computed on the net indemnity ultimately found to be due by us or by a final judgment from and including the 61st day after the date you sign, date, and submit to us the properly completed claim for indemnity form, if the reason for our failure to timely pay is not due to your failure to provide information or other material necessary for the computation or payment of the indemnity. The interest rate will be that established by the Secretary of the Treasury under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611), and published in the **Federal Register** semiannually on or about January 1 and July 1. The interest rate to be paid on any indemnity will vary with the rate announced by the Secretary of the Treasury.

1. If you die, or are judically declared incompetent, or if you are an entity other than an individual and such entity is dissolved after insurance attaches for any crop year, any indemnity will be paid to the persons determined to be beneficially entitled thereto.

m. If you have other fire insurance, fire damage occurs during the insurance period, and you have not elected to exclude fire insurance from this policy, we will be liable for loss due to fire only for the smaller of the amount:

(1) Of indemnity determined pursuant to this contract without regard to any other insurance; or

(2) By which the loss from fire exceeds the indemnity paid or payable under such other insurance.

For the purpose of this section, the amount of loss from fire will be the difference between the fair market value of the trees on the unit before the fire and after the fire.

10. Concealment or Fraud.

We may void the contract on all crops insured without affecting your liability for premiums or waiving any right, including the right to collect any amount due us if, at any time, you have concealed or misrepresented any material fact or committed any fraud relating to the contract. Such voidance will be effective as of the beginning of the crop year with respect to which such act or omission occurred.

11. Transfer of Right to Indemnity on Insured Share

If you transfer any part of your share during the crop year, you may transfer your right to an indemnity. The transfer must be on our form and approved by us. We may collect the premium from either you or your transferee or both. The transferee will have all rights and responsibilities under by the contract.

12. Assignment of Indemnity.

You may assign to another party your right to an indemnity for the crop year, only on our form and with our approval. The assignee will have the right to submit the loss notices and forms required by the contract.

13. Subrogation (Recovery of loss from a third party.)

Because you may be able to recover all or a part of your loss from someone other than us, you must do all you can to preserve any such right. If we pay you for your loss, then your right of recovery will at our option belong to us. If we recover more than we paid you plus our expenses, the excess will paid to you.

14. Records and Access to Grove

You must keep for two years after time of loss, records of the trees destroyed or damaged on each unit, including separate records showing the same information for any uninsured acreage. Failure to keep and maintain such records may, at our option, result in cancellation of the contract prior to the crop year to which the records apply, or a determination that no indemnity is due. Any person designated by us will have access to such records and the grove for purposes related to the contract.

15. Life of Contract: Cancellation and Termination

a. This contract will be in effect for the crop year specified on the application and may not be canceled by you for such crop year. Thereafter, the contract will continue in force for each succeeding crop year unless canceled or terminated as provided in this section.

b. This contract and insurance on any type of citrus trees may be canceled by either you or us for any succeeding crop year by giving written notice on or before the cancellation date proceeding such crop year.

c. This contract will terminate as to any crop year if any amount due us on this or any other contract with you is not paid on or before the termination date preceding such crop year for the contract on which the amount is due. The date of payment of the amount due if deducted from:

(1) An indemnity, will be the date you sign the claim; or

(2) Payment under another program administered by the United States Department of Agriculture, will be the date both other such other payment and setoff are approved.

d. The cancellation and termination dates are May 31 prior to the date insurance attaches.

e. If you die or are judicially declared incompetent, or if you are an entity other than an individual and such entity is dissolved, the contract will terminate as of the date of death, judicial declaration, or dissolution. If such event occurs after insurance attaches for any crop year, the contract will continué in force through the crop year and terminate at the end thereof. Death of a partner in a partnership will dissolve the partnership unless the partnership agreement provides otherwise. If two or more persons having a joint interest are insured jointly, death of one of the persons will dissolve the joint entity.

f. The contract will terminate if no premium is earned for 5 consecutive years.

16. Contract Changes

We may change any terms and provisions of the contract from year to year. If your amount of insurance at which indemnities are computed is no longer offered, the actuarial table will provide the amount of insurance which you are deemed to have elected. All contract changes will be available at your service office by February 28 preceding the cancellation date. Acceptance of changes will be conclusively presumed in the absence of notice from you to cancel the contract.

17. Meaning of Terms

For the purposes of Texas citrus tree crop insurance:

a. "Actuarial table" means the forms and related material for the crop year approved by us which are available for public inspection in your service office, and which show the amounts of insurance, coverage levels, premium rates, prices for computing indemnities, practices, insurable and uninsurable acreage, and related information regarding citrus tree insurance in the county.

b. "Contiguous land" means land which is touching at any point, except that land which is separated by only a public or private right-of-way will be considered contiguous.

c. "County" means the county shown on the application and any additional land located in a local producing area bordering on the county as shown by the actuarial table.

d. "Crop year" means the period beginning June 1 and extending through May 31 of the following year and is designated by the calendar year in which the insurance period ends.

e. "Cyclone" means only a large-scale, atmospheric wind-and-pressure system characterized by low pressure at its center and counterclockwise circular wind motion which has been named by the United States Weather Service and which has sustained winds in excess of 58 miles per hour at the U.S. Weather Service reporting station nearest to the crop damage at the time of loss.

f. "Dehorning" means the cutting back of each scaffold limb to a length that is no longer than ⅛ the height of the tree.

g. "Destroyed" means trees which are damaged to the extent that removal is required.

h. "Freeze" means the condition of air temperatures over a widespread area remaining sufficiently at or below 32 degrees Fahrenheit to cause tree damage.

i. "Insurable acreage" means the land classified as insurable by us and shown as such by the actuarial table.

j. "Insured" means the person who is an owner of the trees insured and who submitted the application accepted by us.

k. "Person" means an individual, partnership, association, corporation, estate, trust, or other legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

1. "Service office" means the office servicing your contract as shown on the application for insurance or such other approved office as may be selected by you or designated by us.

m. "Set out" means transplanting the citrus tree from the nursery to the grove.

n. "Total destruction" means the occurence of damage by unit to the trees which have been set out more than one year in excess of 80 percent.

o. "Unit" means all insurable acreage in the county of any one of the tree types referred to in section 2 of this policy, located on contiguous land on the date insurance attaches for the crop year:

(1) In which you have a 100 percent share, or

(2) In which you are a joint-owner.

Land which would otherwise be one unit may be divided according to applicable guidelines on file in your service office. Units will be determined when the acreage is reported. Errors in reporting units may be corrected by us to conform to applicable guidelines when adjusting a loss. We may consider any acreage and share thereof reported by or for your spouse or child or any member of your household to be your bona fide share or the bona fide share of any other person having an interest therein.

18. Descriptive Headings

The descriptive headings of the various policy terms and conditions are formulated for convenience only and are not intended to affect the construction or meaning of any of the provisions of the contract.

19. Determinations

All determinations required by the policy will be made by us. If you disagree with our determinations, you may obtain reconsideration of or appeal those determinations in accordance with Appeal Regulations.

20. Notices

All notices required to be given by you must be in writing and received by your service office within the designated time unless otherwise provided by the notice requirement. Notices required to be given immediately may be by telephone or in person and confirmed in writing. Time of the notice will be determined by the time of our receipt of the written notice.

Done in Washington, DC, on January 22, 1986.

Edward Hews,

Acting Manager, Federal Crop Insurance Corporation.

[Airspace Docket No. 85-ASO-8]

Alteration of VOR Federal Airways; Georgia; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: An editorial error was discovered in the description of Federal Airway V-5 in the Georgia area. This action corrects that error.

EFFECTIVE DATE: 0901 UTC, March 13, 1986.

FOR FURTHER INFORMATION CONTACT: Robert G. Burns, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

Federal Register Document 86-6 was published on January 3, 1986, which amended and established several Federal Airways in south Georgia and north Florida to enhance the flow of air traffic in that area (51 FR 190). An editorial mistake was discovered in the description of airway V-5. This action corrects that error.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Adoption of the Correction

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Federal Register Document 86–8, as published in the Federal Register on January 3, 1986, (51 FR 190) is corrected as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.123 [Amended]

2. § 71.123 is amended as follows:

V–5 [Amended]

By removing the words "From Dublin, GA, via Athens, GA" and substituting the words "From Albany, GA, via Vienna, GA; Dublin, GA; Athens, GA".

Issued in Washington, DC, on February 14, 1986.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

14 CFR Part 71

[Airspace Docket No. 86–AWA–5]

Redesignation of VOR Federal Airway, Louisiana

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action redesignates Federal Airway V–69W as V–305 in conjunction with efforts to comply with a resolution of the International Civil Aviation Organization to redesignate alternate airways. The action does not alter the configuration of the airway segment involved.

EFFECTIVE DATE: 0901 UTC, May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Brent A. Fernald, Airspace and Air Traffic Rules Branch (ATO–230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426–8626.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations redesignates VOR Federal Airway V–69W as V–305 in conjunction with efforts to comply with a resolution of the International Civil Aviation Organization to redesignate alternate airways. The amendment has the effect of renaming an existing airway route segment but does not in any way affect the configuration of that airway. Therefore, I find that notice and public procedure under 5 U.S.C. 553(b) are unnecessary because this action is a minor amendment in which the public would not be particularly interested. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6A dated January 2, 1985.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, VOR Federal airways.

Adoption of the amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.123 [Amended]

2. § 71.123 is amended as follows:

V–69 [Amended]

By removing the words", including a W alternate via INT Shreveport 084° and El Dorado 223° radials"

V–305 [Revised]

From Shreveport, LA, via INT Shreveport 084° and El Dorado, AR, 218° radials; El Dorado; Little Rock, AR; Walnut Ridge, AR; Malden, MO; Conningham, KY; Pocket City, IN; INT Pocket City 046° and Bloomington, IN, 205° radials; Bloomington; INT Bloomington 025° and Indianapolis, IN, 185° radials; to Indianapolis.

Issued in Washington, DC, February 10, 1986.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 4

[T.D. 86–54]

Customs Regulations Amendment Adding Norway to List of Countries Whose Pleasure Vessels are Entitled To Be Issued U.S. Cruising Licenses

AGENCY: Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations by adding Norway to the list of countries whose pleasure vessels may be issued U.S. cruising licenses. Customs has been informed that yachts used and employed exclusively as pleasure vessels belonging to any resident of the U.S. are allowed to arrive at and depart from Norwegian ports and cruise in the waters of Norway without being subjected to formal entry and clearance procedures. Therefore, Customs is extending reciprocal privileges to pleasure vessels belonging to any resident of Norway.

EFFECTIVE DATE: These privileges became effective for Norway on December 18, 1985.

FOR FURTHER INFORMATION CONTACT: John Mathis, Carriers, Drawback and Bonds Division (202–566–5706), U.S. Customs Service, 1301 Constitution Avenue NW., Washington, DC 20229.

SUPPLEMENTARY INFORMATION:

Background

Section 4.94(a), Customs Regulations (19 CFR 4.94(a)), provides that U.S. vessels documented as yachts, used exclusively for pleasure, not engaged in any trade, and not violating the customs or navigation laws of the U.S. may proceed from port to port in the U.S. or to foreign ports without entering and clearing, as long as they have not visited hovering vessels.

Generally, foreign-flag yachts entering the U.S. are required to comply with the laws applicable for foreign vessels arriving at, departing from, proceeding between ports of the U.S. However, as provided in § 4.94(b), Customs

Regulations (19 CFR 4.94(b)), pleasure vessels from certain countries may be issued cruising licenses which exempt them from formal entry and clearance procedures (e.g., filing manifests, obtaining permits to proceed and paying entry and clearance fees) at all but the first port of entry in the U.S. Yachts or pleasure vessels not carrying passengers or merchandise in trade are exempt from paying tonnage tax and light money in any case pursuant to § 4.21(b)(5), Customs Regulations (19 CFR 4.21(b)(5)). Cruising licenses are available to pleasure vessels of countries which extend reciprocal privileges to U.S. pleasure vessels. A list of these countries is set forth in § 4.94(b).

By diplomatic note dated November 29, 1985, the Norwegian Royal Ministry of Foreign Affairs informed the American Embassy in Oslo, Norway, that the Government of Norway permits yachts used and employed exclusively as pleasure vessels and belonging to any resident of the United States to arrive at and depart from ports of Norway and cruise the waters of Norway without entering and clearing Norwegian Customs, and without the payment of any charges for entering or clearing, dues, duty per ton, tonnage taxes, or charges for cruising licenses. The embassy conveyed this information to the Department of State, which in turn informed Customs Headquarters by a letter dated December 13, 1985. The Carriers, Drawback and Bonds Division of Customs is of the opinion that satisfactory evidence has been furnished to establish the reciprocity required in § 4.94(b). Therefore, on January 14, 1986, the Director of the division determined that, effective retroactively to December 18, 1985, Norway should be added to the list of countries set forth in § 4.94(b).

By virtue of the authority vested in the President by section 5 of the Act of May 28, 1908, 35 Stat. 425, as amended (46 U.S.C. 104), the President has delegated the authority to issue these cruising licenses to the Secretary of the Treasury by E.O. 10289, September 17, 1951. By Treasury Department Order 165–25, the Secretary of the Treasury delegated authority to the Commissioner of Customs to prescribe regulations relating to § 4.94(b) and other sections of the Customs Regulations relating to lists of countries entitled to preferential treatment in Customs matters because of reciprocal privileges accorded to vessels and aircraft of the U.S. Subsequently, by Customs Delegation Order No. 66 (T.D. 82–201), dated October 13, 1982, the Commissioner delegated authority to amend this section to the Assistant Commissioner (Commercial Operations), who redelegated this authority to the Director, Office of Regulations and Rulings, who then redelegated it to the Director, Regulations Control and Disclosure Law Division.

Finding

On the basis of the information received from the Government of Norway and the Department of State, as described above, it has been determined that the United States is in possession of satisfactory evidence regarding the passage of U.S. pleasure vessels through the ports and waters of Norway without their being subjected to formal entry and clearance procedures. Therefore, Norway is added to the list of countries whose pleasure vessels may be issued U.S. cruising licenses.

Inapplicability of Public Notice and Delayed Effective Date Requirements

Because this amendment merely implements a statutory requirement and involves a matter in which the majority of the public is not particularly interested, pursuant to 5 U.S.C. 553(b)(B), notice and public procedure thereon are unnecessary. Further, for the same reasons good cause exists for dispensing with a delayed effective date under 5 U.S.C. 553(d)(1).

The Regulatory Flexibility Act

This document is not subject to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). That Act does not apply to any regulation such as this for which a notice of proposed rulemaking is not required by the Administrative Procedure Act (5 U.S.C. 551 *et seq.*), or any other statute.

Executive Order 12291

This amendment does not meet the criteria for a major regulation as defined in section 1(b) of E.O. 12291. Accordingly, a major impact analysis is not required.

Drafting Information

The principal author of this document was John E. Doyle, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

List of Subjects in 19 CFR Part 4

Customs inspection and duties, Imports, Vessels, Yachts.

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

1. The authority citation for Part 4 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1624; 46 U.S.C. 3, 2103. * * *

Section 4.94 also issued under 19 U.S.C. 1433, 1434, 1435, 1441, 46 U.S.C. 91, 104, 313, 314. * * *

§ 4.94 [Amended]

2. Section 4.94(b), Customs Regulations (19 CFR 4.94(b)), is amended by inserting, in appropriate alphabetical order, the word, "Norway", to the list of countries whose yachts or pleasure vessels may be issued U.S. cruising licenses.

Dated February 20, 1986.

B. James Fritz,

Director, Regulations Control and Disclosure Law Division.

Customs Regulations Amendments Concerning Convention on Cultural Property Implementation Act

AGENCY: Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations by adding provisions to implement the Convention on Cultural Property Implementation Act. The Convention addressed the problem of illicit importing and exporting of items of cultural property, that is, items of importance for archaeology, prehistory, history, literature, art, or science. These regulations are designed to prohibit illicit traffic in cultural property while allowing the exchange of natural treasures for legitimate scientific, educational, and cultural purposes. The regulations are effective for all importations of cultural property, and archaeological and ethnological material, subject to the Convention.

EFFECTIVE DATE: March 31, 1986.

FOR FURTHER INFORMATION CONTACT: Legal Aspects: Samuel Orandle, Entry Procedures and Penalties Division (202–566–5765); Operational Aspects: Louis Alfano, Duty Assessment Division (202–566–8651); U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:

Background

Beginning in the late 1960's, the U.S. began participating in negotiations, sponsored by the United Nations Educational, Scientific and Cultural Organization (UNESCO), addressing the problem of illicit international trade in cultural property. Cultural property was defined as property which, on religious or secular grounds, is specifically designated by a country as being important in the archaeology, prehistory, history, literature, art, or science of that country.

The value of cultural property, whether archaeological or ethnological in nature, is immeasurable. Such items often constitute the very essence of a society and convey important information concerning a people's origin, history, and traditional setting. The importance and popularity of such items regrettably makes them targets of theft, clandestine excavation of archaeological sites and accompanying illegal importing and exporting.

There has been growing concern in the U.S. regarding the need for protecting endangered cultural property. The appearance in the U.S. of stolen or illegally exported artifacts from other countries where there has been recent pillaging has, on occasion, strained our foreign and cultural relations. This situation, combined with the concerns of the museum, archaeological, and scholarly communities, was recognized by the President and Congress. Codes of ethics and professional standards were formally developed by these communities. It became apparent that it was in the national interest for the U.S. to join with other countries to control illegal trafficking of such articles in international commerce.

The U.S. joined international efforts and actively participated in negotiations resulting in the 1970 UNESCO Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property (823 U.N.T.S. 231 (1972)). U.S. acceptance of the 1970 UNESCO Convention was codified into U.S. law as the "Convention on Cultural Property Implementation Act" (Pub. L. 97–446, 96 Stat. 2329 at 2350). The spirit of the Convention was enacted into law to promote U.S. leadership in achieving greater international cooperation towards preserving cultural treasures that are of importance not only to the nations whence they originate, but also to greater international understanding of mankind's common heritage. In 1983 the U.S. became the first major art importing country to implement the 1970 Convention.

It was with these goals in mind that Customs issued interim regulations to carry out the policies of the Act. The interim regulations were published in the **Federal Register** as T.D. 85–107 on June 25, 1985 (50 FR 26193), and took effect immediately. However, comments on the interim regulations were invited for consideration before final regulations were issued.

Analysis of Comments

One commenter conveyed strong support for the intent of the regulations while expressing a general concern for what he termed "weaknesses and ambiguities". However, the commenter stated the weakness was the result of the Convention and the implementing Act, and therefore, could not be corrected in the regulations. Customs does not believe the regulations are weak. However, we cannot address specifics since the commenter did not raise any specific points.

The remaining 4 commenters were more detailed in their submissions. Comments they raised and Customs replies are as follows.

Comment: The definition of "museum" in § 12.104(e) should be attributed to its source, the Museum Services Act (Pub. L. 94–462, 20 U.S.C. 968).

Reply: Customs agrees and has added the reference. Also, Customs is adopting a comment that clarifies the point that "recognized museum" under the Act is synonymous with "museum".

Comment: The regulations should clarify how the Secretary of the Treasury will select a museum or other institution to temporarily hold a seized article of archaeological or ethnological material, or article of seized cultural property. Also, the regulations should provide for reimbursement to a museum or institution holding such an article or piece of property if the object requires special care or more security than normal.

Reply: As written, § 12.104f contains reference to the two basic criteria the Secretary will use in determining which museum or institution, if any, will be given an article or material seized under these regulations, for temporary display. These factors are: the safety that will be provided the article or material, and the museum or institution's assurances, backed by a sufficient bond, that the article or material will be returned to the Secretary upon request. This decision is left to the Secretary's discretion and these regulations are not the proper forum for a listing of specifications concerning museums or institutions. The Secretary will consider such requests by museums or institutions on a case-by-case basis.

As to the comment requesting a regulation providing financial assistance to a museum or institution seeking to temporarily house a seized article or material, Customs is aware of no statutory authority requiring that such aid be made available. To the contrary, Customs believes such a provision is contraindicated by the Secretary's requirement of selecting a museum or institution that is financially able to assure the item's safe return.

Comment: Customs failure to prepare a regulatory impact statement is improper. The regulations will have the kind of impact which requires a regulatory impact statement.

Reply: Customs disagrees. These regulations will only have a minor impact on the general public. Persons who trade in archaeological and ethnological material, or in cultural property, will be more effected. Certain documentation or evidence will be required upon importation of articles or materials designated by agreements or emergency actions as coming under the protection of the Act. Customs would characterize this as a minor impact. Customs does not believe that these regulations will result in any significant economic costs, and no comments to the contrary were submitted.

Comment: Customs Background statement in the interim regulations was unwarranted and improper. Although the text of the interim regulations correctly specifies which prohibitions pertain to which types of property, Customs Background statement may lead to unnecessary confusion.

Reply: Customs agrees that the term, "cultural property", may have been used broadly in the Background section of the interim regulations. We regret if any statements made may have appeared too strongly worded.

The intent of the Background section was to convey the urgency of the problem the interim regulations were designed to address. We do not believe the wording was misleading or confusing to a degree requiring that these regulations be reissued with another opportunity to comment. In fact, the commenter raising these points also states the interim regulations themselves correctly set out the prohibitions pertaining to different types of articles or materials.

Comment: Portions of the interim regulations are inconsistent with the Act.

Reply: Customs agrees that there are some instances where the interim regulations diverged slightly from the Act. To correct this, the following changes have been made to the final regulations.

(1) In § 12.104(a)(1), the word, "and" is being added after paragraph (a)(1)(ii), and the phrase, "or in addition to paragraphs (a)(1) (i) and (ii) of this section" is being added after paragraph (a)(1)(iii).

(2) In § 12.104a(a), reference is made to articles of cultural property stolen from "such institution". The corrected phrase in the final regulations is "such museum, monument, or institution".

(3) In § 12.104a(b) in the interim regulations, a phrase was omitted. The proper wording of § 12.104a(b) as it appears in the final regulations is as follows: No archaeological or ethnological material designated pursuant to 19 U.S.C. 2604 and listed in § 12.104g, that is exported (whether or not such exportation is to the U.S.) from the State Party after the designation of such material under 19 U.S.C. 2604 may be imported into the U.S. unless the State Party issues a certificate or other documentation which certifies that such exportation was not in violation of the laws of the State Party.

(4) In § 12.104b, the introductory paragraph is changed to read, "The following is a list of State Parties and the date of entry into force for each State Party:". Also, Zambia is added in proper alphabetical order with a date of entry into force of September 21, 1985.

(5) In § 12.104c(a), the phrase, "is filed with the district director," is moved from the end of the paragraph to immediately after the word "Secretary".

(6) In § 12.104d, reference is made to the, "certificate or evidence". The corrected phrase in the final regulations is "certificate, documentation, or evidence".

(7) In § 12.104g, the word "Convention" is changed to "Convention on Cultural Property Implementation Act" to properly reflect the source of the protections provided items and categories of protected materials.

Comment: One commenter requested clarification of whether the documentation accompanying an importation of designated archaeological or ethnological material might also apply to importations of cultural property. The commenter, representing research libraries, was concerned over the burden a broad interpretation of these regulations would impose on research libraries obtaining rare manuscripts and incunabula from sources outside the U.S.

Reply: The documentation required for importations of designated archaeological and ethnological material does not apply to importations of rare manuscripts, incunabula, or other items of cultural property.

After consideration of all of the comments received in response to publication of the interim regulations, and further review of the matter, it has been determined to adopt the regulations in final form with the modifications previously discussed.

Executive Order 12291

This document does not meet the criteria for a "major rule" as specified in section 1(b) of E.O. 12291. Accordingly, a regulatory impact analysis is not required.

Regulatory Flexibility Act

Pursuant to section 3 of the Regulatory Flexibility Act (Pub. L. 96–353, 5 U.S.C. 301 *et seq.*), it is hereby certified that the regulations set forth in this document will not have a significant economic impact on a substantial number of small entities. Accordingly, it is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

List of Subjects

19 CFR Part 12

Customs duties and inspections, Imports, Exports.

19 CFR Part 178

Reporting and recordkeeping requirements, Paperwork requirements, Collections of information.

Amendments to the Regulations

Parts 12 and 178, Customs Regulations (19 CFR Parts 12, 178), were amended on an interim basis by the publication of T.D. 85–107, in the **Federal Register** on June 25, 1985 (50 FR 26193). These parts are now amended in final in the following manner:

PART 12—SPECIAL CLASSES OF MERCHANDISE

1. The authority citation for Part 12 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (Gen. Hdnote. 11, Tariff Schedules of the United States), 1624. * * * § 12.104 et seq. also issued under 19 U.S.C. 2612.

2. Part 12 is further amended by adding a new unit titled, "Cultural Property", designated §§ 12.104–12.104i to read as follows:

Cultural Property

Sec.
12.104 Definitions.
12.104a Importations prohibited.
12.104b State Parties to the Convention.
12.104c Importations permitted.
12.104d Detention of articles; time in which to comply.
12.104e Seizure and forfeiture.
12.104f Temporary disposition of materials and articles.
12.104g Specific items or categories designated by agreements or emergency actions.
12.104h Exempt materials and articles.
12.104i Enforcement.

§ 12.104 Definitions.

For purposes of §§ 12.104 through 12.104i:

(a) The term, "archaeological or ethnological material of the State Party" to the 1970 UNESCO Convention means—

(1) Any object of archaeological interest. No object may be considered to be an object of archaeological interest unless such subject—

(i) Is of cultural significance;

(ii) Is at least 250 years old; and

(iii) Was normally discovered as a result of scientific excavation, clandestine or accidental digging, or exploration on land or under water; or in addition to paragraphs (a)(1) (i) and (ii) of this section;

(iv) Meets such standards as are generally acceptable as archaeological such as, but not limited to, artifacts, buildings, parts of buildings, or decorative elements, without regard to whether the particular objects are discovered by exploration or excavation;

(2) Any object of ethnological interest. No object may be considered to be an object of ethnological interest unless such object—

(i) Is the product of a tribal or nonindustrial society, and—

(ii) Is important to the cultural heritage of a people because of its distinctive characteristics, comparative rarity, or its contribution to the knowledge of the origins, development or history of that people;

(3) Any fragment or part of any object referred to in paragraph (a) (1) or (2) of this section which was first discovered within, and is subject to export control by the State Party.

(b) The term "Convention" means the Convention on the Means of Prohibiting and Preventing the Illicit Import, Export, and Transfer of Ownership of Cultural Property adopted by the General Conference of the United States Nations Educational, Scientific, and Cultural Organization at its sixteenth session (823 U.N.T.S. 231 (1972)).

(c) The term "cultural property" includes articles described in Article 1 (a) through (k) of the Convention, whether or not any such article is specifically designated by any State

Party for the purposes of Article 1. Article 1 lists the following categories:

(1) Rare collections and specimens of fauna, flora, minerals and anatomy, and objects of palaeontological interest;

(2) Property relating to history, including the history of science and technology and military and social history, to the life of national leaders, thinkers, scientists and artists and to events of national importance;

(3) Products of archaeological excavations (including regular and clandestine) or of archaeological discoveries;

(4) Elements of artistic or historical monuments or archaeological sites which have been dismembered;

(5) Antiquities more than 100 years old, such as inscriptions, coins and engraved seals;

(6) Objects of ethnological interest;

(7) Property of artistic interest, such as:

(i) Pictures, paintings and drawings produced entirely by hand on any support and in any material (excluding industrial designs and manufactured articles decorated by hand);

(ii) Original works of statutory art and sculpture in any material;

(iii) Original engravings, prints and lithographs;

(iv) Original artistic assemblages and montages in any material;

(8) Rare manuscripts and incunabula, old books, documents and publications of special interest (historical, artistic, scientific, literary, etc.) singly or in collections;

(9) Postage, revenue and similar stamps, singly or in collections;

(10) Archives, including sound, photographic and cinematographic archives;

(11) Articles of furniture more than 100 years old and old musical instruments.

(d) The term "designated archaeological or ethnological material" means any archaeological or ethnological material of the State Party which—

(1) Is—

(i) Covered by an agreement under 19 U.S.C. 2602 that enters into force with respect to the U.S., or

(ii) Subject to emergency action under 19 U.S.C. 2603 and

(2) Is listed by regulation under 19 U.S.C. 2604.

(e) The term "museum" means a public or private nonprofit agency or institution organized on a permanent basis for essentially educational or esthetic purposes, which, utilizing a professional staff, owns or utilizes tangible objects, cares for them, and exhibits them to the public on a regular basis (Museum Services Act; Pub. L. 94-462; 20 U.S.C. 968). For the purposes of these regulations, the term "recognized museum" under the Cultural Property Implementation Act shall be synonymous with "museum".

(f) The term "Secretary" means the Secretary of the Treasury or his delegate, the Commissioner of Customs.

(g) The term "State Party" means any nation which has ratified, accepted, or acceded to the 1970 UNESCO Convention.

(h) The term "United States" or "U.S.", includes the customs territory of the United States, the U.S. Virgin Islands and any territory or area the foreign relations for which the U.S. is responsible.

§ 12.104a Importations prohibited.

(a) No article of cultural property documented as appertaining to the inventory of a museum or religious or secular public monument or similar institution in any State Party which was stolen from such museum, monument, or institution after April 12, 1983, or after the date of entry into force of the Convention for the State Party, whichever date is later, may be imported into the U.S.

(b) No archaeological or ethnological material designated pursuant to 19 U.S.C. 2604 and listed in § 12.104g, that is exported (whether or not such exportation is to the U.S.) from the State Party after the designation of such material under 19 U.S.C. 2604 may be imported into the U.S. unless the State Party issues a certificate or other documentation which certifies that such exportation was not in violation of the laws of the State Party.

§ 12.104b State Parties to the Convention.

(a) The following is a list of State Parties, and the date of entry into force for each State Party:

State party	Date of entry into force
Algeria	Sept. 24, 1974.
Argentina	Apr. 11, 1973.
Bolivia	Jan. 4, 1977.
Brazil	May 16, 1973.
Bulgaria	Apr. 24, 1972.
Cameroon	Aug. 24, 1972.
Canada	June 28, 1978.
Central African Republic	May 1, 1972.
Cuba	Apr. 30, 1980.
Cyprus	Jan. 19, 1980.
Czechoslovakia	May 14, 1977.
Democratic Kampuchea	Dec. 26, 1972.
Democratic People's Republic of Korea	Aug. 13, 1983.
Dominican Republic	June 7, 1973.
Ecuador	Apr. 24, 1972.
Egypt	July 5, 1973.
El Salvador	May 20, 1978.
German Democratic Republic	Apr. 16, 1974.
Greece	Sept. 5, 1981.
Guatemala	Apr. 14, 1985.
Guinea	June 18, 1979.
Honduras	June 19, 1979.
Hungary	Jan. 23, 1978.
India	Apr. 24, 1977.
Iran	Apr. 27, 1975.
Iraq	May 12, 1973.
Italy	Jan. 2, 1979.
Jordan	June 15, 1974.
Kuwait	Sept. 22, 1972.
Mauritania	July 27, 1977.
Mauritius	May 27, 1978.
Mexico	Jan. 4, 1973.
Nepal	Sept. 23, 1976.
Nicaragua	July 19, 1977.
Niger	Jan. 16, 1973.
Nigeria	Apr. 24, 1972.
Oman	Sept. 2, 1978.
Pakistan	July 30, 1981.
Panama	Nov. 13, 1973.
Peru	Jan. 24, 1980.
Poland	Apr. 30, 1974.
Portugal	Mar. 9, 1986.
Qatar	July 20, 1977.
Republic of Korea	May 14, 1983.
Saudi Arabia	Dec. 8, 1976.
Senegal	Mar. 9, 1985.
Socialist People's Libyan Arab Jamahiriya	Apr. 9, 1973.
Spain	Apr. 10, 1986.
Sri Lanka	July 7, 1981.
Syrian Arab Republic	May 21, 1975.
Tunisia	June 10, 1975.
Turkey	July 21, 1981.
United Republic of Tanzania	Nov. 2, 1977.
United States of America	Dec. 2, 1983.
Uruguay	Nov. 9, 1977.
Yugoslavia	Jan. 3, 1973.
Zaire	Dec. 23, 1974.
Zambia	Sept. 21, 1985.

(b) Additions to and deletions from the list of State Parties will be accomplished by Federal Register notice, from time to time, as the necessity arises.

§ 12.104c Importations permitted.

Designated archaeological or ethnological material for which entry is sought into the U.S., will be permitted entry if at the time of making entry:

(a) A certificate, or other documentation, issued by the Government of the country of origin of such material in a form acceptable to the Secretary is filed with the district director, such form being, but not limited to, an affidavit, license, or permit from an appropriate, authorized State Party official under seal, certifying that such exportation was not in violation of the laws of that country, or

(b) Satisfactory evidence is presented to the district director that such designated material was exported from the State Party not less than 10 years before the date of such entry and that neither the person for whose account the material is imported (or any related person) contracted for or acquired an interest, directly or indirectly, in such material more than 1 year before that date of entry, or

(c) Satisfactory evidence is presented to the district director that such designated material was exported from the State Party on or before the date on which such material was designated under 19 U.S.C. 2604.

(d) The term "satisfactory evidence" means—

(1) For purposes of paragraph (b) of this section—

(i) One or more declarations under oath by the importer, or the person for whose account the material is imported, stating that, to the best of his knowledge—

(A) The material was exported from the State Party not less than 10 years before the date of entry into the U.S., and

(B) Neither such importer or person (or any related person) contracted for or acquired an interest, directly or indirectly, in such material more than 1 year before the date of entry of the material; and

(ii) A statement provided by the consignor, or person who sold the material to the importer, which states the date, or, if not known, his belief, that the material was exported from the State Party not less than 10 years before the date of entry into the U.S. and the reasons on which the statement is based; and

(2) For purposes of paragraph (c) of this section—

(i) One or more declarations under oath by the importer or the person for whose account the material is to be imported, stating that, to the best of his knowledge, the material was exported from the State Party on or before the date such material was designated under 19 U.S.C. 2604, and

(ii) A statement by the consignor or person who sold the material to the importer which states the date, or if not known, his belief, that the material was exported from the State Party on or before the date such material was designated under 19 U.S.C. 2604, and the reasons on which the statement is based.

(e) *Related persons.* For purposes of paragraphs (b) and (d) of this section, a person shall be treated as a related person to an importer, or to a person for whose account material is imported, if such person—

(1) Is a member of the same family as the importer or person of account, including, but not limited to, membership as a brother or sister (whether by whole or half blood), spouse, ancestor, or lineal descendant;

(2) Is a partner or associate with the importer or person of account in any partnership, association, or other venture; or

(3) Is a corporation or other legal entity in which the importer or person of account directly or indirectly owns, controls, or holds power to vote 20 percent or more of the outstanding voting stock or shares in the entity.

§ 12.104d Detention of articles; time in which to comply.

In the event an importer cannot produce the certificate, documentation, or evidence required in § 12.104c at the time of making entry, the district director shall take the designated archaeological or ethnological material into Customs custody and send it to a bonded warehouse or public store to be held at the risk and expense of the consignee until the certificate, documentation, or evidence is presented to such officer. The certificate, documentation, or evidence must be presented within 90 days after the date on which the material is taken into Customs custody, or such longer period as may be allowed by the district director for good cause shown.

§ 12.104e Seizure and forfeiture.

(a) Whenever any designated archaeological or ethnological material is imported into the U.S. in violation of 19 U.S.C. 2606, and the importer states in writing that he will not attempt to secure the certificate, documentation, or evidence required by § 12.104c, or such certificate, documentation, or evidence is not presented to the district director before the expiration of the time provided in § 12.104d, the material shall be seized and summarily forfeited to the U.S. in accordance with Part 162 of this chapter.

(1) Any designated archaeological or ethnological material which is forfeited to the U.S. shall, in accordance with the provisions of Title III of Pub. L. 97-446, 19 U.S.C. 2609(b):

(i) First be offered for return to the State Party;

(ii) If not returned to the State Party be returned to a claimant with respect to whom the designated material was forfeited if that claimant establishes—

(A) Valid title to the material;

(B) That the claimant is a bona fide purchaser for value of the material; or

(iii) If not returned to the State Party under paragraph (a)(1)(i) of this section or to a claimant under paragraph (a)(1)(ii) of this section, be disposed of in the manner prescribed by law for articles forfeited for violation of the customs laws. No return of material may be made under paragraph (a)(1) (i) or (ii) of this section unless the State Party or claimant, as the case may be, bears the expenses incurred incident to the return and delivery, and complies with such other requirements relating to the return as the Secretary shall prescribe.

(b) Whenever any stolen article of cultural property is imported into the U.S. in violation of 19 U.S.C. 2607, such cultural property shall be seized and forfeited to the U.S. in accordance with Part 162 of this chapter.

(1) Any stolen article of cultural property which is forfeited to the U.S. shall, in accordance with the provisions of Title III of Pub. L. 97-446, 2609(c):

(i) First be offered for return to the State Party in whose territory is situated the institution referred to in 19 U.S.C. 2607 and shall be returned if that State Party bears the expenses incident to such return and delivery and complies with such other requirements relating to the return as the Secretary prescribes; or

(ii) If not returned to such State Party, be disposed of in the manner prescribed by law for articles forfeited for violation of the customs laws.

§ 12.104f Temporary disposition of materials and articles.

Pending a final determination as to whether any archaeological or ethnological material, or any article of cultural property, has been imported into the U.S. in violation of 19 U.S.C. 2606 or 19 U.S.C. 2607, the Secretary may permit such material or article to be retained at a museum or other cultural or scientific institution in the U.S. if he finds that sufficient safeguards will be taken by the museum or institution for the protection of such material or article; and sufficient bond is posted by the museum or institution to ensure its return to the Secretary.

§ 12.104g Specific items or categories designated by agreements or emergency actions.

(a) [Reserved]

(b) A list of specific items or categories designated by agreements or emergency actions as coming under the protection of the Convention on Cultural Property Implementation Act will from time to time, as the necessity arises, be published in the Federal Register by means of a general notice.

§ 12.104h Exempt materials and articles.

The provisions of these regulations shall not apply to—

(a) Any archaeological or ethnological material or any article of cultural property which is imported into the U.S. for temporary exhibition or display, if such material or article is rendered immune from seizure under judicial process by the U.S. Information Agency, Office of the General Counsel and Congressional Liaison, pursuant to the Act entitled "An Act to render immune from seizure under judicial process certain objects of cultural significance imported into the United States for temporary display or exhibition, and for other purposes", approved October 19, 1965 (22 U.S.C. 2459); or

VOL 51 ISS 39 FE 27 1986 UMI

(b) Any designated archaeological or ethnological material or any article of cultural property imported into the U.S. if such material or article—

(1) Has been held in the U.S. for a period of not less than 3 consecutive years by a recognized museum or religious or secular monument or similar institution, and was purchased by that institution for value, in good faith, and without notice that such material or article was imported in violation of these regulations, but only if—

(i) The acquisition of such material or article has been reported in a publication of such institution, any regularly published newspaper or periodical with a circulation of at least 50,000, or a periodical or exhibition catalog which is concerned with the type of article or materials sought to be exempted from these regulations,

(ii) Such material or article has been exhibited to the public for a period or periods aggregating at least 1 year during such 3-year period, or

(iii) Such article or material has been cataloged and the catalog material made available upon request to the public for at least 2 years during such 3-year period;

(2) If paragraph (b)(1) of this section does not apply, has been within the U.S. for a period of not less than 10 consecutive years and has been exhibited for not less than 5 years during such period in a recognized museum or religious or secular monument or similar institution in the U.S. open to the public;

(3) If paragraph (b)(1) and (2) of this section do not apply, has been within the U.S. for a period of not less than 10 consecutive years and the State Party concerned has received or should have received during such period fair notice (through such adequate and accessible publication, or other means, as the Secretary or his designee shall prescribe) of its location within the U.S.; and

(4) If none of the preceding subparagraphs apply, has been within the U.S. for a period of not less than 20 consecutive years and the claimant establishes that it purchased the material or article for value without knowledge or reason to believe that it was imported in violation of law.

§ 12.104i Enforcement.

In the customs territory of the United States, and in the U.S. Virgin Islands, the provisions of these regulations shall be enforced by appropriate customs officers. In any other territory or area within the U.S., but not within such customs territory or the U.S. Virgin Islands, such provisions shall be enforced by such persons as may be designated by the President.

Part 178, Customs Regulations (19 CFR Part 178), was also amended by the interim regulations issued as T.D. 85-107. The Office of Management and Budget control number issued to these regulations remains the same is retained in § 178.2.

PART 178—APPROVAL OF INFORMATION COLLECTION REQUIREMENTS

1. The authority citation for Part 178 continues to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 1624, 44 U.S.C. 3501 et seq.

§ 178.2 [Amended]

2. Section 178.2 is amended by inserting, in proper numerical order, the following entry:

19 CFR section	description	OMB control No.
12.104c; 12.104e	Certificates and other documentation relating to the importation of items of cultural property.	1515-0147

Alfred R. De Angelus,
Acting Commissioner of Customs.

Approved February 3, 1986.

Francis A. Keating, II,
Assistant Secretary of the Treasury.

BILLING CODE 4820-02-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Salinomycin and Bacitracin Methylene Disalicylate

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by A. H. Robins Co., providing for use of a combination of previously approved premixes containing salinomycin and bacitracin methylene disalicylate (bacitracin MD) for making finished feed for broiler chickens. The feed is to be used for prevention of coccidiosis and for improved feed efficiency.

EFFECTIVE DATE: February 27, 1986.

FOR FURTHER INFORMATION CONTACT: Lonnie W. Luther, Center for Veterinary Medicine (HFV-128), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4317.

SUPPLEMENTARY INFORMATION: A. H. Robins Co., 1405 Cummings Dr., P.O. Box 26609, Richmond, VA 23261, filed a supplement to NADA 135-746 providing for combining seperately approved salinomycin and bacitracin MD premixes in making a finished broiler feed. The drug levels in the finished feed will be salinomycin, 40 to 60 grams per ton and bacitracin MD, 4 to 50 grams per ton. The indications for feed use are prevention of coccidiosis caused by *Eimeria tenella, E. necatrix, E. acervulina, E. Maxima, E. brunetti,* and *E. mivati,* and for improved feed efficiency. The supplemental NADA is approved and the regulations are amended accordingly. The basis for approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.24(d)(1)(ii) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 558 is amended as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

1. The authority citation for 21 CFR Part 558 is revised to read as follows:

Authority: Sec. 512, 82 Stat. 343-351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

2. In § 558.550 by adding new paragraph (c)(1)(vi) to read as follows:

§ 558.550 Salinomycin.

* * * * *

(c) * * *

(1) * * *

(vi)(*a*) *Amount per ton.* Salinomycin 40 to 60 grams and bacitracin methylene disalicylate 4 to 50 grams.

(*b*) *Indications for use.* For the prevention of coccidiosis caused by *Eimeria tenella, E. necatrix, E. acervulina, E. maxima, E. brunetti,* and *E. mivati,* and for improved feed efficiency.

(*c*) *Limitations.* Feed continuously as sole ration. Not approved for use with pellet binders. Do not feed to layers. May be fatal if accidentally fed to adult turkeys or horses. Bacitracin MD as provided by No. 046573 in § 510.600(c) of this chapter.

BILLING CODE 4160-01-M

DEPARTMENT OF STATE

22 CFR Part 41

[Department Regulation 108.847]

Documentation of Nonimmigrants; Treaty Traders and Investors

AGENCY: Department of State.

ACTION: Final rule.

SUMMARY: This final rule amends the language in 22 CFR §§ 41.40(a)(2) and 41.41(a)(3) to read "at least fifty percent owned". The new language will extend eligibility for E visa classification (treaty traders and investors) to employees of organizations which are owned at least fifty percent by a national or nationals of the same country, or to employees of joint ventures which are equally owned by two parties of differing nationalities. The language will be more consistent with modern realities and the needs of international business, and more in keeping with the intent of treaty provisions because it will enable employees of joint ventures and partnerships of two equal partners to qualify as treaty traders or investors.

EFFECTIVE DATE: February 27, 1986.

FOR FURTHER INFORMATION CONTACT: Stephen K. Fischel, Chief, or Guida Evans-Magher, Consular Affairs Specialist, Legislation and Regulations Division, Visa Services, 2401 E Street NW, Washington, DC 20520. (202) 663-1204, 663-1206.

SUPPLEMENTARY INFORMATION: On December 4, 1985, (50 FR 49705) the Department issued proposed regulations [SD-184] to change the present language in 22 CFR 41.40 and 41.41 which requires that an organization must be "principally owned" by a national or nationals of the same treaty country, to read "at least fifty percent owned" by a national or nationals of the same treaty country. The new language allowed for more visa applicants to qualify for E visa classification under section 101(a)(15)(E) of the Immigration and Nationality Act, (8 U.S.C. 1101(a)(15)(E)) by extending eligibility of such classification to employees of organizations owned at least fifty percent by a national or nationals of the same country, or to employees of joint ventures which are equally owned by two parties of differing nationalities. Interested persons were given until January 10, 1986 to submit comments.

Discussion of Comments

Seven comments were received. Six comments, which included comments from the American Immigration Lawyers Association on behalf of its membership, were enthusiastically in favor of the proposed language which, in addition to lowering the percentage of ownership, extends the eligibility of E visa (treaty traders and investors) classification to employees of joint ventures equally owned by two parties of differing nationalities.

The lone dissenter based his objections on the Supreme Court decision in the case of *Sumitomo Shoji America, Inc.* v. *Avagliano,* 457 U.S. 176, 50 U.S. LAW WEEK 4643 (1932). Although the case speaks to the responsibilities of corporations incorporated in the United States, it does not address the determination of nationality of "organizations" or "corporations" for purposes of the Immigration and Nationality Act. Thus, the provisions of section 101(a)(15)(E) and the proposed regulations are unaffected by the *Sumitomo* decision.

In light of the number of comments received and in view of the favorable responses, the Department is satisfied that the proposed regulations should be published as a final rule, since they bestow a benefit upon the affected parties. This rule is not considered to be a major rule under Executive Order 12291. In addition, the rule is not expected to have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 22 CFR Part 41

Passports and Visas, Aliens, Nonimmigrants, Treaty Traders, Investors.

Adoption of Amendments

PART 41—[AMENDED]

In consideration of the foregoing, 22 CFR Part 41 is amended as follows:

1. The authority citation for Part 41 is revised to read as follows:

Authority: Sec. 104, 66 Stat. 174, 8 U.S.C. 1104; 109(b)(1), 91 Stat. 847.

§ 41.40 [Amended]

2. In the last sentence of paragraph (a)(2) of § 41.40 the word "principally", is replaced with the words "at least fifty percent".

§ 41.41 [Amended]

3. In paragraph (a)(3) of § 41.41, the word "principally", is replaced with the words "at least fifty percent".

Dated: February 18, 1986.

Joan M. Clark,
Assistant Secretary for Consular Affairs.

[FR Doc. 86-4135 Filed 2-26-86; 8:45 am]

BILLING CODE 4710-06-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Parts 42, 43, 58, 290, 571, 850, 880, 881, 882, 883, and 941

[Docket No. R-86-1273; FR-2205]

Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970; Technical Amendments

AGENCY: Office of the Secretary, HUD.

ACTION: Technical rule.

SUMMARY: Elsewhere in today's Federal Register, the Department is promulgating a final rule implementing the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act). Because the Uniform Act rule is being promulgated jointly with 16 other Federal agencies, it was not possible to include in that document technical amendments to conform cross-references elsewhere in the Department's regulations to the new sections in the Uniform Act regulation. The amendments following this preamble contain these necessary amendments.

EFFECTIVE DATE: May 1, 1986.

FOR FURTHER INFORMATION CONTACT: Melvin Geffner, Deputy Director,

VOL 51
ISS 39
FE 27
1986
UMI

Relocation and Real Estate Division, Room 7174, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Telephone (202) 755–6336. (This is not a toll-free number).

SUPPLEMENTARY INFORMATION: Elsewhere in today's Federal Register, the Department of Housing and Urban Development is promulgating jointly with other Federal agencies a rule to implement cost-effective policies and procedures governing the implementation of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601). The rule applies to both direct Federal programs and projects and to federally-assisted programs and projects undertaken by State and local agencies.

Because the final rule removes Subpart A of 24 CFR Part 43 and completely revises 24 CFR Part 42 where HUD's old Uniform Act requirements were contained, cross-references contained in relocation requirements throughout HUD's regulations must be changed to reflect the new regulations issued today. Accordingly, this rule contains miscellaneous amendments to the Department's regulations to conform certain relocation provisions to those in the new Uniform Act regulations.

This rule also adds the Paperwork Reduction Act approval number for the paperwork collection requirements contained in the revised Uniform Act Rule.

Other Matters

Executive Order 12291

This rule does not constitute a major rule as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect of competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act of 1980

Under the provisions of section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601), the undersigned certifies that this rule does not have a significant economic impact on a substantial number of small entities because it is a rule of procedure, which conforms cross references in certain relocation provisions in the Department's regulations to the new Uniform Act regulations.

National Environmental Policy Act of 1969

A Finding of No Significant Impact with respect to the environment is determined to be unnecessary under the terms of HUD regulations at 24 CFR 50.20(k). HUD regulations implement section 102(2)(c) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332.

HUD Semiannual Agenda

This rule was not listed in the Department's Semiannual Agenda of Regulations published on October 29, 1985 (50 FR 44166) under Executive order 12291 and the Regulatory Flexibility Act.

List of Subjects

24 CFR Part 42

Administrative practices and procedure, Claims, Community development, Grant programs: Housing and community development, Loan programs: Housing and community development, Manufactured homes, Real property acquisition, Relocation assistance, Reporting and recordkeeping requirements.

24 CFR Part 43

Loan programs: Housing and community development, Relocation assistance; Seed-money loans.

24 CFR Part 290

Mortgage insurance, Low and moderate income housing.

24 CFR Part 58

Community development block grants, Grant programs: Housing and community development, Grant programs: Indians, Indians.

24 CFR Part 850

Grant programs: Housing and community development, Relocation assistance; Rental housing, Low and moderate income housing, Cooperatives.

24 CFR Part 880

Grant programs: Housing and community development, Rent subsidies, Low and moderate income housing, new construction.

24 CFR Part 881

Grant programs: Housing and community development, Rent subsidies, Low and moderate income housing.

24 CFR Part 882

Grant programs: Housing and community development, Housing, Mobile homes, Rent subsidies, Low and moderate income housing.

24 CFR Part 883

Grant programs: Housing and community development, Rent subsidies, New construction and substantial rehabilitation, Low and moderate income housing.

24 CFR Part 941

Loan programs: Housing and community development, Public housing, Prototype costs, Cooperative agreements, Turnkey.

Accordingly, the Department's regulations in Title 24 of the Code of Federal Regulations are amended as follows:

PART 42—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION FOR FEDERAL AND FEDERALLY-ASSISTED PROGRAMS

1. The authority citation for Part 42 continues to read as follows:

Authority: Sec. 213, Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601–4655); Section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§§ 42.20, 42.102, 42.103, 42.104, 42.106, 42.107, 42.203, 42.205, 42.207 [Amended]

2. At the end of each section listed below, add the following phrase:

(Approved under OMB Control Number 2506–0011.)

Sections 42.20, 42.102, 42.103, 42.104, 42.106, 42.107, 42.203, 42.205, and 42.207.

PART 43—PROVISION OF REPLACEMENT HOUSING UNDER THE UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970

3. The authority citation for Part 43 continues to read as follows:

Authority: Sec. 206(a)(of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4626(a)); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 43.28 [Amended]

4. In the introductory paragraph of § 43.28, the phrase "§ 43.4 of this part" is removed and the phrase "§ 42.2 of this chapter" is added in its place.

PART 290—MANAGEMENT AND DISPOSITION OF HUD-OWNED MULTIFAMILY HOUSING PROJECTS

5. The authority citation for Part 290 continues to read as follows:

Authority: Sec. 202, 203, and 204, Housing and Community Development Amendments of 1978 (12 U.S.C. 1715z–1b, 1701z–11, and 1701z–12); secs. 207 and 211, National Housing Act (12 U.S.C. 1713 and 1715b); section 7(d), Department of HUD Act (42 U.S.C. 3535(d)).

§ 290.47 [Amended]

6. In § 290.47(a), the phrase "24 CFR 42.20" is removed and the phrase "§ 42.2(j) of this chapter" is added in its place.

PART 571—COMMUNITY DEVELOPMENT BLOCK GRANTS FOR INDIAN TRIBES AND ALASKAN NATIVE VILLAGES

7. The authority citation for Part 571 continues to read as follows:

Authority: Title I, Housing and Community Development Act of 1974 (42 U.S.C. 5301–5320); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 571.602 [Amended]

8. In § 571.602(a), the phrase "at 24 CFR 42.85" is removed and the phrase "in § 42.2(p) of this title" is added in its place.

PART 850—HOUSING DEVELOPMENT GRANTS

9. The authority citation for Part 850 continues to read as follows:

Authority: Sec. 17 of the United States Housing Act of 1937 (42 U.S.C. 1437o); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 850.35 [Amended]

10. In § 850.35(d)(3), the phase "24 CFR 42.85" is removed and the phrase "in 42.2(p) of this title" is added in its place.

PART 880—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM FOR NEW CONSTRUCTION

11. The authority citation for Part 880 continues to read as follows:

Authority: Secs. 3, 5, and United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c, and 1437f); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 880.209 [Amended]

12. In the following table, remove the phrase indicated in the second column and add in its place the phrase indicated in the third column:

Section	Remove	Add
880.209(a)	At 24 CFR 42.85	In § 42.2(p) of this title.
880.209(b)(3)(i)	At 24 CFR 42.47	§ 42.2(e) of this title.
880.209(b)(4)	At 24 CFR 42.303	In § 42.301 of this title.
880.209(b)(4)	24 CFR 42.353	§ 42.302 of this title.

PART 881—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM FOR SUBSTANTIAL REHABILITATION

13. The authority citation for Part 881 continues to read as follows:

Authority: Secs. 3, 5, and 8, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c, and 1437f); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 881.209 [Amended]

14. In the following table, remove the phrase indicated in the second column and add in its place the phrase indicated in the third column:

Section	Remove	Add
881.209(a)	At 24 CFR 42.85	In § 42.2(p) of this title.
881.209(b)(3)(i)	24 CFR 42.47	§ 42.2(e) of this title.
881.209(b)(4)	At CFR 42.303	In § 42.301 of this title.
881.209(b)(4)	24 CFR 42.353	§ 42.302 of this title.

§ 881.709 [Amended]

15. In § 881.709, in paragraph (a) remove the phrase "at 24 CFR 42.85" and add in its place "in § 42.2(p) of this title", in paragraph (h) remove the phrase "at § 42.453" and add in its place "in § 42.402(b) of this title"; and in paragraph (i) add a period after "Part 42" and remove the phrase "and the policies and procedures contained in HUD Handbook 1376.1, Relocation and Real Property Acquisition, September 1979."

PART 882—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—EXISTING HOUSING

16. The authority citation for Part 882 continues to read as follows:

Authority: Sec. 3, 5, and 8, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c, and 1437f); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 882.406 [Amended]

17. In § 882.406(a), remove the phrase "at 24 CFR 42.85" and add the phrase "§ 42.2(p) of this title" in its place.

PART 883—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—STATE HOUSING AGENCIES

18. The authority citation for Part 883 continues to read as follows:

Authority: Secs. 3, 5, and 8, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c, and 1437f); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 883.311 [Amended]

19. In the following table, remove the phrase indicated in the second column and add in its place the phrase indicated in the third column:

Section	Remove	Add
883.311(a)	At 24 CFR 42.85	In § 42.2(p) of this title.
883.311(b)(3)(i)	24 CFR 42.47	§ 42.2(e) of this title.
883.311(b)(4)	At 24 CFR 42.303	In § 42.301 of this title.
883.311(b)(4)	24 CFR 42.353	§ 42.302 of this title.

PART 941—PUBLIC HOUSING DEVELOPMENT

20. The authority citation for Part 941 continues to read as follows:

Authority: Secs. 4, 5, and 9, United States Housing Act of 1937 (42 U.S.C. 1437b, 1437e, and 1437q); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

21. In § 941.207, the section heading, and paragraphs (a), (b)(1), and (c) are revised as set forth below:

§ 941.207 Relocation and acquisition.

(a) *Applicability of Uniform Act.* The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act) (42 U.S.C. 4601–4655) and HUD implementing regulations in Part 42 of this title apply to the acquisition of real property by a PHA for a project assisted under this Part and to any displacement that results from such acquisition.

(b) * * *

(1) PHA acquisition of a site or property that results from a voluntary transaction as described in § 42.101(a)(1) of this title, except the Uniform Act relocation requirements do apply to the displacement of any renter-occupant of such site or property. For purposes of relocation eligibility for such renter-occupants, the "initiation of negotiations" shall be the date of the seller's acceptance of the PHA's written offer to purchase the property.

* * * * *

(c) *Notices.* Persons scheduled to be displaced shall be given written notices and information by the PHA as specified in § 42.203 of this title. Persons not scheduled to be displaced shall be informed of the acquisition and given notice by the PHA of their opportunity to enter into a lease with the PHA, if the PHA has determined their eligibility under Part 960 of this chapter.

39 CFR Parts 927 and 931

Miscellaneous Changes to Rules of Procedure

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The Postal Service is adopting this final rule to make it clear that the rules of procedure for reporting infractions by a carrier transporting mail by vessel under the Postal Contracting Manual are likewise applicable to a common carrier by water who fails or refuses to transport the mail when required to do so under 39 U.S.C. 5603. In addition, certain obsolete office and department names are updated, and certain other minor changes are made.

EFFECTIVE DATE: March 28, 1986.

List of Subjects in 39 CFR Part 927

Administrative practice and procedure, Government contracts, Maritime carriers, Penalties, Postal Service.

For the reasons set out above, the Postal Service amends title 39 CFR as follows:

PART 927—RULES OF PROCEDURE RELATING TO FINES, DEDUCTIONS, AND DAMAGES

1. In subchapter N, the undesignated center heading for Parts 927 and 931 is revised to read as follows:

Rules of Procedure Before the Mail Processing Department

2. The authority citation for Part 927 is revised to read as follows:

Authority: 39 U.S.C. 401, 2601, 5401-5403, 5603, 5604; 49 U.S.C. 1375, 1471.

3. In § 927.1, in the last sentence of paragraph (b), strike out "Office of Transportation Services" and insert "Office of Transportation and International Services" in lieu thereof; in the first and second sentences of paragraph (c), strike out "Office of Transportation Service(s)" and insert "Office of Transportation and International Services" in lieu thereof; and revise paragraph (a) to read as follows:

§ 927.1 Noncontractual carriage of mail by vessel.

(a) *Report of infraction.* Where evidence is found or reported that a carrier of mail by vessel which has transported or been required to transport mail pursuant to the provisions of section 19-504, Postal Contracting Manual or 39 U.S.C. 5603, has failed or refused to transport the mail when required to do so, has unreasonably or unnecessarily delayed the mails, has committed other delinquencies in the transportation of mail, has failed to carry the mail in a safe and secure manner, or has caused loss or damage to the mail, the facts will be reported to the General Manager, Logistics Division, of the region in which the mail was dispatched or received or was required to be dispatched or received.

Proposed Rules

Federal Register
Vol. 51, No. 39
Thursday, February 27, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 85-AWA-10]

Proposed Establishment of Airport Radar Service Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: This supplemental notice amends an earlier notice in which the FAA proposed to designate an Airport Radar Service Area (ARSA) at Dulles International Airport, Washington, DC, and reopens the comment period for the proposal. Dulles International Airport is a public airport at which a nonregulatory Terminal Radar Service Area (TRSA) is currently in effect. Establishment of an ARSA would require that pilots maintain two-way radio communication with air traffic control (ATC) while in the ARSA. Implementation of ARSA procedures at Dulles would reduce the risk of midair collision and promote the efficient control of air traffic in the terminal area.

DATES: Comments must be received on or before April 11, 1986.

ADDRESSES: Send comments on the proposal in triplicate to:

Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket [AGC-204], Airspace Docket No. 85-AWA-10, 800 Independence Avenue, SW., Washington, DC 20591.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Paul Smith, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 85-AWA-10." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket. Comments received during the earlier comment period will be held in the public docket and combined with comments received during this period.

Availability of NPRM's

Any person may obtain a copy of this Supplemental Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 426-8058. Communications must identify the notice number of this Supplemental NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

On September 30, 1985, the FAA proposed to designate an ARSA at Dulles International Airport, Washington, DC (50 FR 39822), and the comment period for the proposal closed January 2, 1986. One of the goals in the ARSA program is standardization of the designated airspace insofar as possible. Deviation from the standard at Dulles was, and is, necessary due to the rapid rise of the terrain to the west and due to the delegation of airspace. The agency is in the process of making significant changes to the airway and delegated airspace configurations throughout the east coast, commonly referred to as the Expanded East Coast Plan. A modification to the airspace delegated to Dulles Approach Control is anticipated as a part of that plan.

This supplement proposes to amend the earlier notice by raising the 4,000 feet MSL segment within 5 miles of the airport to 4,300 feet MSL. The remainder of the earlier proposal is unchanged. The entire proposal as amended is stated below and an amended graphic is attached.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; and (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). For the reasons discussed in the NPRM, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act (RFA). A regulatory evaluation was prepared for the NPRM and is included in the public docket of the initial notice. The conclusions of the evaluation are not altered by this supplemental notice.

The Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.501 [Amended]

2. § 71.501 is amended as follows:

Dulles International Airport, Washington, DC [New]

That airspace extending upward from the surface to and including 4,300 feet MSL within a 5-mile radius of the Dulles International Airport (lat. 38°56'39"N., long 77°27'28"W.) and lying west of a line extending from the 048°T(057°M) bearing from the airport on the 5-mile arc to the 130°T(139°M) bearing from the airport on the 5-mile arc, and upward from the surface to 3,000 feet MSL east of that line, and that airspace extending upward from 1,700 feet MSL to and including 4,300 feet MSL within a 10-mile radius of the airport from the 149°T(158°M) bearing from the airport clockwise to the 038°T(047°M) bearing from the airport, excluding that airspace beyond 8 miles between the 233°T(242°M) bearing from the airport clockwise to the 272°T(281°M) bearing from the airport, and that airspace extending upward from 1,7000 feet MSL upward to and including 3,000 feet MSL within a 10-mile radius of the airport from the 038°T(047°M) bearing from the airport clockwise to the 149°T(158°M) bearing from the airport, excluding that airspace overlying the Washington, DC, Terminal Control Area.

Issued in Washington, DC, on February 14, 1986.

Daniel J. Peterson;

Manager, Airspace-Rules and Aeronautical Information Division.

[Airspace Docket No. 85-ANM-33]

Proposed Alteration of VOR Federal Airway V-491 and Establishment of V-589-WY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend Federal Airway V-491 by renumbering the segment between Medicine Bow and Caspe, WY, V-589. V-491 begins at the Medicine Bow very high frequency omni-directional radio range and tactical air navigational aid (VORTAC) and goes to Casper, WY, and does not begin again until Rapid City, SD. This has created confusion in referencing this airway because it is segmented. This action would enhance flight planning through this area.

DATE: Comments must be received on or before April 11, 1986.

ADDRESS: Send comments on the proposal in triplicate to:

Director, FAA, Northwest Mountain Region, Attention: Manager, Air Traffic Division, Docket No. 85-ANM-33, Federal Aviation Administration, 17900 Pacific Highway South, C-68966, Seattle, WA 98168.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Burton Chandler, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8627.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 85-ANM-33." The poscard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to amend VOR Federal Airway V-491 by renumbering the segment between Medicine Bow and Casper, WY, V-589. W-491 begins at Medicine Bow VORTAC and goes to Casper, WY, VORTAC, and does not begin again until Rapid City, SD. This has created confusion in referencing this airway because it is segmented. It could be confusing and create problems for a pilot filing a flight plan through this area. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6A dated January 2, 1985.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation Safety, VOR Federal Airways.

The Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.123 [Amended]

2. § 71.123 is amended as follows:

V-491 [Amended]

By removing the words "From Medicine Bow, WY; INT Medicine Bow 336° and Casper 216° radials; to Casper, WY."

V-589 [New]

From Medicine Bow, WY; INT Medicine Bow 336°T(322°M) and Casper, WY, 216°T(201°M) radials; to Casper.

Issued in Washington, DC, on February 14, 1986.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

BILLING CODE 4910-13-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 275

[Release IA-1013; File No. S7-7-86]

Certain Transactions Not Deemed Assignments

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule.

SUMMARY: The Commission is proposing for comment a rule under the Investment Advisers Act of 1940 which provides that a transaction which does not result in a change of actual control or management of an investment adviser shall not be deemed an "assignment" requiring client consent for purposes of that act. If adopted, the rule, which is substantively identical to a corresponding rule under the Investment Company Act of 1940, will provide guidance to investment advisers seeking to determine when events that do not cause a change of actual control of the adviser should not be treated as an assignment.

DATE: Comments must be received by March 21, 1986.

ADDRESS: Comments should be sent in triplicate to John Wheeler, Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Comment letters should refer to File No. S7-7-86. All comments received will be available for public inspection in the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: Thomas P. Lemke, Chief Counsel (202-272-2030), or Stephanie M. Monaco, Attorney (202-272-2031), Office of Chief Counsel, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission ("Commission") today is publishing for comment proposed Rule 202(a)(1)-1 under the Investment Advisers Act of 1940 [15 U.S.C. 80b-1 *et seq.*] ("Act"), which would deem a transaction which does not result in an actual change of control of an investment adviser not to involve an "assignment" requiring client consent under section 205(2) of the Act [15 U.S.C. 80b-5(2)]. The terms of the proposed rule are substantively identical to those of rule 2a-6 [17 CFR 270.2a-6] under the Investment Company Act of 1940 [15 U.S.C. 80a-1 *et seq.*], which deems certain transactions not to involve the assignment of an investment advisory or principal underwriting contract of a registered investment company. If adopted, the rule will provide guidance to investment advisers seeking to determine when events that do not cause a change of actual control or management of the adviser should not be treated as an assignment and will eliminate the need for advisers to file, and the staff to process, routine no-action and interpretive requests on this topic.

Background and Discussion

Section 205(2) of the Act provides that a registered investment adviser may not enter into or nenew an advisory contract unless the contract provides that it cannot be assigned by the adviser without the consent of the other party to the contract. The term "assignment" is defined in section 202(a)(1) of the Act [15 U.S.C. 80b-2(a)(1)] to include, as relevant here, any transfer of an investment advisory contract by the assignor or any transfer of a controlling block of the assignor's outstanding voting securities by a security holder of the assignor.[1] The Act's legislative history mentions concern about fiduciaries assigning personal contracts and demonstrates that this provision is directed against persons who would otherwise "traffic" in investment advisory contracts.[2]

From time to time, however, an adviser may be involved in a transaction—particularly a reorganization or other modification in corporate structure involving a controlling block of the adviser's securities—which technically may be considered to be an assignment for purposes of the Act's definition, but which in fact does not alter the actual control or management of the adviser. If the transaction is viewed as an assignment for purposes of section 205(2), the consent of the adviser's clients would be required. However, because such a transaction does not result in an actual change of control or management of the adviser, interpreting the consent requirement of section 205(2) to apply in this situation appears to serve no useful purpose and, in fact, merely increases the adviser's cost of doing business without providing any benefit to clients.

Accordingly, the Commission is proposing a rule that would deem such a transaction not to involve the assignment of an advisory contract for purpose of section 205(2). The terms of the proposed rule are substantively identical to those of rule 2a-6 under the Investment Company Act of 1940,[3] regarding the "assignment" of an advisory or underwriting contract for a registered investment company. The Commission's staff has stated in no-action letters that the term "assignment" should be interpreted in the same manner for purposes of both of the 1940 Acts.[4] Whether a particular transaction involves an actual change of control is, of course, primarily a factual determination. Because the Commission's staff is not in a position to make the investigation necessary to ascertain, verify, or evaluate the requisite factual information regarding particular transactions, the staff ordinarilly will not express any opinion in responise to inquires as to whether a particular transaction would come within the rule.

Regulatory Flexibility Act Certification

Pursuant to section 605(b) of the Regulatory Flexibility Act [5 U.S.C. 605(b)], the Chairman of the Commission has certified that the rule proposed herein will not, if adopted, have a significant economic impact on a substantial number of small entities. This certification, including the reasons therefore, is attached to this release.

Paperwork Reduction Act

The proposed rule is not subject to that Act because it does not involve an information collection requirement.

List of Subjects in 17 CFR Part 275

Investment advisers, Reporting and recordkeeping requirements, Securities.

Text of Proposed rule

It is proposed that Part 275 of Chapter II of Title 17 of the Code of Federal Regulations under the Investment Advisers Act of 1940 be amended as follows:

PART 275—RULES AND REGULATIONS, INVESTMENT ADVISERS ACT OF 1940

1. The authority citation for Part 275 is revised to read as follows:

Authority: Secs. 203, 204, 211, 54 Stat. 850, as amended, 852, as amended, 855, as amended; 15 U.S.C. 80b-3, 80b-4, 80b-6A, 80b-11 unless otherwise noted.

2. By adding § 275.202(a)(1)-1 as follows:

§ 275.202(a)(1)-1 Certain transactions not deemed assignments.

A transaction which not result in a change of actual control or management of an investment adviser is not an

---

[1] Section 2(a)(4) of the Investment Company Act of 1940 [15 U.S.C. 80a-2(a)(4)] contains a substantially similar definition of the term "assignment."

[2] *See, e.g.,* S. Rep. No. 1775 76th Cong., 3d Sess. 22 (1940). The legislative history of the Investment Company Act of 1940 states similar concerns about trafficking in advisory and underwriting contracts of investment companies. *See, e.g.,* Hearings on S. 3580 Before a Subcomm. of the Senate Comm. on Banking and Currency, 76th Cong., 3d Sess. 253 (1940)

[3] Rule 2a-6 was proposed in Investment Company Act Rel. No. 10809, Aug. 6, 1979, 44 FR 47100 (Aug. 10, 1979) and adopted in Investment Company Act Rel. No. 11005, Jan. 2, 1980, 45 FR 1080 (Jan. 9, 1980).

assignment for purposes of section 205(2) of the Act.

By the Commission.

Dated: February 21, 1986.

Shirley E. Hollis,

Assistant Secretary.

Regulatory Flexibility Act Certification

I, John Shad, Chairman of the Securities and Exchange Commission, hereby certify pursuant to 5 U.S.C. 605(b) that proposed rule 202(a)(1)–1 under the Investment Advisers Act of 1940, if adopted, will not have a significant economic impact on a substantial number of small entities. The reason for the certification is that the rule is merely intended to codify existing informal interpretations about certain transactions not deemed to be "assignments" for purposes of that act.

Dated: February 20, 1986.

John Shad,

Chairman.

BILLING CODE 8010-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 906

Public Comment Period and Opportunity for Public Hearing on Proposed Amendment to the Colorado Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: OSMRE is announcing procedures for a public comment period and hearing on the substantive adequacy of a program amendment submitted by the State of Colorado to its permanent regulatory program (hereinafter referred to as the Colorado program) which was approved by the Secretary of the Interior under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). By letter dated January 23, 1986, Colorado submitted an amendment to its regulations at 2 CCR 407–2, 5.03.3(2)(b) concerning suspension or revocation of permits.

This notice sets forth the times and locations that the Colorado program and the proposed amendment will be available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment, and the procedures that will be followed regarding the public hearing.

DATES: Written comments from the public not received by 4:00 p.m. on March 31, 1986 will not necessarily be considered in the decision process. A public hearing on the proposal will be held at 7:00 p.m. on March 19, 1986. Any person interested in making an oral or written presentation at the hearing should contact Mr. Robert Hagen at the OSMRE Albuquerque Field Office by the close of business on or before March 14, 1986. If no one expresses an interest in participating in the hearing by this date, the hearing will not be held. If only one person has so contacted Mr. Hagen, a public meeting, rather than a hearing, may be held; the results of the meeting will be included in the administrative record.

ADDRESSES: Written comments should be mailed or hand delivered to: Office of Surface Mining Reclamation and Enforcement, Albuquerque Field Office, Attn: Colorado Administrative Record, 219 Central Avenue, NW., Albuquerque, New Mexico 87102.

Copies of the proposed modifications to the program, the Colorado program and the administrative record on the Colorado program are available for public review and copying at the OSMRE offices and the State regulatory authority office listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays. Each requestor may receive, free of charge, one copy of the proposed program amendment by contacting the OSMRE Albuquerque Field Office.

Office of Surface Mining Reclamation and Enforcement, Albuquerque Field Office, 219 Central Avenue, NW., Albuquerque, New Mexico 87102; Telephone: (505) 766–1486

Office of Surface Mining Reclamation and Enforcement, 1100 "L" Street, NW., Room 5124, Washington, DC 20240, Telephone: (202) 343–4855

Colorado Mined Land Reclamation Division, Department of Natural Resources, Centennial Building, Room 423, 1313 Sherman Street, Denver, Colorado 80203, Telephone: (303) 866–3567.

The public hearing will be held at the OSMRE Western Technical Center, Brooks Towers, 1020 Fifteenth Street, Denver, Colorado.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Hagen, Director, Albuquerque Field Office, Office of Surface Mining Reclamation and Enforcement, 219 Central Avenue, NW., Albuquerque, New Mexico 87102. Telephone: (505) 766–1492.

SUPPLEMENTARY INFORMATION:

I. Background on the Colorado Program

On February 29, 1980, Colorado submitted its proposed permanent regulatory program to the Secretary of the Interior. On December 15, 1980, following a review in accordance with 30 CFR Part 732, the Secretary approved the program subject to the correction of 45 minor deficiencies. Information pertinent to the general background and revisions to the permanent program submission, as well as the Secretary's findings, the disposition of comments and an explanation of the initial conditions of approval can be found in the December 15, 1980 **Federal Register** (45 FR 82173–82214). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 906.11, 906.15 and 906.16.

II. Submission of Program Amendment

By letter dated January 23, 1986, Colorado submitted an amendment to its regulations at 2 CCR 407–2, 5.03.3(2)(b) concerning suspension or revocation of permits, which corresponds to the Federal rule at 30 CFR 843.13(a)(3). The text of the amendment is as follows [upper-case words are additions and the italic words are deletions]:

Rule 5.03.3 Suspension or Revocation of Permits

(2)(b) *The Division shall determine that a pattern of violations exists if it finds that there were violations of the same or related requirements of the Act, these Rules, or the permit during three or more inspections of the permit area within any 12-month period.* THE ADMINISTRATOR SHALL PROMPTLY REVIEW THE HISTORY OF VIOLATIONS OF ANY PERMITTEE WHO HAS BEEN CITED FOR VIOLATIONS OF THE ACT, THESE RULES, OR THE PERMIT DURING THREE OR MORE INSPECTIONS OF THE PERMIT AREA WITHIN ANY 12-MONTH PERIOD TO DETERMINE IF A PATTERN OF VIOLATION EXISTS OR HAS EXISTED.

In accordance with the provisions of 30 CFR 732.15 and 732.17, OSMRE is now seeking comments on whether the proposed amendment satisfies the criteria for approval of State program amendments. If the Director determines that the amendment satisfies the criteria and is no less stringent than SMCRA and no less effective than the Federal regulations, the amendment will be approved, and 30 CFR Part 906 modified accordingly. If the Director does approve the proposed amendment, it will become part of the approved Colorado program.

III. Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 1291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory program. Therefore, this action is exempt from preparation of a regulatory impact analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

BILLING CODE 4310-05-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[CGD5 86–03]

Security Zone; James River, VA

AGENCY: Coast Guard, DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Coast Guard is considering a proposal to establish a security zone in the waters of the James River immediately adjacent to the Newport News Shipbuilding and Drydock Co. (NNS) located in Newport News, Va., and establishing a section of anchorage G–1 as a security zone anchorage. This action is necessary to safeguard U.S. Naval vessels from sabotage or other subversive acts, accidents, or other incidents of a similar nature while they are moored at the shipyard. This security zone will provide protection to these vessels by prohibiting access to the waters around the shipyard, except by certain authorized vessels, and by providing a sufficient area in which to detect unauthorized intrusions in time to allow appropriate security measures to be taken.

DATES: Comments must be received on or before April 14, 1986.

ADDRESSES: Comments should be mailed to Commander (mpv), Fifth Coast Guard District, Federal Building, 431 Crawford Street, Portsmouth, VA 23704–5004. The comments and other materials referenced in this notice will be available for inspection and copying at 431 Crawford Street, Room 406, in the offices of the Port and Vessel Safety Branch. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Lieutenant W. J. Wetzel, (804) 398–6388.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD5 86–03) and the specific section of the proposal to which their comments apply, and give reasons for each comment. Receipt of comments will be acknowledged if a stamped self addressed postcard or envelope is enclosed. The regulations may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The drafters of this notice are Lieutenant W. J. Wetzel, Project Officer, Port and Vessel Safety Branch, Fifth Coast Guard District, and Commander R. J. Reining, Project Attorney, Legal Office, Fifth Coast Guard District.

Discussion of Proposed Regulations

After a review of shipyard physical security, the Supervisor of Shipbuilding, Conversion, and Repair for the U.S. Navy at Newport News, Va., in October 1984, requested that the Coast Guard Captain of the Port, Hampton Roads, establish a security zone. The Coast Guard has concluded that a security zone is warranted and appropriate, because the security zone is intended for the protection of assets which are vital to the national interest. It is undeniable that vessels under construction or repair at this shipyard can easily be approached from the water and are vulnerable to acts of sabotage. Prohibiting access to the water areas around this shipyard provides a means of countering this threat without unnecessarily interfering with the public's use of this waterway.

The requested security zone keeps unauthorized persons sufficiently clear of the vessels in and along the shipyard, allows early detection of unauthorized entry, and does not interfere with navigation using the James River for through passage, although a small section of anchorage G–1 along the shipyard will no longer be open to the general public. If this security zone is established, a separate security zone anchorage will be established by this proposal for the use of vessels that are authorized to be within the security zone. The boundaries of anchorage G–1 will be changed by excluding those portions of the anchorage that are within the security zone. This security zone will be limited to water areas only. Present laws and regulations give NNS sufficient authority to restrict access onto its shipyard property and to deal with unauthorized persons within the shipyard.

This proposal would allow certain vessels and individuals to enter the security zone without obtaining the permission from the Captain of the Port. Because of the administrative difficulties involved, and more importantly because it would impose an unreasonable burden upon NNS and interfere with it's ability to conduct its business, the proposal does not require vessels that have been authorized use of the shipyard's facilities by NNS, vessels being worked on by NNS or at the NNS shipyard, vessels and individuals performing work at the NNS shipyard, and certain public vessels to obtain permission from the Captain of the Port before entering the security zone. (Individuals aboard those vessels also may enter the security zone without the permission of the Captain of the Port.)

VOL 51
ISS 39
FE 27
1986
UMI

The possible threat to the national security posed by those vessels is assessed by the Navy before they enter the security zone and measures are taken to ensure that the national security is not jeopardized.

The proposal at the same time preserves the Coast Guard's existing authority to control the movement of vessels and individuals on the waters of the United States, including those vessels and individuals that are permitted to enter or remain within the security zone without the specific permission of the Captain of the Port. This authority is restricted by law to actions taken to prevent injury to vessels, waterfront facilities, or the waters of the United States, or to secure the observance of the rights and obligations of the United Status. The reservation of this authority is necessary to ensure that the Coast Guard has the ability to take prompt and adequate enforcement action within the security zone if a threat to the national security or the safety of any vessel arises. The reservation of this authority is not intended to, and should not, obstruct or hinder the ability of NNS to conduct its business at the shipyard. The authority of the Coast Guard that has been reserved by this proposal is no greater than the authority the Coast Guard has over vessels and individuals at other waterfront facilities, including other commercial shipyards.

Other individuals who desire to enter the security zone will be required to request permission from the Captain of the Port via the Security Office of the U.S. Navy Supervisor of Shipbuilding, Conversion, and Repair at Newport News, Virginia.

The Coast Guard understands that there are several commercial fishermen who have traditionally fished these waters. We anticipate that the Captain of the Port will grant permission for these individuals to enter the security zone during those periods when they hold valid licenses to take shellfish or other forms of marine life from the James River at that location, if upon review by the U.S. Navy it is determined that these individuals do not pose a security risk to the United States.

At the present time, there are no intentions to require the use of Port Security Cards, or other special credentials on board vessels within this security zone.

This regulation is issued pursuant to 50 U.S.C. 191 as set out in the authority citation for all of Part 165.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. The only adverse effect expected to be caused by this proposal are to those interests which will be denied access to the waters contained in this zone. Those interests affected are expected to be primarily recreational, and the loss of the use of this part of the James River should not affect their use of the river for navigation or other purposes except in a very minor way.

Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 165 of Title 33, Code of Federal Regulations as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5.

2. Section 165.504 is added to read as follows:

§ 165.504 Newport News Shipbuilding and Dry Dock Company Shipyard, James River, Newport News, Va.

(a) *Location* The following is a security zone: The waters of the James River encompassed by a line beginning at the intersection of the shoreline with the northernmost property line of the Newport News Shipyard and Dry Dock Co. at latitude 37°00'38.1" N., longitude 76°27'05.7" W., thence southerly to latitude 36°59'58.4" N., longitude 76°27'16.7" W., thence southeasterly to latitude 36°59'23.0" N., longitude 76°26'54.6" W., thence westerly to latitude 36°59'21.5" N., longitude 76°26'58.4" W., thence southeasterly to latitude 36°59'12.9" N., longitude 76°26'52.4" W., thence easterly to latitude 36°59'14.2" N., longitude 76°26'49.1" W., thence southeasterly to latitude 36°58'39.9" N., longitude 76°26'24.1" W., thence easterly to latitude 36°58'37.2" N., longitude 76°26'16.0" W., thence northerly to the intersection of the shoreline with the southernmost property line of the Newport News Shipbuilding and Dry Dock Co. at latitude 36°58'48.0" N., longitude 76°26'11.2" W., thence northwesterly along the shoreline to the point of beginning.

(b) *Security zone anchorage.* The following is a security zone anchorage: The waters of the James River encompassed by a line beginning at the intersection of the shoreline with the northernmost property line of the Newport News Shipbuilding and Dry Dock Company shipyard at latitude 37°00'38.1" N., longitude 76°27'05.7" W., thence southerly to latitude 36°59'58.4" N., 76°27'16.7" W., thence easterly to the shoreline at latitude 36°59'58.5" N., longitude 76°27'11.6" W., thence along the shoreline to the point of beginning.

(c) *Special regulations.*

(1) Section 165.33 (a), (e), and (f) do not apply to the following vessels or individuals on board those vessels:

(i) Public vessels of the United States.

(ii) Public vessels owned or operated by the Commonwealth of Virginia or its subdivisions for law enforcement or firefighting purposes.

(iii) Vessels owned by, operated by, or under charter to Newport News Shipbuilding and Dry Dock Co.

(iv) Vessels that are performing work at Newport News Shipbuilding and Dry Dock Co., including the vessels of subcontractors and other vendors of Newport News Shipbuilding and Dry Dock Co. or other persons that have a contractual relationship with Newport News Shipbuilding and Dry Dock Co.

(v) Vessels that are being built, rebuilt, repaired, or otherwise worked on at or by Newport News Shipbuilding and Dry Dock Co. or another person authorized to perform work at the shipyard.

(vi) Vessels that are authorized by Newport News Shipbuilding and Dry Dock Company to moor at and use its facilities.

(2) Any vessel authorized to enter or remain in the security zone may anchor in the security zone anchorage.

(3) Other vessels desiring access to this zone shall secure permission from the Captain Of The Port through the Security Office of the U.S. Navy Supervisor of Shipbuilding, Conversion, and Repair at Newport News, Virginia. The request shall be forwarded in a timely manner to the Captain Of The Port by the appropriate Navy official. (d) Enforcement. The U.S. Coast Guard may be assisted in the enforcement of this zone by the U.S. Navy.

Dated: February 14, 1986.

James C. Irwin,

Rear Admiral, U.S. Coast Guard, Commander, Fifth Coast Guard District.

[FR Doc. 86-4265 Filed 2-26-86; 8:45 am]

BILLING CODE 4910-14-M

---

33 CFR 166

[CGD 86-006]

Port Access Routes; Approach to Mobile, AL

AGENCY: Coast Guard, DOT.

ACTION: Notice of Study.

SUMMARY: The Coast Guard is undertaking a study of the shipping safety fairways in the approach to Mobile, Alabama. A modification to the existing fairway is being considered for this area. This study is being conducted in accordance with standards contained in the Ports and Waterways Safety Act (PWSA) (33 U.S.C. 1223 and 1224). As a result of this study, new or modified fairways may be proposed in the Federal Register. Also, the results of this study could affect the manner in which specific offshore areas leased after the date of this notice may be explored and developed.

DATE: Comments are due on or before May 28, 1986.

ADDRESS: Commander (mps), Eighth Coast Guard District, Room 1341, Hale Boggs Federal Building, 500 Camp Street, New Orleans, Louisiana 70130-3396.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Frederick V. Newman, Jr., (505) 589—6901.

SUPPLEMENTARY INFORMATION: The area to be examined during the study is bounded by a line connecting the following geographic positions:

Latitude	*Longitude*
(1) 30°10'36" N.,	88° 01'30" W.,
(2) 30°08'04" N.,	88° 00'36" W.,
(3) 30°08'17" N.,	87° 59'15" W.,
(4) 30°05'15" N.,	88° 01'13" W.,
(5) 30°05'15" N.,	88° 08'05" W.,
(6) 30°05'29" N.,	88° 09'19" W.,
(7) 30°07'15" N.,	88° 08'54" W.,
(8) 30°10'36" N.,	88° 03'53" W.

This area encompasses the junction of the Mobile Ship Channel Safety Fairway, the Mobile to Pensacola Safety Fairway, the Mobile Ship Channel to Sea Safety Fairways, and the Horn Island Pass to Mobile Ship Channel Safety Fairway. These fairways are described in the Code of Federal Regulations in Title 33, Part 166, section 200, paragraphs (d) (38) and (39). Safety fairways are areas in which no fixed structures, temporary or permanent, are permitted and therefore may inhibit exploration and exploitation of mineral resources in the area so designated.

Port access routing needs in the Mobile approach area were previously studied in 1980; and the results were published in the Federal Register on October 8, 1981 (46 FR 49969). On the basis of that study no change to the existing shipping safety fairway system in the approaches to Mobile was recommended.

The Coast Guard is initiating a study of the junction of safety fairways in the vicinity of the Mobile Ship Channel entrance in response to a request from Texaco Producing Incorporated to modify the existing Mobile Safety Fairway to open an area presently within the fairway to exploration and production drilling. Specifically, the requested modification would reduce the width of the fairway by moving the western boundary of the existing Mobile Ship Channel Safety Fairway. This boundary would follow a line drawn through the following geographic positions:

Latitude	*Longitude*
(1) 30°07'15" N	8830° 08'54" W.,
(2) 30°08'10" N	8830° 04'40" W.,
(3) 30°10'36" N	8830° 03'53" W.,

Relocation of the western edge of the Mobile Safety Fairway as proposed would affect the following State and Federal lease blocks: State of Alabama lease blocks 113, 131, and 132; and Mobile Area Federal lease blocks 868 and 869. These blocks would then no longer be subject to the fairway restrictions on fixed structures.

Although the above specific alternative will be examined during this study, comments and recommendations or other information need not be limited to this alternative.

Vessel operators are invited to comment on any positive or negative impacts which may result from modifying the fairways within the study area. Likewise potential leaseholders and offshore developers are encouraged to identify and support any foreseeable costs or benefits from possible modification of the fairways in the study area.

Particular issues to be examined during the study, and on which information and public comments are invited, are as follows:

1. The existing and potential vessel traffic (i.e., types of vessels, traffic patterns, number of vessels, variations in the traffic density, etc.).

2. The need for a fairway adjustment (i.e., identification of the conflicting uses of the area which cannot be reasonably accommodated without an adjustment, and whether those needs can be accommodated without an adverse impact on navigation safety).

3. Alternative configurations which can reasonably accommodate the needs of other users.

4. The effect on vessel traffic of the proposed fairway modification, or an alternative fairway configuration, taking into account the location and angle of turns, length of reaches between turns, and maneuverability of vessels expected to transit the area. Also to be considered is any service vessel traffic to be generated by the construction and operation of structures in the area of the modification.

5. Present needs for fairway areas and whether the fairway can accomplish its original purpose if it is modified as proposed.

6. Impacts on adjacent leaseholders or future leaseholders, and the state and federal leasing process, where tracts are located in fairways. One aspect of this issue is how the existence of the fairway restrictions are factored into the value of a lease.

7. Local conditions (e.g., climate, current, hydrography, conditions of limited visibility, and the effect of shoaling on vessel traffic since the fairway was originally established).

8. Adequacy of the aids to navigation system in the vicinity, including public or private aids required on structures to be sited in the area of the modification, and any relocation of existing aids which may be necessary as a result of a fairway modification.

9. Adequacy of advance information available to mariners, including scheduled revisions of affected nautical charts.

10. The need for a safety zone or buffer zone around structures to be sited in the area of the modification.

11. Long term port development plans, including Corps of Engineers dredging and channel-deepening projects.

The Eighth Coast Guard District will be conducting the study and developing recommendations. Following is the name, address and telephone number of the project officer who will be responsible for the study of this area: Lieutenant Commander Frederick V. Newman, Jr., c/o Commander (mps), Eighth Coast Guard District, Room 1341, Hale Boggs Federal Building, 500 Camp Street, New Orleans, Louisiana 70130-3396, (504) 589-6901.

The Coast Guard is interested in receiving information and opinions from persons who have an interest in safe routing of ships as affected by other uses of the area. Written comments should be mailed to the above address. In accordance with the PWSA, the Coast Guard will directly consult with the Departments of State, the Interior,

VOL 51 ISS 39 FE 27 1986 UMI

Commerce, and Army, and the Governors of the affected states during the study. In order to be most useful, any relevant information should be made available to the district office by the end of the comment period.

Procedural Requirements

In conducting this study, the Coast Guard will be governed by certain procedural requirements which are emphasized here to assist those who wish to submit comments. These requirements are based on mandates of the PWSA. The Coast Guard will also apply its experience in the areas of vessel traffic management, navigation, shiphandling, the effects of weather, and prior analysis of the traffic density in certain regions.

The PWSA directs that "in order to provide safe access routes for the movement of vessel traffic proceeding to or from ports . . . the Secretary shall designate necessary fairways and traffic sephration schemes" in which the "paramount right of navigation over all other users" shall be recognized. Before a designation can be made, the Coast Guard is required to "undertake a study of the potential traffic density and the need for safe access routes." In accordance with 33 U.S.C. 1223, the Coast Guard will "to the extent practicable, reconcile the need for safe access routes with the needs of all other reasonable uses of the area involved."

During the study, the Coast Guard is directed to consult with federal and state agencies and to "consider the views of representatives of the maritime community, port and harbor authorities or associations, environmental groups, and other parties who may be affected by the proposed action."

In accordance with the PWSA, the Secretary has the discretion to modify the location or limits of designated safety fairways, where an adjustment is necessary to accommodate the needs of other uses which cannot be reasonably accommodated otherwise. However, the PWSA also stipulates that such an ajustment should not, in the judgment of the Secretary, "unacceptably adversely affect the purpose for which the existing designation was made and the need for which continues."

The results of this study will be published in the **Federal Register**. If the Coast Guard determines that new or modified routing measure designations are needed, a Notice of Proposed Rulemaking will be published.

It is anticipated that the study will be concluded by July 1986.

Dated: February 20, 1986.

T.J. Wojnar,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation.

[FR Doc. 86-4267 Filed 2-26-86; 8:45 am]

BILLING CODE 4910-14-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1244

[Ex Parte No. 385; Sub-2]

Procedures on Release of Data From the ICC Waybill Sample

AGENCY: Interstate Commerce Commission.

ACTION: Extension of time to file comments.

SUMMARY: The notice of proposed rulemaking in this proceeding was served on January 8, 1986 and published in the **Federal Register**, at 51 FR 767, January 8, 1986. February 24, 1986, was given as the due date for comments. This is to give notice that the time for filing comments has been extended for an additional 45 days.

DATE: Comments must be received on or before April 10, 1986.

Comments: An original and 15 copies of any comments referring to Ex Parte No. 385 (Sub-No. 2) should be sent to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:

James A. Nash, Tel. (202) 275-6844

or

Elaine K. Kaiser, (202) 275-6894.

SUPPLEMENTARY INFORMATION: The Interstate Commerce Commission has received a petition from the Association of American Railroads (AAR) requesting a 45-day extension for filing comments in this proceeding. AAR states that the extension will enable the railroad industry to determine whether and to what extent an industry position can be developed. Also, they note that an industry position will expedite the administrative process by eliminating the filing of unnecessary duplicative material and by enabling more precise identification of key issues.

We agree that the 45-day extension is warranted. It will provide the railroads with adequate time to formulate their joint as well as individual positions. Also, this extension will not unduly burden any affected parties because the proposed rules essentially adopt the Commission's Office of Transportation Analysis' current policy for handling waybill requests.

Decided: February 20, 1986.

By the Commission, Heather J. Gradison, Chairman.

James H. Bayne,

Secretary.

Notices

Federal Register
Vol. 51, No. 39
Thursday, February 27, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 86-010]

Advisory Committee on Foreign Animal and Poultry Diseases; Meeting

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of a Meeting of the Secretary's Advisory Committee on Foreign Animal and Poultry Diseases.

SUMMARY: The purpose of this document is to give notice of a meeting of the Secretary's Advisory Committee on Foreign Animal and Poultry Diseases.

PLACES, DATES AND TIME OF MEETING: The meeting will be held at Room 734A of the Federal Building, United States Department of Agriculture, 6505 Belcrest Road, Hyattsville, Maryland, March 25 and 26, 1986, from 8:30 a.m. to 4:30 p.m.

FOR FURTHER INFORMATION CONTACT: Dr. Harless McDaniel, Chief Staff Officer, Technical Support, VS, APHIS, USDA, ROOM 757, Federal Building, Hyattsville, MD 20782, 301-436-8087.

SUPPLEMENTARY INFORMATION:

The purpose of the Committee is to advise the Secretary on means to prevent, suppress, control or eradicate an outbreak of foot-and-mouth disease or other destructive foreign animal or poultry diseases in the event such disease should enter the United States.

The meeting will be open to the public. Written statements concerning these matters may be filed with the committee before or at the time of the meeting.

The following items will be discussed at the meeting:

1. Status of swine repopulation in Haiti.
2. Consideration of Europe as a single entity in regard to the importation of animal products into the United States.
3. Embryo importation—a review of exotic diseases that can be transmitted by embryos.
4. Exotic animal disease teaching aids for use in veterinary colleges.
5. Movement of animals from offshore islands, such as San Clemente, California, to the mainland.
6. Review of APHIS reorganization.

The meeting will be open to the public. Written statements concerning these and other matters may be filed with the Committee before or at the time of the meeting.

Dated: February 21, 1986.

Bert W. Hawkins,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 86-4273 Filed 2-26-86; 8:45 am]

BILLING CODE 3410-34-M

[Docket No. 86-021]

General Conference Committee of the National Poultry Improvement Plan; Meeting

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Announcement of meeting.

SUMMARY: This document gives notice of a meeting of the General Conference Committee of the National Poultry Improvement Plan.

DATES: The meeting will be held March 4, 1986 (9 a.m.-4 p.m.). Written comments may be filed with the Committee before or at the time of the meeting.

ADDRESSES: The meeting will be held in the Best Western, Maryland Inn Motel, 8601 Baltimore Blvd., College Park, Maryland 20740. Written comments may be mailed to Dr. I.L. Peterson, Senior Coordinator, National Poultry Improvement Plan, VS, APHIS, USDA, Room 828, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-5140. Comments received may be inspected at this address between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. I.L. Peterson, 301-436-5140.

SUPPLEMENTARY INFORMATION: This document gives notice of a meeting of the General Conference Committee of the National Poultry Improvement Plan to be held on March 4, 1986. The purpose of the meeting of the General Conference Committee is to review the Model State Program for Poultry Disease Prevention and make recommendations to the Department concerning that program.

This notice is being published on an emergency basis less than 15 days in advance of the meeting. There is an outbreak of avian influenza in the New York live poultry marketing area. It is imperative that the committee review the Model State Program for Poultry Disease Prevention on an expedited basis because of this outbreak.

The meeting will be open to the public. Written statements concerning this matter may be filed with the Committee before or at the time of the meeting.

Dated: February 25, 1986.

J.K. Atwell,

Deputy Administrator, Veterinary Services.

BILLING CODE 3410-34-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Environmental Statements; Availability, etc.; Alabama Coastal Area Management Program (ACAMP)

AGENCY: National Oceanic and Atmospheric Administration, National Ocean Service, Office of Ocean and Coastal Resource Management (OCRM), Commerce.

ACTION: Preparation of an Environmental Assessment.

SUMMARY: Notice is hereby given of the intent to prepare an environmental assessment on a proposed amendment to the ACAMP under the provisions of section 306 of the Federal Coastal Zone Management Act of 1972 (Pub. L. 92-583, as amended). The environmental assessment will be used to determine whether to prepare a supplemental environmental impact statement (SEIS) as required under the National Environmental Policy Act, 42 U.S.C. 4321 *et seq.* (NEPA).

The amendment to the ACAMP consists of a change in the definition of the construction control line (CCL) applicable to construction on beaches and dunes in the Alabama coastal area in Baldwin County from Perdido Key to

VOL 51
ISS 39
FE 27
1986
UMI

Fort Morgan, excluding the incorporated shoreline area of Gulf Shores.

The CCL replaces the construction setback line that was originally established in the ACAMP as the line running parallel to the shoreline at a point 40 linear feet inland of the most inland point of the crestline which is defined as a line interconnecting the peaks of the primary dune system. Because the crestline varies due to the forces of nature, the exact location of the primary dune crestline is often very difficult to detemine, particularly after the damage to the dune system caused by Hurricane Frederick.

The State of Alabama held a public hearing on the proposed CCL on July 11, 1985, in Gulf Shores, Alabama. The Environmental Management Commission adopted the CCL as revised regulations to the ACAMP in October, 1985, and they submitted it to OCRM as an amendment on October 11, 1985.

Federal approval of the amendment would allow the State to maintain their eligibility for program administration grant funds and require that federal actions be consistent with the ACAMP as amended.

In order to determine the scope and significance of issues to be addressed in the environmental assessment, OCRM has reviewed the extensive comments made available by the July 11, 1985 public hearing record and would like to solicit comments from anyone who has knowledge of the impacts which will be associated with implementation of the new CCL. OCRM is currently consulting with the U.S. Fish and Wildlife Service on the endangered Alabama and Perdido Key beach mice under section 7 of the Endangered Species Act. Other aspects being reviewed include the adequacy of the CCL to protect beach dynamics, legal issues including taking, comparison of the old setback line with the CCL, and compliance with the E.O. 11988 on floodplain management.

A scoping meeting will be held on March 18, 1986, in the Navy Conference Room B-100, Page 1 Building, 2001 Wisconsin Avenue, NW., Washington, DC, at 10 a.m. If OCRM decides to prepare a SEIS, this meeting will satisfy the NOAA/NEPA scoping process. All interested parties are invited to attend.

Persons or organizations wishing to submit comments on these or other issues should do so by April 1, 1986.

Requests for the above-described documents and all comments should be made to: Ben Mieremet, Coastal Hazards and Technical Assistance Coordinator, Office of Ocean and Coastal Resource Management, 330 Whitehaven St., NW., Washington, DC 20235 202/254-7494.

(Federal Domestic Assistance Catalog 11.419, Coastal Zone Management Program Administration.)

Dated: February 24, 1986.

Peter L. Tweedt,

Director, Office of Ocean and Coastal Resource Management.

[FR Doc. 86-7257 Filed 2-26-86; 8:45 am]

BILLING CODE 3510-08-M

DEPARTMENT OF DEFENSE

Department of the Navy

Chief of Naval Operations, Executive Panel Advisory Committee, Role of the Naval Reserve in the Maritime Strategy Task Force; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Advisory Committee Role of the Naval Reserve in the Maritime Strategy Task Force will meet March 19-20, 1986, from 9 a.m. to 5 p.m. each day, at 4401 Ford Avenue, Alexandria, Virginia. All sessions will be closed to the public.

The purpose of this meeting is to examine or determine a strategic rationale for the employment of Reserve forces, the value of the Reserve to the total force, and the best way to develop Reserve resources. The entire agenda for the meeting will consist of discussions of key issues regarding changes in the strategic balance, the need for mobilization capability, and related intelligence. These matters constitute classified information that is specifically authorized by Executive order to be kept secret in the interest of national defense and is, in fact, properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting, contact Lieutenant Paul G. Butler, Executive Secretary of the CNO Executive Panel Advisory Committee; 4401 Ford Avenue, Room 928; Alexandria, Virginia 22302-0268. Phone (703) 756-1205.

Dated: February 24, 1986.

William F. Roos, Jr.,

Lieutenant, JAGC, U.S. Naval Reserve Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Information Resources Management Service invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATE: Interested persons are invited to submit comments on or before March 31, 1986.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Desk Officer, Department of Education, Office of Managment and Budget, 726 Jackson Place NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue, SW., Room 4074, Switzer Building, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster, (202) 426-7304.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Director, Information Resources Management Service publishes this notice containing proposed information collection requests prior to the submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Agency form number (if any); (4) Frequency of the collection; (5) The affected public; (6) Reporting burden; and/or (7) Recordkeeping burden; and (8) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: February 24, 1986.

George P. Sotos,

Director, Information Resources Management Service.

Office of Educational Research And Improvement

Type of Review Requested: Revision
Title: Library Services and Construction Act (Pub. L. 98-480) Application and Project Plans for State Administered Programs—Titles I, II and III
Agency Form Number: ED 921 and ED 915
Frequency: Annually
Affected Public: States
Reporting Burden—Responses: 54; Burden Hours: 2,430
Recordkeeping Burden:
Recordkeepers: 0; Burden Hours: 0.

Abstract: The application is a required submission from State Library Agencies in order to receive Federal funds under Title I (Library Services), Title II (Public Library Construction), and Title III (Interlibrary Cooperation and Resource Sharing) of the Library Services and Construction Act, as amended by Pub. L. 98-480.

Office of Special Education and Rehabilitative Services

Type of Review: REINSTATEMENT
Title: Education for the Handicapped Incentive Grant FY 1987-89 Application for Federal Assistance
Agency Form Number: 9055-1
Frequency: Triennial
Affected Public: State or local governments
Reporting Burden:
Responses: 19; Burden Hours: 114
Recordkeeping Burden:
Recordkeepers: 0; Burden Hours: 0.

Abstract: States are required to submit a state plan in order to receive funds under the Education of the Handicapped Act. The information collected in this application is reviewed by the Office of Special Education, and is used as a resource for monitoring state plans.

Office of Special Education and Rehabilitative Services

Type of Review: New
Title: An Evaluation of the Handicapped Migratory Agricultural and Seasonal Farmworkers Vocational Rehabilitation Service Projects
Agency Form Number: B20-14P
Frequency: One time only
Affected Public: State or local governments
Reporting Burden:
Responses: 378; Burden Hours: 296.6
Recordkeeping Burden:
Recordkeepers: 0; Burden Hours: 0.

Abstract: Section 312 of the Rehabilitation Act of 1973 authorized special projects for handicapped migrant and seasonal farmworkers. The projects began in 1976. This is the first evaluation of the projects required under section 14(a) of the Rehabilitation Act of 1973, as amended.

Office of Postsecondary Education

Type of Review Requested: Extension
Title: Request for Payment of 1986-87 Pell Grant Award; 1986-87 Alternate Disbursement System (ADS) Student Report; Notice of Termination/Early Graduation
Agency Form Number: Ed 304, 304-1, and 304-2
Frequency: On occasion; Semi-annually; Annually
Affected Public: Individuals or households; Non-profit institutions; Small businesses or organizations
Reporting Burden:
Responses: 122,700; Burden Hours: 79,755
Recordkeeping Burden:
Recordkeepers: 900; Burden Hours: 135.

Abstract: The Request for payment will be used to collect data necessary for the calculation of a Pell Grant award and to process an initial payment. The ADS Student Report requests additional information needed for processing and verifies previously submitted information. The Notice of Termination/Early Graduation is used to notify the Department of students who terminate their enrollment.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EF86-2041-000]

Department of Energy—Bonneville Power Administration; Filing

February 21, 1986.

Take notice that on February 11, 1986, Bonneville Power Administration (BPA) filed a request for waiver by the Commission, pursuant to § 300.13 of the Commission's regulations, of the 60-day advance filing requirement in § 300.10(a)(3)(ii) of the Commission's regulations. BPA states that it is conducting a formal evidentiary hearing pursuant to the Northwest Power Act in order to determine whether to adopt a "variable industrial rate" for its direct service aluminum smelter customers. BPA states that the hearing is scheduled to end on May 1, 1986 and that BPA intends to request the Commission to implement any rate that BPA adopts on July 1, 1986. BPA states that it is concerned that the hearing process may not be completed by May 1, 1986, so that it is requesting in advance a waiver of the 60-day filing requirement. BPA requests that instead it be permitted to submit any proposed rate by May 15, 1986, 45 days in advance of the proposed implementation date of July 1, 1986.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NW., Washington DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 7, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-4173 Filed 2-26-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CI75-52-003, et al.]

Equitable Resources Energy Co.; Petitions To Amend Certificates of Public Convenience and Necessity and To Redesignate Rate Schedules

February 21, 1986.

Take notice that on February 11, 1986, Equitable Resources Energy Company (EREC), of 2900 Grant Building, 330 Grant Street, Pittsburgh, Pennsylvania 15219, pursuant to § 154.92, *et seq.*, and § 157.23, *et seq.*, of the Regulations [18 CFR 154.91, *et seq.* and 157.23, *et seq.* (1984)], filed an application to amend the certificates of public convenience and necessity heretofore issued to Philadelphia Oil Company (Philadelphia Oil) and the related Gas Rate Schedules to reflect a change of name from Philadelphia Oil Company to Equitable Resources Energy Compony as shown on the attached Exhibit II and in the application which is on file with the Commission and open to public inspection.

Effective December 13, 1984, Philadelphia Oil changed its name to Equitable Resources Energy Company by Certificate of Amendment to Articles of Incorporation issued by the State of West Virginia on December 13, 1984.

VOL 51 ISS 39 FE 27 1986 UMI

Notice is hereby given that all the certificates and rate schedules as listed in the attached Exhibit II are hereby redesignated to reflect the change of name from Philadelphia Oil Company to Equitable Resources Energy Company.

Kenneth F. Plumb,
Secretary.

Certificates and Rate Schedules of Philadelphia Oil Company for Redesignation as Equitable Resources Energy Company

[Project No. 2245-006]

City of Vanceburg, KY; Application for Surrender of License

February 21, 1986.

Take notice that the City of Vanceburg, Kentucky has filed an application for surrender of its license for the Cannelton Project No. 2245.

In 1976 a license was issued to the City of Vanceburg, Kentucky to construct, operate, and maintain the Cannelton Project No. 2245 to be located at the U.S. Army Corps of Engineers (Corps) Cannelton Locks and Dam on the Ohio River. The project would consist of a powerhouse with an installed capacity of 70,560 kW; a bridge connecting the powerhouse to an access road; an earthen dam between the Corps' Cannelton Dam and the powerhouse; and other appurtenant facilities.

By letter of October 12, 1984, the City of Vanceburg was notified that the project site was rendered to a condition satisfactory to the Corps.

Anyone desiring to be heard or to make any protest about this action should file a motion to intervene or a protect with the Federal Energy Regulatory Commission in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR 385.211 or 385.214 (1985). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 385.211 for protests. To become a party, or to participate in any hearing that might be held, a person must file a motion to intervene in accordance with the commission's Rules. Any comments, protest, or motion to intervene must be filed with the Secretary of the Commission on or before March 31, 1986. The Commission's address is: 825 North Capitol Street NE., Washington, DC 20426.

Kenneth F. Plumb,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[OPPE-FRL 2975-4]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solicitation and the expected impact, and where appropriate includes the actual data collection instrument. The following ICRs are available for review and comment.

FOR FURTHER INFORMATION CONTACT: Nanette Liepman, (202) 382-2740 or FTS 382-2740.

SUPPLEMENTARY INFORMATION:

Office of Water

Title: Report of Pollution-Caused Fish Kill (EPA ICR #0267). (EPA is proposing a revised form.)

Abstract: Information on pollution-caused fish kills is supplied voluntarily to EPA by State fish and game agencies periodically after they receive reports of fish kills from the public. The information is used by EPA to analyze ambient water quality conditions and to identify potential water quality problem areas.

Respondents: State fish and game agencies.

National Pollutant Discharge Elimination System (NPDES)

Title: Supplementary Report on Oil or Hazardous Substances Spill (EPA ICR #0823). (This is a request for renewed approval of existing requirements; no changes are proposed.)

Abstract: EPA and/or the U.S. Coast Guard usually investigate spills of oil or hazardous substances into navigable waters. When an on-scene investigation cannot be conducted, EPA may request information from those responsible for the spill. The Agency uses the data to determine whether (a) cleanup efforts are satisfactory and (b) any enforcement action is necessary.

Respondents: Businesses, individuals, state and local governments.

Title: Notice of Actual Production Level - Automotive Manufacturing Industries (EPA ICR #1025). (This is a request for renewed approval of existing requirements; no changes are proposed.)

Abstract: Permittees with approved alternate discharge limits must notify the permit authority (EPA or state agency) when changes in production are anticipated. The permit authority then evaluates permit compliance based on the alternate limits.

Respondents: Automotive manufacturing industries.

Office of Air and Radiation

Title: New Source Performance Standards (NSPS) for Industrial Surface Coating Large Appliances (Subpart SS)—Information Requirements (EPA ICR #659). (This is a reinstatement of an expired ICR; no changes are proposed.)

Abstract: EPA requires new and modified sources to submit notifications of constructions, modifications, startup, shutdowns, and malfunctions and the results of performance tests. Owners/operators record all data and calculations from monthly performance tests used to determine volatile organic compound (VOC) emissions and record all emissions which exceed the standard. Records of daily incinerator temperature, or daily amounts of recovered solvent are maintained. Periods of insufficient incinerator temperature above three continuous hours are recorded.

Respondents: Industrial manufactureres and plant operators who use surface coating processes. SIC codes: 3631, 3632, 3633, and 3639.

Title: New Source Performance Standards (NSPS) for Metal Furniture Surface Coating (Subpart EE) - Information Requirements (ICR #649). (This is a reinstatement of an expired ICR; no changes are proposed.)

Abstract: The EPA requires metal furniture manufacturers of new and modified plants to notify the Agency or delegated enforcement agency of any operational changes that will result in that facility's ability to meet the emission standard for volatile organic compounds. Requirements include installation of temperature measurement devices that calculate the daily volume of VOC-solvent recovered, and records of these calculations. Records of monthly performance tests must be maintained for two years.

Respondents: Industries and plants which apply organic coatings to metal furniture. SIC codes: 2514, 2522, 2531, and 2542.

Title: New Source Performance Standards (NSPS) for Pressure Sensitive Tape and Label Surface Coating (Subpart RR)—Information Requirements (EPA ICR #658). (This is a reinstatement of an expired ICR; no changes are proposed.)

Abstract: EPA requires that owners/operators of industrial operations which coat pressure sensitive tape and label surfaces notify EPA or its delegated agency of any changes or modifications which would affect emission levels. The results of the initial performance test are reported, and air pollution control devices are monitored and their temperatures are recorded. The source submits semi-annual reports of exceedences of VOC emission limits and temperature drops below the allowed limit.

Respondents: Manufacturers of pressure sensitive tape-and label materials. SIC code: 2641.

Title: New Source Performance Standards (NSPS) for Metal Coil Surface Coating (Subpart TT)—Information Requirements (EPA ICR #660). (This is a reinstatement of an expired ICR; no changes are proposed.)

Abstract: EPA requires that new or modified sources notify the Agency or its delegated authority of any changes in operations that will affect emissions levels and the results of performance tests. The VOC content of the coatings, VOC emissions, and incinerator daily temperatures will be recorded.

Respondents: Manufacturers of metal coil. SIC code: 3479.

Agency PRA Clearance Request Completed by OMB

EPA #0583; Records of PCB Storage and Disposal, was approved 12/10/85 (OMB #2070-0061; expires 12/31/88).

Comments on all parts of this notice may be sent to:

Nanette Liepman, U.S. Environmental Protection Agency, Office of Standards and Regulations (PM-223), Information and Regulatory Systems Division, 401 M Street SW., Washington, DC 20460.

and

Richard D. Otis (ICRs #0267, 0823, 1025) or Wayne Leiss (ICRs #0649, 0658, 0659, 0660), Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building (Room 3228), 726 Jackson Place NW., Washington, DC 20503.

Dated: February 21, 1986.

Daniel J. Fiorino,
Acting Director, Information and Regulatory Systems Division.

Decision Not To Test Formamide

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is issuing a decision not to require further testing of formamide, CAS No. 75-12-7, for health effects An August 24, 1984, U.S. District Court, Southern District of New York, ruling requires EPA to issue a proposed test rule for this chemical under section 4(a) of the Toxic Substances Control Act (TSCA) by March 1986 or state reasons for not issuing one. EPA has determined that data now available to the Agency, including data received pursuant to a negotiated testing agreement between the Agency and BASF Wyandotte Corporation (BASF), are adequate to characterize formamide for these effects and that no further testing is required at this time. However, EPA may develop proposed rulemaking under section 5(a)(2) or 8(a) of TSCA to monitor any significant change in exposure to this chemical.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Room E-543, 401 M Street SW., Washington, DC 20460. Toll Free: (800-424-9065). In Washington, DC: (544-1404). Outside the USA: (Operator-202-554-1404).

SUPPLEMENTARY INFORMATION: The Agency is publishing a decision not to require additional testing of formamide for health effects.

I. Introduction

In its Tenth Report, published in the Federal Register of May 25, 1982 (47 FR 22582), the Interagency Testing Committee (ITC) designated formamide for priority testing consideration. The ITC recommended that formamide be tested for genotoxic effects, carcinogenicity, and other chronic health effects. EPA issued a notice, published in the Federal Register of May 23, 1983 (48 FR 23086), which announced the Agency's preliminary decision not to propose a rule under section 4(a) of the Toxic Substances Control Act (TSCA) (Pub. L. 94-469, 90 Stat. 2003, 15 U.S.C. 2601) to require health effects testing of formamide. This decision was based on the Agency's evaluation of the existing data for formamide, the expected exposure profile for formamide, and the tentative acceptance of a testing program submitted by BASF. In the Federal Register of December 29, 1983 (48 FR 57366), EPA issued notice of a negotiated testing agreement (NTA) between EPA and BASF for formamide. Available data did not suggest that formamide is either genotoxic or carcinogenic. Therefore, to answer the concerns expressed by the ITC for other chronic effects, BASF proposed a range-finding study followed by a 90-day subchronic study which was designed to characterize the potential chronic effects of formamide. Because dermal exposure is the most common route of human exposure, the program was designed to clarify the doses at which formamide causes toxic effects after repeated exposure of intact skin over a prolonged period. The specific details of the NTA appear in the December 29, 1983 Federal Register notice. Both the range-finding and 90-day subchronic tests have been completed, and EPA has announced receipt of the test results in two Federal Register notices (49 FR 5190; February 10, 1984 and 50 FR 31919; August 7, 1985). These notices are included in the public docket (OPTS-42032B) for this notice.

On August 24, 1984, the U.S. District Court, Southern District of New York, ruled that negotiated testing agreements were not a legally adequate substitute for rulemaking under section 4 of TSCA in response to priority testing designations of the ITC (*NRDC* v. *EPA*, 595 F. Supp. 1255 (S.D.N.Y. 1984)). In its final order, the court required that EPA publish by March 1986 a notice of proposed rulemaking for formamide or its reasons for not initiating rulemaking. This notice is being published in response to the court's mandate and announces the Agency's decision not to require additional health effects testing for this chemical.

Under section 4(a) of TSCA, the Administrator shall by rule require testing of a chemical substance to develop appropriate test data if the Agency finds that:

> (A)(i) the manufacture, distribution in commerce, processing, use, or disposal of a chemical substance or mixture, or that any combination of such activities, may present an unreasonable risk of injury to health or the environment;
>
> (ii) there are insufficient data and experience upon which the effects of such manufacture, distribution in commerce, processing, use, or disposal of such substance or mixture or of any combination of such

UMI

activities on health or the environment can reasonably be determined or predicted, and

(iii) testing of such substance or mixture with respect to such effects is necessary to develop such data; or

(B)(i) a chemical substance or mixture is or will be produced in substantial quantities, and (I) it enters or may reasonably be anticipated to enter the environment in substantial quantities or (II) there is or may be significant or substantial human exposure to such substance or mixture.

(ii) there are insufficient data and experience upon which the effects of the manufacture, distribution in commerce, processing, use, or disposal of such substance or mixture or of any combination of such activities on health or the environment can reasonably be determined or predicted, and

(iii) testing of such substance or mixture with respect to such effects is necessary to develop such data.

EPA uses a weight-of-evidence approach in making a section 4(a)(1)(A)(i) finding; both exposure and toxicity information are considered in determining whether available data support a finding that the chemical may present an unreasonable risk. For the finding under section 4(a(1)(B)(i), EPA considers only production, exposure, and release information to determine whether there is or may be substantial production and significant or substantial human exposure or substantial release to the environment. For the findings under section 4(a)(1) (A)(ii) and (B)(ii), EPA examines toxicity and fate studies to determine whether existing information is adequate to reasonably determine or predict the effects of human exposure to, or environmental release of, the chemical. In making the finding under section 4(a)(1) (A)(iii) or (B)(iii) that testing is necessary, EPA considers whether ongoing testing will satisfy the information needs for the chemical and whether testing which the Agency might require would be capable of developing the necessary information.

EPA's approach to determining when these findings are appropriately made is described in detail in EPA's first and second proposed test rules as published in the **Federal Register** of July 18, 1980 (45 FR 48528) and June 5, 1981 (46 FR 30300). The section 4(a)(1) (A) findings are discussed at 45 FR 48528 and 46 FR 30300, and the section 4(a)(1)(B) findings are discussed at 46 FR 30300.

II. Review of Available Data

A. Production, use, and Exposure

Detailed information on production, use, and exposure appears in the Agency's initial response to the ITC (48 FR 23098; May 23, 1983). The Agency is not aware of any new data that suggest that the production, use, and exposure profile for formamide has changed since that time.

There is currently no United States production of this chemical; however, BASF imports between 1 and 11 million pounds per year. About 82 percent of the imported formamide is used by the pharmaceutical industry (Ref. 1). The major TSCA use of formamide (13 percent) is in petroleum production, where it acts as a carrier for the corrosion-inhibiting additives pumped into wells during drilling operations. In this capacity, formamide is expected to be quickly hydrolyzed. Furthermore, because formamide is readily biodegraded and does not bioaccumulate, it is not expected to persist in the environment. Other nonconsumptive TSCA uses include soil stabilization (1.0 percent), polymerization (0.5 percent), laboratory (1.0 percent), and ink solvent (1.5 percent) uses (Ref. 3). Consumer products containing formamide as a result of its use as an ink solvent include a number of fiber, plastic, and felt-tip pens and markers (Ref. 3).

There appears to be little opportunity for exposure to formamide based upon present uses. BASF Wyandotte, using data from a 1982 customer survey, estimated that about 400 workers are exposed to formamide under controlled use conditions (Ref. 4). Potential for exposure to formamide from its use as a solvent in water soluable inks occurs both in the formulation of the ink and in the loading of the ink into the writing instrument. The larger manufacturers of these instruments use automated equipment which approach enclosed systems. In less automated equipment, some inhalation of formamide could occur, although dermal exposure to the inks is expected to be mimimal. Potential workplace exposure may also occur on an intermittent basis from loading, mixing, or drumming operations. In addition, the 1985 National Occupational Exposure Survey projected that about 1,800 chemists are potentially exposed to formamide (Ref. 22). Product labels advise workers and chemists to use protective equipment such as gloves, respirators, and goggles when handling formamide. Futhermore, because of formamide's known teratogenic potential, the label also warns pregnant workers to avoid contact with formamide unless adequate precautions are observed to minimize their exposure.

Worst-case estimates (assuming 100 percent absorption) suggest that if an adult female were to spill formamide on both hands, she could be exposed to 1.45 mg/kg/contact (Ref. 28). A male worker could also be exposed to 1.45 mg/kg/contact (assuming 0.13 m^2 hand surface area and 70 kg body weight). EPA believes that the number of male or female workers so exposed to formamide is not substantial. Although no data on the levels of exposure in any of the industries using formamide were submitted, EPA has no evidence which might suggest that the levels of worker exposure coupled with the known toxicity potential of this chemical are significant or present an unreasonable risk, given the use of proper protective equipment recommended on existing labels and anticipated avoidance by pregnant workers.

Consumer exposure to formamide may result from its use in water-soluble ink formulations. Formamide is used in about 4.0 percent of the pens used in the United States, or 130 million pens (Ref. 5). Based upon conversations with several major U.S. pen manufacturers and their representatives and considering formamide's characteristic quick absorption by paper, resistance to smearing, and added expense, EPA believes that when it is used in consumer pens, it is generally used in finer point pens, not the marker pens often used by children (Ref. 4). Finer point pens usually contain about 5 percent formamide. Formamide is also used in high-performance industrial pens, such as high-speed computer plotter pens. These pens usually contain about 35 percent formamide; however, use of these pens should result in minimal opportunity for consumer exposure.

Several other factors tend to minimize the potential for exposure of persons writing with pens containing formamide. Formamide's low vapor pressure tends to reduce the probability of inhalation. Thus, the only significant potential route of exposure would be from skin contact with wet ink. Because of its low vapor pressure, complete miscibility with water, and lipid solubility, any direct skin contact with formamide would probably result in absorption through the skin. Therefore, worst-case dermal exposure estimates for a child were calculated by EPA using data submitted by BASF (Refs. 3 and 28). Calculations for the ink application exposures were based on a total formulation loading of 1.5 gm for a pen, 6.0 gm for a marker, and an average formamide concentration of 20 percent. If a child painted the central surface of both hands with ink from a broad-tip marker, assuming 100-percent absorption of formamide, the dermal exposure would be about 0.3 mg/kg. On the basis of the results of the 90-day subchronic toxicity testing conducted by BASF there is a

risk quotient of 100 between the no-observed-effect-level (NOEL) and this exposure level. Since this NOEL is for daily dosing over a 90-day period and such misuse by a child is not expected to be repeated daily for 90 days, anticipated risk quotients should be much larger, suggesting lesser concern. Furthermore, considering the physicochemical propreties of formamide and the construction of the porous-tip device, which acts to hold the ink in the pen, EPA believes the use of those products would not result in substantial exposure. On the basis of the above information, EPA has concluded that although a large number of consumers may use writing instruments containing formamide, the levels of individual exposure are likely to be well below those found to cause adverse effects.

Formamide has been used in the past or has been suggested for a multitude of other commercial uses, some of which could result in significant worker and/or consumer exposure. Such potential uses include: as an additive to lube oil and hydraulic fluid, as a component in deicing fluids for airport runways, as a curing agent for epoxy resins, as a plasticizer, as an affinity enhancer for dyes, and as a component of liquid fertilizers. The current import volume and predominantly pharmaceutical use of this imported formamide supports the conclusion that the amount of formamide used for these and other uses is small, if any. Furthermore, concern for formamide's recognized developmental toxicity has and undoubtedly continues to limit manufacture and TSCA-related use of this chemical.

B. Health Effects

A detaile review of the health effects information available to the Agency prior to the NTA was presented in the Agency's initial response to the ITC (48 FR 23098; May 23, 1983). A summary of these data and the new data on genetic toxicity developed by the National Toxicology Program (NTP) and on subchronic toxicity developed by BASF follows:

1. *Acute toxicity.* The acute toxicity of formamide to laboratory animals is in the slight-to-moderate range. Oral LD$_{50}$ values range from 3.2 g/kg in the mouse to 7.5 g/kg in the rat (Refs. 6 and 7). Dermal LD$_{50}$ values are reported to be as high as 17 g/kg in the rabbit; the lowest lethal dermal dose for this species is 6.0 g/kg (Refs. 8 and 9).

2. *Mutagenicity.* At the time of the Agency's initial response to the ITC, formamide had not demonstrated a mutagenic response in *in vitro* assays. No indication of mutagenicity was seen using strains TA–98, TA–100, TA–1535, and TA–1537 (+S9) using the *Salmonella* assay (Ref. 10). It was also reported that formamide was nontoxic and nonmutagenic to *Salmonella* at concentrations up to 200 micrograms per plate but was toxic to the bacteria at 500 micrograms per plate (Ref. 11). In addition, no mutagenic effects were demonstrated in a dominant lethal assay after a single intraperitoneal application (⅓ LD$_{50}$) of formamide to NMRI mice (Refs. 12 and 13). Formamide was also without effect in a cell transformation test using rat embryo cells infected with Rausher leukemia virus (Ref. 14) at concentrations from 0.001 to 100 mg/L.

The NTP recently completed the testing of formamide over five doses in four strains of *Salmonella* (TA 98, TA 100, TA 1535, and TA 1537) with and without activation. Testing was done in triplicate with an independent repeat. No indication of mutagenic activity was seen (Ref. 23). Formamide was also tested and found nonmutagenic in TA–98 with activation (Ref. 24). In addition, the NTP has selected formamide as a neative control in an on-going *Drosophila* sex-linked recessive lethal test (Ref. 25).

The Agency is aware that the data are limited on the potential for formamide to cause chromosomal aberrations. However, based upon the results of the dominant lethal assay (Refs. 12 and 13), the Agency has no grounds to require additional testing for these effects nor reason for concern.

3. *Developmental toxicity.* Three dermal studies were submitted by BASF: the teratogenic effects on rats after repeated percutaneous application (Ref. 15); the teratogenic effect in mice of commercial black ink containing 50-percent formamide following percutaneous application on the 8th day post coitum (Ref. 20); and the teratogenic effect in mice following percutaneous application of this ink on the 13th day post coitum (Ref. 21). In the multiple-dose study, formamide was applied 13 times. Dose-dependent embryotoxic and teratogenic effects were observed. The lowest observed reproductive/teratogenic effect level (LOEL) reported was 0.35 g/kg, the lowest dose tested. In the single-dose studies, significant embryolethal, embryotoxic, and teratogenic (fetal deformities) effects were reported at 2.8 gm/kg. When these effect levels are compared to the worst-case dermal exposure of 1.45 mg/kg for an adult female, a risk quotient of about 240 for repeated exposure for an adult female and her offspring was calculated. Similarly, a risk quotient of over 1,000 was calculated for single dermal exposure to an adult female and her offspring (Ref. 28).

Three oral studies were submitted by BASF which reported dose-dependent embryotoxic and/or teratogenic effects in rats (Ref. 16), mice (Ref. 17), and rabbits (Ref. 18). Because these studies utilized lower dosages than the dermal studies both LOEL's and NOEL's were determined. Based upon the results of these studies:

(a) Rabbits appear to be the most sensitive species tested for embryotoxic effects (LOEL=0.11 g/kg; NOEL=0.037 g/kg) and least sensitive for teratogenic effects (no effect at the highest dose tested, 0.37 g/kg). Similar results were reported by Merkle and Zeller (Ref. 19). In addition, they reported that 0.2 g/kg formamide caused pronounced maternal toxicity and death.

(b) Mice appear to be more sensitive (LOEL=0.20 g/kg with 11 percent malformations; NOEL=0.13 g/kg) than rats (LOEL=32 g/kg with 4 percent malformations; NOEL=0.16 g/kg).

(c) The oral route of administration appears to cause a slightly greater response in Sprague-Dawley rat (LOEL=0.32 g/kg with 4 percent malformations) than the dermal route (LOEL=0.35 g/kg with 2 percent malformations).

(d) The types of dose-related malformations observed in these studies (cleavage of vertebrae, wavy or fused ribs, cleft palate, multilobular liver, and hydrocephalus internus) were the same in both rats and mice and in both dermal and oral tests.

Based upon these results, the Agency believes that the oral NOEL for rabbits (0.037 g/kg) is a conservative estimate of the dermal NOEL for the developmental effects of formamide. When this NOEL is compared to the worst-case dermal exposure of 1.45 mg/kg for an adult female, a risk quotient of 24 for repeated exposure to an adult female and her offspring was calculated. This risk quotient is an order of magnitude (10x) lower than the quotient calculated using the dermal LOEL. The Agency considers the developmental toxicity data submitted by BASF adequate under current limited use and exposure.

4. *Subchronic toxicity.* Prior to the NTA, the Agency received one study showing that repeated doses of formamide administered by gavage to rats 5 days per week for 4 weeks resulted in dose-dependent cumulative effects expressed as gastritis and erosion of the gastric mucosa (Ref. 2). The no-observed-effect level was 34 mg/kg. However, because of the short duration of exposure and the technical difficulties encountered with gavage

BEST COPY AVAILABLE

VOL 51 ISS 39 FE 27 1986 UMI

exposure, this study was judged inadequate for risk assessment.

Under the NTA, BASF successfully completed range-finding and 90-day subchronic studies specifically designed to assess the dermal toxicity of formamide, the most common route of human exposure. The studies were designed to clarify the doses at which formamide causes toxic effects after repeated exposure to intact skin over a prolonged period (Ref. 29). They were conducted according to the Organization for Economic Cooperation and Development Subchronic Dermal Toxicity Guideline No. 411 (Ref. 30) and have been reviewed and found acceptable (Refs. 26 and 27). Taking into account the limited current exposure to formamide, EPA believes that the 90-day subchronic test conducted by BASF provides an adequate screen for histopathological effects to the reproductive system and chronic toxicity (with the possible exception of ocular and oncogenic effects for which there is no suggestive evidence) because: extensive biochemical, hematological, and anatomical studies were included; both toxic and non-toxic doses were included; and toxic effects were observed at the high-dose which were not observed at the low-dose (Ref. 33).

The 90-day study conducted in male and female Wistar rats. Formamide was applied to intact, shaved skin, 6 hr/day, 5 days/week at dose levels of 0, 300, 1,000 and 3,000 mg/kg. Although dose levels were based on a 14-day range-finding study, a NOEL was not identified (Ref. 31). The predominant toxic effect observed was polycythemia. A second dermal study using doses of 0, 30, 100, and 3,000 mg/kg provided a NOEL of 30 mg/kg and confirmed the hematological response (Ref. 32). Compound-related effects occurring in a dose-related manner included changes in hematology, clinical chemistry, and weight, i.e., emaciation and decreased body weight (high dose only). Bilateral testicular tubular atrophy was also observed at the 3,000 mg/kg dose. In addition, male rates were clearly more sensitive than female rats to the hematological effects of formamide; significantly increased hemoglobin levels and red cell counts were observed at levels above 300 mg/kg. No abnormalities were detected in the 100 mg/kg or 30 mg/kg dose groups. However, because of the possibility of reduced platelet, lymphocyte, and leucocyte values (not dose-related) at 100 mg/kg, it appears prudent to consider 30 mg/kg the NOEL for the 90-day exposure. When this NOEL is compared to worst-case dermal exposure estimate for a child (0.30 mg/kg) and adult male or female (1.45 mg/kg), risk quotients of about 100 for the child and 20 for the adult exist. Since the NOEL is for repeatedly daily dosing over 90 days and the worst-case exposure estimates are for events that would rarely be expected to occur, anticipated risk quotient should be much larger, suggesting lesser concern for formamide under current use.

5. *Oncogenicity.* EPA is unaware of any bioassay that has not been performed to assess the carcinogenic potential or formamide. However, there are no data which indicate any potential for oncogenic effects.

III. Decision Not to Initiate Rulemaking

EPA has reviewed all available data on formamide including structure-activity relationships, acute toxicity, mutagenicity, and teratogenicity data, and the subchronic toxicity data submitted to the Agency by BASF pursuant to the NTA. The data indicate that the chemical has a low but unique toxicity. Its acute toxicity to laboratory animals is in the slight-to-moderate range. Repeated-dose studies by gavage in rodents resulted in cumulative effects expressed as extensive gastritis and erosion of the gastric mucosa. *In vitro* tests used to predict mutagenic and carcinogenic potential indicate that formamide exhibits slight cellular toxicity, but no mutagenic response. Studies in rats, mice, and rabbits indicate that formamide is embryotoxic and teratogenic at widely varying doses, by several routes of administration. Subchronic dermal studies indicate that repeated exposure to formamide may result in polycythemia. No other significant pathology was observed. Since bilateral testicular tubular atrophy was observed in male rats only at a dose level 100 times the NOEL for hematological effects, the data from the BASF 90-day subchronic study do not suggest a potential unreasonable risk of chronic or abnormal reproductive effects from current exposure to formamide.

The Agendy finds that these data are valid and, when coupled with earlier data, are sufficient to reasonably predict the identified health effects of formamide and do not suggest potential for unreasonable risk at current exposures. Furthermore, current and anticipated future release and exposure for formamide do not appear sufficient to warrant testing for any other effects on a section 4(a)(1)(B) basis.

EPA has therefore decided that testing of formamide under section 4(a)(1) (A) or (B) of TSCA is not warranted at this time. However, the Agency may develop proposed rulemaking pursuant to section 5(a)(2) and/or 8(a) of TSCA to require notification of the Agency prior to any change in manufacturing (importing), processing, handling, use, release, and disposal patterns that would significantly increase exposure to formamide. Other action (e.g., listing of formamide as a hazardous waste, restricting waste disposal practices) may also be taken by the Agency.

IV. Public Record

EPA has established a public record for this decision not to test under section 4 of TSCA (docket number OPTS-42032B). The record includes the following information:

A. Supporting Documentation

(1) Federal Register notices pertaining to this decision consisting of:

(a) a Notice containing the ITC designation of formamide to the Priority List (47 FR 22582; May 25, 1982).

(b) Notice containing the preliminary response to the ITC for formamide (48 FR 23098; May 23, 1983).

(c) Notice containing the decision to adopt the Negotiated Testing Program for formamide (48 FR 57365; December 29, 1983).

(d) Receipt of data notices (49 FR 5190; February 10, 1984 and 50 FR 31918; August 7, 1985).

(2) Communications consisting of:

(a) Written public and intra-agency or interagency memoranda and comments.

(b) Summaries of telephone conversations.

(c) Summaries of meetings.

(3) Reports—published and unpublished factual materials, including contractor's reports.

BILLING CODE 6730-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Acquired Immunodeficiency Syndrome (AIDS) Research Centers

AGENCY: National Institute of Mental Health and National Institute on Drug Abuse, HHS.

ACTION: Issuance of program announcement for establishing Acquired Immunodeficiency Syndrome (AIDS) Research Centers, MH-86-18.

SUMMARY: The National Institute of Mental Health and the National Institute on Drug Abuse announce the availability of a program announcement concerning establishing of Acquired Immunodeficiency Syndrome (AIDS) Research Centers. This announcement is to encourage coordinated, multidisciplinary center programs on the mental health and drug abuse aspects of AIDS which also provide a research environment to encourage the development of new scientists committed to research on AIDS and which establish a structure to facilitate rapid dissemination of the most recent information related to mental health and drug abuse aspects of AIDS. A center is expected to function as a resource to the scientific and clinical community and to State and community agencies. Support may be requested for up to 5 years. It is anticipated that in Fiscal Years 1986 and 1987, there will be up to $500,000 in direct costs per year for two to three research centers.

Receipt and review dates of applications: Applications will be accepted and reviewed according to the usual Public Health Service schedule and procedures. Applications must be received by April 15, 1986, for funding considerations in Fiscal Year 1986.

FOR FURTHER INFORMATION OR A COPY OF THE ANNOUNCEMENT, CONTACT:

Ellen Simon Stover, Ph.D., Deputy Director, Division of Basic Sciences, National Institute of Mental Health, Room 11-103, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443-4337, 443-3563

or

Roy W. Pickens, Ph.D., Director, Division of Clinical Research, National Institute on Drug Abuse, Room 10A-38, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443-6697.

Robert Trachtenberg,
Acting Administrator Alcohol, Drug Abuse, and Mental Health Administration.

BILLING CODE 4160-20-M

New Investigator Research Awards

AGENCY: National Institute of Mental Health, HHS.

ACTION: Issuance of program announcement on New Investigator Research Awards, MH-86-17.

SUMMARY: The National Institute of Mental Health announces the availability of a program announcement concerning the New Investigator Research Award (NIRA) in the areas of Prevention and Mental Health Services Research. NIRA is an award to an institution on behalf of a specific individual and is designed to encourage new investigators (or investigators who have established careers in closely related fields) who wish to specialize in the biomedical and biobehavioral disciplines to develop their research capabilities in Prevention or Mental Health Services. Support may be requested for up to 3 years. It is anticipated that in Fiscal Years 1986 and 1987, there will be up to $112,500 in direct costs per year for the 3-year period.

Receipt and review dates of applications: Applications will be accepted and reviewed according to the usual Public Health Service schedule and procedures, except that for Fiscal Year 1986, NIRA applications in Mental Health Services (not Prevention) have a receipt date of April 1, 1986, with an earliest award date of September 1986.

FOR FURTHER INFORMATION OR A COPY OF THE ANNOUNCEMENT, CONTACT:

Prevention

Ms. Joyce Lazar, Chief, Prevention Research Branch, National Institute of Mental Health, Room 14C-04, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857

or

Mental Health Services

Dr. Lawrence Chaitkin, Division of Biometry and Applied Sciences, National Institute of Mental Health, Room 18C-06, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Robert Trachtenberg,
Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration.

BILLING CODE 4160-20-M

Food and Drug Administration

Advisory Committee; Open Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meetings and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

Meeting: The following advisory committee meeting is announced:

General and Plastic Surgery Devices Panel

Date, time, and place. March 25, 9 a.m., Rms. 703-727A, Health and Human Services Bldg., 200 Independence Avenue SW., Washington, DC.

Type of meeting and contact person. Open public hearing, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 4 p.m.; closed committee deliberations, 4 p.m. to 5 p.m.; Paul F. Tilton, Center for Devices and Radiological Health (HFZ-410), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20901, 301-427-7156.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of devices and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before March 11, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss a premarket approval application (PMA) for a collagen hemostatic agent; a PMA supplement for a polydioxanone synthetic absorbable suture; and the reclassification of stainless steel sutures.

Closed committee deliberations. The committee may discuss trade secret or confidential commercial or financial information regarding a premarket approval application. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (Subpart C of 21 CFR Part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR Part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this Federal Register notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be requested from the Dockets Management Branch (HFA-305), Room 4-62, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (FACA), as amended by the Government in the Sunshine Act (Pub. L. 94-409), permits such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commercial or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instances not generally relevant to FDA matters.

Examples of portions of FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion, and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commercial or financial information submitted to the agency; consideration of matters involving investigatory files compiled for law enforcement purposes; and review of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted inivasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements for a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, notably deliberative sessions to formulate advice and recommendations to the agency on matters that do not independently justify closing.

This notice is issued under sections 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)), and FDA's regulations (21 CFR Part 14) on advisory committees.

BILLING CODE 4160-01-M

Office of Human Development Services

Revisions to HDS Discretionary Grants Administration Manual

AGENCY: Office of Human Development Services, HHS.

ACTION: Final notice.

SUMMARY: The Office of Human Development Services (HDS) is publishing in final, the HDS Discretionary Grants Administration Manual. A notice of proposed revisions was published on October 7, 1982. These revisions apply to all discretionary grant programs administered by the Administration on Children, Youth and Families, the Administration on Aging, the Administration on Developmental Disabilities, the Administration for Native Americans, and the Office of Program Development.

EFFECTIVE DATE: February 27, 1986.

FOR FURTHER INFORMATION CONTACT: Beverly Córdova, (202) 472-6709.

SUPPLEMENTARY INFORMATION:

Background

The Office of Human Development Services (HDS) published proposed revisions to its Discretionary Grants Administration Manual (HDS/GAM) in the **Federal Register** on October 7, 1982. The manual is applicable to discretionary grant programs administered by the Administration for Children, Youth and Families (ACYF), the Administration on Aging (AoA), the Administration on Developmental Disabilities (ADD), the Administration for Native Americans (ANA), and the Office of Program Development (OPD). Comments on the proposed revisions were solicited with a deadline of December 6, 1982 for receipt of comments. Comments were received from organizations receiving HDS support as well as from other interested organizations and individuals. A summary of these comments and the action taken, as well as other technical changes, is indicated below.

In the past, the HDS/GAM was divided into parts which differentiated between general policies and procedures applicable to all discretionary grants and cooperative agreements (Part I) and unique requirements specific to a particular program (e.g., Part II—Head Start). Since program specific requirements which supplement, take precedence over, or deviate from, the HDS/GAM are now codified in individual program regulations, we no longer consider such distinctions necessary for this manual. However, where appropriate, any program-specific requirement which has relevance to an HDS/GAM provision is clearly noted. Therefore, Parts II and III to the manual are hereby revoked.

The HDS Discretionary Grants Administration Manual will be provided in its entirety to all current HDS discretionary grantees. Other interested parties may obtain copies of the manual at cost from the Superintendent of Documents, Government Printing Office, Washington, DC 20402.

Comments and Responses

HDS received twenty-eight comments in response to the October 7 notice. Following are summaries of the specific substantive comments together with our responses.

1. *Comment:* One respondent stated that the HDS Grants Administration Manual (HDS/GAM) is not necessary since the provisions of OMB Circulars establishing uniform requirements for grants and other agreements are incorporated in 45 CFR Part 74, and other policies and procedures applicable to grants are described in the HHS Grants Administration Manual (HHS/GAM).

Response: We agree that recipients of financial assistance should not be confronted with duplicative policies and procedures issued by different awarding offices. In fact, the HDS/GAM was issued in 1977 to provide in one document policies and procedures applicable to all discretionary grants awarded by the program offices which are part of HDS. Prior to the issuance of the HDS/GAM, our program offices had used separate policies and procedures.

The HDS/GAM is not a substitute for 45 CFR Part 74 or the HHS/GAM. The HHS/GAM describes policies and procedures for HHS operating divisions as well as recipients. We implement the HHS/GAM provisions with two manuals, one internal, the HDS Grants Administration Staff Manual, and one external, the HDS/GAM. The HDS/GAM implements the Department's provisions and describes options allowed under the Department's rules and certain deviations to 45 CFR Part 74 which have been approved by the Department. These options and deviations are specifically applicable to HDS grants. Deviations are addressed in 45 CFR Part 74.6 and are authorized by "the head of the granting agency or other officials if designated in or pursuant to formal deviation control procedures established by the agency and OPAL" (Office of Procurement, Assistance, and Logistics). Certain deviations require approval only from the head of the awarding agency. Part 74 also discusses options for granting agencies. Where we have selected a particular option, we have referenced the appropriate Part 74 citation. Finally, the HDS/GAM is useful to a large number of recipients whose sole or major source of Federal assistance is from HDS, since it highlights issues which are typically and frequently of concern to these recipients.

2. *Comment:* A request was made for a definition of the term "capital expenditure".

Response: The definition of a "capital expenditure" is: "The cost of the asset including the cost to put it in place. Capital expenditure for equipment, for example, means the net invoice price of the equipment, including the cost of any modifications, attachments, accessories, or auxiliary apparatus necessary to make it usable for the purpose for which it was acquired. Ancillary charges, such as taxes, duty, protective in-transit insurance, freight, and installation may be included in, or excluded from, capital expenditure cost in accordance with the regular accounting practices of the organization purchasing the equipment". (See definitions of "capital expenditures" in OMB Circular A-21 and "acquisition cost" in 45 CFR 74.132 and OMB Circular A-122). The Definitions section of the manual has been expanded to include this term.

3. *Comment:* The criteria for selection of proposals for funding under a competition for discretionary grants should be outlined in the program announcement.

Response: We agree. The discussion of new applications under section A.2, Application Procedures, of Chapter 1 of the manual has been expanded to require that funding priorities and criteria for review and evaluation must be included in a program announcement.

4. *Comment:* Announcement of the availability of grant funds should be published in the **Federal Register**, even when competition is limited, so that all prospective applicants are properly notified and public information is provided on all grant programs.

Response: We do not agree with this comment. According to Chapter 1-55 of the HHS/GAM, publication of a program announcement in the **Federal Register** is not required by Department policy if the granting office sends a copy of the program announcement directly to every potential applicant. However, we

believe that in most cases wide notification should be encouraged. We have added language in Section A, Application Procedures, of Chapter 1 to provide a program option for publication of notice of availability in the **Federal Register** even when the number of eligible potential applicants is relatively small.

5. *Comment:* The procedures in the manual regarding the Office of Management and Budget Circular A-95 are obsolete since the Circular was revoked.

Response: This is correct. Since the proposed HDS/GAM was published, the Department has issued final regulations implementing Executive Order 12372 in 45 CFR Part 100 (see 48 FR 29188, June 24, 1983). We have changed the provisions in this manual in Section E of Chapter 1 to incorporate these final regulations.

6. *Comment:* Clarification on what grant competition information may or may not be released under the Freedom of Information Act (FOIA) is needed since the Department's policy was recently revised. The revised policy states that requests for all records of "evaluative material" with respect to particular applications being considered will be withheld from the public.

Response: There are a great deal of permutations and possibilities for the kinds and amounts of information that can be released under an FOIA request. It might prove nonproductive to include FOIA information at all in the HDS GAM. In response to the comment, we would prefer to forgo generalizations about grant competition information, and deal on a case by case basis with all requests. Therefore, we are deleting the last two sentences of Chapter 1, Section F, Notice to Unsuccessful Grant Applicants, dealing with our responses to requests from unsuccessful applicants for information regarding the award process.

7. *Comment:* The length of anticipated support for various types of programs should be made clear to potential applicants.

Response: We agree. The general discussion in Section I, Discretionary Grant Funding, of Chapter 1 of the manual has been expanded to state that the anticipated project period will generally be specified in a program announcement and will also usually be included in the description of the program in the *Catalog of Federal Domestic Assistance.*

8. *Comment:* The cost of audit services should be charged to the budget period being audited rather than the period in which the service was actually provided.

Response: We disagree. Generally accepted accounting principles provide for audit obligations to be charged to the fiscal period in which the services are provided. This issue has been clarified in the table showing when obligations should be charged, which appears in Section I of Chapter 1.

9. *Comment:* Forthcoming changes in the Department's Payment Management System (PMS) will make some of the information in the manual regarding liquidation of obligations obsolete.

Response: While some of the formats and information requested and generated by the PMS are different from that of the Department Federal Assistance Finance System (DFAFS), the requirements concerning liquidation of obligations have not been affected. All references to DFAFS in the manual have been changed to PMS to reflect the Department's organizational change to the new Payment Management System.

10. *Comment:* A six month time limit should be established for the liquidation of all obligations incurred under a grant assisted project.

Response: Our current policy is for grantees to submit final Financial Status Reports (SF-269) showing no unliquidated obligations within 90 days of the end of the project period. In unusual circumstances, we would consider extending the deadline date for liquidating obligations for a reasonable time period. The resultant time frame should be more than sufficient for a recipient to close out its grant accounts. We would consider failure to submit a final report within a reasonable length of time an example of poor financial management and take this into account when the fiscal performance of the grantee is evaluated. A resultant poor evaluation could result in a denial or delay in refunding, grounds for tighter fiscal controls on other HDS grants, or other appropriate action. Language has been added to section I.3, Liquidation of Obligations, of Chapter 1, and section A.2, Financial Status Report, of Chapter 6 to strengthen our position on the need for a timely submittal of the Financial Status Report.

11. *Comment:* The section on Transferring Work Through Subgrants or Procurement Contracts Under Grants is lengthy, unclear, and confusing.

Response: After careful consideration we have determined that one addition is necessary in this section. The paragraph in Chapter 1, section K.1 describing prior approval requirements reflects Departmental policy stated in Chapter 1-430 of the HHS/GAM. The paragraph in section K.2 which provides guidance in selecting the proper award instrument has been viewed by most reviewers as being helpful and concise. We have added a sentence to Section K.2 to make a clear distinction regarding the appropriate use of a subaward and a contract.

12. *Comment:* The subsection on Budget Changes distorts the prior approval requirements of the cost principles contained in OMB Circulars A-21, A-87, and A-122 concerning equipment and other capital expenditures. The prior approval requirements in these circulars are not consistent with each other.

Response: We do not believe the HDS/GAM distorts the prior approval requirements set forth in the cited OMB circulars. Although these circulars have different requirements, we are using the authority assigned to us in 45 CFR 74.177(c) to impose the same requirements on all HDS grantees. Thus, in some cases, the requirements on HDS grantees are less rather than more restrictive.

All three circulars that apply to HDS recipients, A-21, A-87, and A-122, have prior approval requirements for the purchase of equipment. The only difference is the threshold which triggers the necessity for prior approval. In interpreting A-87 as it applies to HDS discretionary grants, the provisions dictate prior approval for virtually all items of equipment. A-21 and A-122 are more permissive and require prior approval only for items of equipment having a useful life of two years or more and an acquisition cost of $500 or more per unit. The manual simply waives the stricter requirements of A-87 and imposes the same requirements as A-21 and A-122 so that we have a consistent policy for all HDS grantees.

13. Comment: In Chapter 1, section L.1, Prior Approval Procedures, HDS warns the recipient with regard to acting on written prior approval from HDS when the approved expenditure or activity is unallowable. HDS should not place the burden of responsibility on the recipient, but on HDS, when it approves an unallowable cost or activity.

Response: No change has been made in the manual with regard to this issue. This section was intended to alert grantees as to who the proper officials are when requesting changes. HDS does not assume responsibility for the actions of its employees who act beyond the scope of their authority, orally or in writing. If proper approval has been obtained, and, thereafter, an expenditure or activity is found to be unallowable, the HDS awarding office will carry the weight or responsibility for rectifying the problem. Responsibility still rests with the

VOL 51 ISS 39 FE 27 1986 UMI

grantee, however, to be cognizant of HHS regulations regarding prior approval procedures as specified in 45 CFR 74.102.

14. Comment: Pub. L. 96–205 states in part that an agency or department shall waive any requirement for local matching funds under $100,000 required by law to be provided by the Northern Mariana Islands and American Samoa. Additionally, Pub. L. 95–348 states that certain grant funds made available to the Northern Mariana Islands shall remain available until expended. Provisions of the manual should reference these two statutes.

Response: As stated in the Introduction, Federal legislation takes precedence where a conflict exists with a provision of the manual. We consider this statement sufficient. It includes by implication Pub. L. 96–205 and Pub. L. 95–348 regarding the Northern Mariana Islands and American Samoa. However, with respect to the issue of funds being available until expended, Pub. L. 95–348 deals with matching formula and/or allotment programs, and would not apply to the discretionary grants covered by the HDS/GAM. No change has been made in the manual.

15. Comment: Chapter 2, section D, Valuation of Third-Party In-Kind Contributions, states that a reasonable amount of uncompensated employee time may be charged as an in-kind contribution to the project provided the services are not within the scope of the employee's paid employment. Since uncompensated time involves no cost to the grantee, this section should be deleted.

Response: Volunteer services are encourage by HDS as an acceptable in-kind contribution. As long as the grantee complies withe provisions of the HDS/GAM, and the services performed are reasonable, necessary, and allowable to the projects, such activity should be allowable as an in-kind contribution. No change has been made to the manual on this issue.

16. Comment: The Cost Transfers discussion in Chapter 3, section A.3, is confusing. The section is concerned with transferring costs into and out of HDS grant accounts due to errors and/or closely related work. The discussion appears to accept cost transfers as a standard grantee practice and thus might mislead grantees into believing that improper allocation of costs is acceptable.

Response: We agree and have deleted this topic from the manual.

17. Comment: Major subawards should not be excluded from the direct cost base when computing the amount of indirect cost dollars to be awarded under a grant.

Response: It is necessary to exclude major subawards from the direct cost base to assure that the recipient organization is equitable and based on relative benefits received. Clarifying language has been added to the third paragraph of section B.1 of Chapter 3, Indirect Costs, to explain the purpose of the base exclusion and to emphasize that the specific elements of cost to be excluded from the direct cost base should be part of the indirect cost negotiation and approval process.

18. *Comment:* The discussion of child care costs as allowable costs should require that such costs be authorized by the recipient's written policy.

Response: We agree. To avoid possible internal organization conflicts and to ensure consistency, child care costs should be addressed in the grantee's written policy. Language has been added to the discussion of this item in section D, Allowable Costs, of Chapter 3, to include this requirement.

19. *Comment:* The HDS/GAM should provide for payment for unused accumulated leave only upon termination of a grant or termination of an employee paid under a grant, and it should state that payment of cash in lieu of leave at year-end is unallowable.

Response: The HDS/GAM is not intended to supersede an organization's consistently applied policies of accounting for compensated absences. If it is an organization's policy (though it is rare) to pay for accumulated leave at the end of a fiscal period, then HDS would not interfere with this policy by placing strictures on those employees working on HDS funded projects.

The discussion of this issue, which appears in section D, Allowable Costs, of Chapter 3, was meant to describe how and when costs associated with earned leave should be recorded under an accrual system or a cash system. The section has been revised to state that, under a cash system, the cost is incurred when the earned leave is taken by the employee and paid by the employer.

20. *Comment:* The interest costs provision in section E, Unallowable Costs, of Chapter 3, is obsolete for educational institutions, since OMB Circular A–21 has been revised.

Response: We agree. We have revised this paragraph on interest costs to conform to the current provisions in OMB Circular A–21 for educational institutions.

21. *Comment:* The manual should reflect the use of the SF–270, Request for Advance or Reimbursement, when advance payments by Treasury check are not made on a predetermined basis.

Response: Language has been added to sections A.2 and A.3 of Chapter 4 and to section A.5 of Chapter 6 requiring the use of this form when payments are not made to a recipient on a predetermined basis (see 45 CFR 74.75(a)(1)).

22. *Comment:* The discussion of program income as it relates to the sale of donated goods or services should be deleted or qualified to reflect the fact that the recipient must report program income only in a share proportionate to the direct costs charged to the program in connection with the generation of the income.

Response: In those instances where program income is generated from the results of non-grant related activities as well as grant activities, the grantee would only report income earned from those activities directly associated with the grant. The commenter's point would appear to be an extrapolation from the definition of program income, but, for the sake of clarity, we have included his distinction in the part of this section dealing with reporting.

In addition, we have deleted the cake sale example relating to the sale of donated goods or services. Since fund-raising costs are not allowable under Federal grant programs, HDS cannot permit grant funds to be used for fund-rasing activities. There may be instances in which a grantee wishes to occasionally conduct fund raising in a building whose cost is charged entirely to an HDS grant. This is permissible provided the incidental use of the building for fund-raising is minor and immaterial and does not interfere with the grant project. As an example, if a grantee held a dance in the Head Start Center to raise money for the program, the net profit of income over expenses would not be program income. Rather, the net profit coud be used as a donation to the program as a cash contribution to help satisfy non-Federal share requirements. The generation of that contribution would be irrelevant.

23. *Comment:* There are basically three different alternatives for the use of progrm income: (1) The deduction alternative, (2) The matching alternative, and (3) The additional costs alternative. These terms should be further clarified, and requirements for reporting program income should be clearly stated to avoid confusion.

Response: We agree. Language has been added to section D.2.d of Chapter 4 to clarify the alternatives and uses of program income. We have also further amended this section to clarify the correct methods of reporting program income on the financial status report.

24. *Comments:* (1) The language in section E, Chapter 4, Reimbursements From Other Federal Agencies, is not consistent with procedures currently established in the Head Start program with regard to USDA reimbursement under the Child Care Food Program; and (2) the section as written might encourage a recipient to request funding for the same costs from several Federal funding sources.

Response: We agree. We have deleted from the section language which may appear misleading or conflicting.

25. *Comment:* In the Definitions section, the term "consultant" should exclude all employees of the recipient organization without regard to the services they perform.

Reponse: In general, we try to follow the provisions of the HHS/GAM (in this case, Chapter 1–45), especially when doing so has been beneficial to the grantee as well as to the HDS mission. In this case, we would lose a considerable pool of expertise if we could not pay consultant fees to university professors and other professionals who would fall under its pressure. We believe it is not in the public interest to unnecessarily limit consultant fees when there is no conflict of interest between those who would be affected and the grant. Therefore, no change has been made.

26. *Comment:* The discussion of lease versus purchase in section D of Chapter 8 of the manual (1) distorts the prior approval requirements of the cost principles; (2) overstates the requirements of Attachment O of OMB Circular A–102 and A–110, and (3) in the case of educational institutions, does not reflect the revised interest provisions in OMB Circular A–21.

Reponse: (1) We have revised Chapter 8, section D, lease vs. purchase, to delete the reference to prior approval; (2) we have corrected the overstatement of the requirement of Attachments O of OMB Circulars A–102 and A–110 by replacing "shall" with "should" in the following passage: "Generally, the decision to lease or purchase equipment *should* be based on the lowest cost to the project considering the length of the project and life expectancy of the equipment", and (3) we have added language which calls to the attention of educational institutions the revision in OMB Circular A–21 which deals with interest.

27. *Comment:* The independent auditor qualifications for public accountants discussed in Chapter 11, Section A, Non-Federal Audits, is an arbitrary and discriminatory requirement. The General Accounting Office (GAO) standard should not be included in the HDS/GAM.

Reponse: The use of Certified Public Accountants (CPAs) for audit work has been a longstanding practice with the Department and is consistent with general Federal practice. Both private and public sectors have found the objectivity and quality of work provided by CPAs extremely valuable in performing monitoring functions as well as safeguarding Federal funds. In addition, in this matter, we are complying with Departmental policy as dictated by GAO. No changes have been made in our requirements.

28. *Comment:* Section B, Audit Resolution, of Chapter 11 should make a clear distinction between the two basic kinds of audit findings, (1) management and systems deficiencies and (2) monetary findings. It should also distinguish between the time frames and actions required for the resolution of each kind of audit finding, and the nature of subsequent HDS actions.

Reponse: This section hs been revised to make clear that the audit resolution process is aimed at agreement between the HDS awarding agency and the grantee. Since there is not always agreement, it also addresses HDS's authority to make unilateral decisions. To clarify the difference between audit resolution and debt collection we have reorganized the section to treat each topic separately.

Dated: February 19, 1986.

Dorcas R. Hardy,

Assistant Secretary for Human Development Services.

Final notice is given to the applicability of the HDS Discretionary Grants Administration Manual as published in the **Federal Register** on October 7, 1982, with the following changes:

a. In the "Definitions" section we will add:

- *Capital Expenditure*

The cost of the asset including the cost to put it in place. Capital expenditure for equipment, for example, means the net invoice price of the equipment, including the cost of any modifications, attachments, accessories, or auxiliary apparatus necessary to make it usable for the purpose for which it was acquired. Ancillary charges, such as taxes, duty, protective in-transit insurance, freight, and installation may be included in, or excluded from, capital expenditure cost in accordance with the organization's regular accounting practices. (See definitions of "acquisition cost" in 45 CFR 74.132 and OMB Circular A–122, and "capital expenditures" in OMB Circular A–21.)

b. In Chapter 1, section A.2.a, the final sentence of the first paragraph will be amended to read:

This announcement descibes the program, the amount of funds available, eligibility requirements, where to obtain application forms, the deadlines for submitting an application, criteria for review and evaluation, funding priorities, and other information about the activity.

c. In Chapter 1, section A.2.a, the second sentence in the second paragraph will be amended to read:

In these cases, announcement of the availability of funds may be made through: (1) Publishing a notice in the **Federal Register;** (2) Individual letters to all prospective applicants; (3) Publishing notices in newspapers; or (4) other suitable forms of public notice.

d. In section E, Chapter 1, the provisions concerning the Intergovermental Review of Federal Programs will be completely revised as follows:

E. Intergovernmental Review of Federal Programs

Cross-references:

Executive Order 12372
45 CFR Part 100

1. Background

The Intergovermental Review System established by OMB Circular A–95 was replaced by Executive Order (E.O.) 12372 "Intergovernmental Review of Federal Programs", signed by President Reagan on July 14, 1982. Unders E.O. 12372 and implementing DHHS regulations published at 45 CFR Part 100, States may design their own processes for reviewing and commenting on proposed Federal assistance under covered programs. A list of HDS covered programs is included as Attachment B to this manual. [For clarity, a list of HDS programs which are not covered by the Order is also included.]

The objectives of the new approach under E.O. 12372 are to (1) increase State flexibility to design a process and select programs, (2) increase the ability of State and local elected officials to influence Federal decisions, and (3) compel Federal officials to be more responsive to State concerns, or explain the reasons why they cannot accomodate those concerns. Nearly every State has adopted a State process and designated a State official or organization to act as the State's "Single Point of Contact" (SPOC) for coordinating and sending official State process comments and recommendations to Federal agencies.

VOL
51
ISS
39
FE
27
1986
UMI

All organizations submitting applications subject to E.O. 12372 review should contact the cognizant SPOC (if one has been designated) as early as possible for instructions regarding the State's process.

2. Applicability

The requirements of this section are applicable to all HDS discretionary programs covered by E.O. 12372 except those administered by Federally-recognized Indian Tribes. Changes and additions of covered programs in 45 CFR Part 100 will be announced in the Federal Register.

3. The HDS Process

a. New and Competing Continuation Awards

The responsible HDS granting office will notify the SPOCs as early as possible of the intent to issue new or competing continuation financial assistance awards through the publication of a program announcement in the Federal Register. If every eligible applicant is identifiable by the granting office, the announcement may be mailed to each of them directly instead of being published in the Federal Register.

The program announcement will specify the due date for comments from the SPOCs. That date will normally be the 60th day after the application deadline date. The program announcement and/or the application kit will include a current listing of SPOCs to facilitate early notification. Application kits will include information relating to compliance with the procedures described in this section.

b. Noncompeting Continuation Awards

As early as possible, the cognizant HDS Grants Officer will notify the appropriate SPOC of the intent to make a noncompeting continuation award. For noncompeting continuations which are generally refunded on a continuous basis, e.g., Head Start, the Grants Officer will send out an early notification letter in July of each year. This letter will alert the SPOC of anticipated funding for the subsequent fiscal year beginning October 1 and will indicate the due date for comments from the SPOC. That date will normally be the 30th day afer the application deadline date.

For other noncompeting continuations, HDS will notify the SPOC with a copy of the recipient's refunding guidance letter. This letter is mailed to the recipient six months prior to the continuation date, and will simultaneously be mailed to the cognizant SPOC. Again, an accompanying letter will inform the SPOC that it will have until 30 days after the application deadline date to submit comments. Current grantees receiving continuation application kits or instructions should notify the SPOC that they are applying for a non-competing continuation award with a 30 day rather than a 60 day review period.

c. Applicant Compliance Certification

Applicants shall certify that they have contacted the cognizant SPOC by checking the appropriate box in Item 22 of Standard Form 424, Federal Assistance. If more than one State will be served by the proposed project, the SPOC of each State in which the project will operate should be contacted by the applicant. The applicant's certification in Item 22 serves as assurance that *all* States to be served have been contacted. The Grants Officer will screen each application to ensure that the certification in Item 22 has been included, and immediately notify the SPOC of the receipt of any covered application which should, but does not, indicate that the SPOC has had an opportunity for review.

4. Handling Of State Process Recommendations: The "Accommodate or Explain Rule"

a. The "accommodate or explain" rule applies when all of the following are present:

(1) A written comment that constitutes a State process recommendation is received by the HDS official designated to receive applications.

(2) The comment is sent or transmitted by the SPOC.

(3) HHS has stated in the Federal Register that the program is covered by E.O. 12372.

(4) The applicant is not a Federally-recognized Indian Tribe.

(5) The comment is received not later than the established due date for State process comments.

b. If all of the factors listed in the preceding paragraph are present, the "accommodate or explain" rule is triggered even if the program is not one that was officially selected for review in the State process.

c. A mere endorsement of a grant application does not trigger the "accommodate or explain" rule. However, a comment that prioritizes or ranks applications does trigger the rule (if all of the factors listed in paragraph a above are present).

d. When the "accommodate or explain" rule applies, HDS must make every effort to accommodate the State process recommendation.

e. The HDS granting office will notify the SPOC in writing whether we accommodate or non-accommodate a State process recommendation to which the "accommodate or explain" rule applies.

5. Accommodations

Accommodating a State process recommendation consists of either: (1) Accepting and carrying out the recommendation, or (2) Negotiating a mutually agreeable solution with the SPOC or State process representative.

6. Nonaccommodations

a. Nonaccommodation occurs when:

(1) The State process recommends that an application not be funded, and HDS decides to fund it; or

(2) The State process recommends substantive changes to the application or special conditions in the award and HDS decides to fund the application without these changes or special conditions; or

(3) The State process indicates that a particular application should be chosen for funding over others, and it is not funded while other, lower priority applications are.

b. Explanation requirement:

When a decision is made not to accommodate a State process recommendation, the HDS granting office must promptly send a written explanation of the reason(s) to the SPOC.

c. Delay of implementation: A nonaccommodation decision must not be implemented for at least ten days after the SPOC is first notified of the decision. (See paragraph 7 below concerning exceptions to this rule.) This waiting period requirement is intended to provide adequate time for the State process to formulate an appropriate response if the issue is sufficiently important within the State. Every nonaccommodation explanation given to a SPOC shall notify the SPOC of the specific date after which HDS may implement the nonaccommodation decision. Neither the awards for successful applications nor the disapproval letters for nonsuccessful applicants shall be mailed until after the ten day waiting period has expired.

7. Unusual Circumstances and Waivers

In unusual circumstances, the Department may allow a reduction in: (1) The 60 day waiting period for new and competing continuations; (2) The 30 day waiting period for noncompeting continuations; or (3) The 10 day waiting period for nonaccommodation letters. For example, a statutory deadline, an emergency, or the end of the fiscal year may necessitate a shorter period. This authority is used sparingly to deal with unforeseen situations or problems beyond the Department's control.

e. In Chapter 1, section F, the final two sentences will be deleted.

f. In Chapter 1, section I.1, the following insert will be added after the first sentence:

(Note.—HDS program announcements generally specify the length of the project period covered by the grant award. Further information is provided for some HDS programs in the *Catalog of Federal Domestic Assistance.)*

g. In Chapter 1, section I.2, the table showing when obligations must be charged will be changed as follows:

If the Obligation is for:

- Services by a contractor (except for audit services).
- Audit services.

The Obligation is made:

- When the services are provided.

h. In Chapter 1, section I.3, the second paragraph will be revised to read as follows:

If it is not possible to liquidate totally all obligations within the 90-day period specified for submission of a final report, grantees shall notify the HDS Grants Officer in writing and request approval for an extension of time in which to liquidate obligations. At the same time, grantees shall submit a "provisional" final report, indicating when the final report may be expected. Provisional final reports must be submitted on a quarterly basis until all obligations have been liquidated.

Note.—Failure to submit a final report within a reasonable length of time would be considered an example of poor financial management and taken into account when the fiscal performance of the grantee is evaluated. (See Chapter 6.A.2 for more information on the importance of timely reporting.)

When all obligations have been liquidated, the grantee shall submit a final expenditure report, showing $0 balance on line 10(h) of the SF–269. This $0 balance must also be reflected on the final Cash Transactions Report (SF–272 or PMS–272) which must be submitted with the final SF–269.

i. In Chapter 1, section K.2, the following sentence will be added after the fourth sentence of the first paragraph:

If the grantee intends to *assist* a lower tier party, the award should be made as a subgrant. Where a service is acquired or *purchased,* the award should be a procurement (contract).

j. In Chapter 3, delete section A.3, Cost Transfers.

k. In Chapter 3, section B.1, the first two sentences in the third paragraph will be amended to read:

The indirect cost rate is the ratio, expressed as a percentage, between the indirect costs and a direct cost base, commonly either direct salaries and wages or total direct costs, excluding capital expenditures and other distorting items (such as major subawards and flow-through funds). These base adjustments are necessary to ensure an equitable allocation of indirect costs based on relative benefits received. A definition of the direct cost base, (e.g., the types and/or amounts of distorting items to be excluded from the direct cost base) will be agreed upon as part of the approval process in establishing the organization's indirect cost rate(s) and will be contained in the Rate Agreement.

l. In Chapter 3, section D, the discussion of Child Care Costs in the Allowable Costs Section will be changed as follows:

- *Child Care Costs*

Where authorized by the recipient's written policies, child care costs to allow authorized participants or representatives to attend official board or council meetings, subject to limitations in program guidelines or regulations.

m. In Chapter 3, section D.(1), the discussion of Fringe Benefits will be changed to read as follows:

(1) *Employee sick, vacation, and other leave costs* may be accumulated on an accrual basis or a cash basis provided that an established written policy is consistently applied on an organization-wide basis. Under an accrual accounting system, the costs are recorded when leave is earned. (This meets the requirements of generally accepted accounting principles concerning liability for employee's compensation for future absences.) Under a cash accounting system, the costs are recorded when leave is taken by the employee and paid by the employer.

n. In Chapter 3, section E, the paragraph on interest on borrowed capital or temporary use of endowment funds will be changed to indicate that these costs are unallowable except as follows:

(1) In the case of State, local, and Federally-recognized Indian Tribal governments, interest costs associated with the acquisition of publicly owned buildings which are newly occupied on or after October 1, 1980 are allowable if a "rental rate" system or equivalent system reflecting actual costs is used (see section C.2.a and D.7 of Attachment B of OMB Circular A–87).

(2) In the case of educational institutions subject to the cost principles in OMB Circular A–21 (subsection J.17.e), the cost of interest paid to an external party is allowable where associated with the following assets, provided the assets are used in support of sponsored agreements and the total cost (including depreciation or use allowance, operation and maintenance costs, interest, etc.) does not exceed the rental cost of comparable assets in the sâme locality:

(a) Buildings acquired or completed on or after July 1, 1982.

(b) Major reconstruction and remodeling of existing buildings completed on or after July 1, 1982.

(c) Acquisition or fabrication of capital equipment (as defined in paragraph J.13, "Equipment and other capital expenditures") completed on or after July 1, 1982, costing $10,000 or more, if agreed to by the Government.

o. For Chapter 4, Section A.2, Method of Payment, the passage entitled Advance by Treasury check will be amended by the addition of the following passage as the last sentence:

For grants paid through the Division of Accounting Operations or the Regional Administrative Support Center, advances are made through either: (1) Receipt of the SF–272; (2) Payment schedules submitted for new awards; or, (3) By the grantee regularly submitting the SF–270, "Request for Advance or Reimbursement."

p. Chapter 4, section A.3.b, first paragraph, will be changed in its entirety to read:

The HDS Grants Officer, at the time of a new award, sends a payment authorization package containing the grantee's forecasted cash needs for the first four months of the award to DAO or RASC. The finance office makes out a schedule of payments based on the forecasted cash needs and sends it to Treasury, where a check is automatically issued to the grantee at or near the beginning of each month. Subsequent payment requests in three month increments are provided by the grantee as part of the quarterly SF–272, Federal Cash Transactions Report, which are in turn forwarded by DAO or RASC to Treasury. If the grantee submits the SF–270 to request payments, a check is released to the grantee after the form is received and processed.

q. In Chapter 4, section D.2.b, the first example of monies received from sale of donated goods or services "cake sales for Head Start program", will be deleted.

r. In Chapter 4, section D.2.d, the discussion of the options (in bullets) is revised to read as follows:

- Income is deducted from the total project costs and third-party in-kind contributions for the purpose of determining the amount to which the maximum Federal share percentage will be applied. [See *deduction alternative* in 45 CFR 74.42(c).] Under this alternative, the recipient must use the income to reduce the amount of Federal and other funds needed to pay the allowable costs of the project.

Income under this option, when received, must be used for current costs before grant funds. However, the HDS granting office may authorize carryover of income received by the recipient to the recipient's next funding period. If so, the recipient shall use the income carried over before it uses grant funds in that period.

- Income is used for costs that count toward satisfying a matching requirement. [See *cost-sharing or matching alternative* in 45 CFR 74.42(d).] The income, when received, must be used to provide the matching before grant funds are used. The carryover provisions of the deduction alternative also apply to this alternative.
- Income is used by the recipient for costs that further the objectives of the statute under which the grant was made but which are not part of the project budget. They may be allowable or unallowable types of costs. Used in this fashion, income is not deducted from the total project costs when filling out the financial status report and is not required to be used before grant funds; but, it does have to be reported. No authorization from the granting office is necessary if the income is to be used in a later period. [See *additional costs alternative* in 45 CFR 74.42(e).]

The additional costs alternative described in 45 CFR 74.42(e) may not be applied to program income earned by a recipient that is a for-profit organization.

s. The section on Reporting in Chapter 4, Section D.2.d is revised as follows:

The following information pertaining to program income must be reported on the SF–269: (1) Source (or how the income was earned); (2) Amount, and (3) Disposition (identify which alternatives the income was used under and how much for each). Specific instructions for reporting general program income earned on the Financial Status Report (SF–269) are as follows:

(1) Enter on line 10.c all general program income used during this period in accordance with the *deduction alternative.*

(2) Costs paid during the period by general program income under the *matching alternative* (if permitted by the terms of the grant) must be included in line 10.f, and the amount of costs on that line paid by the income must be stated in item 12 (i.e., if any of the costs on line 10.f were paid by general program income, state the amount in item 12).

(3) The amount of costs paid during the period by general program income under the *additional costs alternative* (if permitted by the terms of the grant) must be stated in item 12 along with a description of the purposes for which the income was used.

(4) If any general program income is being held for use in a later period (to the extent such a deferral is authorized), state the amount in item 12.

(5) If any alternative besides the deduction alternative is permitted or if deferral to a later period is authorized, report the amount of general program income earned during the reporting period in item 12.

(6) In item 12 list the sources of the income earned during the reporting period or describe how the income was earned. If the sources or means are the same as those set forth in the application, state "see application" in item 12.

(7) As a minimum, program income must be reported in a share proportionate to the direct costs charged to the progam (or charged to the match) in connection with the generation of the income.

(8) Since interest earned is reported on the SF–272, it is not necessary to report interest on the SF–269.

(9) If SF–270, Request for Advance or Reimbursement, is used to request cash, also report program income in item 11.b of this form.

t. Chapter 4, section E will be substantially shortened to read as follows:

E. Reimbursements From Other Federal Agencies

HDS encourages grantees to seek other Federal funds to supplement financial assistance provided by HDS grant funds. Grantees should anticipate the funding of these project costs by sources other than HDS and should not request funds from HDS to support these same activities.

u. In Chapter 6, section A.2, the following passage will be added as the third paragraph:

In unusual circumstances, the deadline date for submitting a final report may be extended for a reasonable time period (if requested in writing and approved by the Grants Officer). However, the grantee should be advised that failure to submit the final financial status reports within a reasonable period of time would demonstrate poor financial management which could potentially result in a denial or delay in refunding, grounds for tighter fiscal controls on other HDS grants, or other action as may be deemed necessary by the Grants Officer.

v. Chapter 6, section A.5 will be revised to read as follows:

5. Request for Advance or Reimbursement

Cross references:

- 45 *CFR* 74.75, and
- Exhibit X–6–4 of this chapter.

HDS uses Standard Form 270, "Request for Advance or Reimbursement" when: (1) Advance payments by Treasury check are *not* made for a nonconstruction grant on a predetermined basis; (2) A grantee is paid by reimbursement for a nonconstruction grant; or (3) a grantee is paid by advance or reimbursement for a construction grant. The frequency for submitting payment requests is discussed in 45 CFR 74.96 and Chapter 4.A of this manual.

w. Chapter 8, section D, will be changed to read as follows:

D. Lease Versus Purchase

Appendices G (paragraph 8) and H (paragraph 3.C.(1)) of Part 74 require that an analysis shall be made of lease versus purchase alternatives to determine which approach would be the most economical. Generally, the decision to lease or purchase equipment should be based on the lowest cost to the project considering the length of the project and life expectancy of the equipment. In the case of the educational institutions, which can pay interest in certain circumstances, consideration should also be given to the provisions regarding interest in section J.17.e of OMB Circular A–21 (see "Interest Costs" in Chapter 3.E of this Manual).

x. Chapter (11, section A, first paragraph, will be revised to read as follows:

A. Non-Federal Audits

Subpart H of 45 CFR Part 74 (and 45 CFR Part 74, Appendix J) incorporates the audit requirements in OMB Circular A–128 covering governmental recipients and OMB Circular A–110 (Attachment F) for non-governmental recipients. The audit requirements in Circulars A–128 and A–110 are reproduced in Attachment A of this Manual.

In summary, Circular A–128 replaces Attachment P to OMB Circular A–102. The Circular implements the Single Audit Act of 1984. All governmental

recipients receiving $100,000 or more in Federal funds are to be audited annually unless the government has specific authority to perform less frequent audits. Circular A–110 provides that each recipient must have itself audited by non-Federal auditors at least every two years and that the audit is to be performed on an organization-wide basis, with appropriate sampling of grant-related transactions. Unless authorized by program legislation or regulations, the granting office may not impose grant-by-grant (or subgrant-by-subgrant) audit requirements.

y. Chapter 11, section B, will be amended and a new section C will be added as follows:

B. Audit Resolution

Grantees must take timely and appropriate action to resolve audit findings and recommendations, including (1) management and systems deficiencies and (2) monetary findings (i.e., questioned costs). Grantees are usually allowed a 30-day period from the date of request to respond to the responsible audit resolution official (referred to as the "Action Official") concerning audit findings. Thus, grantee organizations have an opportunity to provide any further information they may wish to provide on the audit report. Both monetary and non-monetary findings must be resolved within six months. This means that (1) a final decision on the amount of any monetary recovery must be reached and (2) a satisfactory plan of corrective action, including time schedules, to correct all deficiencies must be established.

Failure to submit timely responses will result in a unilateral determination on the audit findings. If appropriate, the Action Official will also initiate "safeguard" procedures to protect the Government's interests. At the completion of the audit resolution process, the grantee will be notified of the final decision. The grantee may appeal this decision in accordance with the applicable appeal procedures (see Chapter 12).

C. Debt Collection

Funds owed to the Federal Government as a result of audit disallowances signed by the appropriate HDS official must be repaid. The Finance Office is primarily responsible for interest calculation and all other debt collection activities. Interest charges will be assessed from the date of the HDS Official's notification of the disallowance if the disallowance is not paid within 30 days of the date of the disallowance letter. If the grantee appeals the final decision and the disallowed amount is sustained in its entirety or is reduced through a negotiated agreement, interest will be charged for the full period on the sustained amount of the disallowance which was not paid by the date of the disallowance letter.

Social Security Administration

Refugee Resettlement Program; Proposed Formula for Allocations to States of Fiscal Year 1986 Funds for Social Services for Refugees and Cuban/Haitian Entrants

AGENCY: Office of Refugee Resettlement (ORR), SSA, HHS.

ACTION: Notice of proposed formula for allocations to State of fiscal year 1986 funds for refugee and entrant social services.

SUMMARY: This notice proposes the formula for allocation to States of FY 1986 funds for social services under the Refugee Resettlement Program (RRP). The formula yields the allowable allocation of FY 1986 refugee and Cuban/Haitian entrant social service funds for each State participating in the RRP.

DATE: Comments on the allocation method provided for in this notice will be considered if received by March 31, 1986.

ADDRESS: Address written comments in duplicate, to: David Howell, Office of Refugee Resettlement, Room 1229, Switzer Building, 330 C Street SW., Washington, DC 20201.

FOR FURTHER INFORMATION CONTACT: David Howell, (202) 245–1923.

SUPPLEMENTARY INFORMATION:

I. Amounts Proposed for Allocation

The Office of Refugee Resettlement (ORR) expects to have available $44,802,000 in refugee/entrant social service funds for FY 1986. This is the amount that was originally requested in the President's Budget for FY 1986. Under the Continuing Resolution for 1986 (Pub. L. 99–190), Congress made $71,700,000 available for social services; this was then reduced to $68,617,000 as a result of the 4.3% reduction required to be taken under the Balanced Budget and Emergency Deficit Control Act of 1985 (Pub. L. 99–177), generally referred to as Gramm-Rudman-Hollings. On February 5, 1986, the President proposed a rescission of those FY 1986 social service funds in excess of the original request of $44,802,000. Congress has not yet acted on this proposed rescission. In the event that funds above the $44,802,000 addressed by this notice were to be finally available, ORR would plan to increase proportionally the State allocations proposed here, based on the same population formula as that contained in this notice.

Of this total of $44,802,000, the Director of ORR proposes to make available to States $35,829,647 during FY 1986 under the social services allocation formula set out in this notice. Separate announcements have been made of remaining funds not included in this notice.

All allocation figures include both refugees and entrants, since both populations may be served with funds made available under this notice.

The Director proposes to allocate funds directly to States in the following manner:

- $33,700,001 (75% of the available social service funds) would be allocated on the basis of each State's proportion of the national population of refugees and entrants who had been in the U.S. less than 3 years as of October 1, 1985.
- $196,286 of the funds would be made available to States which have particular needs associated with small refugee/entrant populations in order to provide a floor of $45,000 for States for which the formula would otherwise yield less than that amount. In FY 1985, the floor amount was $75,000; the floor amount of $45,000 is proposed for FY 1986 to take into account the overall reduction in funds to be allocated.
- $1,933,360 of the funds would be allocated to each State on the basis of its proportion of the 3-year refugee/entrant population (including a $5,000 floor) in order to provide an incentive for States to fund refugee/entrant mutual assistance associations (MAAs). A written assurance that these funds will be used for MAAs would be required in order for a State to receive these funds. Guidance for States regarding this assurance is provided in Section II of this notice.

Of the $8,972,353 in remaining social service funds, the Director anticipates making about $2,000,000 available to States, if necessary, to provide funding beyond the proposed formula resulting from any adjustment made in population estimates (see Section III, below) specified in Section IV. In addition, $7,000,000 is currently expected to be used by ORR on a discretionary basis to provide funds for individual projects intended to contribute to the effectiveness and efficiency of the refugee resettlement program.

VOL 51 ISS 39 FE 27 1986 UMI

The discretionary funds will support: Specific program activities (listed below) designed to improve the delivery of services to refugees in areas designated in announcements of the availability of funds; an interagency agreement with the U.S. Public Health Service for the improvement of State mental health services to refugees; contracts to provide technical assistance to refugee service providers; and such activities as the Director determines to be required to address unique refugee service gaps. Announcements of the availability of funding and grant application procedures for some projects have been issued (Availability of Funding for Grants to States to Implement Favorable Alternate Sites Demonstration Projects, Memorandum to State Refugee Coordinators issued October 1, 1984; Availability of FY 1986 Funding for Grants to States to Implement Comprehensive Discretionary Social Services (CDSS) Projects for Refugees, Memorandum to State Refugee Coordinators issued December 19, 1985; Availability of Funding for Planned Secondary Resettlement of Refugees, 50 FR 20038, May 13, 1985).

II. Proposed Formula

Under this proposal, $33,700,001 of the funds available for FY 1986 for social services would be allocated to States in accordance with the formula specified below. A State's allowable allocation would be calculated as follows:

1. The total amount of funds determined by the Director to be available for this purpose; divided by—
2. The total number of refugees and entrants who arrived in the United States not more than three years prior to the beginning of the fiscal year for which the funds are appropriated, as shown by the ORR Refugee Data System. The resulting per capita amount will be multiplied by—
3. The number of refugees and entrants in item 2, above, in the State as of October 1, 1985, adjusted for estimated secondary migration.

The calculation above will yield the formula allocation for each State. The MAA incentive award supplements will be made subsequently, contingent upon letters of assurance from States.

The proposed formula is identical to that used by ORR for social service allocations in FY 1984 and FY 1985. States have generally supported the concept of this type of formula, which is based on 3-year population estimates, and have supported proposals that minimum amounts be provided to States with small refugee/entrant populations. We believe this position to be programmatically sound, since data on refugee receipt of cash assistance show the highest to occur during a refugee's first 3 years in the United States.

ORR has reviewed available data regarding the need for social services, and has considered relevant information derived from previous experience in the formula allocation of social service funds, comments received in the FY 1983, FY 1984, and FY 1985 allocation proposals, and numerous consultations with States. From this review, ORR has concluded that the proposed formula will result in allocations being made available to States on an equitable basis. Under this proposal, each State would receive funds in proportion to its population of refugees generally having the greatest need for services. Additional special needs of States will be considered under ORR's CDSS announcement.

While the proposed formula is based on the 3-year refugee population, social service programs are not limited to refugees who have been in the U.S. only three years. States may provide services without regard to an individual refugee's or entrant's length of residence. (A State must, however, have an approved State plan for the Cuban/Haitian Entrant Program in order to use funds on behalf of entrants as well as refugees.)

ORR funds may not be used to provide services to United States citizens since they are not covered under the refugee and entrant legislation (except that services may be provided to a U.S.-born minor child in a family in which both parents are refugees or entrants or, if only one parent is present, in which that parent is a refugee or entrant).

In accordance with ORR's "Statement of Program Goals, Priorities and Standards for State-Adminstered Refugee Resettlement Program" issued March 1, 1984, funds awarded under this notice would be subject (as were FY 1985 funds) to a requirement that at least 85 percent of a State's award be used for employment services, English language training, and case management services, reflecting the Congressional objective that "employable refugees should be placed in jobs as soon as possible after their arrival in the United States" and that social service funds be focused on these types of services. (Immigration and Nationality Act section 412(a)(1)(B).) As in FY 1985, ORR will consider granting, under specific circumstances, a waiver of this provision. In order to receive a waiver, a State must be able to demonstrate to the satisfaction of the Director, ORR, that two of the following three conditions exist: The cash assistance rate for time-eligible refugees/entrants in the U.S.; less than 85% of the State's social service allocation is sufficient to meet all employment-related needs of the State's refugees/entrants; and/or there are nonemployment-related service needs which are so extreme as to justify an allowance above the basic 15 percent.

States should also expect to use funds proposed under this notice to pay for social services which are provided to refugees/entrants who participate in alternative projects. The Continuing Resolution for FY 1985, in addition to providing funds for the refugee program, amended the Immigration and Nationality Act to provide that:

> The Secretary [of HHS] shall develop and implement alternative projects for refugees who have been in the United States less than thirty-six months, under which refugees are provided interim support, medical services, support [social] services, and case management, as needed, in a manner that encourages self-sufficiency, reduces welfare dependency, and fosters greater coordination among the resettlement agencies and service providers.[1]

The Department has already issued a separate notice in the **Federal Register** with respect to applications for such projects (50 FR 24583; June 11, 1985). The notice on alternative projects does not contain provisions for the allocation of additional social service funds beyond the amounts proposed for availability in this notice. Therefore a State which may wish to consider carrying out such a project should take note of this in planning its use of social service funds proposed for allocation under the present notice.

Finally, ORR believes that the continued and/or increased utilization of refugee mutual assistance associations (MAAs) in the provision of social services promotes appropriate use of services as well as the effectiveness of the overall service system. The belief is reinforced by the interest in MAAs which has developed under similar incentive funds awarded to States in previous years. Therefore, additional funds which would be targeted specifically to these organizations have been included in the proposal as an optional award to States which would use them for this purpose.

In order to receive the MAA incentive funds, the appropriate State agency official shall provide written assurance to the Office of Refugee Resettlement that the following conditions will be observed by the State agency is using funds made available to the State under this special allocation:

(1) That such funds will be used to fund refugee/entrant mutual assistance associations for the direct provision of services to refugee and entrant clients.

(2) That the MAA incentive allocation is subject to and included under ORR's requirement that 85% of social service funds allocated by this notice to a State be used for priority services, as defined elsewhere in this notice.

(3) That the State agency will observe the following definition of a mutual assistance association:

(a) That the organization must be legally incorporated as a non-profit organization; *and*

(b) That not less than 51% of the composition of the Board of Directors or governing board of the mutual assistance association will be comprised of refugees/entrants or former refugees/entrants.

(4) That the State agency shall assist MAA's in seeking other public and/or private funds for the provision of services for refugee and entrant clients in subsequent years.

Written assurances should be sent to the Director, Office of Refugee Resettlement, Room 1229 Switzer Building, 330 C Street SW., Washington, DC 20201, with a duplicate copy to the appropriate ORR Regional Director. It will be assumed that States which have not responded by May 30, 1986, do not intend to avail themselves of this special allocation.

III. Basis of Refugee and Entrant Population Estimates

The population estimates for the proposed allocation of funds in FY 1986 are based on the ORR Refugee Data System, adjusted as of October 1, 1985, for estimated secondary migration. The data base includes refugees of all nationalities as well as Cuban and Haitian entrants resettled after September 30, 1982. Figures for entrants resettled are based on data maintained by the ORR Florida Office.

For fiscal year 1986, ORR's formula allocations to the States for support services for refugees are to be based on the numbers of refugees who arrived, and entrants who arrived or were resettled, during the preceding three fiscal years: 1983, 1984, and 1985. Therefore, estimates have been developed of the numbers of refugees and entrants with arrival or resettlement dates between October 1, 1982, and September 30, 1985, who are thought to be living in each State as of October 1, 1985. The population estimates for the fiscal year 1986 allocations cover refugees of all nationalities and Cuban/Haitian entrants.

The adjustments made to the base arrival figures for estimated secondary migration were compiled primarily from Forms ORR-11 submitted by the States. At the time these estimates were compiled, all State data submissions were considered to be final. Findings from the February 1985 refugee child count of the U.S. Department of Education were also used selectively to adjust State population estimates.

Estimates have been developed separately for refugees and entrants and then combined into a total estimated 3-year refugee/entrant population for each State. In doing so, ORR excluded from the population totals nationwide 3,600 refugees who were resettled subject to a full Federal match of $1,000 under ORR's voluntary agency program (often referred to as the matching-grant program) with national voluntary refugee resettlement agencies. The social service funds available to serve refugees not covered by the voluntary agency program are limited and, ORR believes, should be directed to the areas where those refugees live.

Table 1, below, shows the estimated three-year populations, as of October 1, 1985, of all refugees (col. 1), excluding those matching-grant refugees discussed above; entrants resettled between October 1, 1982 and September 30, 1985 (col. 2); the total of these figures (col. 3); the formula amounts which the population estimates yield (col. 4); the proposed allocations after allowing for the minimum amounts (col. 5); and the amount available as an incentive to States to use MAA's as service providers (col. 6).

A detailed explanation of the development of data used in this formula allocation can be obtained by writing to the address indicated in Section V of this notice.

IV. Proposed Allocations

The following allocations are proposed for refugee social services in FY 1986:

TABLE 1.—ESTIMATED THREE-YEAR REFUGEE/ENTRANT POPULATIONS OF STATES PARTICIPATING IN THE REFUGEE PROGRAM AND SOCIAL SERVICE FORMULA AMOUNTS AND PROPOSED ALLOCATIONS FOR FY 1986

State	Refugees	Entrants	Total	Formula amount	Proposed allocation	MAA incentive allocation
	(1)	(2)	(3)	(4)	(5)	(6)
Alabama	939	0	939	$160,972	$160,972	$9,078
Arizona	2,117	0	2,117	362,915	362,915	20,461
Arkansas	807	0	807	138,343	138,343	7,801
California	64,652	104	64,756	11,101,047	11,101,047	625,975
Colorado	2,008	25	2,033	348,515	348,515	19,649
Connecticut	2,474	11	2,485	426,001	426,001	24,016
Delaware	27	0	27	4,629	45,000	5,000

V. State Evidence on Refugee Population

If a State wishes ORR to reconsider its population estimate, it should submit written evidence through its ORR Regional Director. Requests will be evaluated according to a strict standard. The following is the type of evidence which would be considered appropriate:

- Documentation and discussion should be confined to the population entering during fiscal years 1983, 1984, and 1985, and should clearly identify what refugee or entrant groups are being discussed.
- Evidence should include a description of the information collection system(s) used by the State, including data sources, time period covered, timeliness, and validation procedures.
- Special studies and reports can be considered only if they are submitted for review.
- An example of acceptable evidence would be a list of refugees identified by name, alien number, date of arrival, and case size, if appropriate.

Any State evidence on population estimates should be submitted separately from comments on the proposed allocation formula no later than 30 days from date of publication of this notice and should be addressed to: Dr. Linda W. Gordon, Office of Refugee Resettlement, Room 1229, Switzer Building, 330 C Street, SW., Washington, DC 20201, Telephone: (202) 245–1967.

VI. Paperwork Reduction Act

This notice does not create any reporting or recordkeeping requirements requiring OMB clearance.

BILLING CODE 4190-11-M

National Institutes of Health

National Cancer Institute; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Cancer Center Support Review Committee, National Cancer Institute, National Institutes of Health, March 20–21, 1986, Holiday Inn Crown Plaza, 1750 Rockville Pike, Rockville, Maryland 20852. This meeting will be open to the public on March 20, from 8:30 a.m. to 9:30 a.m. to review administrative details. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sections 552(b)(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on March 20 from approximately 9:30 a.m. to recess; and on March 21 from 8:30 a.m. to adjournment, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the application, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20892 (301/496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. John Abrell, Executive Secretary, Cancer Center Support Review Committee, National Cancer Institute, Westwood Building, Room 828, National Institute of Health, Bethesda, Maryland 20892 (301–496–9767) will furnish substantive program information.

Dated: February 14, 1986.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140-01-M

National Heart, Lung, and Blood Institute; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Heart, Lung, and Blood Institute Board of Scientific Counselors, May 15 and 16, 1986, National Institutes of Health, 9000 Rockville Pike, Building 10, Room 7N214, Bethesda, Maryland 20892. This meeting will be open to the public from 9:00 a.m. to 4:00 p.m. May 15 and from 9:30 a.m. to 12 noon on May 16 for discussion of the general trends in research relating to cardiovascular, pulmonary and certain hematologic diseases. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public from 12 noon to adjournment May 16 for the review, discussion, and evaluation of individual programs and projects conducted by the National Institutes of Health, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Terry Bellicha, Chief, Public Inquiry Reports Branch, National Heart, Lung, and Blood Institute, Building 31, Room 4A21, National Institutes of Health, Bethesda, Maryland 20892, phone (301) 496–4236, will provide a summary of the meeting and a roster of the Board members. Substantive program information may be obtained from Dr. Jack Orloff, Director, Division of Intramural Research, NHLBI, NIH, Building 10, Room 7N214, phone (301) 496–2116.

Dated: February 14, 1986.

Betty J. Beveridge,

NIH Committee Management Officer.

BILLING CODE 4140-01-M

National Institute of Allergy and Infectious Diseases; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Allergy and Clinical Immunology Subcommittee of the Allergy, Immunology, and Transplantation Research Committee, National Institute of Allergy and Infectious Diseases, on March 11–14, 1986, in Conference Room 10, Building 31C, at the National Institutes of Health, Bethesda, Maryland 20892.

The meeting will be open to the public from 1:30 p.m. to 1:50 p.m. on March 11 and from 8:00 a.m. to 8:35 a.m. on March 13 to discuss administrative details relating to committee business and for program review. Attendance by the public will be limited to space available. In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code, and section 10(d) of Pub. L. 92–463, the meeting of the Allergy and Clincial Immunology Subcommittee will be closed to the public for the review, discussion, and evaluation of individual grant applications and contract proposals from 1:50 p.m. on March 11 until recess on March 12 and from 8:40 a.m. on March 13 until adjournment on March 14. These applications, proposals, and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Lynn Trible, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A–32, National Institute of Health, Bethesda, Maryland 20892, telephone (301) 496–5717, will provide summaries of the meetings and rosters of the committees members.

Dr. Nirmal K. Das, Executive Secretary, Allergy, Immunology and Transplantation Research Committee, NIAID, NIH, Westwood Building, Room 706, Bethesda, Maryland 20892, telephone (301) 496–7966, will provide substantive program information.

DEPARTMENT OF INTERIOR

Bureau of Land Management

Colorado; Canon City District Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given in accordance with Pub. L. 94–579 that the Canon City District Advisory Council Meeting will be held on Thursday, March 20, 1986, 8:30 a.m. to 5 p.m., in the Community Room of the First National Bank Building, 9th and Royal Gorge Boulevard, Canon City, Colorado. The meeting agenda will include:

1. Current issues including Gramm/Rudman budget reductions, National Wildlife Federation court injunction, Foreset Service-BLM Interchange Proposal, Grazing Boards and Fees.
2. Election of Officers, if quorum is present.
3. Project Pride workshop.
4. Information on the San Luis Resource Management Plan and workshop on issues and criteria.
5. Reports from Area Managers on current programs.
6. Public presentations to the council (open invitation). The meeting is open to the public. Persons interested may make oral presentations to the council at 10 a.m. or they may file written statements for the council's consideration. The District Manager may limit the length of

BILLING CODE 4310-JB-M

Minerals Management Service

Outer Continental Shelf; Development Operations Coordination; Shell Offshore, Inc.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Shell Offshore Inc. has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 1249, Block 162, South Timbalier Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Venice, Louisiana.

DATE: The subject DOCD was deemed submitted on February 20, 1986.

ADDRESS: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Boulevard, Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service; Gulf of Mexico OCS Region; Rules and Production; Plans, Platform and Pipeline Section; Exploration/Development Plans Unit; Phone (504) 838-0875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected States, local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: February 21, 1986.

J. Rogers Pearcy,

Acting Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB-167; Sub-1078X]

Consolidated Rail Corporation; Abandonment in Erie County, NY; Exemption

Applicant has filed a notice of exemption under 49 CFR 1152 Subpart F—*Exempt Abandonments* to abandon its 0.51-mile line of railroad between milepost 393.67 and milepost 394.18.

Applicant has certified (1) that no local or overhead traffic has moved over the line for at least 2 years and (2) that no formal complaint filed by a user of rail service on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected pursuant to *Oregon Short Line R. Co.—Abandonment-Goshen,* 360 I.C.C. 91 (1979).

The exemption will be effective March 29, 1986 (unless stayed pending reconsideration). Petitions to stay must be filed by March 10, 1986, and petitions for reconsideration, including environmental, energy, and public use concerns, must be filed by March 19, 1986, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Charles E. Mechem, 1138 Six Penn Center Plaza, Philadelphia, PA 19103-2959.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio.*

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

Decided: February 11, 1986.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 30743]

The Pittston Company; Control Exemption; Buffalo Creek and Gauley Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempts, under 49 U.S.C. 10505, the control by The Pittston Company of Buffalo Creek and Gauley Railroad Company from the requirements of 49 U.S.C. 11343 subject to protective conditions for all employees: (1) *Nunc pro tunc* from April 27, 1981, until the execution of a new voting trust agreement, which has been approved; and (2) for the future, when the new voting trust agreement terminates.

DATES: This exemption is effective on March 31, 1986. Petitions to stay must be filed by March 10, 1986, and petitions to reopen must be filed by March 19, 1986.

ADDRESSES: Send pleadings referring to Finance Docket No. 30743 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423

(2) Petitioner's representatives, Chandler L. van Orman, 888 17th Street NW., Suite 902, Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275-7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289-4357 (DC Metropolitan area) or toll free (800) 424-5403.

Decided: February 18, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 84-17]

James M. Sornsin, M.D.; Revocation of Registration; Stay of Revocation With Conditions

On April 17, 1984, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), directed an Order To Show Cause to James M. Sornsin, M.D. (Respondent), at the Henry Ford Hospital, 3799 West Grand Boulevard, Detroit, Michigan, and Cullman Orthopaedic Clinic, 402 Arnold Street NW., Suite 208, Cullman, Alabama. The order to show cause sought to revoke DEA Certificates of Registration AS9115658 and AS1971945 issued to Respondent. The statutory ground under 21 U.S.C. 824(a)(3) for the revocation of AS9115658 was the suspension of Respondent's medical license by the State of Michigan, Department of Licensing and Regulation, Board of Medicine, for a period of one year, thus terminating Respondent's authority to possess, dispense, administer or otherwise handle controlled substances in the State of Michigan. The statutory ground under 21 U.S.C. 824(a)(2) for the revocation of AS1971945 was Respondent's conviction on May 20, 1983, in the United States District Court for the Eastern District of Michigan, for unlawful distribution of controlled substances in violation of 21 U.S.C. 841(a)(1), a felony relating to controlled substances. Respondent, through counsel, requested a hearing on the issues raised by the order to show cause. The matter was placed on the docket of Administrative Law Judge Francis L. Young. Following prehearing procedures, a hearing was held before Judge Young in Nashville, Tennessee on March 21, 1985. The parties having stipulated that Respondent no longer practiced medicine in the State of Michigan, Respondent consented to the revocation of AS9115658 issued to him at an address in Detroit. The findings of the Administrative Law Judge, therefore, relate to whether the Administrator should, in the exercise of his discretion, revoke AS1971945 issued to Respondent at an address in Cullman, Alabama.

On August 6, 1985, the Administrative Law Judge issued his opinion and recommended ruling in this matter. Government counsel filed exceptions to the recommended ruling on August 14, 1985, pursuant to 21 CFR 1316.66. The Administrative Law Judge transmitted the record to the Administrator on September 6, 1985. On October 28, 1985, the Administrator gave counsel for both sides until December 2, 1985 to comment on any issues raised by the transmittal letter of the Administrative Law Judge. Both Government counsel and counsel for Respondent wrote letters commenting on the transmittal letter of the Administrative Law Judge, who also wrote a letter to the Administrator on December 3, 1985, even though the Administrator had not asked him for his thoughts on any comments that might be filed by counsel. The Administrator has considered the entire record in this matter and hereby enters his final order, based on the following findings of fact and conclusions of law.

The Administrative Law Judge found that Respondent pled guilty in Federal court in Detroit to distribution of Talwin, a Schedule IV controlled substance, in violation of 21 U.S.C. 841(a)(1). Respondent was sentenced to three years incarceration, all but six months of which was suspended, and fined $10,000. This plea stemmed from Resondent's involvement with two "clinics" in Detroit, Med-Care Clinic and United Physicians Medical Center. Investigation of these "clinics" by the FBI revealed them to be nothing more than fronts for the diversion of significant quantities of controlled substances. Respondent was hired at Med-Care in January, 1981. During the spring of 1981 Respondent and other physicians employed at the "clinic" wrote very large numbers of prescriptions for controlled substances without any medical justification. For example, on May 15, 1981, Respondent wrote 72 prescriptions for controlled substances filled at one Detroit pharmacy alone. Working part-time on that day, Respondent could not have seen any "patient" for more than four minutes. Similarly, the records of this pharmacy show that Respondent wrote 140 Ambenyl, 82 Desoxyn, 92 Preludin, 162 Talwin and 69 Tussionex prescriptions between January and August, 1981. Most of the patients' addresses on these prescriptions were found to be fictitious.

The Administrator finds that business at the "clinics" grew so brisk that the employees abandoned any pretext of "patient care." Office employees simply took orders from the "patients" for whatever controlled substances they desired. The physicians would proceed to write the prescriptions, filling in fictitious information on patient charts. Whie the record does not reveal whether Respondent worked at the clinic when business was so brisk, the record does show that in March, 1981, Respondent did write an inordinate number of controlled substance prescriptions for "patients" he claimed he saw. On March 4, 1981, he wrote 45 prescriptions; on March 7, a Saturday, 66 prescriptions; on March 10, 69 prescriptions; on March 12, 57 prescriptions; on March 17, 65 prescriptions on March 19, 91 prescriptions; on March 24, 62 prescriptions and March 26, 43 prescriptions. Respondent generated $12,000 worth of business during the month of March, 1981, one-half of which was paid to him.

The Administrative Law Judge found that Respondent cooperated with the FBI in its investigation of the "clinics" and their operators. The Administrative Law Judge further found that after Respondent's release from incarceration in November, 1983, he entered the practice of orthopedics in Cullman, Alabama. A physician who works with Respondent testified that he would be willing to monitor Respondent's prescribing of controlled substances were the Administrator to condition Respondent's continued registration on a monitoring of his prescribing of controlled substances.

After the hearing and the filing of proposed findings of fact and conclusions of law by the parties, the Administrative Law Judge, *sua sponte,* decided to include in his opinion and recommended ruling an agreement between this agency and another physician involved in the same "clinic" investigation. Government counsel took exception to the inclusion of the agreement. While the Administrator has considered the rest of the record in reaching his decision, he did not consider the agreement in the other case, as recommended by the Administrative Law Judge. The Government maintains, and the Administrator concurs, that the facts and circumstances surrounding this independent agreement outside the judicial context should not be treated as judicial precedent. Accordingly, the Administrator did not consider the other agreement in making his determination in this matter.

The Administrative Law Judge recommended that the Administrator not revoke the registration of Respondent at the Alabama address. Rather, he recommended that

VOL 51 ISS 39 FE 27 1986 UMI

Respondent be registered, subject to four conditions. The Administrative Law Judge based this recommendation on the agreement reached in the other case and the facts brought forward during the hearing in this matter. The four conditions recommended by Judge Young are:

1. Respondent is to maintain a written log for three years of all prescriptions for controlled substances he writes and of all such substances he administers and dispenses, beginning on the effective date of the final order in this Matter;

2. Dr. Vincent F. Bergquist of the Cullman Orthopaedic Clinic will regularly review the log prepared by Respondent. Dr. Bergquist will discuss its contents with Respondent and satisfy himself that each prescription, administration and dispensation there recorded appears to have been done for a legitimate medical purpose;

3. Three months from the effective date of this final order, and every three months thereafter for a period of three years, Respondent will send the log for the preceding three months to a DEA office specified in the final order; and

4. Before Respondent sends in the log to the DEA office, Dr. Bergquist will endorse at the end of it, a statement to the effect that condition two above has been complied with.

The Administrative Law Judge concluded that the record "amply" demonstrates that Respondent has now "launched in a wholly sound and ethical medical practice" and that he enjoys the confidence of his professional colleagues, both as to competence and to character. The Administrative Law Judge correctly pointed out that this is more than can be said of most respondents coming before him. The Administrative Law Judge also noted Respondent's youth and the fact that he has a young family and good professional prospects.

The Administrator adopts the recomendation of the Administrative Law Judge. The factors the Administrator sees in mitigation of Respondent's past activities are his relative youth and the vouching of Dr. Bergquist. Respondent is admonished not to engage in the improper handling of controlled substances again in his professional career. Any such action on his part during the next three years will swiftly and surely lead to sanctions against both him and his DEA registration.

The Administrator is not satisified that the recommendation of the Administrative Law Judge sufficiently protects the public in one important regard. The Administrative Law Judge recommends that the Administrator register Respondent and provide no mechanism for the summary revocation of the registration in the event that Respondent does relapse into his former prescribing practices. Therefore, the Administrator will revoke AS1971945 and deny all pending applications for renewal, but will stay the revocation and denial pending Respondent's successful completion of the conditions recommended by the Administrative Law Judge and adopted by the Administrator. In the event that Dr. Bergquist cannot certify Respondent's compliance, or if any of Respondent's prescriptions are not legitimately issued, the Administrator will summarily suspend AS1971945 pending any hearing on the violation. Respondent is to send the log to the DEA New Orleans Field Division, to the attention of the Diversion Group Supervisor. Upon the successful completion by Respondent of the terms of the probationary registration, the Administrator will grant the Respondent a plenary Certificate of Registration.

In consideration of the facts in this case, the Administrator hereby adopts the recommendation of the Administrative Law Judge to the extent that Respondent is to submit logs to the DEA New Orleans Field Division, subject to the conditions set forth above. Pursuant to 21 U.S.C. 824(a)(2), as delegated to the Administrator of DEA by 21 U.S.C. 871 an 28 CFR 0.100(b), the Administrator hereby revokes DEA Certificate of Registration AS1971945, denies any pending applications for renewal, and stays the revocation and denial pending the successful completion by James M. Sornsin, M.D. of the terms numbered one through four above. The revocation, denial and stay are effective March 31, 1986.

Dated: February 24, 1986.

John C. Lawn,
Administrator.

[FR Doc. 86-4283 Filed 2-26-86; 8:45 am]

BILLING CODE 4410-09-M

Controlled Substances; Establishment of 1986 Aggregate Production Quota for Methamphetamine (for Conversion)

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of an established 1986 aggregate production quota.

SUMMARY: This notice establishes the 1986 aggregate production quota for methamphetamine (for conversion).

DATE: This order is effective February 27, 1986.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug Control Section, Drug Enforcement Administration, 1405 I Street NW., Washington, DC 20537, Telephone: (202) 633-1366.

SUPPLEMENTARY INFORMATION: Section 306 of the Controlled Substances Act, (21 U.S. Code 826), requires the Attorney General to establish Aggregate Production Quotas for all controlled substances in Schedules I and II each year. This responsibility has been delegated to the Administrator of the Drug Enforcement Administration pursuant to § 0.100 of Title 28 of the Code of Federal Regulations.

On December 27, 1985, a notice proposing to establish a 1986 Aggregate Production Quota for methamphetamine (for conversion) was published in the Federal Register (50 FR [illegible]). All interested persons were invited to comment on or object to the proposal on or before January 27, 1986. No comments or objections were received.

Pursuant to sections 3(c)(3) and 3(e)(2)(B) of Executive Order 12291, the Director of the Office of Management and Budget has been consulted with respect to these proceedings.

The Administrator hereby certifies that this matter will have no significant impact upon small entities within the meaning and intent of the Regulatory Flexibility Act, 5 U.S. Code 601, et seq. The establishment of annual production quotas for Schedules I and II controlled substances is mandated by law and by international commitments of the United States. Such quotas impact predominantly upon major manufacturers of the affected controlled substances.

Therefore, under the authority vested in the Attorney General by section 306 of the Controlled Substances Act of 1970 (21 U.S.C. 826) and delegated to the Administrator of the Drug Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations, the Administrator hereby orders that the 1986 aggregate production quota for methamphetamine (for conversion), expressed in grams of anhydrous base, be established as follows:

Basic Class	1986 Aggregate Production Quota (grams)
Schedule II	
Methamphetamine (for conversion)	1,996,000

Dated: February 7, 1986.

John C. Lawn,
Administrator, Drug Enforcement Administration.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

Employee Welfare and Pension Benefit Plans Advisory Council; Meeting

Pursuant to sectin 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, a public meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held at 9:30 a.m., March 14, 1986, at the U.S. Department of Labor, 200 Constitution Avenue, NW., Room C-5515—Seminar Room 6, Washington, DC 20210.

The Advisory Council has formed a 12-member task force to study issues relating to pension plan termination in which excess assets revert to the sponsor of employee benefit pension plans covered by ERISA.

The Advisory Council previously held a public hearing on January 13, 1986 at which time testimony was taken from employee representatives, employer representatives, and other interested individuals and groups.

The purpose of the March 14 meeting is to specifically take testimony from participants and beneficiaries of such terminated plans who have not previously testified. The witnesses are requested to relate their experiences to the Advisory Council and to make suggestions relating to the matter as they deem relevant.

Individuals wishing to address the Advisory Council should submit requests on or before March 10, 1986 to Edward F. Lysczek, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Room N-5677, 200 Constitution Avenue, NW., Washington, DC 20210 (202/523-8753). Oral presentations will be limited to ten minutes, but witnesses may submit an extended statement for the record.

Signed at Washington, DC, this 25th day of February, 1986.

T. Timothy Ryan, Jr.,
Chairman, ACEWPBP Task Force on Terminations and Reversions.

BILLING CODE 4510-29-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 86-15]

NASA Advisory Council, Space Systems and Technology Advisory Committee; Open Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Systems and Technology Advisory Committee, Informal Task Force on Automation and Robotics.

DATE: March 11, 1986, 8 a.m. to 4:30 p.m.

ADDRESS: National Aeronautics and Space Administration, Lyndon B. Johnson Space Center, Building 1, Room 966, Houston, TX 77058.

FOR FURTHER INFORMATION CONTACT: Dr. Melvin Montemerlo, Code R, National Aeronautics and Space Administration, Washington, DC 20546 (202/453-2743),

SUPPLEMENTARY INFORMATION: The Space Systems and Technology Advisory Committee (SSTAC) was established to provide technology activities in the Office of Aeronautics and Space Technology (OAST). The Informal Task Force on Automation and Robotics, chaired by Dr. Stanley Weiss, is comprised of six members and was formed to provide a review of OAST's automation and robotics program. The meeting will be opened to the public up to the seating capacity of the room (approximately 75 persons including the Task Force members and other participants). The meeting must be held at this time in order that it be in conjunction with the Office of Space Station's Automation and Robotics Panel meeting.

Type of meeting: Open.

Dated: February 21, 1986.

Richard L. Daniels,
Advisory Committee Management Officer, National Aeronautics and Space Administration.

BILLING CODE 7510-01-M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Agency Records Schedules; Availability

AGENCY: National Archives and Records Administration, Office of Records Administration.

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes a notice at least once monthly of all agency records schedules (requests for records disposition authority) which include records proposed for disposal. The first notice was published on April 1, 1985. Records schedules identify records of continuing value for eventual preservation in the National Archives of the United States and authorize agencies to dispose of records of temporary value. NARA invites public comment on proposed records disposals as required by 44 U.S.C. 3303a(a).

DATE: Comments must be received in writing on or before April 28, 1986.

ADDRESS: Address comments and requests for single copies of schedules identified in this notice to the Records Appraisal and Disposition Division (NIR), National Archives and Records Administration, Washington, DC 20408. Requestors must cite the control number assigned to each schedule when requesting a copy. The control number appears in parenthesis immediately after the title of the requesting agency. Copies of the schedules are also available for public inspection during the comment period at the Office of the Federal Register, Room 8401, 1100 L Street, NW., Washington, DC 20408.

SUPPLEMENTARY INFORMATION: Each year U.S. government agencies create billions of records in the form of paper, film, magnetic tape, and other media. In order to control the accumulation of records, Federal agencies prepare records schedules which specify when the agency no longer needs them for current business and what happens to the records after the expiration of this period. Destruction of the records requires the approval of the Archivist of the United States, which is based on a thorough study of their potential value for future use. A few schedules are comprehensive; they list all the records of an agency or one of its major subdivisions. Most schedules cover only one office, or one program, or a few series of records, and many are updates of previously approved schedules.

BEST COPY AVAILABLE

VOL 51 ISS 39 FE 27 1986 UMI

The monthly public notice identifies the Federal agencies and their appropriate subdivisions requesting disposition authority, includes a control number assigned to each schedule, and briefly identifies the records scheduled for disposal. The complete records schedule contains additional information about the records and their disposition. Additional information about the disposition process will be furnished with each copy of a records schedule requested.

Schedules Pending Approval

1. Department of Agriculture, Forest Service, Office of Information (N1–95–86–1). Motion picture production files.

2. Department of the Air Force, Directorate of Administration, Records Management Branch (N1–AFU–86–29). Military Standard Requisitioning and Issue Procedures (MILSTRIP) and Military Standard Billing System (MILSBILLS) computer listings.

3. Department of the Air Force, Directorate of Administration, Records Management Branch (N1–AFU–86–30). Commissary store records.

4. Department of the Air Force, Directorate of Administration, Records Management Branch (N1–AFU–86–31). Commissary records.

5. Department of the Air Force, HQ, USAF, Directorate of Administration, (N1–AFU–86–33). Air Force Special Activities Center Personnel Selection Panel records.

6. Department of the Air Force, HQ, USAF, Directorate of Administration, (N1–AFU–86–34). Annual summaries of real property transactions.

7. Department of the Air Force, Directorate of Administration, Records Management Branch (N1–AFU–86–36). Transportation requests.

8. Department of the Air Force, Directorate of Administration, HQ, USAF, Records Management Branch (NC1–AFU–86–35). Administrative records of base engineer emergency forces.

9. Department of the Army, Records Management Operation Office, Standards Division (N1–AU–86–5). Munitions manufacturing licenses and technical assistance agreements files.

10. Department of the Army, Records Management Operations Office (N1–AU–86–23). Ration control records.

11. Department of the Army, The Adjutant General's Office, Records Management Division (NC1–AU–83–11). Hazardous material management records.

12. Department of the Army, Office of the Adjutant General, Records Management Division (NC1–AU–85–47). Non-appropriated fund activities loan and grant records.

BILLING CODE 7515-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Subcommittee on Safety Philosophy, Technology, and Criteria, and Extreme External Phenomena; Meeting

The ACRS Subcommittee on Safety Philosophy, Technology, and Criteria and Extreme External Phenomena will hold a joint meeting on March 12, 1986, Room 1046, 1717 H Street, NW, Washington, DC.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, March 12, 1986—8:45 A.M. until conclusion of business

The Subcommittee will discuss the status of the EDO's review of the two-year trial use of the 1983 proposed Safety Goal Policy and recommendations for the future use of a safety goal policy and the status of the NRC Staff's development of containment performance criteria. The Subcommittee will also review the NRC Staff's proposed resolution for USI A–17, "Systems Interaction in Nuclear Power Plants." The Subcommittee on Extreme External Phenomena will review the 1986 Ohio earthquake and the implications for the Perry Nuclear Power Plant.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommitee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Dr. Richard Savio (telephone 202/634-3267) between 8:15 a.m. and 5:00 P.M. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: February 24, 1986.

Morton W. Libarkin,

Assistant Executive Director for Project Review.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-22928; File No. SR-BSECC-86-1]

Self-Regulatory Organizations; Proposed Rule Change by Boston Stock Exchange Clearing Corp. Relating to an Amendment to the Schedule of Trade Recording Fees

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(c)(1), notice is hereby given that on January 31, 1986 the Boston Stock Exchange Clearing Corporation ("BSECC") filed with the Securities and Exchange Commisison the proposed changes as described in items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organizations's Statement on the Terms of Substance of the Proposed Rule Change

The Boston Stock Exchange Clearing Corporation ("BSECC") has reduced its trade recording fees, effective February 3, 1986. The amendment reduces the trade recording charge per 100 shares from $.44 per hundred to $.29 per hundred for the first 2,500 trades per month. In addition the previous rate of $.00 per hundred for trades in excess of 7,500 per month has been increased to $.05 per hundred. Finally the maximum charge per tradesize has been reduced from $100 to $50.

Self-Regulatory Organizations's Statement of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most signficant aspects of such statements.

(A) Self-Regulatory Organizations's Statement of the Purpose and Statutory Basis for, the Proposed Rule Change

(1) The BSECC has reduced trade related charges in order to encourage future growth, as well as to pass along to members cost reductions realized through growth and more efficient operations.

(2) The changes herein are changes in fees and therefore, are summarily made effective as of February 3, 1986, pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934, as amended.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Corporation does not believe that this proposed change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments were solicited from the Fee Committee of the BSECC. This committee is composed of representatives of Dealer-Specialist, Retail and Institutional members of the BSECC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by March 20, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: February 19, 1986.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 86–4218 Filed 2–26–86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-22908; File No. SR-DTC-86-01]

Self-Regulatory Organizations; Depository Trust Co.; Filing of Proposed Rule Change

The Depository Trust Company ("DTC") on January 29, 1986 submitted a proposed rule change to the Commission under section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"). DTC's rule change would allow DTC participants to accept invitations to tender securities and to surrender those securities through DTC. The Commission is publishing this notice to solicit public comment on the proposal.

DTC's proposal would allow DTC participants to use DTC's voluntary offering program services to process acceptances of invitations to tender securities. Currently, participants must communicate directly with the tender agent and, to the extent those securities are in the depository, must withdraw those securities from the depository in physical form and surrender securities to the tender agent. Under the proposed rule change, participants would have the option to accept eligible invitations either through DTC or directly with the tender agent and could surrender securities to the tender agent by book-entry movements from their accounts at DTC to the tender agent's account at DTC.

VOL 51
ISS 39
FE 27
1986
UMI

The procedures for processing acceptances of invitations to tender securities are substantially similar to DTC's participant operating procedures for exchange offers and cash tender offers. DTC would inform participants whether an invitation qualifies under the program. In accordance with the instructions of participants accepting an eligible invitation, DTC would effect book-entry deliveries of the tendered securities from their accounts to the tender agent's account and would forward their instructions to the tender agent. When DTC receives cash payments from the tender agent for tendered securities, DTC would distribute those payments to its participants through DTC's money settlement system.

DTC's invitation to tender securities program is designed to simplify the process of accepting invitations and tendering securities to tender agents and to permit DTC to continue its regular services rather than making subject securities ineligible for such depository services. Under the program, participants could pledge, by book-entry, their rights to receive the cash payment based on their bids in return for tendered securities or the return of some or all of the tendered securities in accordance with the terms of the invitation. Other depository services, including transfers and withdrawals, would not be available for securities to be issued in exchange for tendered securities until the tender agent releases those securities to DTC.

DTC believes that the proposal is consistent with the Act in general, and with section 17A of the Act in particular, because it facilitates the prompt and accurate clearance and settlement of securities transactions. In addition, DTC believes that the proposal is consistent with the Act because it would allow participants an economical and orderly method for accepting invitations to receive cash payment in return for voluntary tender of securities.

Copies of all documents relating to the proposal, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, may be inspected and copied at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC and at DTC's principal office.

To assist the Commission in determining whether to approve the proposal or to institute disapproval proceedings, the Commission invites public comment on the proposal. Comments should refer to File No. SR-DTC-86-01. Please file six copies of comments with the Secretary of the Commission, 450 Fifth Street, NW., Washington.

Dated: February 21, 1986.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 86-4219 Filed 2-26-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-22926; File No. SR-NSCC-85-09]

Self-Regulatory Organizations; Filing and Order Temporarily Approving on an Accelerated Basis Proposed Rule Change of the National Securities Clearing Corp.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("the Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on December 31, 1985, the National Securities Clearing Corporation ("NSCC") filed with the Securities and Exchange Commission File No. SR-NSCC-85-09. The Commission is publishing this notice to describe the proposal and to solicit comments on it. The Commission also is temporarily approving, on an accelerated basis, File No. SR-NSCC-85-09 for the reasons discussed below.

I. Description

NSCC's proposal amends NSCC's rules and procedures to: (1) Establish as a pilot program a Mutual Fund Settlement, Entry and Registration Verification Service (called "Fund/Serv Service"); (2) create a new category of membership ("Fund/Serv Member") and membership qualifications for the Fund/Serv Service; (3) make changes to certain existing rules regarding Fund/Serv Members' rights, privileges and obligations; and (4) establish fees for the Fund/Serv Service.

1. The Fund/Serv Service

New NSCC Rule 52 establishes the Fund/Serv Service that will enable NSCC settling members to submit mutual funds purchase and redemption orders to NSCC. NSCC will transmit all data to Mutual Fund Processors.[1] If NSCC is unable to transmit order data, or the Mutual Fund Processor fails to receive data, the Mutual Fund Processor may obtain summary data to the extent it is available.

On trade date ("T") NSCC settling members submit trade data to NSCC.[2] NSCC will check to ensure that the data is submitted in acceptable format but will not check the accuracy of the data. NSCC will transmit all data submitted in acceptable form to the appropriate Mutual Fund Processor on the evening of T. Mutual Fund Processors will have two business days after T (until T+2) to confirm or reject an order received. Mutual Fund Processors can also correct the dollar or share amounts on confirmed orders (reconfirm a confirmed order) up to T+2. NSCC settling members will have until T+2 to submit corrected orders to the extent they disagree with the terms of an order as confirmed or reconfirmed by a Mutual Fund Processor. A Mutual Fund Processor will have until T+3 to reject any changes submitted by an NSCC settling member.

Mutual Fund Processors that receive orders from members outside of NSCC's system may originate orders ("Fund Originated Orders") for the purpose of confirmation and settlement within the Fund/Serv Service System. Fund Originated Orders must be submitted to NSCC on T+1. NSCC will submit the orders to the appropriate member on the evening of T+1. Members will have until T+2 to accept, reject or correct an order. The Mutual Fund Processor need not take any action if he determines to accept a correction submitted by an NSCC settling member. If the Mutual Fund Processor does not reject the correction by T+3, NSCC will settle the order based upon the correction. If the corrected order is rejected, NSCC will delete the order from the Fund/Serv Service.

Members may also submit "As of" orders up to 6 months after T. A trade not submitted on trade date or a trade previously submitted but rejected from the system may be submitted as an "As of" trade. The Mutual Fund Processor can either accept or reject such an order but cannot make any corrections.

Mutual fund transactions will utilize NSCC's existing settlement system. Orders settled through the Fund/Serv Service, however, are not guaranteed by NSCC. Accordingly, to the extent one side failed to pay for a transaction, the contra side would be required to return to NSCC any funds received from NSCC.

Mutual fund purchases will settle automatically on T+5. For mutual fund liquidations, the settlement date could vary from T+5 to T+15, depending on whether the securities are registered in street name or the customer's name. If the securities are registered in street name settlement would occur on T+5. For securities registered in the customer's name, the system will delay

---

[1] A Mutual Fund Processor is a settling member or a Fund/Serv Member that receives mutual fund purchase and redemption orders from NSCC on behalf of eligible mutual funds.

[2] As specified in the new rules, the time frames for action under the new system are set out in NSCC's procedures.

settlement until the Mutual Fund Processor releases the transaction for settlement.[3]

The Mutual Fund Processor will have until T+14 to submit the release. Settlement will occur on the next business day following receipt by NSCC or a release for settlement. Any liquidations remaining in a "delayed" status on T+15 will be deleted from the system.

The Fund/Serv Service also will enable a member to submit registration instructions to a Mutual Fund Processor to the extent that the order was confirmed and settled through the Fund/Serv Service. NSCC will accept registration instructions from T+5 through T+15. All settled orders pending registration instructions on T+15 will be deleted from NSCC's system on T+16.

2. Qualifications for Use of the Fund/Serv System

In order for mutual funds to utilize the Fund/Serv Service, NSCC, in new Rule 51, creates a new category of membership, called a Fund/Serv Member. New Rule 51 defines a Fund/Serv Member as a principal underwriter as defined in section 2(a)(29) of the Investment Company Act of 1940 that is also a registered broker/dealer or an organization that has demonstrated to NSCC's Board of Directors that it could materially benefit from access to the Fund/Serv Service. The rule also requires that the Fund/Serv Member enter into an agreement with NSCC setting forth the rights and obligations of the Fund/Serv Member.

During the pilot program, NSCC proposes to limit participation to no more than four settling members (broker-dealers) and five Fund/Serv members (mutual fund complexes). In its filing, NSCC indicates that it expects the pilot program to last no longer than twelve months.

3. Conforming Amendments to NSCC's Rules

NSCC also is amending many of its existing rules to accommodate the new service and to set forth a Fund/Serv Member's rights and obligations. For example, NSCC Rule 4 is amended to give NSCC the authority to request a clearing fund deposit from Fund/Serv members. NSCC has determined, at least for the pilot program, not to require Fund/Serv Members to make clearing fund deposits.

NSCC's rule change gives it the right to inspect the Fund/Serv Member's books and records. The proposal also establishes minimum standards of financial responsibility and operational capability. These standards require a Fund/Serv applicant to have a previous business history, capable personnel and sufficient financial ability to meet obligations to NSCC. Since NSCC will not, at least initially, require a clearing fund deposit, NSCC proposes a $500 million assets-under-management threshold for applicant funds under the pilot since it believes that a Fund/Serv Member who manages assets of this size would not likely be unable to meet its settlement obligations even if an extraordinary number of redemptions were to occur. The rules also require Fund/Serv applicants to complete a questionnaire, but because of NSCC's relative unfamiliarity with the mutual fund industry, NSCC has determined to defer development of a final questionnaire until a later time.

4. Fund/Serv Systems Fees

NSCC also is amending Rule 24, Charges For Services Rendered, to authorize the establishment of fees for the Fund/Serv Service. NSCC will charge a fee of $0.35 per side per confirmed transaction. In addition, NSCC will charge a participant fee of $50 per month. This fee covers the costs associated with account maintenance. Broker/dealer participants already paying the maximum participant fee of $150 per month will not incur additional monthly account maintenance charges.

II. NSCC's Rationale

NSCC believes that the proposal is consistent with the Act because it facilitates prompt and accurate clearance and settlement of securities transactions in investment company securities. NSCC is limiting participation in the Fund/Serv System, during the pilot program, to obtain experience with the operational aspect of that system. At the conclusion of the pilot, NSCC expects to offer the Fund/Serv Service to all members and qualifying mutual funds.

NSCC requests accelerated approval of the proposal under section 19(b)(2) of the Act. NSCC believes that accelerated approval is justified because the immediate implementation of the Fund/Serv Service would enable NSCC to provide an automated service for processing mutual fund transactions that is not currently available. Because of the significant growth in mutual funds as an investment vehicle and the manual processing of mutual fund transactions, NSCC believes that the speedy implementation of the service would greatly enhance the prompt and accurate processing of mutual fund transactions.

III. Discussion

The Commission agrees with NSCC that the proposed one year pilot is consistent with Section 17A of the Act. Currently, there are no centralized facilities or systems for the processing of mutual fund securities transactions. Rather, broker-dealers individually develop arrangements with mutual funds and fund transfer agents for the clearance and settlement of such transactions. The development of a central processor, coupled with uniform clearance and settlement procedures, could provide substantial efficiencies for both broker-dealers and for mutual funds and their agents. In recognition of this, in 1985, at the request of the Investment Company Institute and the National Association of Securities Dealers, NSCC began developing an automated clearing and settlement system for mutual fund transactions. The Fund/Serv Service is a result of that effort.

The proposal will enable NSCC to provide automated and centralized order entry, confirmation, registration and settlement services for mutual fund transactions. During the pilot, NSCC will monitor the Fund/Serv Service to ensure the safe and efficient processing of mutual fund transactions and will make changes necessary to provide such service to all NSCC members. In addition, the Fund/Serv Service will utilize the same facilities and the same basic settlement system currently used for other securities transactions. Before expiration of the pilot period, NSCC expects to submit a proposed rule change to establish a permanent system. The Commission therefore finds that the proposal is consistent with the Act and, in particular, with section 17A of the Act.

The Commission believes the implementation of the Fund/Serv Service will enable NSCC to provide an automated service for processing mutual fund transactions that is not currently available. In light of the significant growth of mutual funds as an investment vehicle and the manual processing of mutual fund transactions, the Commission agrees with NSCC that the speedy implementation on a pilot basis of the automated service is a significant step in enhancing the prompt and accurate processing of mutual fund transactions and therefore is in the

---

[3] Before securities registered in the customer's name can be liquidated, the customer must deliver properly endorsed securities to the broker-dealer. The broker-dealer then forwards them to the mutual fund transfer agent for registration in street name. This process normally can not be completed by T+3 to allow settlement to occur on T+4.

VOL 51 ISS 39 FE 27 1986 UMI

public interest. By limiting the number of broker-dealers in the pilot, and by restricting the pilot to a limited number of mutual funds with substantial assets under management, NSCC is proceeding in a careful, cautious manner while gaining significant experience with the operation of a permanent mutual fund securities processing system. The Commission therefore finds good cause for approving the proposal on an accelerated basis.

You are invited to submit written data, views and arguments concerning the proposal within 21 days from the date this is published in the Federal Register. Please file six copies of comments, referring to File No. SR-NSCC-85-09, with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, by March 20, 1986.

Copies of all documents related to the proposal, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, may be inspected and copied at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC, and at NSCC's principal office.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change (SR-NSCC-85-09) be, and it hereby is, approved through February 18, 1987.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: February 20, 1986.

Shirley E. Hollis,
Assistant Secretary.

BILLING CODE 8010-01-M

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Boston Stock Exchange, Inc.

February 20, 1986.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following securities:

Vestron Inc.
  Common stock, $0.01 par value (file no. 7-8800)
American Family Corporation
  Common stock, $0.10 par value (file No. 7-8801).

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before March 12, 1986, written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,
Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34-22935; File No. SR-NASD-85-19]

Self-Regulatory Organizations; Order Instituting Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change Submitted by the National Association of Securities Dealers, Relating to Proposed Fees for Information Disseminated by Means of the National Quotation Data Service

The National Association of Securities Dealers, Inc. ("NASD") has filed with the Commission pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b-4 thereunder [2] a proposed rule change [3] that would establish a charge of $79.00 per month for each subscriber terminal receiving full quotation information in NASDAQ securities through vendors other than the NASD or its NASDAQ subsidiary (the NASD has characterized this service as its National Quotation Data Service ("NQDS")).

I. Background

The Commission's firm quotation rule, Rule 11Ac1-1 under the Act, requires the NASD as of April 1, 1982, to make available to vendors full quotation information on those over-the-counter ("OTC") securities designated as National Market System ("NMS") Securities.[4] In light of that requirement, the NASD asked vendors whether they were interested in receiving this quotation information on NMS Securities. Only the Instinet Corporation ("Instient") [5]

The Commission granted the NASD a number of exemptions [6] from having to provide Instinet the data until after technical preparations and negotiations over access terms, with fee as the principal issue, were completed. After nearly two years of negotiations, the parties could not reach an agreement on fees. The NASD thereupon filed with the Commission its proposed fees for the NQDS.[7] Under the proposed fees, Instinet would pay $3,200 a month for the direct computer communication costs of transmitting the quotation information from the NASD to Instinet. Instinet's customers subscribing to the information would be charged by the NASD a monthly per terminal subscriber fee based on the NASD's $150 Level 2/3 fee.[8] The $150 fee would be reduced to reflect that Instinet would receive quotations in only NMS Securities.[9]

In response to the NASD's fee filing, on July 15, 1983, Instinet filed a petition with the Commission pursuant to section 11A(b)(5) of the Act alleging that the fees for NQDS were an inappropriate limitation or prohibition on access to services provided by the NASD as an exclusive processor of securities information. In its petition, Instinet sought access to quotation information on all NASDAQ securities, not just NMS Securities.[10]

On August 16, 1983, the Commission issued an order pursuant to section 11A(b)(5) of the Act preliminarily finding that at least with respect to those securities designated as NMS Securities, the proposed fees constituted a prohibition or limitation on access to services, and instituted a proceeding to determine whether the prohibition or limitation on access to services was inconsistent with the Act.[11] In that order, the Commission also solicited comments on certain issues raised in the proceeding, including whether Insitinet should receive access to quotation information on all NASDAQ securities and in a separate release instituted proceedings pursuant to section 19 of the Act to determine whether to approve or disapprove the proposed fees.[12]

After reviewing the record of the proceeding,[13] The Commission, on April 17, 1984, issued orders determining that, among other things,[14] because Instinet sought to distribute certain NASDAQ quotation information in competition with the NASD, which is an exclusive processor of that information, the proposed fees must be cost-based to ensure the neutrality and

[2] 17 CFR 240.19b-4.

[3] File No. SR-NASD-85-19. Notice of the filing was given by issuance of a Commission release and by publication in the Federal Register. *See* Securities Exchange Act Release No. 22376 (August 30, 1985), 50 FR 36692 ("August Notice").

[4] 17 CFR 240.11Ac1-1. NMS Securities are those OTC securities designated pursuant to Rule 11Aa2-1 under the Act, 17 CFR 240.11Aa2-1. The primary effect of designation is to subject OTC stocks to the Commission's firm quotation, last sale reporting, and confirmation rules (Rules 11Ac1-1, 11Aa3-1, and 10b-10 under the Act).

[5] Instinet is a registered broker-dealer that offers computerized execution facilities and securities information services.

[6] *See*, Securities Exchange Act Release Nos. 18585 (March 23, 1982), 19112 (October 12, 1982), and 19564 (March 3, 1983); 47 FR 13295, 46793, and 48 FR 10175.

[7] *See*, Securities Exchange Act Release No. 19884 (June 17, 1983), 48 FR 29086 ("1983 Fee Proposal Release"). File No. SR-NASD-83-13.

[8] The NASD sells directly to subscribers its NASDAQ Level 2 and 3 services, which identifies all NASDAQ market makers and their quotations. Level 3 service permits market makers to insert quotations into NASDAQ whereas Level 2 service is information only. The NASD also provides Level 1 service, which provides the best bid and offer quotations in each NASDAQ security without identifying market makers, through other vendors and charges vendors' subscribers $8.75 per month per terminal.

[9] *See* 1983 Fee Proposal Release, *supra* note 7, 48 FR at 29087. The NASD's proposed subscriber fee was intended to recover the costs of operating the NASDAQ system.

[10] *See*, Petition by Instinet for Review of Denial and/or Limitation of Access to Facilities and Services, dated July 15, 1983 ("Instinet Petition"). *See*, Public File No. 4-258.

[11] *See* Securities Exchange Act Release No. 20068 (August 16, 1983), 48 FR 38124.

[12] *See* Securities Exchange Act Release No. 20069 (August 16, 1983), 48 FR 38131.

[13] For a discussion of what composed the proceeding's record, see Securities Exchange Act Release No. 20874 (April 17, 1985), 49 FR 17640 ("April Order").

[14] The Commission instituted proceedings to determine whether Instinet should receive access to full quotation information in all NASDAQ securities, not just NMS Securities. The Commission also granted interim relief to Instinet in the form of immediate access to full NASDAQ quotation information in all NASDAQ securities at an interim subscriber fee equal to the NASDAQ Level 1 fee since Level 1 service was the NASD's only other pass-through service. *See* discussion, *Infra* note 32.

VOL 51 ISS 39 FE 27 1986 UMI

reasonableness of the NASD's charges to Instinet and its subscribers.[15] Under this analysis, the Commission approved the NASD's NQDS vendor fee, but disapproved the NASD's proposed NQDS subscriber fee because that fee was based in part on costs related to functions not used in supplying quotation data to Instinet.[16] One such function that the Commission determined entailed costs the NASD should not be permitted to recover was the inquiry or "quotation query function."[17] The Commission determined that NQDS should not bear costs associated with the NASDAQ system's query function because NQDS provides Instient only raw quotation data and Instient would have to develop and offer its own inquiry service to subscribers.[18]

On June 11, 1984, the NASD filed a motion requesting Commission reconsideration [19] of the finding made in the April Order related to costs of the NASDAQ query function. In urging reconsideration of this finding the NASD asserted that market makers necessarily query full quotation information offered through NASDAQ in deciding whether to maintain or change their quotation. Accordingly, the NASD argued that the query function was an essential part of the update function, and, therefore, Instinet's subscribers should bear a proportionate share of the costs related to the query function. The Commission denied the motion, on the basis that the NASD had not advanced any new data or arguments to warrant Commission reconsideration of issues resolved in the April Order.[20]

On November 19, 1984, the NASD filed a second motion requesting Commission reconsideration of the query cost finding based on new evidence.[21] The evidence was derived in part from an NASD statistical study which indicated that 76.8 percent of queries directed to the NASDAQ system were made by market makers in stocks in which they made markets. The Commission denied the motion because the NASD had not demonstrated that there were reasonable grounds for its failure to produce this evidence prior to the April Order. The NASD also had failed to show that the proffered evidence was material to any of the findings contained in the April Order, as the Commission had previously considered and rejected arguments that the evidence was intended to support.[22]

On July 31, 1985, the NASD filed with the Commission SR–NASD–85–19, the proposed NQDS subscriber fee.[23]

II. Description of SR–NASD–85–19

In its filing with the Commission, the NASD stated that

> [t]he proposed rule change establishes a charge of $79.00 per month per subscriber terminal receiving NQDS information disseminated by a vendor. The proposed rule change is the creation of a fee which accurately reflects the cost of collecting, processing and preparing the NQDS information for distribution of vendors and subscribers and is consistent to the fullest extent possible with the direction contained in the Commission's [April] Order and sound cost accounting principles.

The fee was formulated based on a study performed on behalf of the NASD by the accounting firm of Coopers & Lybrand ("C&L Study"). As further detailed in the August Notice, the NASD explained that

> [t]he fee represents the cost of the information as is collected, processed and prepared for distribution through NQDS, derived on the basis of a functional analysis of the NASDAQ system, the derivation of cost pools attributable to segregable functions performed within the system and the allocation of these costs to the various services offered by NASDAQ which utilize the functions. These costs were in turn applied to the cost bearing units of sale of the information which are the average number of quotations each such service is capable of accessing.

On October 4, 1985, staff of the Commission met with representatives of the NASD and C&L to clarify the methodology and findings of the C&L Study ("October Meeting").[24] The C&L Study, supplemented by the October Meeting, indicated that the following methodology was used in developing the fee. First, four NASDAQ functions were isolated: Broadcast (Level 1), NQDS, queries, and updates. Next, all NASDAQ costs were isolated and seven cost pools, three direct and four indirect, were created. One direct cost pool representing NASDAQ terminal costs was removed because these costs were recovered separately. C&L then allocated the remaining six cost pools [25] to the four NASDAQ functions. The costs contained in the indirect cost pools were allocated to each function in the same porportion that that function made use of the three system resources. After the costs of the four functions were ascertained, products such as NQDS and Level 1, 2 and 3 services derived from these functions could be priced a number of ways. The fees were adjusted to recover 150% of the NASD's 1984 costs. C&L believed that any pricing scenario that excluded query costs in pricing NQDS would not be appropriate in its judgment.

At the October Meeting, the Commission staff asked a number of specific questions about the Study. The Commission staff questioned why the Study concluded that query costs should be shared by NQDS, particularly since the Commission determined in the April Order that this type of cost was not to be included in calculating the NQDS subscriber fee. C&L stated that in its professional view it believed that an allocation of costs based on the system resources a service utilized required

[16] *Id.*

[17] The "query function," for example, allows subscribers to NASDAQ Level 2 and 3 services to recall full quotation information on a NASDAQ terminal. The service requires the NASD both to provide an ability to store quotations and to provide information in response to an inquiry.

[18] *See* April Order, *supra* note 13, 49 FR at 17649. In support of this finding the Commission stated that it "rejects the NASD's assertion that it should allocate to NQDS an equal share of each of the NASDAQ system's functions because the market makers who build the data-base depend on all NASDAQ system functions. There is no requirement that market makers recall NASDAQ quotation information through their NASDAQ terminals in connection with each quotation update. To the extent a market maker desires to recall quotation information before updating his quotation, he could choose to recall particular quotation information through Instinet terminals or inside quotation information through a variety of sources, without any reliance on the NASDAQ system's storage and recall functions. Moreover, the Commission does not believe that such a subsidization of market makers through NQDS fees is consistent with the Act. While all NASDAQ and NQDS subscribers receive NASDAQ market maker quotation information, the fact remains that NASDAQ subscribers are provided a recall service, which Instinet must provide its subscribers at a separate cost." April Order, *id.*, 49 FR at 17649 n.91.

[23] *See infra* note 3.

[24] *See* File No. 4–258, Memorandum to the Files, from William W. Uchimoto, Division of Market Regulation, SEC, regarding C&L Meeting, dated November 1, 1985. C&L commented on the Commission's Memorandum: see Letter from C&L to Richard G. Ketchum, SEC, dated January 8, 1986.

[25] The three direct cost pools were the costs of each of these NASDAQ component resources: Network Communications, Processor CPU, and Data Storage. The indirect cost pools were: general and administrative costs, systems development and overhead.

NQDS to bear a share of the query costs. In this regard, C&L regarded all subscribers to NASDAQ quotations as benefiting from quotation updates made through Level 3 terminals. C&L concluded that, because updates are based upon market maker queries, all subscribers, including NQDS subscribers, should pay for system costs related to processing market maker queries. In order to isolate those queries that C&L believed were made in connection with a market maker's update, C&L first counted only those queries that were made by market makers in stocks in which they made markets. Of these queries, C&L counted only queries received from Level 3 terminals used to make markets in the particular stocks. C&L determined that 76.8% of Level 3 queries were of this nature.

C&L then responded to questions regarding the Study's view that subscribers to NQDS or Levels 2 or 3 services receive on average nine quotations—eight market makers' quotations and the best bid and offer display ("BBO")—whereas subscribers to Level 1 service receive one quotation, the BBO. Because the Study treated each stored quotation as a single cost unit, subscribers to full quotation information (including NQDS subscribers) thus would bear nine times more query costs than subscribers to Level 1 service. The Commission staff questioned why only one cost unit was attributable to the BBO when the BBO, as a distillation of all market makers' quotations in a specific security, appeared different from individual market maker quotations. C&L believed that the BBO was constructed by massaging "in stream" data reflecting incoming quotation update data. Specifically, C&L assumed the BBO was derived after the data is processed to some degree and validated but before it is entered into the database for storage. Because this data was derived from in stream data, C&L stated that system processing utilized to produce the BBO could not be measured.

III. Comment Letters

In response to its solicitation of comments on SR–NASD–85–19, the Commission received comment letters from the Information Industry Association ("IIA"),[26] Instinet,[27] and the NASD.[28] The IIA did not comment on the specifics of how the NQDS fee should be formulated, but did believe that the NQDS fee should be cost-based for the sake of fairness and efficiency.

Instinet's comment letter was accompanied by a report prepared on behalf of Instinet by the accounting firm of Deloitte Haskins & Sells ("DH&S Report") that reviewed the C&L Study. In its comment letter, Instinet urged the Commission to summarily disapprove the NASD's proposed NQDS subscriber fee because the "NASD and Coopers and Lybrand assume things contrary to the April Order that are integral to the fees proposed." In this regard, Instinet noted that the proposed fee departs from the April Order by assigning a portion of the costs of operating NASDAQ's quotation inquiry function to NQDS subscribers. Furthermore, Instinet cited to the DH&S Report in arguing that the NASD's unit pricing theory that "assign[s] different cost factors to products on the basis of the amount of information provided appears to reflect primarily an assignment of value to the product rather than an allocation of costs," a pricing methodology rejected by the April Order. Instinet reasoned that "the number of quotes available is almost irrelevant where high proportions of costs are fixed costs. In that situation, the availability of one quote costs as much as many, many more." Indeed, Instinet contended that, to the extent dissemination of the BBO involved not only collection of some individual market maker quotations as NQDS but also an additional calculation—*i.e.*, determination and updating of the BBO—if anything a higher fee was appropriate for Level 1 than NQDS. Instinet indicated that a preferable approach would be to apportion common costs among all users on an equal basis utilizing subscriber terminals as the appropriate pricing units. By assuming that the charges for terminals receiving NQDS should be no more than those receiving Level 1 service and using the NASD's methodology except as revised with respect to unit pricing, Instinet calculated that the NQDS monthly subscriber fee should be approximately $11.00 per terminal.

Instinet also argued that it is "unfair and unreasonable" to permit the NASD to set the NQDS subscriber fee to recover 150% of the NASD's 1984 costs. Instinet stated that "even granting the assumption that NASD's historical cost growth is a reasonable predictor of future growth, a front-loaded, 50% increment generates substantial revenues over three years in excess of those generated by 15% per annum rate increase over the same period."

Instinet believed that the multiplier used would generate a capital surplus which the NASD had not justified and would amount to current customers having "to finance capital expenditures that will benefit different, future customers." Finally, Instinet argued that the NASD failed to take into account increased revenues that Instinet expected would largely offset increased costs over time. Instinet recommended that the NASD should establish fees that recover 1986 forecast expenses.

Instinet then requested that the NASD be required to explain or provide further data regarding how conclusions or findings were reached with respect to a number of technical matters discussed in the C&L Study. Instinet cautioned that the proposed NQDS fee should not be approved without review of this additional information and suggested that the Commission hold an informal conference with the parties to explore these matters fully.

The NASD's comment letter addressed some of the major contentions raised by Instinet's comment letter. The NASD's comments were accompanied by an affidavit from a C&L partner, which responded to 49 questions or remarks expressed by Instinet in commenting on the proposed NQDS subscriber fee. The NASD disputed Instinet's view that services such as NQDS must be segregated and separately costed and argued that the NASDAQ system is monolithic and incapable of being functionally analyzed in the manner indicated by Instinet. The NASD also defended its unit pricing methodology stating that it does not result in value-of-service pricing because "it is a cost hearing unit-of-sale approach applied to the quantity of market information received through each service." The NASD then responded to Instinet's concerns regarding the 50% cost recovery multiplier. The NASD believes that the multiplier is based on a reasonable five year projection of costs and avoids costly and repeated fee filings that would require reviewing costs on an annual basis. The NASD indicated that revenue projections are unpredictable and that Level 2 and 3 revenues may actually decline because of new interfaces and a lower NQDS subscriber fee. Indeed, NASD predicts an eventual operating deficit even with the 50%

multiplier. While the NASD was willing to answer other questions and provide further information, the NASD believed that the current record is sufficient for the Commission to analyze the proposed fee.

IV. Discussion

A. Standards Governing Commission Review

The NASD's proposed rule change raises a number of issues under the Act regarding the dissemination of market information. These issues include, first, questions regarding the appropriate prices and terms that an exclusive processor of securities data can impose on vendors that may compete with the exclusive processor in marketing the data in specialized formats and displays.[29]

Second, the proposed rule change must be consistent with Section 15A of the Act. Specifically, the proposal must be consistent with:

- Section 15A(b)(5) of the Act, which requires that the NASD's rules "provide for the equitable allocation of reasonable dues, fees, and other charges among members and issuers and other persons using any facility or system which the association operates or controls."
- Section 15A(b)(6) of the Act, which requires that the NASD's rules "remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, . . . to protect investors and the public interest; and are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers."
- Section 15A(b)(9) of the Act, which requires that the NASD's rules "do not impose any burden on competition not necessary or appropriate in futherance of the purposes of [the Act]."

In considering whether the NASD's proposed fee is consistent with these provisions of the Act, the Commission must also consider the proposal in light of the Commission's previous determinations in this matter. Specifically, the Commission, in the April Order, determined that, "at least in the circumstance where an exclusive processor supplies information to other vendors and competes with those vendors in providing information and terminal services to end-users, the exclusive processor's fees should be based strictly on the expenses it incurs in providing information to vendors." [30] In this connection, the Commission stated that

> the NASD may recover only the costs of collecting, validating, [footnote omitted] and preparing the information for shipment to Instinet. Costs related to the NASD's inquiry system, such as storing quotations for inquiry purposes and responding to actual inquiries, cannot be considered in developing an NQDS subscriber charge. In addition, incremental capacity built into its computer and communications system [footnote omitted] necessary to operate an inquiry service, but not necessary for a quotation collection service, cannot be considered costs relevant to the NQDS service.[31]

The Commission also stated that, "barring demonstrable differences in cost, all subscribers to NASDAQ information through vendors other than NASDAQ should pay the same basic fee to the NASD whether they receive the NASDAQ Level 1 best bid and offer service or the Instinet full quotation service." [32]

B. Institution of Proceedings to Determine Whether to Approve or Disapprove SR–NASD–85–19

After carefully reviewing the terms of the proposed rule change and the C&L Study upon which the rule change was based, the Commission is unable at this time to determine that the rule change is consistent with the Act, particularly sections 11A and 15A thereunder. Accordingly, the Commission is instituting proceedings pursuant to section 19(b)(2)(B) under the Act to determine whether the proposed rule change should be approved or disapproved. The Commission believes that these proceedings will provide the NASD and commentators an opportunity further to assess the NASD filing and C&L Study, as well as to review and address the concerns raised in Instinet's comment letter.

Specifically, the commission notes that the C&L Study's method of computing the NQDS fee does not appear to be cost-based. As previously discussed, the Commission, in the April Order, determined that costs not related to a service provided should not be borne by that service. Under this analysis, the Commission determined that costs associated with operating a quotation query service were not to be included in calculating an NQDS subscriber fee. Notwithstanding the Commission's unequivocal position on query costs, the NASD utilized the C&L Study to base its decision to include certain quotation query costs as common costs apportionable to NQDS subscribers. The NASD's proposed NQDS fee, therefore, is inconsistent with the Act for reasons delineated in the April Order.[33] The Commission preliminarily does not find that the reasoning set forth in the C&L Study justifies a reconsideration of the query function exclusion. C&L based its determination to include market maker query costs on what it labeled as an "assumption"—that because market maker quotations were critical to the operation of the NASDAQ system, all users should share those query costs.[34] This is precisely the same argument made by the NASD and rejected by the Commission in the April Order.[35]

Accordingly, because the NASD included NASDAQ query costs in developing an NQDS subscriber fee, the Commission is unable to conclude at this time that the proposed rule change is consistent with the Act. Moreover, because Instinet would have to provide its own query service while bearing some of the costs of the NASD's competing query service, the commission is unable to make the finding that the rule change does not "impose any burden on competition not necessary or appropriate in furtherance of the purposes of [the Act]." [36]

The Commission in the April Order also determined that the proposed NQDS subscriber fee should be "cost-based and calculated by allocating the percentage of system use of each quotation service offered by the NASD ("functional analysis"), to assure the neutrality and reasonableness of the NASD's charges to Instinet and its subscribers." [37] The Commission is concerned about the consistency of the NASD proposal with the Commission determination, particularly in its reliance on the C&L Study's unit pricing theory. The Commission questions why C&L chose the stored quotation as the pricing unit over other potential pricing units such as the number of terminals receiving data. The Commission also questions the appropriateness of requiring recipients of full NASDAQ quotation information to bear nine times more costs than recipients of Level 1 service who receive the BBO.[38]

At the October Meeting, when questioned how the BBO was constructed, C&L responded that it believed that the BBO was formulated from "in stream" data prior to its entry into the NASDAQ database. The Commission requests comment on C&L's analysis that it is unlikely that construction of the BBO may directly result from the processing of all market makers' quotations entered into the quotation database in a particular NASDAQ security. In addition, the Commission requests comments on whether, even if the BBO is constructed in the manner asserted by the NASD, it is possible both from a quotation collection and systems standpoint that dissemination of the BBO may be materially different than dissemination of individual market maker quotations.

The Commission believes that a careful analysis of the actual costs of developing the BBO is necessitated by the Commission's decision in the April Order that "all pass-through subscribers, including the Level 1 fee and the fee to Instinet subscribers, must be calculated on the same basis." [39] In this regard, the Commission provided Instinet and its subscribers interim relief in the form of access to NQDS at a price identical to the NASD's Level 1 charge of $8.75 per terminal per month.[40] The Commission recognized that "there may be costs properly allocable to NQDS that exceed those relating to NASDAQ Level 1 service," but expected the NASD to ascertain those costs by the "more rigorous cost accounting required by [the April Order]." [41] In light of the cost attribution standard imposed by the April Order, the Commission preliminarily believes that the C&L Study does not provide sufficient support for the NASD's conclusion that the BBO pass-through service should recover for each subscriber only one ninth of the system costs recovered by the NQDS pass-through service. Accordingly, absent a careful and searching examination by the NASD of this matter, the Commission is unable to determine, among other things, that the NASD's proposed NQDS fee is based on a formula that provides for the "equitable allocation of reasonable . . . charges among . . . persons using any facility or system which the association operates or controls." [42]

VI. Request for Comments

The Commission requests that interested persons provide written submissions of their views, data, and arguments with respect to the potential grounds for disapproval identified above.[43] Interested persons are invited to submit comments regarding the proposed rule change by April 1, 1986. Persons desiring to submit written data, views, and arguments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Reference should be made to File No. SR–NASD–85–19.

Copies of the submission and all written statements with respect to the proposed rule change between the Commission and any person, other than those which may be withheld from the public,[44] will be available for inspection and copying at the Commission's Public Reference Room.

It is hereby ordered, pursuant to section 19(b)(2) of the Act, that proceedings be instituted to determine whether to approve or disapprove proposed rule change SR–NASD–85–19.

By the Commission.

Dated: February 21, 1986.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 35–24022; 70–6306]

Consolidated Natural Gas Co.; Proposed Issuance of Common Stock Under Dividend Reinvestment Plan and Employee Stock Ownership Plan Reflecting a Two-for-One Stock Split

February 20, 1986.

Consolidated Natural Gas Company ("Consolidated"), 100 Broadway, New York, New York 10005, a registered holding company, has filed with this Commission a further post-effective amendment to its declaration in this proceeding pursuant to sections 6(a), 7, and 12(c) of the Public Utility Holding Company Act of 1935 ("Act") and Rules 42 and 50(a)(5) promulgated thereunder.

By prior orders in this proceeding dated June 7, 1979, February 12, 1982, July 9, 1982, November 10, 1983, November 26, 1984, and November 27, 1985 (HCAR Nos. 21088, 22366, 22571, 23114, 23497, and 23925), Consolidated was authorized to issue shares of its common stock, from time to time, to the agent for Consolidated's common stockholders participating in Consolidated's dividend reinvestment plan ("DRP Plan") and to the Trustees of the employee stock ownership plan ("ESOP Plan") of Consolidated and its participating subsidiaries. The time for the issuance of such shares expires on

---

[29] In this regard, section 11A(c) of the Act provides that the Commission, may, by rule, assure that "all securities information processors may, for purposes of distribution and publication, obtain [securities data made available by an exclusive processor] on fair and reasonable terms."

Second, the proposed fee must be reviewed to detemine whether such fee is fair and reasonable and is consistent with the Congressional mandate in section 11A(a)(1) of the Act to assure "the availability to brokers, dealers, and investors of information with respect to quotations for and transactions in securities."

[30] April Order, *supra* note 13, 49 FR at 17647.

[31] April Order, *id.*, 49 FR at 17659–60.

[32] April Order, *id.*, 49 FR at 17658. The Commission considered NQDS and Level 1 service to be "pass-through" services that only collected information and passed it on to vendors.

[33] At the October Meeting, C&L conceded that it had utilized only statistics that were collectible directly from the NASDAQ system and had not studied reasons why market makers make queries from Level 3 terminals. Accordingly, irrespective of the Commission's decision not to permit any NASDAQ query costs to be passed on to NQDS subscribers, the Commission believes that the C&L Study fails to distinguish and separate Level 3 queries that could be made for purposes other than an activity done that precedes an update of a market maker's quotation. For example, market makers may query a Level 3 terminal to price an incoming order from the firm's retail sales office or to respond to a phone inquiry from a broker with an agency order.

[34] *See* C&L Study at 55–56. The NASD and C&L also restate that the NASDAQ system is monolithic and for that reason assert that accepted cost accounting principles do not require seperate allocation of system costs attributable to the query function. NASD Comment Letter, *supra* note 28 at 3; C&L affidavit, *supra* note 28 at 2. The Commission understands the structure of the NASDAQ system, and in the April Order determined that the Act requires that the NASD still must make a reasonable attempt to identify specific cost components associated with different services generated by the system in order to exclude query costs from the NQDS fee. This determination was based, in part, on its recognition that the NQDS feed requires Instinet to duplicate costs attributable to a query function in its own system. Indeed, the NASD itself has recognized that there is a capability to separate out costs even in a "monolithic" system. Thus, the NASD, in excluding 24% of query costs, has made some cost allocations with respect to NQDS. The Commission believes, however, that these allocations are insufficient. For the reasons stated in the April Order, the Commission believes that the NASD must make an attempt to exclude all costs associated with the NASDAQ query function; of course, the NASD can include the costs of collecting, validating, and preparing the quotation information for shipment to Instinet.

[35] While the Commission recognizes that an expert analysis of NASDAQ can add precision to measuring costs of the various system functions, the

Continued

Commission believes that the C&L study's allocation of a portion of market maker query costs to Instinet and its subscribers reflects a determination falling outside the scope of C&L's special expertise. As a general matter, the determination regarding whether Instinet should subsidize costs attributable to a separate service not provided to Instinet is a policy question which falls in the Commission's area of expertise and discretion.

[36] Section 15A(b)(9) of the Act.

[37] April Order, *supra* note 13, 49 FR at 17642.

[38] As discussed *supra*, the C&L Study treated a "quotation" as a unit of cost. With an average of eight market maker quotations per security plus the BBO, the NASD's proposal is based on a total of nine quotations per security, with the BBO treated identically as an individual market maker quotation.

[39] April Order, *supra* note 13, 49 FR at 17662.

[40] *See* April Order, *supra* note 13, 49 FR at 17661.

[41] *Id.*

[42] Section 15A(b)(5) of the Act.

[43] In light of the comments by Instinet and the IIA, commentators are encouraged to revisit and respond to the questions raised in the August Notice. Specifically, the Commission seeks further comment regarding the NASD's unit pricing methodology, cost pools and allocations, and 150% budget multiplier.

VOL 51
ISS 39
FE 27
1986
UMI

December 31, 1989, for the DRP and on December 31, 1986, for the ESOP. As of February 12, 1986, 105,174 shares of common stock, $4 par value, allocated to the DRP remain unissued, and 77,134 shares of common stock, $4 par value, allocated to the ESOP remain unissued.

Consolidated has filed a declaration (File No. 70-7217) requesting authorization to amend its Certificate of Incorporation by increasing and classifying its authorized common stock from 50,000,000 shares, $4 par value, to 120,090,000 shares, $2.75 par value, primarily for the purpose of effecting a two-for-one stock split. Each share of issued and unissued $4 par value common stock would be changed into two shares of $2.75 par value common stock. At the close of business on May 20, 1986, the two-for-one stock split would become effective, assuming shareholder approval of the amendment to the Certificate of Incorporation, and all shares of the common stock would be reclassified as $2.75 par value common stock.

Consolidated now proposes in this proceeding to issue through December 31, 1989, to both the agent for the DRP Plan and to the trustees of the ESOP Plan, an aggregate of 364,616 shares of its common stock, $2.75 par value, or twice the number of $4 par value shares remaining unissued immediately prior to the stock split.

The amended declaration and any further amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by March 17, 1986, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the declarant at the address above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as now amended or as it may be further amended, may be permitted to become effective.

For the Commision, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

[Release No. 35-24022; 70-7170]

Consolidated Natural Gas Co.; Proposed Issuance of Common Stock Under Dividend Reinvestment Plan Reflecting a Two-for-One Stock Split

February 20, 1986.

Consolidated Natural Gas Company ("Consolidated"), 100 Broadway, New York, New York 10005, a registered holding company, has filed with this Commission a post-effective amendment to the declaration in this proceeding pursuant to sections 6(a), 7, and 12(c) of the Public Utility Holding Company Act of 1935 ("Act") and Rules 42 and 50(a)(5) promulgated thereunder.

By order in this proceeding dated November 27, 1985 (HCAR No. 23926), Consolidated was authorized to issue between January 1, 1986, and December 31, 1989, to the agent for Consolidated common stockholders participating in Consolidated's dividend reinvestment plan ("DRP"), up to 750,600 shares of its common stock, $4 par value.

Consolidated has filed a declaration (File No. 70-7217) requesting authorization to amend its Certificate of Incorporation by increasing and classifying its authorized common stock from 50,000,000 shares, $4 par value, to 120,000,000 shares, $2.75 par value, primarily for the purpose of effecting a two-for-one stock split. Each share of issued and unissued $4 par value common stock would be changed into two shares of $2.75 par value common stock. At the close of business on May 20, 1986, the two-for-one stock split would become effective, assuming shareholder approval of the amendment to the Certificate of Incorporation, and all shares of the common stock would be reclassified as $2.75 par value common stock.

Consolidated now proposes in this proceeding to issue through December 31, 1989, to the agent for the DRP plan, 1,500,000 shares of its common stock, $2.75 par value, or twice the number of $4 par value shares authorized prior to the stock split.

The amended declaration and any further amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by March 17, 1986, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the declarant at the address above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as now amended or as it may be further amended, may be permitted to become effective.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. IC-14951; File No. 811-3923]

Lehman International Dollar Funds, Inc.; Application for an Order Declaring That Applicant Has Ceased To Be an Investment Company

February 20, 1986.

Notice is hereby given that Lehman International Dollar Funds, Inc. ("Applicant") 55 Water Street, New York, New York 10041, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified management investment company, filed an application on October 29, 1985, for an order of the Commission, pursuant to section 8(f) of the Act, declaring that Applicant has ceased to be an investment company. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the applicable provisions thereof.

Applicant states that it is incorporated under the laws of the State of Maryland and that it filed a registration statement pursuant to section 8(b) of the Act on December 9, 1983, which became effective on February 16, 1984. Applicant further states that it has only one investment portfolio, Lehman International Dollar Money Market Fund ("Fund"). According to the application, tax law changes were made in 1984 which would adversely affect the investment objective of the Fund as of July 1, 1985; Applicant notified Fund securityholders of those changes and ceased to sell Fund shares after June 22, 1984. During the month of June 1985, securityholders were advised to redeem their Fund shares at net asset value. The application further states that on July 1, 1985, the only securityholder remaining was Shearson Lehman Brothers, Inc., its sponsor, and total assets were $100,000 in cash. On October 15, 1985, Applicant's directors voted to dissolve

the Corporation. Applicant states that it is not a party to any litigation or administrative proceeding and it does not propose to engage in any business activities other than those necessary for the winding-up of its affairs.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 10, 1986, at 5:30 p.m. do so by submitting a written request setting forth the nature of his/her interest, the reasons for the request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon the Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 35-24027; 70-7201]

National Fuel Gas Co.; Proposed $200,000 Loan for a Note and Preferred Stock Option

February 21, 1986.

National Fuel Gas Company ("National"), 30 Rockefeller Plaza, New York, New York 10112, a registered holding company, has filed a declaration with this Commission pursuant to sections 9(a) and 10 of the Public Utility Holding Company Act of 1935 ("Act").

National proposes to lend Metscan, Inc. ("Metscan") the sum of $200,000 in consideration for a note ("Note") made in the same principal amount at an interest rate of 3% per annum above the prime rate of Chemical Bank accruing from the date of execution. Interest on the unpaid principal balance will be paid quarterly beginning on January 1, 1986. Principal will be payable on demand after the fourth anniversary of the date of the Note. Contemporaneously, Metscan will grant National an option to purchase 80,000 of its Class C Preferred Shares at $2.50 per share for a period of four years from the date of the grant, and thereafter for 30 days after the principal and accrued interest is paid in full. At its discretion, National may exercise its option at any time and apply the option price to any outstanding principal indebtedness. In this instance, Metscan would remain liable for the payment of accrued interest.

Metscan has developed an electronic meter reading device that will provide an economical method of reading meters. This system operates to provide low cost and efficient remote automatic meter reading, meter security, theft detection, consumption monitoring, and control capability for metered utility service, including gas meters. The device is presently being field tested within the National distribution territory.

The application and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by March 17, 1986, to Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the applicants at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice of order issued in this matter. After said date, the application, as filed or as it may be amended, may be granted.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[File No. 22-14607]

Union Pacific Corp.; Application and Opportunity for Hearing

Notice is hereby given that Union Pacific Corporation (the "Company") has filed an application pursuant to clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939, as amended (the "Act"), for a finding by the Securities and Exchange Commission (the "Commission") that the trusteeship of Citibank, N.A. ("Citibank") under indentures of the Company dated as of April 1, 1969 and September 1, 1980, respectively (the "1969 Indenture" and "1980 Indenture", respectively), which were heretofore qualified under the Act, and the trusteeship by Citibank under an Indenture between Albany County, Wyoming ("Albany County") and Citibank, Trustee, dated December 1, 1985 (the "1985 Indenture"), is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Citibank from acting as trustee under any of the indentures.

Section 310(b) of the Act provides in part that if a trustee under an Indenture qualified under the Act has or shall acquire any conflicting interest it shall within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of such Section provides, with certain exceptions stated therein, that there may be excluded from the operation of this provision another indenture under which other securities of the issuer are outstanding, if the issuer shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that trusteeship under such qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under either of such indentures.

In support of its application the Company alleges that:

(1) The Company has outstanding on December 20, 1985 approximately $5,099,100 aggregate principal amount of its 4¾% Convertible Denbentures due April 1, 1999 (the "Convertible Debentures") and $250,000,000 aggregate principal amount of its 11⅞% Sinking Fund Debentures due 2010 (the "Sinking Fund Debentures") issued under the 1969 Indenture and 1980 Indenture, respectively, in each case executed by the Company and Citibank, as Trustee. The Convertible Debentures were registered under the Securities Act of 1933, as amended (the "Securities Act") (File No. 2-31741), and the 1969 Indenture was qualified under the Act (File No. not available). The Sinking Fund Debentures were registered under the Securities Act (File No. 2-68787) and the 1980 Indenture was qualified under the Act (File No. 22-10659). Citibank is currently acting as trustee under the 1969 and 1980 Indentures.

(2) Pursuant to the 1985 Indenture, there were issued the Adjustable Rate Pollution Control Revenue Bonds (Union Pacific Railroad Company Project), Series 1985, in the aggregate principal amount of $8,000,000 (the "Bonds"). The proceedings of the sale of the Bonds were loaned to Union Pacific Railroad

Company, a wholly-owned subsidiary of the Company, pursuant to an Pollution Control Financing agreement dated as of December 1, 1985 between Albany County and Union Pacific Railroad Company. The Bonds are payable by Albany County solely from revenues received by Albany County from such Financing Agreement. The rights of Albany County under such Financing Agreement have been assigned to the Trustee to secure the Bonds, and pursuant to a Guaranty dated as of December 1, 1985 (the "Guaranty"), the Company has unconditionally guaranteed the payment by Union Pacific Railroad Company of its obligations under the Financing Agreement in respect of the principal, redemption price, premium, if any, and interest on the Bonds. The Bonds are exempt from registration under the Securities Act by virtue of an exemption contained in section 3(a)(2) thereof, and the 1985 Indenture was not qualified under the Act. Citibank is currently acting as trustee under the 1985 Indenture.

(3) Section 608 of the 1980 Indenture provides in part as follows:

(a) If the Trustee has or shall acquire any conflicting interest, as defined in this section, it shall, within 90 days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign in the manner and with the effect hereinafter specified in this Article.

(b) In the event that the trustee shall fail to comply with the provisions of subsection (a) of this section, the Trustee shall, within 10 days after the expiration of such 90-day period, transmit by mail to all Holders, as their names and addresses appear in the Debenture Register, notice of such failure.

(c) For the purposes of this section, the Trustee shall be deemed to have conflicting interest if

(1) The Trustee is trustee under another indenture under which any other securities, or certificates of interest or participation in any other securities, of the Company are outstanding, unless such other indenture is a collateral trust indenture under which the only collateral consists of Debentures issued under this Indenture, provided that there shall exclude from the operation of this paragraph (a) the Indenture, dated as of April 1, 1969, between Union Pacific Corporation and Citibank, N.A., Trustee, relating to the Company's 4¾% Convertible Debentures Due 1999, and (b) any indenture or indentures under which securities, or certificates of interest or participation in other securities, of the Company are outstanding, if . . .

(ii) The Company shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that trusteeship under this Indenture and such other indenture or indentures is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Trustee from acting as such. . . .

The 1969 Indenture contains indentical provisions to the above, except for section references and the like and the reference to the 1969 Indenture.

(4) Execution of the 1985 Indenture may invoke Citibank in a conflict of interest within the meaning of section 608 of the 1980 Indenture and the corresponding section 8.08 of the 1969 Indenture, since the 1985 Indenture has not been qualified under the Act and is not the subject of any other proceeding of the Commission.

(5) The Company's obligations with respect to the Convertible Debentures, the Sinking Fund Debentures and the Bonds are wholly unsecured and rank on a parity with each other. The only material differences between the 1969 and 1980 Indentures and the 1985 Indenture, and between the rights of the holders of the Convertible Debentures and the Sinking Fund Debentures and the holders of the Bonds, relate to the fact that the Company is the Guarantor of the obligations of Union Pacific Railroad Company under the Financing Agreement described above, which has been assigned to the Trustee to secure the Bonds, but is the primary obligor under the 1969 and 1980 Indentures, and that the 1969 and 1980 Indentures are wholly unsecured but the 1985 Indenture is secured by the assignment of the rights of Albany County under the Financing Agreement, and also relate to aggregate principal amounts, dates of issue, denominations, events of default, maturity and interest payment dates, interest rates, form of registration, redemption or prepayment procedures, Trustee's reports, restrictions on transferability, conversion, provisions for conflicting interest of the Trustee, and other provisions of a similar nature. Any such differences and any other difference in the provisions of the 1969 and 1980 Indentures and the 1985 Indenture are unlikely to cause any conflict of interest between the respective trusteeships of Citibank under said Indentures.

(6) The Company is not in default under the 1969, 1980 or 1985 Indenture.

(7) Such differences as exist between the 1969 and 1980 Indentures and the 1985 Indentures are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors of disqualify Citibank from acting as trustee under the 1969 or 1980 Indenture or the 1985 Indenture.

(8) The Company has waived (a) notice of hearing, (b) hearing on the issues raised by its application and (c) all rights to specify procedures under the Commission's Rules of Practice with respect to the application.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application which is on file in the offices of the Commission, File No. 22-14607, at 450 Fifth Street, NW., Washington, DC 20549.

Notice is further given that an order granting the application may be issued by the Commission at any time on or after March 17, 1986, unless prior thereto a hearing upon the application is ordered by the Commission, as provided in clause (ii) of section 310(b)(1) of the Act. Any interested person may, not later than March 17, 1986 at 5:30 P.M., Eastern Standard Time, in writing, submit to the Commission his views or any additional facts bearing upon this application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, and should state briefly the nature of the interest of the person submitting such information or requesting a hearing, the reasons for such request, and the issues of fact and law raised by the application which he desires to controvert.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Government Purchases of Products From Countries Designated Under the Caribbean Basin Economic Recovery Act

Under the authority delegated to me by the President in section 1-201 of Executive Order 12260 of December 31, 1980, in order to promote further the economic recovery of the Caribbean

Basin countries, I have determined that the countries, listed below, designated by the President as beneficiaries under the Caribbean Basin Economic Recovery Act (19 U.S.C. 2701, et. seq.) provide appropriate reciprocal competitive government procurement opportunities for United States products and suppliers of such products. I hereby direct that products originating in those countries shall be treated as eligible products for purposes of section 1-101 of Executive Order 12260 until September 30, 1985, unless otherwise provided by the U.S. Trade Representative in the Federal Register. Such treatment shall not apply, however, to products, originating in those countries, that are excluded from duty free treatment under 19 U.S.C. 2703(b).

Clayton Yeutter,

United States Trade Representative.

Countries Designed as Beneficiaries under the Caribbean Basin Economic Recovery Act: Antique and Barbuda, Bahamas, Barbados, Belize, British Virgin Islands, Costa Rica, Dominica, Dominican Republic, El Salvador, Grenada, Guatemala, Haiti, Honduras, Jamaica, Montserrat, Netherlands Antilles, Panama, St. Christopher-Nevis, St. Lucia, St. Vincent and the Grenadines, Trinidad and Tobago.

BILLING CODE 3190-01-M

Implementation of Modifications in Specialty Steel Import Relief

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: This notice modifies the import relief for specialty steel in order to implement agreements with the European Communities, Japan and the Republic of Korea.

EFFECTIVE DATE: March 1, 1986.

FOR FURTHER INFORMATION CONTACT: Joseph Papovich, Office of the United States Trade Representative (202) 395-4510.

SUPPLEMENTARY INFORMATION: Presidential Proclamation 5074 of July 19, 1983, provided for the temporary imposition of increased tariffs and quantitative restrictions on certain stainless and alloy tool steel imported into the United States. The U.S. Trade Representative was directed by Proclamation 5074 to take such actions and perform such functions for the United States as may be necessary to implement the relief, including the allocation of quota quantities on a country-by-country basis; and, pursuant to section 203 of the Trade Act of 1974, to negotiate orderly marketing agreements and modify the import relief. On September 18, 1984, the President established a national policy for the steel industry and directed the U.S. Trade Representative to coordinate and direct the implementation of that policy, including the negotiation of new arrangements and the reaffirmation of existing measures limiting steel exports into the United States. Supplemental authority to enforce the national policy for the steel industry was provided for in title VII of the Trade and Tariff Act of 1984 (18 U.S.C. 2253 note).

Pursuant to the above authority, the U.S. Trade Representative has concluded agreements with Australia, Austria, Brazil, Czechoslovakia, the European Communities (Belgium, Denmark, Federal Republic of Germany, France, Greese, Ireland, Italy, Luxembourg, the Netherlands and the United Kingdom of Great Britain and Northern Ireland), German Democratic Republic, Finland, Hungary, Japan, Mexico, Poland, Portugal, the Republic of Korea, Romania, South Africa, Spain, Venezuela, Yogoslavia. In order to implement such agreements, and unless and until further modified by the U.S. Trade Representative, the Tariff Schedules of the United States (TSUS) is modified as follows:

1. Headnote 10 to subpart A, part 2 of the TSUS is modified by adding new paragraph (g) at the end thereof, as follows:

"(g) *Products Subject to Certain Export Restraint Agreements.*

(i) The duties provided for in items 926.00 and 926.05 shall not apply to products of Australia, Austria, Brazil, Czechoslovakia, the European Communities (Belgium, Denmark, Federal Republic of Germany, France, Greece, Ireland, Italy, Luxembourg, the Netherlands and the United Kingdom of Great Britain and Northern Ireland), German Democratic Republic, Finland, Hungary, Japan, Mexico, Poland, Portugal, the Republic of Korea, Romania, South Africa, Spain, Venezuela, Yugoslavia exported to the United States on or after March 1, 1986."

(ii) Items 926.00 and 926.05 are modified by inserting in the parenthetical expressions in each item after the opening of parenthesis the words "except as provided in headnote 10(g) to this subpart, and".

(iii) Items 926.12, 926.13, 926.17, 926.18, 926.22, and 926.23 are modified by replacing the country allocations for "Other" countries with "Other, excluding the European Communities (Belgium, Denmark, Federal Republic of Germany, France, Greece, Ireland, Italy, Luxembourg, the Netherlands and the United Kingdom of Great Britain and Northern Ireland)". These modifications shall be effective as to products of such Member States of the European Communities on or after March 1, 1986. Such products exported to the United States prior to March 1, 1986 shall, on or after March 1, 1986, be permitted entry subject to normal Customs procedures. Such products are subject to a bilateral export restraint agreement with the European Communities which will be implemented on March 1, 1986.

(2) Items 926.12, 926.13, 926.16, 926.22, and 926.23 are further modified by changing the quota quantities for "Other, excluding the European Communities (Belgium, Denmark, Federal Republic of Germany, France, Greece, Ireland, Italy, Luxembourg, the Netherlands, and the United Kingdom of Great Britain and Northern Ireland) to the following:

Item	Quota quantity (in short tons) entered during the restraint period			
	July 20 through Oct. 19	Oct. 20 through Jan. 19	Jan. 20 through Apr. 19	Apr. 20 through July 19
926.12	(1)	(1)	(1)	"1,195"
926.13	"1,136"	"1,136"	"1,136"	"1,137"
926.17	(1)	(1)	(1)	[illegible]
926.18	"876"	"876"	"876"	"877"
926.22	(1)	(1)	(1)	"718"
926.23	"736"	"736"	"737"	"737"

[1] No change.

Dated: February 21, 1986.

Clayton Yeutter,

United States Trade Representative.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 86-014]

Lower Mississippi River Waterway Safety Advisory Committee; Meeting

Pursuant to section 10(a) of the Federal Advisory Committee Act (Pub. Law 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of the Lower Mississippi River Waterway Safety Advisory Committee. The meeting will be held on Tuesday, March 11, 1986, in the U.S. Coast Guard Vessel Traffic Service, 4400 Dauphine Street, New Orleans, LA. The meeting is scheduled to begin at 9:30 a.m. and end at 4:00 p.m. The agenda for the meeting consists of the following items:

1. Call to Order.
2. Minutes of the January 14, 1986 Meeting.

VOL 51
ISS 39
FE 27
1986
UMI

3. Briefing of VTS Operation.

4. Tour of Vessel Traffic Service Center New Orleans.

5. Question and Answer Period with Vessel Traffic Service Center Operators.

6. Presentation of Information Concerning the "Black Box" Concept of Vessel Traffic Management and the Global Maritime Distress System.

7. Discussion of the Coast Guard's Challenge to the Committee to Increase Participation in Vessel Traffic Service, New Orleans and to Examine the Scope of the Present New Orleans Vessel Traffic System.

8. Adjournment.

The purpose of this Advisory Committee is to provide consultation and advice to the Commander, Eighth Coast Guard District on all areas of maritime safety affecting this waterway.

Attendance is open to the public. Members of the public may present written or oral statements at the meeting.

Additional information may be obtained from Commander D.F. Withee, USCG, Executive Secretary, Lower Mississippi River Waterway Safety Advisory Committee, c/o Commander, Eighth Coast Guard District (mps), Room 1341, Hale Boggs Federal Building, 500 Camp Street, New Orleans, LA 70130-3396, telephone number (504) 589-6901.

Dated: February 19, 1986.

L.C. Kindbom,

Captain, U.S. Coast Guard Acting Chief, Office of Boating, Public, and Consumer Affairs.

BILLING CODE 4910-14-M

Federal Aviation Administration

Air Traffic Procedures Advisory Committee; Meeting

Pursuant to section 19(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. 10, notice is hereby given of a meeting of the Federal Aviation Administration (FAA) Air Traffic Procedures Advisory Committee (ATPAC) to be held from April 6, at 9 a.m., through April 11, 1986, at 4 p.m., at FAA headquarters, 800 Independence Avenue, SW., Washington, DC.

The agenda for this meeting is as follows: A continuation of the Committee's review of present air traffic control procedures and practices for standardization, clarification, and upgrading of terminology and procedures. It will also include:

1. Approval of minutes.
2. Election of new Chairperson.
3. Discussion of agenda items.
4. Discussion of urgent priority items.
5. Report from Executive Director.
6. Old Business.
7. New Business.
8. Discussion and agreement of location and dates for subsequent meetings.

Attendance is open to the interested public, but limited to the space available. With the approval of the Chairperson, members of the public may present oral statements at the meeting. Persons desiring to attend and persons desiring to present oral statements should notify, not later than April 4, 1986, Mr. Walter H. Mitchell, Executive Director, ATPAC, Air Traffic, Acting ATO-300, 800 Independence Avenue SW., Washington, DC, 20591, telephone (202) 426-3725. Information may be obtained from the same source.

The next quarterly meeting of the FAA ATPAC is planned to be held from July 22 through July 25, 1986, in Oakland, California.

Any member of the public may present a written statement to the Committee at any time.

Issued in Washington, DC, on February 13, 1986.

Walter H. Mitchell,

Executive Director, Air Traffic Procedures Advisory Committee.

Sunshine Act Meetings

Federal Register
Vol. 51, No. 39
Thursday, February 27, 1986

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONTENTS

Item
Federal Deposit Insurance Corporation 1
Federal Election Commission 2
Federal Energy Regulatory Commission 3
Federal Mine Safety and Health Review Commission 4
Inter-American Foundation Board Meeting 5
International Trade Trade Commission 6
Parole Commission 7

1

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 8:33 p.m. on Friday, February 21, 1986, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to: (1) Receive bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in First National Bank at Douglas, Douglas, Wyoming, which was closed by the Senior Deputy Comptroller for Bank Supervision, Office of the Comptroller of the Currency, on Friday, February 21, 1986; (2) accept the bid for the transaction submitted by First Wyoming Bank-Douglas, Douglas, Wyoming, an insured State nonmember bank; (3) approve the application of First Wyoming Bank-Douglas, Douglas, Wyoming, for consent to purchase certain assets of and assume the liability to pay deposits made in First National Bank at Douglas, Douglas, Wyoming; and (4) provide such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to facilitate the purchase and assumption transaction.

In calling the meeting, the Board determined, on motion of Chairman L. William Seidman, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: February 24, 1986.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

Part II

Postal Service

39 CFR Part 777

Uniform Relocation Assistance and Real Property Acquisition Policies and Procedures; Final Rule

VOL 51
ISS 39
FE 27
1986
UMI

POSTAL SERVICE

39 CFR Part 777

Final Revised Uniform Relocation Assistance and Real Property Acquisition Policies and Procedures

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The final relocation regulations adopted here replace the original Postal Service relocation regulations adopted in 1975, which were written on the assumption that acquisitions normally occur under the exercise or the threat of the exercise of eminent domain. However, because virtually no postal real property acquisitions involve eminent domain takings, the former regulations have not been entirely satisfactory and have at times resulted in confusion and windfall payments to participants in voluntary transactions with the Postal Service. To avoid these problems, the final rule, using the Department of Transportation's final rule as a model, does not apply to voluntary sales made without the exercise or the threat of the exercise of eminent domain.

EFFECTIVE DATE: March 31, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Harry C. Pennington, (202) 268–3111.

SUPPLEMENTARY INFORMATION: On May 28, 1985, the Postal Service published in the Federal Register for comment (50 FR 21752) a proposed rule to replace the relocation regulations previously adopted in 1975. A full explanation of the proposed changes, including the variations from the government-wide model rule, was published on May 28 and will not be repeated here, particularly since the Postal Service received no comments on the proposed rule. Accordingly, we are adopting the final rule substantially as proposed, with the exception of a few minor changes which we believe will clarify the final rule.

Implementation of the new regulations will take effect 30 days subsequent to publication in the Federal Register. However, any projects which have been publicly advertised prior to this date will continue to have relocation processed under the former regulations.

A description of the minor changes referred to above follows:

1. In paragraph (e) of § 777.13, the definition of "Displaced Person" has four minor changes:

a. A sentence was added to paragraph (e)(1)(ii)(B) so that it now allows the Postal Service to waive the requirement that a tenant still be in occupancy of the displacement property on the date that title transfers in order to be eligible for assistance.

b. Paragraph (e)(1)(iii) is amended with minor wording changes for clarity. The words "or will be" were inserted before "required to move" in the first sentence. The words "in order for the Postal Service to accomplish the project for which the property was acquired" were inserted before "provided such tenant occupies" in the same sentence. The words "or on the date the Postal Service leases or contracts to lease such property" were deleted from the last sentence which is in parenthesis.

c. Proposed paragraph (e)(2)(iii) was removed. It was ambiguous and could have been misconstrued to eliminate legitimate eligibility. The remaining paragraphs in that section were then renumbered accordingly and a minor wording change was made to the new paragraph (e)(2)(iii) for clarity. The words "for which lawful possession is" were inserted before the word "specified" in the first sentence.

d. Proposed paragraph (e)(2)(viii)(A) was removed to eliminate ambiguity. Paragraph (e)(2)(viii)(B) was changed to (e)(2)(vii), and a sentence was added to exclude as displaced persons, those tenants who are allowed to remain on acquired property and continue renting from the Postal Service, but who are given notice to vacate as a result of failure to comply with the terms of the lease with the Postal Service or failure to renew their leases under prevailing market conditions.

e. An additional definition was added as paragraph (e)(2)(ix) indicating that a person whose property is acquired through "friendly condemnation action" where price is not an issue, is not considered a displaced person.

2. In § 777.13(j), the definition of "Financial Means" was changed slightly for clarification. The words "the greater of" were inserted before "25 percent."

3. Section 777.14 was revised by inserting the words "coercive, or deceptive" in the first line in order to assure that eligibility of displaced persons is protected, and not vulnerable to change because of any action the displaced person may have taken in response to information given or action taken by Postal Service employees.

4. Section 777.22(c)(2) was changed to require that initial contact of displaced persons take place prior to acquisition and prior to the notice of displacement or the notice to vacate, and to suggest that it normally not be made prior to contracting for the acquisition. Language allowing the Postal Service 30 days after the notice of displacement or the notice to vacate before making initial contact was deleted.

5. Section 777.23(b)(6) was modified to provide that the replacement value of property lost, stolen, or damaged in the process of moving would be an allowable moving expense "when determined to be fair and reasonable by the Postal Service." This modification was provided to avoid potential windfalls for damaged articles of little value being replaced with new items having high replacement cost.

6. The last word of § 777.23(d)(4) was changed from "certificate" to "certification" to be consistent with the fee for certification inspections.

7. In § 777.23(h)(1), the annual gross receipts of at least "$2,000" was changed to "$5,000" to be consistent with the approximately 150 percent rise in the CPI since the test was instituted. This change has also been made in the Model Rule published by the Department of Transportation.

8. An addition was made to § 777.23(k)(1) to require that, unless the Postal Service determined otherwise, a claimant would have to make a good faith effort to sell an outdoor advertising sign, which was not to be moved, before the claimant could claim the depreciated replacement cost of the sign, less the proceeds from its sale.

9. The last sentence of § 777.24(a)(1) was changed by changing "(e)" to "(f)." This will exclude displaced persons eligible for 180-day Owner Occupant benefits, who choose instead to receive tenant benefits, from eligibility for downpayment assistance. Such persons are excluded from eligibility for downpayment assistance in both the Model Rule published by the Department of Transportation and the proposed rule published by other Federal agencies on May 28, 1985.

10. A sentence was added to § 777.24(f)(4) to encourage the use of installment of escrow rental assistance payments when last resort housing provisions are used to make payments exceeding $4,000.

11. In § 777.24(h) at the end of the first sentence the words "(not to exceed the costs of such for a comparable replacement dwelling)" were inserted to provide an upper limit on incidental expenses commensurate with costs of comparable housing.

12. In § 777.26(a)(3), the paragraph was clarified by eliminating the words "elect to."

13. In § 777.26(b)(3) the words "but only for such benefits as relate to costs of occupying the new site" were eliminated and the words "with regard to the mobile home and to benefits under § 777.24(b) with regard to the site, subject to a limitation on the home and site benefits combined of $15,000" were substituted, thereby clarifying benefits payable for home and site for an owner.

14. Since a displaced person who owns a mobile home, but rents a site, is considered a tenant for the purposes of these regulations, § 777.26(b)(4) was corrected by deleting the words "the further maximum limitation on home and site benefits combined of $15,000 for a 180-day owner occupant and $4,000 for a 90-day occupant" and substituting the word "a limitation on home and site benefits combined of $4,000."

15. In § 777.27(a), the words "who would otherwise be eligible for a replacement housing payment" were deleted so as to reflect the potential applicability of Last Resort Housing to those desplaced persons not formerly eligible for a replacement housing payment.

16. A paragraph (d) was added to § 777.27 requiring that displaced persons provide proof of gross monthly income through income tax returns, certified financial statements or other reasonable evidence which the Postal Service determines is satisfactory, before they can be paid last resort housing exceeding the $4,000 or $15,000 limitations set out in these regulations.

17. Section 777.31, acquisition procedures, has been renumbered and certain minor editorial changes were made.

18. A paragraph (c) was added to § 777.32, protecting the rights of tenants who own improvements on property to be acquired. The language was taken from the Model Rule and the proposed rule published by other Federal agencies on May 28, 1985.

List of Subjects in 39 CFR Part 777

Postal Service, Relocation assistance, Real property acquisition.

For the above reasons, 39 CFR Part 777 is revised to read as follows:

PART 777—RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES

Subpart A—General Policy, Purpose and Definitions

Sec.
777.11 General policy.
777.12 Purpose.
777.13 Definitions.
777.14 Certain indirect actions prohibited.

Subpart B—Uniform Relocation Assistance

777.21 General procedures.
777.22 Relocation assistance advisory services.
777.23 Moving expenses.
777.24 Replacement housing payments.
777.25 Additional rules for replacement housing payments.
777.26 Mobile homes.
777.27 Last resort housing.
777.28 Claims and appeals.

Subpart C—Acquisition

777.31 Acquisition procedures.
777.32 Acquisition of tenant-owned improvements.
777.33 Expenses incidental to transfer of title to the Postal Service.

Subpart D—Voluntary Acquisitions

777.41 Acquisition procedures.

Subpart E—Donations

777.51 Acceptance of donations.

Authority: 39 U.S.C. 401.

Subject A—General Policy, Purpose and Definitions

§ 777.11 General policy.

It is the policy of the Postal Service to comply voluntarily with the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Pub. L. 91-646; 84 Stat. 1894), hereinafter referred to as the Act.

§ 777.12 Purpose.

The purpose of these regulations is to update policy and procedures for the Postal Service's voluntary compliance with the Act.

§ 777.13 Definitions.

(a) *The Act.* The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Pub. L. 91–646. The Act consists of three titles: Title I—General Provisions; Title II—Uniform Relocation Assistance; and Title III—Uniform Real Property Acquisition Policy.

(b) *Business.* Any lawful activity, except a farm operation, that is:

(1) Conducted primarily for the purchase, sale, lease, and/or rental of personal and/or real property, and for the manufacturing, processing, and/or marketing of products, commodities, and/or any other personal property; or

(2) Conducted primarily for the sale of services to the public; or

(3) Solely for the purposes of reimbursing moving and related expenses, conducted primarily for outdoor advertising display purposes, when the display(s) must be moved as a result of the project; or

(4) Conducted by a nonprofit organization that has established its nonprofit status under applicable Federal or State law.

(c) *Comparable Replacement Dwelling.* A dwelling which is:

(1) Decent, safe, and sanitary.

(2) Functionally similar to the displacement dwelling with particular attention to the number of rooms and living space.

(3) In an area that is not subject to unreasonably adverse environmental conditions, is not generally less desirable than the location of the displacement dwelling with respect to public utilities and commercial and public facilities, and is reasonably accessible to the displaced person's place of employment.

(4) On a site that is typical in size for residential development with normal site improvements including customary landscaping. The site need not include special improvements such as outbuildings, fences, swimming pools, and greenhouses.

(5) Currently available to the displaced person.

(6) Within the financial means of the displaced person.

(d) *Decent, Safe, and Sanitary Dwelling.* A dwelling which meets local housing and occupancy codes and the following standards, unless they are waived for good cause by the Postal Service. The dwelling must:

(1) Be structurally sound, weathertight, and in good repair.

(2) Contain a safe electrical wiring system adequate for lighting and other electrical devices.

(3) Contain a heating system capable of sustaining a healthful temperature of approximately 70 degrees except in those areas where local climatic conditions do not require such a system.

(4) Be adequate in size with respect to the number of rooms and areas of living space needed to accommodate the displaced persons. There shall be a separate, well-lighted and ventilated bathroom that provides privacy to the user and contains a bathtub or shower stall, sink, and toilet, all in good working order and properly connected to appropriate sources of water and to a sewage drainage system. In the case of a housekeeping unit—as opposed to, for example, a room in a boarding house—there shall be a kitchen area that contains a fully usable sink, properly connected to potable hot and cold water and to a sewage draining system, and adequate space and utility service connections for a stove and a refrigerator.

(5) Contain unobstructed egress to safe, open space at ground level.

(6) For displaced persons who are handicapped, be free of any barriers which would preclude their reasonable ingress, egress, or use of the dwelling.

(e) *Displaced Person:* (1) Subject to the additional definitions, limitations and exceptions in paragraph (e)(2) of this section, the term "displaced person" is defined as follows. ("Displaced persons" are entitled to receive benefits

BEST COPY AVAILABLE

VOL 51 ISS 39 FE 27 1986 UMI

only as specifically provided for elsewhere in these regulations.)

(i) A person who owns real property, and who is required to move or to move personal property from the real property following Postal Service action to obtain title to, or a leasehold interest in, such real property by the exercise or the threat of the exercise of eminent domain.

(ii) A person who is a tenant and who is required to move or to move his or her personal property from real property:

(A) Following Postal Service action to obtain the tenant's leasehold interest in such real property by the exercise or the threat of the exercise of eminent domain, or,

(B) Where the Postal Service acquires a fee interest in the property (including long-term leases of 50 years or more), as a result of a Postal Service notice of displacement or notice to vacate such real property, provided the tenant was lawfully in possession at the time of the postal contract to acquire such property. (The requirement that the tenant occupy such real property on the date title is such real property transfers to the Postal Service may be waived for good cause by the Postal Service.)

(C) Where such real property was used to construct a new building for the express purpose of leasing to the Postal Service under circumstances where such tenant would have been a "displaced person" hereunder had the Postal Service itself acquired the land and required the removal of the tenant to undertake construction of the building for Postal Service ownership.

(iii) Where the Postal Service acquires either a fee interest or a leasehold interest in the property, a person who is a residential tenant and is or will be required to move or to move his or her property from the real property, in order for the Postal Service to accomplish the project for which the property was acquired, provided such tenant occupies such real property on the date title in such real property transfers to the Postal Service or the date the Postal Service leases or contracts to lease such property, and further provided such tenant was lawfully in possession at the time of the initiation of negotiations. (The requirement that the tenant occupy such real property on the date title in such real property transfers to the Postal Service may be waived for good cause by the Postal Service.)

(2) The term "displaced person" covers only persons meeting the requirements in paragraph (e)(1) of this section. The term "displaced person" does not cover the following non-exclusive list of examples.

(i) An owner who voluntarily sells his or her real property to the Postal Service, or,

(ii) A tenant who voluntarily transfers his or her leasehold interest to the Postal Service without the exercise or the threat of the exercise of eminent domain, or,

(iii) A tenant who is not lawfully in possession at the times for which lawful possession is specified in paragraphs (e)(1)(ii)(B) and (e)(1)(iii) of this section. A tenant who was legally required by the lease or otherwise to have moved from the property at the times specified in such paragraphs shall not be considered to be lawfully in possession.

(iv) A person who, at the determination of the Postal Service, is not required to relocate permanently, or,

(v) A person who, after receiving a notice of displacement or notice to vacate by the Postal Service, is notified in writing that he or she will not be displaced. Such later notification shall not be issued if the person has already moved. If such latter notification is issued, the Postal Service shall reimburse the person for any reasonable expenses incurred to satisfy any binding contractual relocation obligations entered into after the effective date of the notice of displacement or the notice to vacate or,

(vi) A person who is required to temporarily vacate the premises in order to permit fumigation, repair, painting, or other maintenance or code of enforcement work or,

(vii) A tenant who is required to move from real property as a result of a notice from the Postal Service to vacate such real property where such notice to vacate is issued five years or more after the date of the acquisition of such real property. A tenant who is given a notice to vacate as a result of failure to comply with the terms of his/her lease with the Postal Service or failure to renew his/her lease under prevailing market conditions is not considered to be a displaced person.

(viii) A mobile home occupant who owns the site on which the mobile home is located and who voluntarily sells the site to the Postal Service, regardless of whether such person owns or rents the mobile home.

(ix) A person whose property is acquired through a "friendly condemnation action" where price is not an issue.

(f) *Displacement Dwelling.* The dwelling acquired by the Postal Service from which a displaced person is required to move.

(g) *Dwelling.* The place of permanent or customary and usual residence of a person including a single family house; a single family unit in a two-family, multi-family, or multi-purpose property; a unit of a condominium or cooperative housing project; a non-housekeeping unit (i.e. room in a boarding house); a mobile home; or any other residential unit.

(h) *Family.* Two or more individuals who are related by blood, adoption, marriage, or legal guardianship who live together as a family unit. If the Postal Service considers that circumstances warrant, others who live together as a family unit may be treated as if they are a family for the purpose of determining assistance under these regulations.

(i) *Farm Operation.* Any activity conducted solely or primarily for the production of one or more types of agricultural products or commodities, including timber, for sale or home use, and customarily producing such products or commodities in sufficient quantity to be capable of contributing materially to the operator's support.

(j) *Financial Means.* A comparable replacement dwelling is within the financial means of the displaced family or individual if the average monthly rental or housing cost (e.g., monthly mortgage payments, insurance for the dwelling unit, property taxes, and other reasonable recurring related expenses) which the displaced person will be required to pay does not exceed the greater of 25 percent of the monthly gross income of the displaced family or individual or the ratio of the present monthly rental or housing cost to the gross income of the displaced family or individual. (Supplemental payments made by public agencies are to be included in gross income for purposes of these comparisons.)

(k) *Initiation of Negotiations.* In the case where eminent domain is neither exercised nor threatened to be exercised, the initiation of negotiations is the initial written communication stating a price by the owner or the owner's representative to the Postal Service, or by the Postal Service to the owner or the owner's representative, regarding a proposed acquisition (by purchase or lease) or an interest in a specific piece of real property. In the case where eminent domain is either exercised or threatened to be exercised, the initiation of negotiations is the date the Postal Service makes a written offer of just compensation.

(l) *Notice of Displacement.* A notice given in writing by the Postal Service to a person that he or she will be displaced from his or her place of residence, business or farm, as a result of a facility action by the Postal Service. A notice of displacement may be combined with or in a notice to vacate.

(m) *Notice to Vacate.* A notice given in writing by the Postal Service to a person that he or she is to vacate postal owned property on or before a certain date. A notice to vacate may be combined with or in a notice of displacement.

(n) *Owner of Displacement Dwelling.* A person is considered to be an owner, if, at the initiation of negotiations, the person holds any of the following interests in real property acquired for a postal project:

(1) Fee title, a life estate, a 99-year lease, or a lease, including any options for extension, with at least 50 years to run from the date of acquisition; or

(2) An interest other than leasehold interest in a cooperative housing project which includes the right to occupy a dwelling; or

(3) A contract to purchase any of the interests or estates described in paragraph (n)(1) or (n)(2) of this section; or

(4) Any other interest, including a partial interest, which in the judgment of the Postal Service, warrants consideration as ownership.

(o) *Person.* Any individual, family, partnership, corporation, association, business or farm operation.

(p) *Personal Property.* Any tangible property, not considered part of the real property, for which payment has not been included in the acquisition cost.

(q) *Tenant.* A person who has the legal right to temporary use and occupancy of real property owned by another. In some cases, these regulations also use the term "tenant" to refer to a person who occupies real property owned by another but whose legal right was terminated due to a timely notice to vacate the real property used and occupied.

§ 777.14 Certain indirect actions prohibited.

Postal employees shall take no indirect, coercive, or deceptive actions to cause persons to move from real property in an effort to avoid the circumstances under which such persons would be eligible to receive relocation benefits as displaced persons under these regulations. If a claimant demonstrates that such prohibited action caused him or her to move, he or she will be treated as a displaced person hereunder, if he or she otherwise meets the definition of a displaced person.

Subpart B—Uniform Relocation Assistance

§ 777.21 General procedures.

(a) *Planning Prior to Site Selection.* When acquisition of a site under consideration would likely involve displacement of a person eligible under § 777.13 for relocation assistance, the Postal Service representative shall prepare a relocation needs and availability analysis. The Postal Service representative shall include in the analysis a complete inventory of persons who may be displaced and specifically identify their needs.

(b) *Planning Subsequent to Site Selection.* Subsequent to site selection, the Postal Service must review the relocation needs and availability analysis and establish a specific plan for providing the assistance covered by these regulations to any eligible displaced persons. It will further determine the necessity of establishing an on-site relocation office which would be accessible to displaced persons and would be staffed with relocation personnel qualified to render all relocation services. The Postal Service will assure that cost estimates reflect current market conditions and that funding is available for all relocation assistance and activities.

(c) *Contracting for Relocation Services.* When the Postal Service determines it to be advantageous, it may enter into a relocation assistance service contract with a public agency or private firm having expertise in relocation assistance. The contract must require the contractor to follow Postal Service relocation assistance regulations.

(d) *Notice to Vacate, Ninety Day Requirement.* Postal Service notices to vacate must be issued at least 90 days prior to the date the property must be vacated. Any such notice must be in writing and delivered in person with receipt acknowledged, or by certified mail, return receipt requested. The 90-day requirement does not apply to any such notice issued subsequent to a valid notice to vacate issued by the prior owner of the property. A 90-day notice may be given with, or such notice may be combined with, but such notice must not be given before, the notice of displacement referred to in paragraph (f) of this section.

(e) *Shorter Notice Period, Unusual Circumstances.* An occupant may be required to vacate the property on less than 90 days advance written notice if the Postal Service determines that a 90-day notice is impracticable. An example of such a situation is when the person's continued occupancy of the property would constitute a substantial danger to the person's health or safety.

(f) *Notice of Displacement.* Normally, a notice of displacement will be given at the time of acquisition or later. Such notice must not be given earlier than the time of contracting, except in the case of acquisitions by eminent domain or by the threat of eminent domain. Such notice may be given at the time of contracting or between the time of contracting and the time of acquisition if the Postal Service considers it wise to start the displacement process then and if, in the judgment of the Postal Service, it is clear that person will in fact be a displaced person.

(g) *Notice of Availability of Advisory Services.* The notice of displacement will state that relocation assistance advisory services will be available to the displaced person and will designate who will provide such services.

§ 777.22 Relocation assistance advisory services.

(a) *General.* The Postal Service carries out an advisory assistance program for displaced persons.

(b) *Relocation Information.* The Postal Service must contact each displaced person to provide an informational statement outlining the assistance available to the particular person. If it is impracticable to contact the displaced persons personally, the informational statement must be mailed to the persons, certified mail, return receipt requested.

(c) *Time of Initial Contact to Provide Relocation Information.* The initial contact to provide relocation information must take place by the following dates:

(1) Where acquisition of the property is to occur as a result of the exercise or the threat of the exercise of eminent domain, at the time of initiation of negotiation or within 30 days thereafter.

(2) In any other instance such contact must be made prior to acquisition and prior to the notice of displacement or the notice to vacate, but it should normally not be made prior to contracting for the acquisition.

(d) *Service to be Provided.* The advisory program shall include such services as may be necessary or appropriate to:

(1) Provide current information on the availability, purchase prices, financing, and rental costs of replacement dwellings.

(2) For displaced persons eligible for replacement housing payments, explain that the displaced person cannot be required to move unless at least one

VOL 51
ISS 39
FE 27
1986
UMI

comparable replacement dwelling is made available.

(i) At the request of the displaced person, the Postal Service must inform that person, in writing, of the specific comparable replacement dwelling used as the basis for the replacement housing payment offer, the price or rent used to establish the upper limit of that offer, the basis for the determination, and the amount of the replacement housing payment to which he or she may be entitled.

(ii) Where feasible, housing must be inspected by the Postal Service representative prior to its being made available to assure that it is a comparable replacement dwelling and meets the decent, safe, and sanitary standard. The displaced person must be notified that a replacement housing payment will not be made unless the replacement dwelling is inspected and determined to be decent, safe, and sanitary.

(iii) Whenever possible, minority displaced persons must be given reasonable opportunities to relocate to comparable dwellings, not located in a an area of minority concentration, that are within their financial means. This policy, however, does not require the Postal Service to provide a person a larger payment than is necessary to enable that person to relocate to a comparable replacement dwelling.

(iv) All displaced persons, especially the elderly and handicapped, must be offered transportation to inspect housing to which they are referred.

(3) Provide current and continuing information on the availability, purchase prices, and rental costs of comparable and suitable commercial and farm properties and locations, and assist any person displaced from a business or farm operation to obtain and become established in a suitable replacement location.

(4) Minimize hardships to displaced persons in adjusting to relocation by providing counseling, advice about other sources of assistance that may be available, and such other help as may be appropriate.

(5) Supply displaced persons with appropriate information concerning Federal, State, and local housing programs, disaster loan and other programs administered by the Small Business Administration, and other Federal, State, and local programs offering assistance to displaced persons.

(6) Upon selection of a replacement property by a displaced person, the Postal Service may arrange for a representative to assist the displaced person with necessary arrangements for the move.

§ 777.23 Moving expenses.

(a) *Eligibility.* (1) Residential displaced persons are entitled to benefits under paragraphs (b) and (c) of this section.

(2) Business and farm displaced persons are entitled to benefits under paragraphs (d) through (k) of this section.

(3) Those business or farm displaced persons who reside on the property where the business or farm operation is conducted are eligible for applicable benefits both as residents and as business or farm displaced persons, but no duplicate payments are allowed.

(4) Persons who are required to move or to move personal property from real property, an interest in which is not acquired by the Postal Service, when it is determined by the Postal Service that such move is necessary or reasonable because of the Postal Service's having acquired an interest in other real property owned or leased by such persons and on which such persons conduct a business or farm operation, under circumstances where such persons are displaced persons with regard to such other real property or would have been displaced persons with regard to such other real property had they been required to move or to move personal property from such other real property, are entitled to benefits as residential, business or farm displaced persons-under paragraphs (a)(1) or (a)(2) of this section.

(5) Eligibility for moving expenses does not depend upon the owner's or tenant's actual occupancy of the displacement real property.

(b) *Allowable Expenses, Residential Moves.* Allowable moving expenses include:

(1) Transportation of the displaced person and his or her personal property. Transportation costs are limited to the costs of a move up to a distance of 50 miles unless the Postal Service determines that relocation beyond 50 miles is justified.

(2) Packing, crating, unpacking, and uncrating of the personal property.

(3) Disconnecting, dismantling, removing, reassembling, and reinstalling relocated household appliances and other personal property.

(4) Storage of the personal property not to exceed 12 months unless the Postal Service determines that a longer period is necessary.

(5) Reasonable costs for insurance for the replacement value of the personal property being moved or stored.

(6) When determined to be fair and reasonable by the Postal Service the replacement value of property lost, stolen, or damaged in the process of moving (not through the fault or negligence of the displaced person, his or her agent, or employee), but only where insurance covering such loss, theft, or damage is not reasonably available.

(7) Other moving related expenses that are not listed as non-allowable under paragraph (1)(3) of this section and which the Postal Service determines to be reasonable and necessary.

(c) *Fixed Payment for Moving Expenses, Residential Moves.* Any residential displaced person may choose to receive a fixed payment in lieu of a payment for actual moving and related expenses. This fixed payment will consist of:

(1) A moving expense allowance, not to exceed $300, which must be determined in accordance with the applicable moving allowance schedules approved by the Federal Highway Administration; and

(2) A dislocation allowance of $200.

(d) *Allowable Expenses, Business and Farm Operations.* Allowable expenses include:

(1) The expenses allowed under paragraphs (b) (2), (4), (5) and (6) of this section;

(2) Transportation of personal property. Transportation costs are limited to a distance up to 50 miles unless the Postal Service makes a finding that relocation beyond 50 miles is justified.

(3) Disconnecting, dismantling, removing, reassembling, and reinstalling relocated machinery, equipment, and other personal property, and substitute personal property as described in paragraph (d)(8) of this section. This includes connection to utilities available at the replacement site or building and minor modifications to personal property to adapt it to the replacement site or building. Excluded are expenses for providing utilities to or installing utilities at the replacement site or building and expenses for repair, alteration, improvement or modification of the replacement site or building. This exclusion includes, but is not limited to, any repairs, alterations, improvements, or modifications required by local code to bring the building up to standard.

(4) Any license, permit, or certification fee required of the displaced person by a governmental authority at the replacement location. However, this payment is limited to the pro rata value for the remaining useful life of any existing license, permit, or certification.

(5) Reasonable professional services necessary for planning the move of the personal property. Such professional services must be approved in advance

by the Postal Service and shall not exceed the lowest of three acceptable bids.

(6) Relettering signs and replacing stationary, business cards, rubber stamps, etc., on hand at the time of displacement, that are made obsolete as a result of the move. This does not include new signs, and other items replaced will only be reimbursed in the numbers that were on hand when they became obsolete.

(7) Actual direct loss of tangible personal property incurred as a result of moving or discontinuing the business or farm operation. The payment will consist of the reasonable costs incurred in attempting to sell the item plus the lesser of:

(i) The fair market value of the item for continued use at the displacement site, less the proceeds from its sale. (To be eligible for this payment the claimant must make a good faith effort to sell the personal property, unless the Postal Service determines that such effort is not necessary. When payment for property loss is claimed for goods held for sale, the fair market value must be based on the cost of the goods to the business, not the potential selling price.); or

(ii) The estimated cost of moving the item no more than 50 miles, but with no allowance for storage.

(8) If an item of personal property which is used as part of a business or farm operation is not moved, is promptly replaced with a substitute item that performs a comparable function at the replacement site, the displaced person is entitled to payment of the lesser of:

(i) The cost of the substitute item, including installation costs at the replacement site, less any proceeds from the sale. (To be eligible for payments under paragraph (d)(8) of this section, the claimant must make a good faith effort to sell the personal property, unless the Postal Service determines that such effort is not necessary.)

(ii) The estimated cost of moving and reinstalling the replaced item, based on the lowest acceptable bid or estimate obtained by the Postal Service for eligible moving and related expenses, but with no allowance for storage.

(9) A displaced business or farm operation is entitled to reimbursement for actual expenses, not to exceed $1,000, which the Postal Service determines to be reasonable and which are incurred in searching for a replacement location. These expenses include transportation, meals and lodging away from home, time spent searching (based on reasonable salary or earnings) and fees paid to a real estate agent or broker to locate a replacement site, exclusive of any fees or commissions related to the purchase of such site.

(10) Other moving-related expenses, not listed as non-allowable under paragraph (l)(3) of this section, which the Postal Service determines to be reasonable and necessary.

(e) *Fixed Payment in Lieu of Moving Expenses, Business Moves.* Any displaced business, other than an outdoor advertising display business, or a non-profit organization, is eligible for a fixed payment in lieu of actual moving and related expenses. This payment must be in an amount equal to the average annual net earnings of the business at that location, as computed under paragraph (i) of this section, but not less than $2,500 nor more than $10,000. For a displaced person to qualify for this payment, the Postal Service must determine that:

(1) The business cannot be relocated without a substantial loss of its existing patronage (clientele or net earnings). A business is assumed to meet this test unless the Postal Service demonstrates that it will not suffer a substantial loss of its existing patronage; and

(2) The business is not part of a commercial enterprise having another establishment which is not being acquired by the Postal Service, and which is under the same ownership and engaged in the same or similar business activities. (For purposes of this rule, if the other establishment did not contribute materially to the income of the displaced person [see paragraph (h) of this section] during the 2 taxable years prior to displacement, it shall not be considered another establishment; for purposes of the preceding sentence); and

(3) The business contributed materially to the income of the displaced person during the 2 taxable years prior to displacement (see paragraph (h) of this section). However, the Postal Service may waive this test for good cause.

(f) *Determining the Number of Businesses.* In determining whether two or more displaced legal entities constitute a single business which is entitled to only one fixed payment, all pertinent factors shall be considered, including the extent to which:

(1) The same premises and equipment are shared;

(2) Substantially identical or interrelated business functions are carried out and business and finacial affairs are commingled;

(3) The entities are held out to the public, and to those customarily dealing with them, as one business; and

(4) The same person or closely related persons own, control, or manage the affairs of the entities.

(g) *Fixed Payment in Lieu of Moving Expenses, Farm Operation.* Any displaced farm operation may choose a fixed payment in lieu of a payment for actual moving and related expenses in an amount equal to its average annual net earnings as computed in accordance with paragraph (i) of this section, but not less than $2,500 nor more than $10,000. For a displaced person to qualify for this payment, the Postal Service must determine that the farm operation contributed materially to the income of the displaced person during the two taxable years prior to the displacement (see paragraph (h) of this section). In the case of acquisition of land which was part of a farm operation before the acquisition, the fixed payment shall be made only if the Postal Service determines that:

(1) The acquisition of part of the land caused the operator to be displaced from the operation on the remaining land; or

(2) The partial acquisition caused a substantial change in the nature of the farm operation.

(h) *Contributes materially.* The term "contributes materially," as used in paragraphs (e) and (g) of this section means that, during the 2 taxable years prior to the taxable year in which displacement occurs, or during such other period as the Postal Service determines to be more equitable, a business or farm operation:

(1) Had average annual gross receipts of at least $5,000; or

(2) Had average annual net earnings of at least $1,000; or

(3) Contributed at least 33⅓ percent of the owner's or operator's average annual gross income from all sources.

(4) If the application of the above criteria creates an inequity or hardship in any given case, the Postal Service may approve the use of other criteria as determined appropriate.

(i) *Average Annual Net Earnings of a Business or Farm Operation.* The average annual net earnings of a business or farm operation are one-half of its net earnings before Federal, State, and local income taxes during the 2 taxable years immediately prior to the taxable year in which it was displaced. If the business or farm was not in operation for the full 2 taxable years prior to displacement, net earnings shall be based on the actual period of operation at the displacement site during the 2 taxable years prior to displacement, projected to an annual rate. Average annual net earnings may

VOL 51 ISS 39 FE 27 1986 UMI

be based upon a different period of time when the Postal Service determines it to be more equitable. Net earnings include any compensation obtained from the business or farm operation by its owner, the owner's spouse, and dependents. The displaced person shall furnish the Postal Service proof of net earnings through income tax returns, certified financial statements, or other reasonable evidence which the Postal Service determines is satisfactory.

(j) *Nonprofit Organizations.* Any displaced nonprofit organization may choose a fixed payment in lieu of a payment for actual moving and related expenses in an amount of $2,500, if the Postal Service determines that it:

(1) Cannot be relocated without a substantial loss of existing patronage (membership or clientele). A nonprofit organization is assumed to meet this test, unless the Postal Service demonstrates otherwise; and

(2) Is not part of an enterprise having at least one other establishment engaged in the same or similar activity which is not being acquired by the Postal Service.

(k) *Relocation of Outdoor Advertising Signs.* The amount of a payment for direct loss of an advertising sign which is personal property is the lesser of:

(1) The depreciated replacement cost of the sign, as determined by the Postal Service, less the proceeds from its sale; (To be eligible for payments under this paragraph (k)(1), the claimant must make a good faith effort to sell the sign, unless the Postal Service determines that such effort is not necessary.) or

(2) The estimated cost of moving the sign, no more than 50 miles, but with no allowance for storage.

(l) *General Provisions*—(1) *Self Moves.* If the displaced person elects to take full responsibility for all or a part of the move, the Postal Service may approve a payment for the person's moving expenses in an amount not to exceed the lowest of three bids acceptable to the Postal Service. Bids may be obtained by either the displaced person or the Postal Service. A qualified Postal Service representative may prepare a moving estimate, in lieu of solicitation for bids, but in such case, the moving expense payment cannot exceed $2,500.

(2) *Transfer of Ownership.* Upon request by the Postal Service and in accordance with applicable law, the displaced person may transfer to the Postal Service ownership of any personal property that is not to be moved, sold, or traded-in by executing a disclaimer of all rights or interest in the property.

(3) *Non-Allowable Expenses.* Except as specifically otherwise provided herein, a displaced person is not entitled to payment for:

(i) The cost of moving any structure or other real property improvement in which the displaced person reserved ownership (but see § 777.25(i) and § 777.26).

(ii) Loss of goodwill.

(iii) Loss of profits.

(iv) Loss of trained employees.

(v) Any additional operating expenses of a business or farm operation caused by operating in a new location.

(vi) Personal injury.

(vii) Any legal fee or other cost for perparing a claim for a relocation payment or for representing the displaced person before the Postal Service.

(viii) Expenses for searching for a replacement dwelling.

(ix) Physical changes to the real property at the replacement location of a business or farm operation, except as provided in paragraph (d)(3) of this section.

(x) Costs for storage of personal property on real property owned or leased by the displaced person.

§ 777.24 Replacement housing payments.

(a) Residential displaced persons are eligible for replacement housing payments as follows:

(1) Residential displaced persons who lawfully and continuously owned and occupied a displacement dwelling for not less than 180 days prior to the initiation of negotiations are entitled to the benefits set out in paragraph (b) of this section. Such displaced persons may alternately choose the benefits under paragraph (f) of this section.

(2) Residential displaced persons who lawfully and continuously owned and occupied, and residential displaced persons who were tenants and lawfully and continously occupied, a displacement dwelling for not less than 90 days prior to the initiation of negotiations are entitled to the benefits set out in paragraph (e) of this section.

(3) Where the replacement housing payment provided hereunder does not provide for housing within the financial means (see § 777.13(j)) of the displaced person, see § 777.27, Last Resort Housing.

(b) *Benefits for 180 Day Owner Occupants.* Displaced persons eligible under paragraph (a)(1) of this section are entitled to benefits as set out below:

(1) An amount which is the sum of:

(i) The amount which must be added to the acquisition cost of the displacement dwelling to provide a total amount equal to the lesser of:

(A) the reasonable cost of a comparable replacement dwelling as determined by paragraph (c) of this section; or

(B) the purchase price of a decent, safe and sanitary replacement dwelling actually purchased and occupied by the displaced person; plus

(ii) Interest Cost—(see paragraph (d) of this section); plus

(iii) Incidental Expenses (see paragraph (h) of this section).

(2) The benefits in paragraph (b)(1) above are limited to a maximum payment of $15,000.

(3) The benefits in paragraph (b)(1) above are available only if a decent, safe and sanitary replacement dwelling is purchased within 12 months after the latter of:

(i) The date of acquisition or, in the case of condemnation, the date the required amount is deposited in a court for the displaced person's benefit, or

(ii) The date the person moves from the displacement dwelling.

(c) *Determining the Cost of a Comparable Replacement Dwelling.* The cost of a comparable replacement dwelling for purposes of benefits to be paid to 180 day owner occupants will be determined by applying the following:

(1) If available, at least three representative comparable replacement dwellings must be examined and the payment offer computed on the cost of the fair market value of the dwelling most closely comparable to the displacement dwelling.

(2) To the extent, feasible, comparable replacement dwellings will be selected from the neighborhood in which the displacement dwelling was located. If this is not possible, comparable replacement dwellings will be selected from nearby or similar neighborhoods where housing costs are similar.

(d) *Increased Mortgage Interest Costs.* The amount to be paid to a displaced 180 day owner occupant for increased mortgage interest costs is the amount, if any, by which the present value of the interest on the mortgage loan(s) on the replacement dwelling plus any other debt service costs exceeds the present value of the interest on the mortgage loan(s) on the displacement dwelling plus purchaser's points and loan origination fees, subject to the following:

(1) The payment must be based only on bona fide mortgages that were a valid lien on the displacement dwelling for at least 180 days prior to the initiation of negotiations. All such mortgages on the displacement dwelling must be used to compute the payment.

(2) The payment must be based on the unpaid mortgage balance on the displacement dwelling or the new mortgage amount, whichever is less.

(3) The payment must be based on the remaining term of the mortgage on the displacement dwelling or the actual term of the new mortgage, whichever is shorter.

(4) The new mortgage must be a bona fide mortgage and its interest rate must not exceed the prevailing interest rate currently charged by mortgage lending institutions in the area in which the replacement dwelling is located.

(5) The discount rate used to compute the present value of the increased interest cost must be the prevailing interest rate paid on demand savings deposits by commercial banks in the area in which the replacement dwelling is located.

(6) Purchaser's points and loan origination fees, but not seller's points, are reimbursable to the extent they are not paid as incidental expenses, they do not exceed rates normal to similar real estate transactions in the area, and the Postal Service determines them to be necessary. The computation of such points and fees shall be based on the unpaid mortgage balance on the displacement dwelling, or the new mortgage amount, whichever is less.

(e) *Benefits for 90 Day Owner Occupant and Tenants.* Displaced persons eligible under paragraph (a)(2) of this section are entitled to benefits as set out below:

(1) Rental assistance benefits, as set out in paragraph (f) of this section or downpayment assistane benefits, as set out in paragraph (g) of this section.

(2) The benefits in (e)(1) above are limited to $4,000.

(3) The benefits in (e)(1) above are available only if a decent, safe and sanitary replacement dwelling is purchased or rented within 12 months after the latter of:

(i) The date of acquisition or, in the case of condemnation, the date the required amount is deposited in the court for the displaced person's benefit, or

(ii) The date the person moves from the displacement dwelling.

(f) *Rental Assistance.* The rental assistance benefits, not to exceed $4,000, for 90 day owner occupants and tenants will be computed as follows:

(1) The amount which must be added to 48 times the average monthly rental paid at the displacement dwelling (or, if the displaced person is an owner occupant, the fair market rental value had the displacement dwelling been rented) for the three-month period prior to displacement to provide a total amount equal to the lesser of:

(i) 48 times the reasonable monthly rental of a comparable replacement dwelling; or

(ii) 48 times the actual monthly rental cost of the decent, safe, and sanitary dwelling actually rented and occupied by the displaced person.

(2) If utilities are included in either the replacement dwelling or the displacement dwelling rent, appropriate utilities must be factored into both rentals. If utilities are not included in either monthly rental then the payment will be computed using the base rental rates.

(3) If, in the opinion of the Postal Service, the monthly rental at the displacement dwelling is significantly below the fair market rent of the displacement dwelling, such fair market rent must be used in computing the rental assistance payment.

(4) The payment under this section must be disbursed in a lump-sum amount unless the Postal Service determines on a case-by-case basis, for good cause, that the payment should be made in installments. Where the rental assistance payment exceeds $4,000 under the provisions of Last Resort Housing, (§ 777.27), installment payments or payments through escrow accounts may be considered.

(g) *Downpayment Assistance.* Downpayment assistance, not to exceed $4,000, is available to 90 day owner occupants and 90 day tenants subject to the following: The payment will be the full amount of the first $2,000 of the required downpayment and incidental expenses plus one-half of any amount required for such downpayment and incidental expenses over $2,000.

(h) *Incidental Expenses.* Incidental expenses covered under paragraph (b)(1)(iii) or (g) of this section are those reasonable costs actually incurred by the displaced person incident to the purchase of a replacement dwelling and customarily paid by the buyer (not to exceed the costs of such for a comparable replacement dwelling). They include:

(1) Legal, closing, and related costs, including those for title search and insurance, preparing conveyance instruments, notary fees, preparing surveys and plats, and recording fees.

(2) Lender, FHA, or VA appraisal fees.

(3) FHA or VA application fee.

(4) Certification of structural soundness when required by the lender.

(5) Credit report.

(6) Owner's and mortgagee's evidence or assurance of title.

(7) Escrow agent's fee.

(8) State revenue or documentary stamps, sales or transfer taxes.

(9) Such other costs as the Postal Service determines to be incidental to the purchase.

§ 777.25 Additional rules for replacement housing payments.

(a) *Multiple Owners.* When a single family dwelling is owned by more than one person and occupied by only some of the 180 day owners (for example, when the dwelling is owned by an estate and only one of the heirs is in occupancy), the occupant(s) is (are) eligible to receive a maximum total price differential which is the lesser of:

(1) The difference between (i) the reasonable cost of a comparable replacement dwelling, as determined under § 777.24(c) and (ii) the acquisition cost of the displacement dwelling; or

(2) The difference between (i) the occupant's share of the acquisition cost of the displacement dwelling and (ii) the purchase price of a decent, safe, and sanitary replacement dwelling actually purchased and occupied by the displaced person.

(b) *Multiple Occupants of One Displacement Dwelling.* If two or more occupants of the displacement dwelling move to separate replacement dwellings, each occupant is entitled to a reasonable prorated share, as determined by the Postal Service, of any relocation payments that would have been made if the occupants moved together to a comparable replacement dwelling. However, if the Postal Service determines that two or more occupants maintained separate households within the same dwelling, such occupants have separate entitlements to relocation payments.

(c) *Mixed Use and Multi-Family Properties Acquired.* If the displacement dwelling was part of a property that contained another dwelling unit or space used for non-residential purposes, or if it is located on a lot larger than that typical for residential purposes, only that portion of the acquisition payment which is actually attributable to the displacement dwelling and site can be considered its acquisition cost when computing the price differential.

(d) *Disaster-Related Insurance Proceeds.* To the extent necessary to avoid duplicate compensation, the amount of any insurance proceeds received by a person in connection with a disaster related loss to the displacement dwelling must be included in the acquisition cost of the displacement dwelling when computing the price differential.

(e) *Inspection of Replacement Dwelling.* Before making a replacement housing payment or releasing a payment from escrow, the Postal Service must inspect the replacement dwelling and determine that it is a decent, safe, and sanitary dwelling.

VOL
51
ISS
39
FE
27
1986
UMI

(f) *Purchase of Replacement Dwelling.* A displaced person is considered to have met the requirement to purchase a replacement dwelling if the person has purchased an existing dwelling; purchased and rehabilitated or moved and restored an existing dwelling; or constructed a new dwelling, provided in each instance the dwelling is determined to be decent, safe and sanitary.

(g) *Conversion of Payment.* A displaced person who initially rents a replacement dwelling and receives a rental assistance payment may, within the required 12 month eligibility period, purchase a decent, safe and sanitary replacement dwelling. In such case, he or she is eligible to revise his or her original claim, and claim any additional assistance for which he or she was originally eligible. However, any portion of the rental assistance payment that has been disbursed must be deducted from the resultant replacement housing payment or downpayment assistance payment.

(h) *Payment After Death.* A replacement housing payment is personal to the displaced person. Upon his or her death, the undisbursed portion of any such payment shall not be paid to the heirs or assigns, except that:

(1) The amount attributable to the displaced person's period of actual occupancy of the replacement housing will be paid.

(2) The full payment must be disbursed in any case in which a member of a displaced family dies and other family members continue to occupy the replacement dwelling selected in accordance with these regulations.

(3) Any portion of a replacement housing payment necessary to satisfy the legal obligation of an estate in connection with the selection of a replacement dwelling by or on behalf of a deceased person must be disbursed to the estate.

(i) *180 Day Owner Retention of Displacement Dwelling.* If a 180 day owner occupant retains ownership of his or her dwelling or the right to move his or her dwelling from the displacement site, and he or she moves it and reoccupies it on a replacement site, the cost of the actual replacement dwelling to be computed for purposes of § 777.24(b)(1)(i)(A) (not to exceed the purchase price of a comparable replacement dwelling) will be the sum of:

(1) The expenses of moving and restoring the retained dwelling to a condition comparable to that prior to the move; and

(2) The salvage or other value deducted from the acquisition cost for the retained ownership; and

(3) Additional costs, if necessary, incurred to make the unit a decent, safe, and sanitary replacement dwelling; and

(4) The cost of the replacement site, not to exceed the cost of a comparable available and suitable replacement site.

(j) *90 Day Owner/Retention of Displacement Dwelling.* A 90 day owner occupant who retains ownership of his or her dwelling or the right to remove his or her dwelling may receive the benefits as if he or she were a 180 day owner occupant subject, however, to a limitation of $4,000 on maximum benefits in lieu of the $15,000 limitation set out in paragraph § 777.24(b)(2).

§ 777.26 Mobile homes.

(a) *Moving Expenses.* Displaced persons who are occupants of mobile homes are eligible for moving expenses under § 777.23 subject to the following:

(1) If the person owns the mobile home, moving expenses may, at the owner's option, include any reasonable costs incurred to move the mobile home to a replacement site, plus the reasonable cost of disassembling, moving, and reassembling any attached appurtenances (such as porches, decks, skirting, and awnings) which were not acquired, anchoring of the unit, and utility "hook-up charges."

(2) If the person rents the mobile home, the Postal Service may allow the person moving expense benefits for moving the mobile home as if the person were an owner of the mobile home under paragraph (a)(1) of this section.

(3) If costs of moving a mobile home are paid as moving expenses under paragraphs (a)(1) or (a)(2) of this section, the person may not receive housing assistance benefits hereunder, other than any benefits to which they are entitled that are limited to the site of the mobile home.

(4) Displaced occupants of mobile homes are eligible for moving expenses for personal property other than the mobile home and its appurtenances, but only to the extent the Postal Service does not pay the costs of moving the mobile home (either as moving expenses or replacement housing payments or, if it does pay such costs, the personal property is of a type that is customarily moved separately from the mobile home.)

(b) *Replacement Housing Payments.* Displaced persons who are 180 day or 90 day occupants of mobile homes qualify for replacement housing payments under § 777.24 subject to the following:

(1) If the displaced person owns the mobile home and owns the site, the person is eligible for benefits under either § 777.24 (b) or (e).

(2) If the displaced person rents the mobile home and rents the site the person is eligible for benefits under § 777.24(e).

(3) If the displaced person rents the mobile home and owns the site the person is eligible for benefits under § 777.24(e), with regard to the mobile home and to benefits under § 777.24(b) with regard to the site, subject to a limitation on the home and site benefits combined of $15,000. (Persons who voluntarily sell mobile home sites are not displaced persons and are not entitled to benefits under Subpart B. See § 777.13(e)(2)(viii)).

(4) If the displaced person owns the mobile home and rents the site the person is eligible for benefits under either § 777.24 (b) or (e) with regard to the mobile home and to benefits as a tenant under § 777.24(e) with regard to the site, subject to a limitation on home and site benefits combined of $4,000.

(c) *Special Rules for Mobile Homes.* (1) In computing replacement housing payments for mobile home owners under paragraph (b) of this section, apply the terms of § 777.25 (i) and (j) as appropriate, to transactions involving moving the mobile home to a new site.

(2) The acquisition of a portion of a mobile home park may leave a remainder that is not adequate to continue the operation of the park. When the Postal Service determines that its acquisition of the real property has had this effect and that for this reason a mobile home occupant located on the remaining part of the property is required to move, such occupant shall be considered a displaced person under these regulations and shall be entitled to such benefits hereunder as the person would otherwise qualify.

§ 777.27 Last resort housing.

(a) *Basic Determination to Provide Last Resort Housing.* A displaced person cannot be required to move from his or her dwelling unless at least one comparable replacement dwelling is made available to him or her which is within his or her financial means. When such comparable replacement dwelling is not available, additional measures may be taken to provide for "last resort" housing for eligible displaced persons.

(b) *Basic Rights of Persons to be Displaced.* The provisions of this section do not deprive any displaced person of any rights the person may have under these regulations such as the right to accept the maximum replacement housing payment available under these regulations and to move to a decent, safe and sanitary replacement dwelling even if such dwelling is beyond the person's financial means.

(c) *Methods of Providing Replacement Housing.* The Postal Service has broad latitude in implementing this section, but implementation must be on a reasonable cost basis. The Postal Service may provide last resort housing using the following methods:

(1) Rehabilitation of and/or additions to an existing replacement dwelling.

(2) The construction of a new replacement dwelling.

(3) The provision of a direct loan which requires regular amortization or deferred repayment. Terms of such loan will be at the discretion of the Postal Service.

(4) A replacement housing payment in excess of the $4,000 and $15,000 limitations contained in § 777.24. A rental subsidy under this section may be provided in installments.

(5) The relocation and any needed rehabilitation of a replacement dwelling.

(6) The purchase or lease of land and/or a replacement dwelling by the Postal Service and subsequent sale or lease to, or exchange with, a displaced person.

(7) The removal of barriers to the handicapped.

(8) Any other method determined by the Postal Service to be reasonable.

(d) *Proof of Financial Need.* Last Resort Housing benefits exceeding the limitations under § 777.24(b)(2) and § 777.24(e)(2) will not be paid unless required to provide housing within the displaced person's financial means. To establish financial means, the displaced person must furnish the Postal Service proof of gross monthly income through income tax returns, certified financial statements or other reasonable evidence which the Postal Service determines is satisfactory.

§ 777.28 Claims and appeals.

(a) *Preparation of Claim.* The relocation representative should assist eligible displaced persons in the preparation of claims for moving assistance and relocation housing assistance. Preliminary review should be conducted in the field by the relocation representative with the displaced person, to preclude technical difficulties in processing the claim at a higher level.

(b) *Documentation.* Any claim for a relocation payment must be supported by such documentation as may be required to support the claim, for example the length of occupancy at the displacement dwelling, the rent paid at the displacement dwelling, expenses incurred in relocating, etc. A displaced person must be provided reasonable assistance to complete and file any required claim.

(c) *Time for Filing.* All claims must be filed with the Postal Service within 18 months after the date of the actual move from the displacement property.

(d) *Review, Approval and Payment.* The Postal Service will review claims within 60 days of submission and approve or disapprove payment. Upon approval or partial approval of the displaced person's claim, the Postal Service will promptly authorize payment of the approved amount. The certification that the claimant has occupied decent, safe, and sanitary housing must be completed prior to final payment of replacement housing payments.

(e) *Relocation Payments Not Considered as Income.* Upon approval of the claim and delivery of the relocation payment, the displaced person must be advised that no relocation payment made under these procedures shall be considered as income for the purpose of the Internal Revenue Code of 1954, or for the purpose of determining the eligibility or the extent of eligibility of any person for assistance under the Social Security Act or any other Federal Law.

(f) *Certification.* Certification that a person is displaced will be provided any agency requiring such information to assist that person under any Federal law or program.

(g) *Advance of Funds.* If the displaced person cannot arrange for the acquisition of a replacement property because of financial problems and the problems would be solved by an advance of funds, the Postal Service may determine the estimated amount of the actual claim and authorize an advance of that amount or a portion thereof. The displaced person will be fully informed in writing that his or her final claim will then be subject to adjustment. Advance payments should not be made to persons with a history of financial irresponsibility.

(h) *Money Owed to the Postal Service.* In cases of Postal Service leasing the acquired property to a displaced persons, or in cases of advance moving cost payments, any monies due the Postal Service by the displaced person and not paid before the remainder of the relocation payments are made must be deducted from such payments and the relocation file so documented.

(i) *Notice of Denial of Claim.* If the Postal Service disapproves all or part of a payment claimed, or refuses to consider the claim on its merits because of untimely filing or other grounds, it must promptly notify the claimant in writing of the determination, the basis for the determination, and the procedures for appealing the determination.

(j) *Appeal Procedure.* If a displaced person wishes to file an appeal:

(1) The appeal must be in writing.

(2) The appeal must be directed to the General Manager, Real Estate Division, and must set forth the displaced person's reasons for the appeal. (The General Manager shall not have taken part in the decision which led to the appeal. Appeals misdirected to others must be forwarded immediately to the General Manager with notification of the forwarding to the appellant.)

(3) The appeal must be submitted within 60 days after the displaced person receives written notification of the Postal Service's original determination concerning the displacee's claim. The Postal Service may extend this time limit for good cause.

(k) *Right of Representation.* A displaced person has a right to be represented by legal counsel or other representative in connection with his or her appeal, but solely at the person's own expense.

(l) *Review of Files by Appellant.* The Postal Service must permit a person to inspect and copy all materials pertinent to his or her appeal, except materials which are confidential. Such inspection will be permitted as allowed under the Freedom of Information Act, 39 CFR Part 265.

(m) *Scope of Review.* In deciding an appeal, the Postal Service must consider all pertinent justification and other material submitted by the displaced person and all other available information that is needed to ensure a fair and full review of the appeal.

(n) *Determination and Notification After Appeal.* Promptly after receipt of all supporting information submitted by the appellant, the General Manager, Real Estate Division, must make a written determination on the appeal, including the basis on which the decision was made, and furnish the appellant a copy. If the full relief requested is not granted at the regional level, the General Manager, Real Estate Division, must advise the person of his or her right to appeal the decision to the Director, Office of Real Estate. The rules stated here for appeals to the General Manager apply as well as to appeals to the Director, Office of Real Estate.

Subpart C—Acquisition

§ 777.31 Acquisition procedures.

(a) *Policy; Application of Section.* The Postal Service, as a matter of policy,

VOL 51
ISS 39
FE 27
1986
UMI

acquires interests in real property through voluntary agreements with owners. Only under unusual and compelling circumstances, and on a case-by-case basis, does the Postal Service acquire real property through the exercise or the threat of the exercise of eminent domain. This policy does not, however, prevent the Postal Service from occasionally entering into mutually agreeable condemnation proceedings with an owner, where price is not an issue, and for such purposes as to clear title or to acquire property from certain elected officials. For the purposes of this section, the Postal Service does not consider such voluntary and mutually agreeable uses of condemnation proceedings as the exercise or the threat of the exercise of eminent domain. The following regulations apply only to acquisitions by the exercise or the threat of the exercise of eminent domain:

(1) *Notice to Owner.* As soon as feasible after deciding to acquire a specific property through the exercise of eminent domain, the Postal Service must notify the owner of its intent to acquire the property.

(2) *Expeditious Negotiations.* The Postal Service must make every reasonable effort to acquire real property expeditiously by negotiation.

(3) *Appraisal and Invitation to Owner.* Before the initiation of negotiations, the real property shall be appraised in accordance with Postal Service appraisal standards as outlined in RE-1 and the owner or the owner's designated agent shall be given an opportunity to accompany the appraiser during the appraiser's inspection of the property.

(4) *Establishment of Offer of Just Compensation.* Prior to the initiation of negotiations (see § 777.13(k) for definition) the Postal Service must establish an amount which it believes is just compensation for the real property rights be acquired. The amount must not be less than the approved appraisal of the fair market value, including damages or benefits to the remaining property. Appraisers shall not give consideration to, or include in their real property appraisals, any allowances for the benefits provided by Title II of the Act.

(5) *Summary Statement.* Promptly after determining fair market value, the Postal Service shall make a written offer to acquire the property for the full amount believed to be just compensation. Along with the written purchase offer, the owner must be given a written statement of the basis for the offer of just compensation. This statement must include:

(i) A statement of the amount offered as just compensation. In the case of a partial acquisition, the compensation for the real property to be acquired and the compensation for damages, if any, must be separately stated.

(ii) The location and description of the real property and the interest(s) to be acquired.

(iii) An identification of the buildings, structures, and other improvements (including removable building equipment and trade fixtures) which are considered part of the real property for which the offer of just compensation is made. Where appropriate, the statement shall identify and separately held ownership interest in the improvement(s), for example, a tenant-owned improvement.

(6) *Basic Negotiation Procedures.* The Postal Service must make every reasonable effort to contact the owner or the owner's representative and:

(i) Discuss the Postal Service's offer to purchase the property including the basis for the offer of just compensation, and;

(ii) Explain Postal Service acquisition policies and procedures including the provisions for the payment of incidental expenses as described under § 777.33.

(7) *Opportunity to Consider Offer.* The owner must be given a reasonable opportunity to consider the Postal Service's offer, to present material which he or she believes is relevant to determining the value of the property, and to suggest modification in the proposed terms and conditions of the purchase. The Postal Service must consider the owner's presentation.

(8) *Updating Offer of Just Compensation.* If the information presented by the owner or a material change in the character or condition of the property indicates the need for new appraisal information, or if a significant delay has occurred since the time of the appraisal(s) of the property, the Postal Service must have the appraisal(s) updated or obtain a new appraisal(s). If the latest appraisal information indicates that a change in the purchase offer is warranted, the Postal Service must promptly reestablish just compensation and offer the revised amount to the owner in writing.

(9) *Contracts and Options.* Contracts to purchase shall cover only those items related to the acquisition of the property, and not incorporate provisions for making payments for relocation costs or related costs under Title II of these regulations.

(10) *Title II Benefits Not To Be Considered.* In the event of condemnation, estimated compensation shall be determined solely on the basis of the appraised value of the real property with no consideration being given to or reference contained therein to the payments to be made under Title II.

(11) *Coercive Action.* The Postal Service shall not advance the time of condemnation, or defer negotiations or condemnation, or the deposit of funds with the court, or take any other coercive action in order to induce an agreement on the price to be paid for the property.

(12) *Inverse Condemnation.* If the Postal Service intends to acquire any interest in real property by exercise of the power of eminent domain, it must institute formal condemnation proceedings and not intentionally make it necessary for the owner to institute proceedings to prove the fact of the taking of the real property.

(13) *Payment Before Taking Possession.* Before requiring the owner to surrender possession of the real property, the Postal Service must either:

(i) Pay the agreed purchase price to the owner; or

(ii) In the case of a condemnation proceeding, deposit with the court for the benefit of the owner an amount not less than the amount of the approved appraised value of the property or the amount of the award of compensation in the condemnation proceeding for the property.

(14) *Right-of-Entry.* With the prior approval of the owner, the Postal Service may obtain a right-of-entry before making payment to the owner.

§ 777.32 Acquisition of Tenant-owned improvements.

(a) *Acquisition of Improvements.* When acquiring any interest in real property, the Postal Service must acquire at least an equal interest in all buildings, structures, or other improvements located upon the real property. This must include any improvement of a tenant owner who has the right or obligation to remove the improvement at the expiration of the lease term.

(b) *Special Conditions.* Payment for tenant-owned improvements will be made to the tenant only if he or she meets the following conditions:

(1) In consideration for the payment the tenant-owner assigns, transfers, and releases to the Postal Service all of the tenant-owner's rights, title, and interests in the improvement;

(2) The owner of the real property on which the improvement is located disclaims all interest in the improvement; and

(3) The payment does not result in the duplication of any compensation otherwise authorized by law.

(c) *Preservation of Tenant's Rights.* Nothing in this section shall be construed to deprive the tenant-owner of any rights to reject payment under this section and to obtain payment for such property interests in accordance with other applicable law.

§ 777.33 Expenses incidental to transfer of title to the Postal Service.

(a) *Reimbursement.* When property is acquired through the exercise or the threat of the exercise of eminent domain, the owner shall be reimbursed for all reasonable expenses he or she necessarily incurred in conveying the real property to the Postal Service for:

(1) Recording fees, transfer taxes, documentary stamps, evidence of title, boundary surveys, legal descriptions of the real property, and similar incidental expenses. However, the Postal Service will not pay costs solely required to perfect the owner's title to the real property.

(2) Penalty costs and other charges for prepayment of any preexisting recorded mortgage, entered into in good faith, encumbering the real property.

(3) The pro rata portion of any prepaid real property taxes which are allocable to the period after the Postal Service obtains title to the property or effective possession of it, whichever is earlier.

(b) *Direct Payment.* Whenever feasible the Postal Service must pay these costs directly and thus avoid the need for an owner to pay such costs and then seek reimbursement from the Postal Service.

(c) *Certain Litigation Expenses.* The owner of the real property acquired must be reimbursed any reasonable expenses, including reasonable attorney, appraisal, and engineering fees which the owner actually incurred because of a condemnation proceeding if:

(1) The final judgment of the court is that the Postal Service cannot acquire the real property by condemnation; or

(2) The condemnation proceeding is abandoned by the Postal Service other than under an agreed-upon settlement; or

(3) The court having jurisdiction renders a judgment in favor of the owner in an inverse condemnation proceeding or the Postal Service effects a settlement of such a proceeding.

Subpart D—Voluntary Acquisitions

§ 777.41 Acquisition procedures.

(a) *Voluntary Acquisitions.* Acquisition rules for voluntary purchases are set out in Handbook RE-1, Realty Acquisition and Management and cover such areas as appraisal and negotiation procedures.

(b) *Tenant-Owned Improvements.* In general the Postal Service deals exclusively with the fee owner on the acquisition of all real property interest at the site. The Postal Service may, however, in exceptional cases deal directly with a tenant on a leasehold improvements matter. Should the Postal Service acquire the fee interest without acquiring rights in a leasehold improvement under circumstances in which the tenant would be entitled to compensation under § 777.32 above if the acquisition were by eminent domain or the under threat thereof, the tenant will be entitled to the benefits that would, under such circumstances, have been paid under § 777.32 above, unless the tenant has formally disclaimed further right in the real property improvement beyond the time of the expiration of his or her tenancy.

Subpart E—Donations

§ 777.51 Acceptance of donations.

Nothing in these regulations shall prevent a person from making a gift or donation of real property or any part thereof, or any interest therein, or of any compensation paid therefor, to the Postal Service. The Postal Service may obtain an appraisal of the real property for income tax or other purposes if the owner thereof requests the Postal Service to do so.

Fred Eggleston,

Assistant General Counsel Legislative Division.

DEPARTMENT OF EDUCATION

Office of Elementary and Secondary Education

Grants, Availability, etc.; Law-Related Education Program

AGENCY: Department of Education.

ACTION: Notice of Extension of Closing Date and Amendment to Notice for Transmittal of New Applications for Fiscal Year 1986 under the Law-Related Education Program.

SUMMARY: This notice extends the closing date of March 7, 1986, to April 7, 1986, for the transmittal of applications for new projects under the law-related education program (84.123). The fiscal year 1986 application notice for this program, published in the **Federal Register** on January 9, 1986 (51 FR 1028), provides detailed information concerning this program. This notice amends the January 9 notice to invite applications for projects on constitutional law.

SUPPLEMENTARY INFORMATION: The law-related education program is intended to enable children, youth, and adults to be more informed and effective citizens by equipping them with knowledge and skills pertaining to the law, the legal process, the legal system, and the fundamental principles and values on which these are based. An understanding of the Constitution and its importance in our democracy is essential in developing an appreciation for our democration system of government and in preparing youth to be knowledgeable, responsible citizens. The 200th anniversary of the signing of the U.S. Constitution will take place on September 17, 1987.

In view of the upcoming bicentennial of the Constitution, the Secretary of Education believes it is especially appropriate to invite applications under the law-related education program that propose projects on the Constitution, its origins and development, and the fundamental role of the Constitution in our legal system over the past two centuries. For example, proposed projects may educate students about principles that serve as the groundwork for American constitutional democracy, about the original documentary sources relevant to the Constitution, and/or about the concepts implemented by the Constitution, such as the rights and responsibilities of citizenship. This invitational priority is in addition to the invitational priorities stated in the January 9 notice.

FOR FURTHER INFORMATION CONTACT: Inquiries concerning this extension and amendment should be addressed to Jack A. Simms, U.S. Department of Education, Office of Elementary and Secondary Education, Room 2023, FOB-6, 400 Maryland Avenue, SW., Washington, DC 20202. Telephone (202) 472-7960.

(20 U.S.C. 3851)

(Catalog of Federal Domestic Assistance No. 84.123, Law-Related Education Program)

Dated: February 26, 1986.

William J. Bennett,

Secretary of Education.

Uniform Relocation Assistance and Real Property Acquisition for Federal and Federally Assisted Programs

AGENCIES: Department of Agriculture; Department of Commerce; Department of Defense; Department of Education; Department of Energy; Department of Health and Human Services; Department of Housing and Urban Development; Department of the Interior; Department of Justice; Department of Labor; Department of Transportation; Environmental Protection Agency; Federal Emergency Management Agency; General Services Administration; National Aeronautics and Space Administration; Pennsylvania Avenue Development Corporation; Veterans' Administration.

ACTION: Final rule.

SUMMARY: This regulation establishes a common rule for the implementation of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act) which requires that owners of real property to be acquired for Federal or federally-assisted programs and persons displaced from their dwellings, businesses, or farms as a result of such acquisition be provided fair, consistent, and equitable treatment. This regulation revises existing Uniform Act regulations and implements the Uniform Act for the 17 agencies listed above. The Department of Transportation, which published a final rule implementing the Uniform Act of March 5, 1985, is publishing this regulation as a "Final rule; request for comments."

DATES: This regulation is effective May 28, 1986, unless otherwise stated in the agency specific preamble. If an agency chooses to make this regulation effective earlier than May 28, 1986, it will publish a notice to that effect in the **Federal Register**. However, the regulation will not be effective earlier than March 31, 1986. It applies to all acquisitions and displacements for which the initiation of negotiations, defined at § ___.2(k), has not occurred as of the effective date.

The paperwork requirements for certain sections are not effective. See discussion under "Paperwork Reduction Act of 1980" in **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: See individual agencies below.

SUPPLEMENTARY INFORMATION: In May 1982, the Office of Management and Budget (OMB), in response to the concerns of State and local governments, formed a Uniform Act Interagency Regulatory Review Working Group to develop uniform regulations to be implemented by each covered agency for the Uniform Act. On February 27, 1985, a Presidential Memorandum was published in the **Federal Register** naming the Department of Transportation (DOT) as the agency with lead responsibility for the Uniform Act. On March 5, 1985, DOT published in the Register a model Uniform Act rule, which (in accordance with the President's February 27, 1985, memorandum) was followed on May 28, 1985, by a proposed common Uniform Act rule for 16 other covered agencies.

In response to the May 28 **Federal Register** publication, 37 respondents submitted more than 140 comments which were circulated to all covered agencies. The Working Group, under the leadership of OMB and DOT, then reviewed the comments and recommended changes to the proposed rule. These changes then were reviewed by all covered agencies. The regulations of all covered agencies are superceded by this common regulation, although DOT is publishing this regulation as a "Final rule; request for comments."

A description of the substantive changes from the proposed rule follows below. Numerous other changes not affecting content were made for clarity or readability. This regulation is applicable to both direct Federal programs and projects and to federally-assisted programs and projects undertaken by State and local government agencies. Uniform Act requirements, previously carried out under the differing regulations and procedures of separate Federal agencies, now will be included in this common rule. In addition, this common rule will increase the flexibility of State and local government agencies in implementing the Uniform Act.

Subpart A—General

Section ___.2 Definition of real property.

One commenter suggested including a definition of real property in the regulations. This proposal was not adopted because the criteria for distinguishing between real property and personal property vary from State to State. In some more complicated cases, the Agency may require a legal opinion on the appropriate classification of property.

Section ___.2(b) Definition of business.

One commenter recommended that the definition of a business be revised to require a minimum period of operation at the displacement site as a condition of eligibility for payment of moving expenses. The Uniform Act does not contain any basis for such a restriction. Therefore, the suggestion was not adopted.

Section ___.2(c) Definition of comparable replacement dwelling.

There were numerous comments on the components of this definition. These comments are addressed as follows:

Section ___.2(c)(2) Functional similarity.

A number of commenters expressed concern over the proposed requirement at Section ___.2(c)(2) that a comparable replacement dwelling must be functionally similar to the displacement dwelling with particular attention to the number of rooms and living space. Of special concern was the reasonableness of the costs that would be incurred when replacing run-down substandard housing with standard housing, regardless of the size of the housing or the needs of the displaced person. In many cases, the betterment of the person's living standards may be the primary purpose of the project, and excessive cost could render the project infeasible or limit the number of persons whose living conditions could be improved by the project.

In an effort to address the comments, while assuring fair and equitable treatment of all persons displaced from their homes by a project, we have added an explanation of intent in Appendix A. The statement in Appendix A indicates that the term "functionally similar" means that the comparable replacement dwelling must perform the same function, provide the same utility, and be capable of contributing to the same life style as the displacement dwelling. While it need not possess every feature of the displacement dwelling, the principal features must be present.

Section ___.2(c) Comparable replacement dwelling.

Section ___.2(c)(5) of the proposed rule indicated that a comparable replacement dwelling must be "currently available to the displaced person." Several commenters interpreted this to permit displacing agencies to satisfy their Uniform Act obligations by offering persons replacement housing made affordable under federally-assisted housing programs, such as the Department of Housing and Urban Development (HUD) Section 8 Existing Housing Program. This interpretation is not correct.

Under the Uniform Act, a person displaced from private market housing, who is not receiving assistance under any government housing program before displacement, must be provided referrals to private market dwellings which meet all the other criteria of Section ___.2(c) without any subsidy under a government housing program.

To ensure there will be no misunderstanding of the intent of the law and these regulations, Section ___.2(c)(5) has been modified to indicate that a comparable replacement dwelling must be available on the private market, unless the person is receiving government housing assistance to occupy the displacement dwelling. In the latter case, a comparable replacement dwelling may reflect similar government housing assistance. In addition, an explanation of the intent of the rule has been included in Appendix A.

Section ___.2(c)(6) Financial means standard.

Section ___.2(c)(6) of the proposed rule specified that a comparable replacement dwelling must be "within the financial means of the displaced person." It further indicated that a replacement dwelling would meet this standard if the person's basic monthly housing costs after displacement did not exceed those same costs before displacement, after taking into account the replacement housing payment provided under these regulations. A number of commenters supported this "make whole" approach, while others opposed it. Those objecting to the adoption of this standard suggested that a person's monthly housing costs after displacement should not exceed a percentage (25% or 30%) of the person's income and that, where necessary, a replacement housing payment should be sufficient to reduce a person's monthly housing costs to such level.

The final rule retains the "make whole" financial means standard at Section ___.2(c)(6) as consistent with the basic intent of the Uniform Act that a displaced person "shall not suffer disproportionate injuries" as a result of a project and that the person should be able to maintain the same life style after displacement.

Generally, those who preferred a percentage of income test commented from thier experience with HUD-assisted community development and housing programs. It is noted that under the HUD-assisted Community Development Block Grant (CDBG) program, communities have authority to develop relocation payment standards that exceed those required by the Uniform Act, provided that all persons in like circumstances are treated in a like manner. Thus, communities which wish to use a percentage of income test when computing rental assistance payments may do so by adopting a local written policy in accordance with 24 CFR 570.606(b). Such payments may be provided to any displaced persons for whom the community determines payment to be appropriate.

It is also noted that displaced low-income persons receive priority for federally-assisted housing programs designed to provide suitable, decent, safe and sanitary rental housing at a cost for rent and utilities that does not exceed 30% of the persons' adjusted income.

Several commenters requested clarification of the obligation of a displacing agency in those cases where the maximum replacement housing payment under Subpart F is not sufficient to ensure that appropriate replacement housing is within the financial means of the displaced person.

The requirement to provide displaced persons with replacement housing that is within their financial means is set forth in Section 205(c)(3) of the Uniform Act. Section 205(c)(3) requires that such housing must be available to the person before displacement (i.e., before the person moves). Therefore, whenever a $15,000 replacement housing payment under Section ___.402 would be insufficient to meet the financial means standard at Section ___.2(c)(6), the Agency must provide assistance under the last resort housing provisions of Subpart G. In order to make this requirement clear, a statement of this policy has been included in the final rule at Section .2(c)(6)(iii) and Section ___.403(b).

In order to deal with widely varied circumstances, Subpart G provides displacing agencies broad latitude to determine and implement the most cost-effective method of complying with the financial means standard. This may involve cash payments, the provision of housing or other methods. Several examples follow.

Example 1: An eligible person rents a comparable replacement dwelling and the increased cost for rent and utilities is $100 per month, or $4,800 over a 48-month period. Although a rental assistance payment under Section ___.402 is limited to $4,000, the last resort housing provisions of Subpart G would make it possible for the Agency to meet the financial means standard by providing the person $4,800. The payment may be in a lump sum or in installments.

Example 2: A 180-day owner-occupant buys a comparable replacement home and the sum of the price differential described at Section ___.401(c), increased mortgage interest costs, and incidental expenses as described at Section ___.401(e), is $20,000. Although a replacement housing payment for 180-

VOL 51 ISS 39 FE 27 1986 UMI

day homeowner-occupants under Section ___.401 is limited to $15,000, the last resort housing provisions of Subpart G would make it possible for the Agency to meet the financial means standard by providing the person $20,000.

Example 3: As in Example 2, the cost of obtaining a comparable replacement dwelling is $20,000. However, the Agency can build a new dwelling or rehabilitate an existing one at a cost which would yield a replacement housing payment of $17,500. It may choose this cost-effective method of meeting its obligation to make available a comparable replacement dwelling. Should the displaced person choose another replacement dwelling, his total replacement housing payment would be limited to $17,500.

While a payment under Subpart G may be necessary to meet the financial means test, it should not provide a higher payment than necessary to meet the "make whole" standard. Because the method for computing the increased mortgage interest cost component (Section ___.401(d)) of a replacement housing payment for a 180-day homeowner would do so, the final rule at Section ___.2(c)(6)(i) has been clarified by including a reference to Appendix A, Section ___.602 which explains that a last resort housing payment to a 180-day homeowner who must pay a higher interest rate on the new mortgage, may reflect the "buy down" approach to reimbursement of increased mortgage interest costs. (See Appendix A, Section ___.2(c)(6).)

However, clarification of Section ___.2(c)(6)(i) to permit use of the "buy down" approach when computing last resort housing payments does not change the method of computing a replacement housing payment under Section ___.401.

Section ___.2(f) Definition of displaced person.

Section ___.2(f)(1)(i) of the proposed rule indicated that the Agency shall determine whether a person is displaced as a direct result of a partial acquisition. Two commenters expressed concern that the statement could be construed to mean that the Agency's discretion to determine whether a tenant-occupant is permanently displaced does not extend to an acquisition of the entire real property. To preclude such unintended interpretation, this statement has been moved from Section ___.2(f)(1)(i) to Section ___.2(f)(2)(iv).

Section ___.2(f)(1)(iii) has been amended to indicate that a person displaced, as a result of the Agency's acquisition of or written order to vacate, for the project, other real property on which the person conducts a business or farm operation, is eligible for payment of moving expenses under Section ___.301, Section ___.302, or Section ___.303. Through an inadvertent error, the proposed rule did not make reference to the latter two sections. The change is necessary to conform the rule to the statute. Also, because the term "business" is defined to include any "nonprofit organization," the reference to the latter has been deleted from Section ___.2(f)(1)(iii).

Section ___.2(f)(2) Persons not displaced.

In response to two comments, a statement has been included in Appendix A at Section ___.2(f)(2)(iii) to explain that tenant-occupants who move from acquired real property but who are not permanently displaced within the meaning of the regulations must be treated fairly and equitably.

Section ___.2(f)(2)(viii) of the proposed rule permitted an Agency to determine that a person who is required only to temporarily vacate the premises for a short period to permit fumigation or other code enforcement work is not a "displaced person" under the regulations. Since Section ___.2(f)(2)(iii) authorizes the same determination, the provision at Section ___.2(f)(2)(viii) has been deleted.

Section ___.2(k) Initiation of negotiations.

Several commenters expressed confusion about the meaning of portions of this provision. In response to these comments, we have rewritten the provision to clarify it, but we have not changed its meaning. The provision now clearly indicates that for acquisitions and displacements under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (Public Law 96–510, commonly known as Superfund), there is a different definition for the initiation of negotiations. This is due to the differing nature of the Superfund program which is discussed in Appendix A, Section ___.2(k).

Section ___.3 No duplication of payments.

Several commenters expressed the view that Agencies would have to conduct extensive searches to be certain that they were not making duplicate payments. This was not the intention of the proposed rule and we have added a statement in Appendix A, Section ___.3 explaining that an Agency is required to avoid duplicating only those other payments of which it has knowledge at the time it is making the payment under these regulations.

Section ___.8 Compliance with other laws and regulations.

Section ___.8(g) of the proposed rule indicated that implementation of the regulations was subject to certain provisions of Executive Order 12259, "Leadership and Coordination of Fair Housing in Federal Programs." Two commenters called attention to the fact that the entire Executive Order was pertinent to the rule. Accordingly, the rule has been modified to identify the applicability of Executive Order 12259 at Section ___.8(j), and paragraphs (j) through (l) of the proposed rule have been redesignated as paragraphs (k) through (m) of the final rule. In addition, Executive Order 11990, "Protection of Wetlands," which had been inadvertently omitted, has been added at Section ___.8(1).

Section ___.9(c) Reports.

A number of commenters suggested that the content of the statistical report at Appendix B of the rule be expanded and that such report data be collected from displacing agencies more frequently than once each three years. Two commenters suggested deletion of two lines.

No change has been made to the statistical entries in Appendix B in response to these comments. The report data outlined in Appendix B are considered adequate for the general information needs of Federal agencies.

Section ___.10 Appeals.

A number of commenters objected to the proposal to eliminate (under certain federally-assisted programs) a person's right to appeal the decision of a State agency to the Federal agency funding the project. Several were concerned over the objectivity of the State agency when reviewing a request to overrule its earlier decision. Two of the commenters represented State agencies whose objections were based on a concern over whether they could continue to obtain a Federal Agency's review and advice on specific cases.

Programs which will be subject to the final rule vary in nature and many have operated successfully without a regulation authorizing persons to appeal a State Agency's decision to the Federal Agency funding the project. For this reason, we have not changed the final rule to provide for an appeal to the Federal level for all such programs. Federal agencies monitor State agency actions under federally-assisted programs. Also, any person dissatisfied

with a State agency's determination on his or her appeal may seek judicial review of the determination.

With respect to State agencies obtaining review and advice from a Federal Agency, no change in present program administration is intended. State agencies may continue to seek advice as to the general interpretation of a rule or its application in specific cases, whether or not an affected person has filed an appeal.

Section ___.10(b) of the proposed rule provided a person the right to appeal to an Agency its determination as to the person's eligibility for, or the amount of, a relocation payment or certain acquisition expenses. Several commenters recommended that the grounds for appeal be expanded to cover the adequacy of an Agency's referrals to comparable replacement housing before displacement, as provided under the current HUD Uniform Act regulations. Such deficiencies could be addressed by appealing the payment determination, since deficiencies in replacement housing would produce incorrect payments. Therefore, no change in the scope of appeals is considered necessary.

Subpart B—Real Property Acquisition

Section ___.101 Applicability of acquisition requirements.

One commenter raised the issue of the applicability of Subpart B to acquisition of property from a Federal, State, or local gvoernment Agency. The commenter's position was that such acquisitions should not be subject to Subpart B. Past practice of Federal agencies implementing the Uniform Act varies on this point. For example, the Department of Housing and Urban Development regulations excluded such acquisitions from coverage, while the Department of Transportation and Federal Highway Administration (FHWA) regulations did not.

As a consequence of this comment, we changed Section ___.101(a)(2) to indicate that Subpart B applies only if the acquiring governmental Agency has the authority to condemn the property of the owning Agency. This approach will reduce unnecessary paperwork and other administrative burdens on assistance recipients while maintaining Uniform Act protections for those needing them.

Section ___.102 Basic acquisition policies.

Several commenters proposed that the notice to the owner (of the Agency's interest in acquiring the property) required by Section ___.102(b) should be in writing. After careful consideration, we concluded that to require written notification in all cases would be impractical and would result in an unnecessary administrative burden. However, any Agency may elect to provide a written notice. Moreover, all Agencies must comply with the recordkeeping requirements of Section ___.9(a).

One commenter recommended that a relocation specialist accompany the appraiser during the property inspection discussed at Section ___.102(c). While not required by the regulation, this may be done if an Agency so chooses.

Another commenter suggested that an appraisal not be required for properties valued at less than $500 since the appraisal fee could exceed the property's value. We carefully considered this point but concluded that the requirement for an appraisal in all instances should be retained. First, we believe that the Uniform Act does not afford such latitude. Second, in the case of Federal and some State laws, basing the need for an appraisal on a threshold dollar amount in partial acquisitions is not a sound criterion, since a complicated valuation problem can result in a modest or even zero estimate of just compensation.

However, the reader should note Section ___.103(b) (Standards of Appraisals), which contemplates development of an appraisal format for low value, uncomplicated acquisitions and Section ___.108 (Donations).

One commenter suggested that the administrative settlement provision at Section ___.102(i) be revised to permit but not require the Agency to pay "depreciated replacement cost installed" for a real property improvement. This provision is intended to allow an Agency flexibility in settling cases where specific circumstances make it is reasonable to do so. It is impractical to provide a complete list of the numerous reasons for making such settlements in the rule. However, we expect the responsible Agency official to be judicious in the use of this provision, documenting the basis for the settlement. This provision is not to be used as a substitute for ensuring that other acquisition-related work is done properly. For example, if there is an error in the appraisal or appraisal review on a given parcel/property to be acquired, it is expected that the problem will be referred to the appropriate appraiser and/or appraisal reviewer for reconsideration, and, if necessary, correction. Administrative settlements should be used only when it is determined by the Agency that a reasonable difference of opinion exists concerning just compensation and such a settlement is prudent and in the public interest. Accordingly, a given situation might justify a settlement based upon an allowance for "depreciated replacement cost installed."

One commenter suggested that the phrase "for construction purposes" be inserted after "right-of-entry" near the end of the last sentence of Section ___.102(j) dealing with payment before taking possession. This change was recommended so that unnecessary restrictions would not be imposed on the Agency' survey activities. We have made the change to clarify this point. Another commenter recommended that the phrase "in exceptional cases" be deleted from this provision. This suggestion has not been adopted because it is intended that a right-of-entry (i.e., taking possession before payment is made available) be used *only* in the exceptional case. For example, this provision is intended to prohibit the use of rights-of-entry solely to meet a predetermined construction schedule, unless the project, itself, is of an emergency nature. Section 301(4) of the Uniform Act requires that, to the greatest extent practicable, no owner shall be required to surrender possession before payment is made available.

Several comments were received expressing concern that the fair market rent for short-term occupancy under Section ___.102(m) could be interpreted to be an inappropriately high rent in some circumstances. We have added language to Appendix A, Section ___.102(m) to clarify this provision.

Section ___.103 Criteria for appraisals.

One commenter recommended that the provisions of Section ___.103(e) (Qualifications of appraisers) and Section ___.103(f) (permitting the appraiser of a property to negotiate the acquisition of that property if its value is $2,500 or less) should apply only when Federal funds are directly involved in the acquisition of property. This recommendation has not been adopted. If property is acquired for a Federal or federally-assisted project, the requirements of the Uniform Act and this implementing regulation apply whether or not Federal funds are directly involved in acquisition.

One commenter recommended that the regulation address the eligibility of appraisal costs under federally-assisted programs. The eligibility of this type of cost varies by program and, therefore, may be addressed only in specific program regulations.

Section __.104 Review of appraisals.

Three commenters questioned the need for a review of any appraisal if the interest to be acquired is under $2,000 or is uncomplicated and of a low value. We do not agree. A review appraisal serves as an important check on the appraiser and enhances consistency among offers. In addition, it is a useful management tool providing oversight of Agency appraisal operations. Two of these commenters appeared to believe that the regulation required an overqualified reviewer or a contract reviewer. An appraiser's qualifications should be commensurate with the difficulty of the appraisal problem. (See Section __.103(e).) There is no need to retain a contract reviewer if there is someone on the staff, or otherwise available, who has suitable experience. Even when a contract reviewer is hired, the Agency still retains ultimate responsibility for establishing the amount of the offer to the owner.

Section __.106 Expenses incidental to transfer of title to the Agency.

One commenter suggested that incidental expenses should be reimbursed when the owner is required to pay a certain cost and the Agency later chooses to duplicate the action for its own reasons. We agree since the owner has no choice in such circumstances. An editorial change has been made to Appendix A, Section __.106 to convey this point more clearly.

Section __.108 Donations.

The preamble to the proposed rule noted that Section __.108, in part, allowed an owner of real property to waive his right to an appraisal as long as he is informed of that right. As a corollary, we wish to note that an Agency may use one appraisal as a basis for just compensation for a number of other similar parcels, as long as the owner of such other parcel(s) waives the right to an appraisal. This will reduce the cost of acquiring land while maintaining Uniform Act protections.

Subpart C—General Relocation Requirements

A number of commenters expressed concern about the absence of a requirement for relocation planning, asserting that without such a requirement it is not possible to successfully relocate displaced persons. We do not agree.

The rule does not prohibit relocation planning. Displacing agencies are free to plan in accordance with their needs, in recognition of the fact that they will have to meet the law's requirement to make comparable housing available to displaced persons before such persons may be required to move. We believe that early problem identification and resolution are desirable to avoid delays in project advancement, unnecessary litigation and other management difficulties. Therefore, displacing agencies are encouraged to continue to take appropriate actions to avoid these problems.

Sections __.203 (a) and (b) Relocation notices.

One commenter noted that no specific time had been designated for giving these notices and seemed to recommend doing so. We do not agree. The circumstances of an Agency's knowing that a particular person will be displaced and its ability to provide him or her the information these notices require will vary widely. Designating a particular date or event which would apply to all cases is not practical, in our opinion. However, we wish to make it clear that the requirement in both of these provisions is that the notices must be given promptly. In particular, the general information notice must be provided at the earliest feasible date so that persons to be displaced may be aware of assistance available to them.

Another commenter recommended consolidating the notices under Section __.203 (a) and (b) into one notice to be provided promptly after the initiation of negotiations. We have not accepted this suggestion because we believe it would delay the displaced person's receipt of basic information contained in the general information notice. As noted above, we believe the expeditious provision of this information is essential. However, we agree with the same commenter's suggestion that, if the two notices are separated by a substantial time period, the second notice should reiterate the basic information which was contained in the first. We encourage all displacing agencies to follow such a practice.

Section __.203(c) Ninety-day notice.

In response to a comment, we have changed the language in this provision to make it clear that the ninety-day notice may not be issued before the Agency has notified the person to be displaced of at least one available comparable replacement dwelling. Another commenter requested that the rule explicitly include Court Orders which contain specific vacate dates as meeting the ninety-day notice requirement. While we do not believe such a statement belongs in the rule, we agree that a written Court Order could meet this requirement. However, under ordinary circumstances the ninety-day notice requirement should have been met long before a case goes to condemnation.

Section __.204(a) Availability of comparable replacement dwelling prior to displacement.

Several comments under this section have been dealt with under other, more appropriate sections. This includes the suggestion that HUD Section 8 existing units be considered as comparable housing and the concern about the financial means criterion adopted by the regulations (see Sections __.2(c) (5) and (6)).

One commenter "strongly disagrees with the implication that only one referral needs to be made to a displacee." This is an incorrect reading of the rule. The rule, as proposed, required that, "*Where possible,* three or more comparable replacement dwellings *shall be made available* (emphasis added)." Only in situations where it is not possible to obtain three comparable replacement dwellings is it permitted to obtain fewer than three. However, in no case is it permitted to require a move without one comparable having been made available.

Section __.204(a)(2) Availability of comparable replacement dwelling prior to displacement.

In response to several comments, we have deleted the phrase "(not less than 90 days)" from this section since 90 days may not be an appropriate amount of time in all cases. The displacing Agency will have to judge what is a reasonable amount of time to negotiate and enter into a lease or purchase agreement.

Section __.205(b)(2) Relocation assistance advisory services.

Several commenters took issue with the proposed rule concerning services to be provided to assist minority persons to relocate to dwellings not in areas of minority concentration. The rule makes clear that all activities under the Uniform Act and its implementing regulations must be carried out in a nondiscriminatory manner. This applies to all phases of the process—from the initial contact with owners and displacees to the provision of housing and other relocation assistance and through the final settlement of relocation and acquisition payments. In addition, the rule provides that minority persons who wish to seek replacement housing in nonminority areas, whenever possible, *shall* be provided opportunities to do so. We believe that to go beyond

---

these requirements is unnecessary and exceeds the proper scope of this regulation.

Section __.206 Eviction for cause.

Several commenters asked if a displaced person who is evicted from the displacement dwelling and who fails to relocate to decent, safe, and sanitary housing within one year after the eviction is precluded from receiving a replacement housing payment, even if the displacing agency failed to provide a referral to comparable replacement housing. In our view, it would be inconsistent with the intent of the Uniform Act to penalize the displaced person for the Agency's failure to carry out its responsibilities. Therefore, we have modified this provision to make the beginning of the one-year period for obtaining replacement housing the later of either the moving date or the date referral to comparable replacement housing is made.

Section __.207 General requirements—claims for relocation payments.

There were comments on several subsections of Section __.207:

Section __.207(b) Expeditious payments.

One commenter suggested that payment of relocation claims be required within a specific time period, e.g., 30 days. We do not agree. Circumstances vary widely among displacing agencies. For some, making a payment is relatively uncomplicated; for others, it may involve a number of different individuals and even departments. No specific standard would serve both displacees' and agencies' interests. We believe the standard we proposed, i.e., "as soon as feasible," is the correct approach.

Section __.207(d) Time for filing.

In response to a comment, we have restructured this provision to make clear the separate requirements for tenants and owners.

Section __.207(f) Deductions from relocation payments.

Several commenters objected to the idea of allowing displacing agencies to deduct from relocation payments any rent which is owed them. We believe the ability to deduct rent actually and legitimately owed to the displacing Agency is essential to an effective relocation program. Without it, there is little incentive for a recalcitrant occupant either to pay the rent or to move. We see no reason why an occupant should not pay rent to an Agency which has acquired his dwelling and is permitting him to remain on site.

However, we also believe that the Agency has responsibilities toward such occupants. First among these is the prohibition of deductions which would prevent the person to be displaced from obtaining comparable replacement housing. Second, the Agency must meet its responsibilities under these regulations, including referrals to comparable housing, the provision of informational materials and notices, and other assistance. In the case of slum or dangerous conditions, which seem to be the major causes of concern to the commenters, we would expect the Agency to take appropriate action regarding site occupants. In addition, other forums, such as local courts or administrative agencies, are available to such persons.

Subpart D—Payments for Moving and Related Expenses

Section __.302 Fixed payment for moving expenses—residential moves.

One commenter recommended that the moving expense schedule be revised to provide more realistic payments. While this suggestion has merit, the Uniform Act imposes an upper limit of $300 for moving expenses plus a $200 dislocation allowance for this payment.

Section __.303 Payment for actual reasonable moving and related expenses—nonresidential moves.

One commenter recommended that self-moves to a storage site (see Section __.303(a)(4)) be prohibited and that the Agency, at its discretion, pay only the actual cost of the move conducted by a licensed commercial moving company selected by the Agency. We considered this recommendation to be unduly restrictive and, therefore, no change has been made.

One commenter suggested that the eligibility of franchise fees be specified in the regulation at Section __.303(a)(6). In general, eligible moving expense items are too numerous to list individually in the regulation; we have included only broad categories of expenses and those specific items which occur frequently. Each funding agency should provide the necessary guidance to specify which individual items are eligible costs.

Another commenter recommended that we specifically exclude attorneys' fees from the eligible professional services necessary for planning, moving and reinstalling personal property (Section __.303(a)(8)). We did not adopt this suggestion but we note that such fees must be reasonable and *necessary* to be eligible costs.

In response to a comment, we added a provision under purchase of substitute personal property (Section 303(a)(12)) allowing estimated moving cost to be based on a single bid or estimate when the move would be low cost or uncomplicated.

One commenter suggested that allowable searching expenses for a replacement site for an advertising sign should be limited to $300, while another suggested that finders' fees for franchise establishments should be addressed. We concluded that it was impractical to single out certain types of businesses for a different benefit level and that the individual Agency should determine what payment amount is reasonable and necessary.

One commenter suggested that designated agents of the Agency, such as movers and appraisers, be allowed to make inspections of the displacement and replacement sites as discussed in Section __.303(b)(3). This is the intent of the regulation.

Several comments recommended changes in the procedure for self-moves at Section __.303(c). This section has been rewritten for clarity. Since the definition of a business includes nonprofit organizations, we have deleted the redundant reference to them from this section and Sections __.303 (f) and (j). We also deleted the statement concerning additional documentation of moving expenses actually incurred. Determination of the need to gather further information is left to the Agency. Lastly, we added a provision to permit an Agency to make a payment based upon a single bid or estimate for moves which are low cost or uncomplicated in nature.

Section __.304 Fixed payment for moving expenses—nonresidential moves.

Several commenters questioned the provision in Section __.304(a)(1) presuming that a business will suffer a substantial loss of existing patronage, unless the Agency demonstrates otherwise. Given the disruption incident to most moves, we believe the burden of proof belongs with the Agency, not the business. Therefore, no change was made.

Two commenters suggested that the gross receipts portion of the material contribution test at Section __.2(d)(1) provided windfall payments, i.e., that the $2,000 gross receipts threshold is an insufficient basis for making a $2,500 payment. They also suggested raising the $1,000 net earnings threshold in Section __.2(d)(2). We made no changes in Section __.2(d)(2), believing $1,000 in net earnings to be sufficient to meet the material contribution test. However, we did change the threshold level for the gross receipts test from $2,000 to $5,000.

VOL 51
ISS 39
FE 27
1986
UMI

consistent with the approximately 150 percent rise in the Consumer Price Index since the test was instituted.

Section __2(d)(4) gave an Agency wide discretion to determine, in hardship cases, that the earnings of a business "contribute materially" and thus qualify it for an "in lieu" payment. Two commenters noted that Section __304(a)(3) of the proposed rule addressed the same issue through a waiver. The inconsistency has been corrected by deleting the waiver provision at Section __304(a)(3).

One commenter suggested that the procedure in Section __304(b) for determining the number of businesses should apply to all business relocation payments, not just fixed payments. We believe this issue to be of particular importance for fixed payments; however, if an Agency believes it needs to determine the number of businesses for another business relocation payment, it may use the same criteria.

One commenter suggested that the list of ineligible moving expenses in Section __305 be expanded to include a number of additional items, such as overtime, mistakes, and feasibility studies. We believe it is impractical to list all ineligible costs and that the "ineligibility" of items not specified in Section __305 should be determined by the Agency as part of its responsibility for determining whether costs are reasonable and necessary for the move. The same commenter also suggested that Section __305(j) better distinguish between reinstallation of relocated machinery, equipment and other personal property and physical changes to the real property at the replacement location. We concluded that this determination should be made by the Agency.

In response to two comments, Section __305(k) has been revised to indicate that it prohibits payments for storing personal property on property already owned or leased by the displaced person.

Subpart E—Replacement Housing Payments

Section __401 Replacement housing payments for 180-day homeowner-occupants.

The paragraphs in this section have been rearranged for consistency. Paragraph (c) becomes (f), (d) becomes (c), (e) becomes (d), and (f) becomes (e).

Three commenters suggested changes in the procedure for determining the replacement housing payment when the displaced person retains, relocates, and reoccupies the displacement dwelling. In response, we changed Section __401(c)(4)(iii), formerly Section __401(d)(4)(iii), so that the purchase price of the replacement dwelling will reflect the current fair market value of the replacement site rather than what the displaced person previously paid for it. In addition, we added Section __401(c)(4)(iv) to clarify the requirement in Section __401(d)(4)(iii) of the proposed rule that the retention value of the displacement dwelling is to be included in the purchase price of a replacement dwelling if it is included in the acquisition cost used in computing the replacement housing payment.

We have made a number of language changes in Section __401(d), formerly Section __401(e), solely for clarification.

One commenter suggested that the payment described in Section __401(e), formerly Section __401(f), should be limited to the incidental expenses in connection with purchasing a *comparable* replacement dwelling. In general, we did not accept this suggestion because we believe such a requirement would yield administrative burdens for implementing agencies out of proportion to the resulting savings. However, we did change the treatment of title insurance, formerly in Section __401(f)(1), now Section __401(e)(6), by limiting compensation to the cost for a comparable dwelling. Two other commenters suggested that the cost of termite inspection be listed as an eligible expense. We agree and have revised Section __401(f)(4), now Section __401(e)(4), accordingly. In addition, we deleted the words "by the lender" from this provision so that the cost of a structural certification or termite inspection would be an eligible incidental expense, if required.

Section __402 Replacement housing payments for 90-day occupants.

Two commenters suggested that we permit the Agency to extend for good cause the one-year time period in Section __402(a)(2) for renting/purchasing and occupying a replacement dwelling. We agree and have made the change.

Six commenters objected to the use of the "make whole" approach for determining the rental assistance payment under Section __402(b)(1). They argued that the financial means test should be based on percentage of income. These comments were extensively considered. As discussed under Section __2(c)(6) above, we believe that the intent of the Uniform Act is to provide a means for preventing disproportionate injury to persons displaced by public projects. The "make whole" standard accomplishes this objective.

A number of commenters expressed concern over the provision at Section __402(b)(1) (see also Section __2(c)(6)(ii)) that the market rent of the displacement dwelling is to be used when computing the rental assistance payment for a displaced person who paid little or no rent before displacement. The commenters feared that the provision would unfairly reduce the amount of the rental assistance payment to low-income persons, especially the elderly, who pay a low rent before displacement.

This provision is intended to address the computation of payments for homeowner-occupants (who, of course, did not pay rent before displacement), and those very unusual situations where a tenant is paying an unreasonably low rent, and a payment based on such rent would provide a windfall. The provision is not intended to apply in those situations where use of the fair market rent would result in a hardship because of the displaced person's income, or other special circumstances. An explanation of this intent has been included in Appendix A, Subpart E.

Three comments concerned the inclusion of utility services when computing a rental assistance payment. One indicated that the inclusion of utility services in the payment computation could result in an inappropriate subsidy and suggested that no utility services be reflected in the payment. The other two commenters expressed concern that the provision required all utility services to be reflected in the payment computation, if a single utility service is included in any of the applicable contract rents.

In response to these comments, the provision has been revised to indicate that the Agency must include in the payment computation the cost of any utility service (i.e., heat, water) which is included in either the displacement dwelling rent or the replacement dwelling rent. If neither rent includes a specific utility service, the Agency may compute the payment with or without such service. In any case, the Agency must ensure that like circumstances are compared.

Section __403 Additional rules governing replacement housing payments.

Four commenters suggested various changes at Section __403(a)(1) concerning the adjustment of the asking price for a comparable replacement dwelling. We considered the suggestions and made clarifying changes.

Several commenters suggested changes in the procedure at Section

__403(a)(2) for computing a replacement housing payment when the displacement property contains a major exterior attribute. Two commenters suggested that the displacing agency be allowed either to adjust the acquisition cost of the displacement dwelling by deducting the value of the attribute (as provided in the rule) *or* to pay for the additional cost of the attribute when it is not included in the comparable replacement property. We do not agree. We believe that the purpose of a replacement housing payment is to provide comparable *housing*, not exterior attributes such as swimming pools, larger-than-typical lots, etc. Moreover, paying for the cost of such attributes would add considerable cost to the relocation process without concomitant housing benefits. In addition, the language in this paragraph regarding partial acquisitions of a typical residential property, where the remainder constitutes a buildable residential lot, has been clarified.

Two commenters suggested that Section __403 (d) and (e), which relate to occupancy requirements, be consolidated. We agree and have combined and clarified the two provisions in Section __403(e).

Subpart F—Mobile Homes

A number of comments were received on this Subpart indicating that we had not made clear the intent of certain proposed provisions. To clarify these items, and to conform Subpart F to the remainder of the regulations, the following changes have been made.

Section __502 Moving and related expenses—mobile homes.

Section __502(a)(3) of the proposed rule has been moved to Section __502(b) of the final rule and revised to make it clear that the reasonable cost of repairs and/or modifications to make a mobile home decent, safe and sanitary are reimbursable, if the Agency determines that it would be practical to relocate the mobile home. A conforming change has been made to Section __503(c)(1).

Section __502(b) of the proposed rule has been moved to Section __502(c) of the final rule and clarified to indicate that payment of a nonreturnable mobile home park entrance fee may be reimbursable, if the person is displaced from a mobile home park or if the Agency determines that payment of the fee is necessary to effect relocation.

Sections __503 and __504 Replacement housing payments for 180-day mobile homeowner occupants and 90-day mobile home occupants

Sections __503(c) __504(c) have been clarified to indicate that a person displaced from a mobile home site may be eligible for a replacement housing payment to assist in purchasing or renting a replacement site, even if the person is not displaced from the mobile home.

Section __505 Additional rules governing relocation payments to mobile home occupants.

Section __505(a) has been modified to make it clear that the computation of a replacement housing payment must take into account the increased cost for both the replacement mobile home and the replacement mobile home site. Also, since this provision, as revised, fully explains the intent of Section __505(b)(1) of the proposed rule, the latter provision has been deleted and the next two paragraphs redesignated accordingly.

Section __505(b)(3) of the proposed rule has been moved to Section __505(b)(2) and revised to make clear its intent to set an upper limit on the replacement housing payment to a 180-day mobile home owner who elects not to relocate the mobile home, even though the Agency determines that, with certain repairs or modifications, relocation of the unit would be practical. To conform it with Section __401(c)(4), this provision also has been revised to require that the upper limit of the payment take into account the cost of moving the mobile home to a replacement site.

Section __505(e), which formerly discussed only mobile home occupants, has been reworded to make it clear that an owner required to move a mobile home as a direct result of a partial acquisition is eligible for payment of moving expenses, regardless of whether he or she occupied the mobile home.

Subpart G—Last Resort Housing

The rule supersedes the current governmentwide rule on last resort housing issued by the Department of Housing and Urban Development (HUD) at 24 CFR Part 43. Subpart G sets forth policies and procedures that maximize the flexibility of agencies seeking to use Section 206 of the Uniform Act (last resort housing provisions). By removing unnecessary existing requirements, it allows agencies to design and implement last resort housing measures according to their own needs.

Section __601(a) has been clarified to indicate that whenever a replacement housing payment under Subpart E would be insufficient to provide a comparable replacement dwelling on a timely basis to a person, the Agency is authorized to take appropriate last resort housing measures under Subpart G to accomplish this objective. This clarification is consistent with those added at Section __2(c)(6)(iii) and Section __403(b).

In response to two comments, Section __601(b) has been clarified by indicating that a 180-day homeowner-occupant, who is eligible for a replacement housing payment under Section __401, is entitled to a reasonable opportunity to purchase a comparable replacement dwelling. However, this provision must be read in conjunction with the definition of "owner of displacement dwelling" at Section __2(1) and is not to be imterpreted as requiring the Agency to provide persons owning only a fractional interest in the displacement dwelling a greater level of assistance to purchase a replacement home than the Agency would be required to provide such persons if they owned fee simple title to such dwelling. A statement to this effect has been included in Appendix A, Section __601(b).

Appendices

The reader's attention is directed to the appendices which accompany the rule. Appendix A provides additional information concerning the intent of certain portions of the rule. Appendix B provides a report form and instructions for those agencies which elect to require a report on Uniform Act activities.

Executive Order 12291

Executive Order 12291 requires that a regulatory impact analysis be prepared for "major" rules which are defined in the Order as any rule that has an annual effect on the national economy of $100 million or more, or certain other specified effects.

We intend the final rule to result in savings to State and local governments in the implementation of the Uniform Act. However, we do not believe that the regulation will have an annual economic effect of $100 million or more or the other effects listed in the Order. For this reason, we have determined that the regulation is not a major rule within the meaning of the Order.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 605(b)) requires that, for each rule with a "significant economic impact on a substantial number of small entities," an analysis be prepared describing the rule's impact on small entities and identifying any significant alternatives

VOL 51
ISS 39
FE 27
1986
UMI

to the rule that would minimize the economic impact on small entities.

The head of each of the agenices covered by this notice, or delegatee, has certified that this regulation, if adopted, will not have a significant economic impact on a substantial number of small entities. The provisions of the Uniform Act which provide the benefits covered by the rule have not changed. The primary impact of the rule is expected to be the elimination of unnecessary administrative requirements and the consequent reduction of burden on affected entities.

Paperwork Reduction Act of 1980

Sections __.102(e), __.103(b), __.104(c), __.203(a), __.203(c), __.205(b), __.207(g), and __.303(b) contain paperwork requirements subject to review by the Office of Management and Budget (OMB) Under Public Law 96–511, the Paperwork Reduction Act of 1980 (the Act). Each covered Federal agency will submit these requirements to OMB for approval in accordance with the Act and associated regulations at 5 CFR 1320. Except for the Department of Transportation (which has already received OMB approval (Order No. 2105–0508), these requirements will not be effective until OMB approval has been obtained. Each Federal agency will publish a notice in the **Federal Register** once OMB approval is obtained.

John J. Franke Jr.,
Assistant Secretary for Administration.

PART 21—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION FOR FEDERAL AND FEDERALLY ASSISTED PROGRAMS

Subpart A—General

Sec.
21.1 Purpose.
21.2 Definitions.
21.3 No duplication of payments.
21.4 Assurances, monitoring and corrective action.
21.5 Manner of notices.
21.6 Administration of jointly-funded projects.
21.7 Federal agency waiver of regulations.
21.8 Compliance with other laws and regulations.
21.9 Recordkeeping and reports.
21.10 Appeals.

Subpart B—Real Property Acquisition

21.101 Applicability of acquisition requirements.
21.102 Basic acquisition policies.
21.103 Criteria for appraisals.
21.104 Review of appraisals.
21.105 Acquisition of tenant-owned improvements.
21.106 Expenses incidental to transfer of title to the agency.
21.107 Certain litigation expenses.
21.108 Donations.

Subpart C—General Relocation Requirements

21.201 Purpose.
21.202 Applicability.
21.203 Relocation notices.
21.204 Availability of comparable replacement dwelling before displacement.
21.205 Relocation assistance advisory services.
21.206 Eviction for cause.
21.207 General requirements—claims for relocation payments.
21.208 Relocation payments not considered as income.

Subpart D—Payments for Moving and Related Expenses

21.301 Payment for actual reasonable moving and related expenses—residential moves.
21.302 Fixed payment for moving expenses—residential moves.
21.303 Payment for actual reasonable moving and related expenses—nonresidential moves.
21.304 Fixed payment for moving expenses—nonresidential moves.
21.305 Ineligible moving and related expenses.

Subpart E—Replacement Housing Payments

21.401 Replacement housing payment for 180-day homeowner-occupants.
21.402 Replacement housing payment for 90-day occupants.
21.403 Additional rules governing replacement housing payments.

Subpart F—Mobile Homes

21.501 Applicability.
21.502 Moving and related expenses—mobile homes.
21.503 Replacement housing payment for 180-day mobile homeowner-occupants.
21.504 Replacement housing payment for 90-day mobile home occupants.
21.505 Additional rules governing relocation payments to mobile home occupants.

Subpart G—Last Resort Housing

21.601 Applicability.
21.602 Methods of providing replacement housing.
Appendix A—Additional information.
Appendix B—Statistical information.

1208.207 General requirements—claims for relocation payments.
1208.208 Relocation payments not considered as income.

Subpart D—Payments for Moving and Related Expenses

1208.301 Payments for actual reasonable moving and related expenses—residential moves.
1208.302 Fixed payment for moving expenses—residential moves.
1208.303 Payment for actual reasonable moving and related expenses—nonresidential moves.
1208.304 Fixed payment for moving expenses—nonresidential moves.
1208.305 Ineligible moving and related expenses.

Subpart E—Replacement Housing Payments

1208.401 Replacement housing payments for 180-day homeowner-occupants.
1208.402 Replacement housing payments for 90-day occupants.
1208.403 Additional rules governing replacement housing payments.

Subpart F—Mobile Homes

1208.501 Applicability.
1208.502 Moving and related expenses—mobile homes.
1208.503 Replacement housing payments for 180-day mobile homeowner occupants.
1208.504 Replacement housing payments for 90-day mobile home occupants.
1208.505 Additional rules governing relocation payments to mobile home occupants.

Subpart G—Last Resort Housing

1208.601 Applicability.
1208.602 Methods of providing replacement housing.
Appendix A Additional information.
Appendix B Statistical report form.

Authority: 42 U.S.C. 4601, Sec. 213.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Parts 42 and 43

[Docket No. R-86-1239; FR-2106]

EFFECTIVE DATE: This regulation is effective May 1, 1986 for all acquisitions and displacements for which the initiation of negotiations occurs on or after May 1, 1986.

FOR FURTHER INFORMATION CONTACT: Melvin Geffner, Deputy Director, Roland Brown, Georgian Carter, or Alvin West, Relocation and Real Estate Division, Room 7174, Department of Housing and Urban Development, 451 Seventh Street S.W., Washington, D.C. 20410. Telephone (202) 755–6336. (This is not a toll-free number.)

ADDITIONAL SUPPLEMENTARY INFORMATION: This regulation supersedes existing HUD regulations governing Uniform Relocation Assistance and Real Property Acquisition found at 24 CFR Part 42 and Part 43, Subpart A. The regulation implements the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act). The common preamble to this final rule describes the principal changes that will be made in response to the comments submitted to the Federal Agencies on the proposed rule, including those submitted to the Department of Housing and Urban Development.

In addition to this rule the Department is publishing elsewhere in today's issue of the **Federal Register**, a rule containing technical amendments to other HUD regulations which cite relocation requirements in old Part 42 and Part 43, Subpart A. These changes are necessary to accurately reflect current program requirements. This document also contains appropriate amendments to add OMB control numbers to the Paperwork requirements contained in HUD's relocation regulations.

Providing Comparable (Affordable) Replacement Dwellings on a Timely Basis

These regulations accord all persons displaced from a dwelling the right to assistance sufficient to relocate to a comparable replacement dwelling (defined at § 42.2(c)). If a $15,000 replacement housing payment under § 42.401 or a $4,000 replacement housing payment under § 42.402 would not be sufficient to ensure that a comparable (affordable) replacement dwelling is available on a timely basis, the Agency must provide additional or alternative relocation assistance or abandon the displacement-causing activity.

Under § 42.102(m), if a person who is the owner or tenant of the real property at the time of its acquisition by the agency is permitted to occupy it after acquisition on a short-term basis, the rent may not exceed the "fair market rent" for the property. The term "fair market rent" means the rent paid for the unsubsidized use of similar property in similar areas and, thus, may differ from the Fair Market Rent (FMR) established by HUD under its section 8 housing assistance payments programs.

The last resort housing provisions of Subpart G offer Agencies wide latitude to devise appropriate solutions (see § 42.602) for providing such additional or alternative assistance, including the most frequently used option—increasing the replacement housing payment above the limit set forth in § 42.401 or § 42.402. Under the Community Development Block Grant Program grant recipients may, as an alternative to the last resort housing procedures at Subpart G, adopt a written policy in accordance with 24 CFR 570.606(b) under which displaced persons will be provided relocation assistance at levels that will ensure the availability of a comparable replacement dwelling.

To facilitate relocation in a timely and cost-effective manner, Agencies are encouraged to provide referrals to comparable replacement dwellings at the time of the initiation of negotiations (defined at § 42.2(k)) or as soon as feasible thereafter. Timely notification of the specific comparable replacement dwelling and the price or rent used as the basis for establishing the upper limit of the replacement housing payment (see § 42.205(b)(2)(i)) is an essential step in the relocation process. Unless such notification is provided in a timely manner, the level of replacement housing assistance would be based on the purchase price or rent of the decent, safe and sanitary dwelling to which the person actually moves, whether or not the resulting compensation exceeds that necessary to relocate to a comparable replacement dwelling.

Section 42.403(a)(1) permits the Agency to adjust the asking price for the comparable replacement dwelling that is used as the basis for computing the upper limit of a replacement housing payment, if the adjustment can be justified by local market data. It should be noted that a comparable replacement dwelling must be actually available to the person to be displaced. It cannot be a dwelling that was recently sold and therefore not available to the person. Nor can the payment be based on a statistical average of recent sales prices. Although very recent sales prices of dwellings similar to the comparable dwelling may serve as a basis for adjusting the asking price, should the comparable replacement dwelling be sold at a price above the adjusted price, the Agency may be required to reestablish the upper limit of the replacement housing payment on the basis of the actual sales price or to select another comparable replacement dwelling for this purpose.

Executive Order 12291

This rule does not constitute a major rule as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it does not (1) have an annual effect of the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act of 1980

Under the provisions of section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601), the undersigned certifies that this rule does not have a significant economic impact on a substantial number of small entities. The primary effect on grantees administering the rule will be a reduction in administrative costs and other burdens resulting from the simplification and clarification of certain policies and the elimination of policy differences among the Federal agencies promulgating this common rule. A small number of displaced businesses would no longer be eligible to choose a fixed payment (up to $10,000) in lieu of a payment for their actual moving expenses. However, there would be minimal effect on the relocation assistance provided to other displaced businesses and all displaced businesses would remain eligible for reimbursement of their actual moving expenses.

Environmental Impact

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implements section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of the General Counsel, Rules Docket Clerk, Room 10276, 451 Seventh Street, SW., Washington, 20410.

HUD Semiannual Agenda

This rule was listed as sequence number 907 in the Department's Semiannual Agenda of Regulations published on October 29, 1985 (50 FR 44199) under Executive Order 12291 and the Regulatory Flexibility Act.

Paperwork Reduction Act

The information collection requirements contained in this rule have been submitted to the Office of Management and Budget for review under the provisions of Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520) and have been assigned OMB Control Number 2506–0011.

Title 24 of the Code of Federal Regulations is amended as follows:

Dated: February 21, 1986.

Samuel R. Pierce, Jr.,

Secretary.

1. Part 42 is revised as set forth at the end of this document.

PART 42—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION FOR FEDERAL AND FEDERALLY-ASSISTED PROGRAMS

Subpart A—General

Sec.
42.1 Purpose.
42.2 Definitions.
42.3 No duplication of payments.
42.4 Assurance, monitoring and corrective action.
42.5 Manner of notices.
42.6 Administration of jointly-funded projects.
42.7 Federal agency waiver of regulations.
42.8 Compliance with other laws and regulations.
42.9 Recordkeeping and reports.
42.10 Appeals.

Subpart B—Real Property Acquisition

42.101 Applicability of acquisition requirements.
42.102 Basic acquisition policies.
42.103 Criteria for appraisals.
42.104 Review of appraisals.
42.105 Acquisition of tenant-owned improvements.
42.106 Expenses incidental to transfer of title to the agency.
42.107 Certain litigation expenses.
42.108 Donations.

Subpart C—General Relocation Requirements

42.201 Purpose.
42.202 Applicability.
42.203 Relocation notices.
42.204 Availability of comparable replacement dwelling before displacement.
42.205 Relocation assistance advisory services.

2. Title 32 is further amended by removing and reserving parts 641 and 742.

DEPARTMENT OF EDUCATION

34 CFR Part 15

FOR FURTHER INFORMATION CONTACT: Gary Rasmussen, U.S. Department of Education, 400 Maryland Avenue, S.W., Room 1175, Washington, D.C. 20202. Telephone: (202) 245–0306.

ADDITIONAL SUPPLEMENTARY INFORMATION: These regulations governing Uniform Relocation Assistance and Real Property Acquisition for Federal and Federally Assisted Programs replace previous uniform regulations published by the Department of Health, Education, and Welfare on April 2, 1973 (38 FR 8492), which were adopted and republished with appropriate conforming technical amendments by the Department of Education on May 9, 1980 (45 FR 30825). The text of these regulations is explained elsewhere in this document.

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the response to the proposed rules and on its own review, the Department has determined that the regulations in this document do not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 15

Government property, Relocation assistance, Real property acquisition.

Title 34 of the Code of Federal Regulations is amended by revising Part 15 as set forth at the end of this document.

Dated: February 24, 1986.

William J. Bennett,

Secretary of Education.

VETERANS ADMINISTRATION

38 CFR Part 25

FOR FURTHER INFORMATION CONTACT: Pam Swiatek, Chief, Real Estate Division (088C), Office of Construction, Veterans' Administration, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 389-3105)

ADDITIONAL SUPPLEMENTARY INFORMATION: The Veterans' Administration, in accordance with the Presidential Memorandum of February 27, 1985, and in conjunction with other

covered agencies, published on May 28, 1985, in the Federal Register, a proposed common rule implementing the Uniform Relocation Assistance and Real Property Acquistion Policies Act of 1970 to replace those contained in 38 CFR Part 25. Title 38 CFR is amended by removing the existing regulations in Part 25, and inserting the final common rule in that part.

In response to the May 28 Federal Register publication, the VA received one comment by the State of Washington Department of Transportation objecting to § 25.3, which placed "no duplication of payments" responsibility on the acquiring agency, as burdensome. The suggested change has been considered. The rule never intended to inquire the agencies to make extensive searches to insure that there is no duplication of payments. A section has been added to Appendix A explaining that an agency is required to avoid duplicating only those payments of which it has knowledge at the time it is making the payment under the regulations.

List of Subjects in 38 CFR Part 25

Relocation assistance, Veterans' Administration, Real property acquisition.

Title 38 of the Code of Federal Regulations is amended by revising Part 25 to read as forth at the end of this document.

Approved: February 14, 1986.

Everett Alvarez, Jr.,
Acting Administrator.

PART 25—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION FOR FEDERAL AND FEDERALLY ASSISTED PROGRAMS

Subpart A—General

Sec.
25.1 Purpose.
25.2 Definitions.
25.3 No duplication of payments.
25.4 Assurance, monitoring and corrective action.
25.5 Manner of notices.
25.6 Administration of jointly funded projects.
25.7 Federal agency waiver of regulations.
25.8 Compliance with other laws and regulations.
25.9 Recordkeeping and reports.
25.10 Appeals.

Subpart B—Real Property Acquisition

25.101 Applicability of acquisition requirements.
25.102 Basic Acquisition policies.
25.103 Criteria for appraisals.
25.104 Review of appraisals.

Sec.
25.105 Acquisition of tenant-owned improvements.
25.106 Expenses incidental to transfer of title to the agency.
25.107 Certain litigation expenses.
25.108 Donations.

Subpart C—General Relocation Requirements

25.201 Purpose.
25.202 Applicability.
25.203 Relocation notices.
25.204 Availability of comparable replacement dwelling before displacement.
25.205 Relocation assistance advisory services.
25.206 Eviction for cause.
25.207 General requirements—claims for relocation payments.
25.208 Relocation payments not considered as income.

Subpart D—Payments for Moving and Related Expenses

25.301 Payment for actual reasonable moving and related expenses—residential moves.
25.302 Fixed payment for moving expenses—residential moves.
25.303 Payment for actual reasonable moving and related expenses—nonresidential moves.
25.304 Fixed payment for moving expenses—nonresidential moves.
25.305 Ineligible moving and related expenses.

Subpart E—Replacement Housing Payments

25.401 Replacement housing payment for 180-day homeowner-occupants.
25.402 Replacement housing payment for 90-day occupants.
25.403 Additional rules governing replacement housing payments.

Subpart F—Mobile Homes

25.501 Applicability.
25.502 Moving and related expenses-mobile homes.
25.503 Replacement housing payment for 180-day mobile homeowner-occupant.
25.504 Replacement housing payment for 90-day mobile homeowner-occupants.
25.505 Additional rules governing relocation payments to mobile home occupants.

Subpart G—Last Resort Housing

25.601 Applicability.
25.602 Methods of providing replacement housing.

Appendix A—Additional Information.

Appendix B—Statistical Report Form.

Authority: Sec. 213, Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Pub. L. 91-646, 84 Stat. 1894 (42 U.S.C. 4601).

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 4

[FRL 2965-6]

FOR FURTHER INFORMATION CONTACT: Marshall Schy, Grants Administration Division (PM-216), Room 3317M, (202) 382-5298. (This is not a toll-free number.)

ADDITIONAL SUPPLEMENTARY INFORMATION: Federal agencies are jointly publishing a common final rule to implement cost-effective policies and procedures governing the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601 et seq). The rule, as a part of the President's regulatory relief program, is designed to reduce the burden of regulation and paper work for EPA's assistance recipients. When effective, this rule will supersede the existing EPA Uniform Act rule at 40 CFR Part 4. In addition to the items discussed above in the common preamble, EPA wishes to bring the following sections to the attention of its readers.

Section 4.101 Real Property Acquisition (General).

Section 4.101(b) provides a benchmark of 50 years beyond which the acquisition requirements of this rule clearly apply to leases. Appendix A at § 4.101(b) notes that an Agency may apply those requirements to a less-than-full-fee acquisition short of 50 years which, in its judgment, should be covered. In the past, under the wastewater treatment grant program, EPA has applied Uniform Act requirements to necessary acquisitions if they were for 20 years or longer. EPA will continue to use this standard under the common rule.

Section 4.103 Criteria for Appraisals.

The rule significantly expands the criteria for appraisals of real property under EPA and EPA-assisted programs. Section 4.103(a) defines an appraisal; § 4.103(b) provides minimum standards for the content of appraisals; § 4.103(e) discusses qualifications for appraisers; and § 4.103(f) discusses conflict of interest in appraisals.

Section 4.104 Review of Appraisals.

The rule adds a requirement that the Agency have an appraisal review process. The purpose of the review is to assure that all appraisals meet Agency appraisal standards.

VOL
51
ISS
39
FE
27
1986
UMI

Section 4.108 Donations.

The rule permits the full or partial donation of real property to an Agency, as long as the donor is informed of his right to just compensation. Similarly, an owner of real property may waive his right to an appraisal of his property as long as he is informed of that right. This will allow the Agency to avoid the cost of appraisals in situations where the owner believes the benefit he will receive from the project is greater than the value of the interest being acquired, e.g., easements to provide water sewer lines. In addition, it will allow the Agency to use one appraisal as the basis for determining just compensation for a number of other, similar parcels, as long as the owner of such parcel(s) waives the right to an appraisal.

This has been a long-standing problem in EPA's wastewater treatment program under which State agencies may purchase numerous easements, each often of nominal value. In this situation, the cost of obtaining an appraisal for each acquisition may well exceed the value of the interest being acquired. This not only is costly and unproductive, but, in some cases, may affect the viability of the proposed project.

Section 4.207(e) Multiple occupants of one displacement dwelling.

EPA's previous rule (at § 4.333) provided for separate replacement housing payments for multiple occupants of a single dwelling. The common final rule provides for a prorated share of all relocation payments in such multiple occupancy situations, except when the displacing agency determines that more than one household had been maintained. When that occurs, each household has a separate entitlement to relocation payments.

Section 4.304(c) Fixed payment for moving expenses—Nonresidential moves [Farm operation].

The common final rule modifies a portion of EPA' current requirement found at § 4.205–3. That provision, in part, requires that a partial acquisition of a farm operation leave the farm operation with an uneconomic remnant in order for a fixed payment to be payable. The rule only requires that in such cases, the partial acquisition cause a substantial change in the nature of the farm operation.

Section 4.403(a) Determining cost of comparable replacement dwelling.

The current EPA rule at § 4.330 provides three methods of determining the cost of a comparable replacement dwelling, i.e., using dwelling units available on the market, the schedule method, and alternative methods if the market and schedule methods are inappropriate. The common final rule retains only the market method.

Section 4.336 Certification of eligiblity pending purchase of replacement dwelling.

The common final rule deletes the requirement at § 4.336 that the displacing agency, at the request of a displaced person, provide a certificate concerning eligibility for a replacement housing payment. While this no longer is required, EPA encourages displacing agencies to continue to provide this and similar assistance to displaced persons.

Section 4.502 EPA share of costs.

The common final rule deletes the provision at § 4.502(a) of EPA's current regulation requiring that payments and other costs under the Uniform Act be shared in the same manner as other project costs. It also deletes the provision at § 4.502(c) that EPA may advance to a State agency the EPA share of the cost of certain Uniform Act payments if it is determined to be necessary for the expeditious completion of a program or a project. These deletions are for regulatory simplification. Since both provisions are statutory (section 211 of the Uniform Act), the requirements are unchanged.

List of Subjects in 40 CFR Part 4

Real property acquisition, Relocation assistance.

Title 40 of the Code of Federal Regulations is amended by revising Part 4 as set forth at the end of this document.

Lee M. Thomas,
Administrator.
February 21, 1985.

PART 4—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION FOR FEDERAL AND FEDERALLY ASSISTED PROGRAMS

Subpart A—General

Sec.
4.1 Purpose.
4.2 Definitions.
4.3 No duplication of payments.
4.4 Assurances, monitoring and corrective action.
4.5 Manner of notices.
4.6 Administration of jointly-funded projects.
4.7 Federal agency waiver of regulations.
4.8 Compliance with other laws and regulations.
4.9 Recordkeeping and reports.
4.10 Appeals.

Subpart B—Real Property Acquisition

4.101 Applicability of acquisition requirements.
4.102 Basic acquisition policies.
4.103 Criteria for appraisals.
4.104 Review of appraisals.
4.105 Acquisition of tenant-owned improvements.
4.106 Expenses incidental to transfer of title to the agency.
4.107 Certain litigation expenses.
4.108 Donations.

Subpart C—General Relocation Requirements

4.201 Purpose.
4.202 Applicability.
4.203 Relocation notices.
4.204 Availability of comparable replacement dwelling before displacement.
4.205 Relocation assistance advisory services.
4.206 Eviction for cause.
4.207 General requirements—claims for relocation payments.
4.208 Relocation payments not considered as income.

Subpart D—Payments for Moving and Related Expenses

4.301 Payment for actual reasonable moving and related expenses—residential moves.
4.302 Fixed payment for moving expenses—residential moves.
4.303 Payment for actual reasonable moving and related expenses—nonresidential moves.
4.304 Fixed payment for moving expenses—nonresidential moves.
4.305 Ineligible moving and related expenses.

Subpart E—Replacement Housing Payments

4.401 Replacement housing payment for 180-day homeowner-occupants.
4.402 Replacement housing payment for 90-day occupants.
4.403 Additional rules governing replacement housing payments.

Subpart F—Mobile Homes

4.501 Applicability.
4.502 Moving and related expenses—mobile homes.
4.503 Replacement housing payment for 180-day mobile home owner-occupants.
4.504 Replacement housing payment for 90-day mobile home occupants.
4.505 Additional rules governing relocation payments to mobile home occupants.

Subpart G—Last Resort Housing

4.601 Applicability.
4.602 Methods of providing replacement housing.
Appendix A—Additional information.
Appendix B—Statistical report form.

Authority: Section 213, Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Public Law 91–646, 84 Stat. 1894 (42 U.S.C. 4601).

GENERAL SERVICES ADMINISTRATION

41 CFR Parts 101–6, 101–18 and 105–51

FOR FURTHER INFORMATION CONTACT: Mr. John H. Quigley, Director, Space Management Division (202–566–1875) or Mr. John P. Spock, Space Management Division (202–523–5549), General Services Administration, 18th and F Streets, NW., Washington, DC 20405. Office hours Monday through Friday from 8:00 to 4:30 P.M., ET.

ADDITIONAL SUPPLEMENTARY INFORMATION: The recordkeeping and information collection requirements included in these regulations have been submitted or are simultaneously being submitted for approval to the Office of Management and Budget.

To promote the uniform and effective administration of Federal relocation assistance and real property acquisition as provided for in the Uniform Act and the Presidential Memorandum of February 27, 1985, GSA revokes its exisitng implementing regulations in 41 CFR 101–18.000 through 101–18.003–19 and 41 CFR 101–18.300 through 101–18.312, and adopts the uniform model regulation published herein and promulgates it at 41 CFR Part 105–51. The model regulation in general provides greater details than exist under GSA's present implementing regulations. The subject coverage is generally the same, however, the model regulation differs as follows:

Section __3 No duplication of payments, and § __4, Assurances, monitoring and corrective action, are new.

Section __101(b) Revises GSA's regulations on leasehold acquisition as published in 41 CFR 101–18.312.

Section __102(g) Is a new requirement for updating offers of just compensation.

Section __103 Expands GSA's criteria for appraisals.

Subparts C, D and E, dealing with general relocation requirements, payment for moving and related expenses, and replacement housing payments, respectively, provide expanded details over those contained in GSA's regulations.

Subpart F on mobile homes is new.

Subpart G expands GSA's present coverage of last resort housing.

Appendix A, Additional information is new.

Effect on other Directives. The provisions of 41 CFR indicated above are superseded by this rule. The Governmentwide regulation, issued by GSA to implement the Uniform Act, at 41 CFR 101–6.1 is cancelled.

List of Subjects in 41 CFR Part 105–51

Real property acquisition; Relocation assistance.

Title 41 of the Code of Federal Regulations is amended as set forth below.

1. Title 41 is amended by adding Part 105–51 to read as follows:

PART 105–51—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION FOR FEDERAL AND FEDERALLY ASSISTED PROGRAMS

Subpart 105–51.0—General

Sec.
105–51.001 Purpose.
105–51.002 Definitions.
105–51.003 No duplications of payments.
105–51.004 Assurances, monitoring and corrective action.
105–51.005 Manner of notices.
105–51.006 Administration of jointly-funded projects.
105–51.007 Federal agency waiver of regulations.
105–51.008 Compliance with other laws and regulations.
105–51.009 Recordkeeping and reports.
105–51.010 Appeals.

Subpart 105–51.1—Real Property Acquisition

105–51.101 Applicability of acquisition requirements.
105–51.102 Basic acquisition policies.
105–51.103 Criteria for appraisals.
105–51.104 Review of appraisals.
105–51.105 Acquisition of tenant-owned improvements.
105–51.106 Expenses incidental to transfer of title to the agency.
105–51.107 Certain litigation expenses.
105–51.108 Donations.

Subpart 105–51.2—General Relocation Requirements

105–51.201 Purpose.
105–51.202 Applicability.
105–51.203 Relocation information and written notices.
105–51.204 Availability of comparable replacement dwelling prior to displacement.
105–51.205 Relocation assistance advisory services.
105–51.206 Eviction for cause.
105–51.207 General requirements-claims for relocation payments.
105–51.208 Relocation payments not considered as income.

Subpart 105–51.3—Payments for Moving and Related Expenses

105–51.301 Payments for actual reasonable moving and related expenses—residential moves.
105–51.302 Fixed payment for moving expenses—residential moves.
105–51.303 Payment for actual reasonable moving and related expenses—nonresidential moves.
105–51.304 Fixed payment for moving expenses—nonresidential moves.
105–51.305 Ineligible moving and related expenses.

Subpart 105–51.4—Replacement Housing Payments

105–51.401 Replacement housing payments for 180-day homeowner-occupants.
105–51.402 Replacement housing payments for 90-day occupants.
105–51.403 Additional rules governing replacement housing payments.

Subpart 105–51.5—Mobile Homes

105–51.501 Applicability.
105–51.502 Moving and related expenses—mobile homes.
105–51.503 Replacement housing payments for 180-day mobile homeowner occupants.
105–51.504 Replacement housing payments for 90-day mobile home occupants.
105–51.505 Additional rules governing relocation payments to mobile home occupants.

Subpart 105–51.6—Last Resort Housing

105–51.601 Applicability.
105–51.602 Methods of providing replacement housing.
Appendix A—Additional information.
Appendix B—Statistical report form.

Authority: Section 213, Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Pub. L. 91–646, 84 Stat. 1894 (42 U.S.C. 4601).

2. Part 105–51 is further amended as follows:

a. Change "Subpart D" to read "Subpart 105–51.3" in the following places:

105–51.501
105–51.502(a)(2)

b. Change "Subpart E" to read "Subpart 105–51.4" in the following places:

§ 105–51.501
§ 105–51.505(a)
§ 105–51.601(a)

c. In Appendix A change the subpart designations to read as set forth in the table of contents for Part 105–51 above.

PART 101–6—MISCELLANEOUS REGULATIONS

Subpart 101–6.1—[Removed and Reserved]

3. Subpart 101–6.1 is removed and reserved.

PART 101–18—ACQUISITION OF REAL PROPERTY

4. The authority citation for Part 101–18 continues to read as follows:

VOL 51
ISS 39
FE 27
1986
UMI

Authority: 63 Stat. 377 (40 U.S.C. 304c, 471, 490, 601–615); 73 Stat. 479; (40 U.S.C. 490 note); (42 U.S.C. 4201–4244); (40 U.S.C. 531–535); E.O. 11512, 35 FR 3979; 84 Stat. 1894, unless otherwise noted.

5. Part 101–18 is amended by removing § 101–18.003 through 101–18.003–19 and by removing and reserving Subpart 101–18.3 as follows:

§§101–18.003 through 101–18.003–19 [Removed].

Subpart 101–18.3—[Removed and Reserved]

Dated: February 20, 1986.

Paul Trause,

Acting Administrator of General Services.

DEPARTMENT OF THE INTERIOR

41 CFR Part 114–50

FOR FURTHER INFORMATION CONTACT: Billy Lee Hart, Chief, Division of Real Property Management, Office of Acquisition and Property Management, Room 5517, Department of the Interior, Washington, D.C. 20240, Phone: 202–343–3336.

ADDITIONAL SUPPLEMENTARY INFORMATION: Federal agencies are promulgating jointly a final common rule to implement cost-effective policies and procedures governing the implementation of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601). This final common rule is applicable to both direct Federal programs and projects and to federally-assisted programs and projects undertaken by State and local governments.

This regulation supersedes the existing Department of the Interior regulation governing Uniform Relocation Assistance and Real Property Acquisition found at 41 CFR Part 114–50. The principal changes that will be made in the current regulation are discussed below.

Section 114–50.302 (__.2) (a) Definition of Agency.

The term agency has been clarified to mean that an agency within the Department of the Interior means bureau or office including those programs implemented by State or local governmental units with Federal or State financing.

Section 114–50.307 (__.7) Federal Agency Waiver of Regulations.

The term agency in this section has also been clarified to mean that for the purposes of this subpart Federal funding agencies include bureaus and offices.

The Department of the Interior is codifying the rule in Title 41 of the CFR as a subpart rather than as a part. Therefore, the section numbering will be different from the common rulemaking. The differences are displayed in the table of contents of Subpart 114.50.3 below. Conforming amendments are being made to correct the internal references in light of the differences between the Department of the Interior and the common rulemaking numbering.

List of Subjects in 41 CFR Part 114–50

Uniform relocation assistance and real property acquisition policies, Relocation assistance, Real property acquisition.

Title 41 of the Code of Federal Regulations is amended as set forth below.

Joseph E. Doddridge, Jr.,

Deputy Assistant Secretary—Policy, Budget and Administration.

1. The authority citation for Part 114–50 continues to read as follows:

Authority: 5 U.S.C. 301, and sec. 213 of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, 84 Stat. 1894, 1900 (42 U.S.C. 4601, 4633).

2. Part 114–50 is amended by revising Subpart 114–50.3 to read as set forth at the end of this document:

PART 114–50—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES

* * * * *

Subpart 114–50.3—Uniform Relocation Assistance and Real Property Acquisition for Federal and Federally Assisted Programs

General

Sec.
114–50.301 (__.1) Purpose.
114–50.302 (__.2) Definitions.
114–50.303 (__.3) No duplication of payments.
114–50.304 (__.4) Assurances, monitoring and corrective action.
114–50.305 (__.5) Manner of notices.
114–50.306 (__.6) Administration of jointly-funded projects.
114–50.307 (__.7) Federal agency waiver of regulations.
114–50.308 (__.8) Compliance with other laws and regulations.
114–50.309 (__.9) Recordkeeping and reports.
114–50.310 (__.10) Appeals.

Real Property Acquisition

114–50.311 (__.101) Applicability of acquisition requirements.
114–50.312 (__.102) Basic acquisition policies.
114–50.313 (__.103) Criteria for appraisals.
114–50.314 (__.104) Review of appraisals.
114–50.315 (__.105) Acquisition of tenant-owned improvements.
114–50.316 (__.106) Expenses incidental to transfer of title to the agency.
114–50.317 (__.107) Certain litigation expenses.
114–50.318 (__.108) Donations.

General Relocation Requirements

114–50.321 (__.201) Purpose.
114–50.322 (__.202) Applicability.
114–50.323 (__.203) Relocation information and written notices.
114–50.324 (__.204) Availability of comparable replacement dwelling before displacement.
114–50.325 (__.205) Relocation assistance advisory services.
114–50.326 (__.206) Eviction for cause.
114–50.327 (__.207) General requirements—claims for relocation payments.
114–50.328 (__.208) Relocation payments not considered as income.

Payments for Moving and Related Expenses

114–50.331 (__.301) Payment for actual reasonable moving and related expenses—residential moves.
114–50.332 (__.302) Fixed payment for moving expenses—residential moves.
114–50.333 (__.303) Payment for actual reasonable moving and related expenses—nonresidential moves.
114–50.334 (__.304) Fixed payment for moving expenses—nonresidential moves.
114–50.335 (__.305) Ineligible moving and related expenses.

Replacement Housing Payments

114–50.341 (__.401) Replacement housing payment for 180-day homeowner-occupants.
114–50.342 (__.402) Replacement housing payment for 90-day occupants.
114–50.343 (__.403) Additional rules governing replacement housing payments.

Mobile Homes

114–50.351 (__.501) Applicability.
114–50.352 (__.502) Moving and related expenses—mobile homes.
114–50.353 (__.503) Replacement housing payment for 180-day mobile homeowner-occupants.
114–50.354 (__.504) Replacement housing payment for 90-day mobile home occupants.
114–50.355 (__.505) Additional rules governing relocation payments to mobile home occupants.

Last Resort Housing

114–50.361 (__.601) Applicability.
114–50.362 (__.602) Methods of providing replacement housing.

Appendix A—Additional information.
Appendix B—Statistical report form.

3. Subpart 114–50.3 is further amended as follows:

a. Change "this part" to read "this subpart" in the following places:

§ 114–50.307
§ 114–50.343(e)

b. Change "this Subpart" to read "§§ 114–50.311 through 114–50.318" in the following places:

§ 114–50.311 (a) and (b)
§ 114–50.315 (b) and (e)

c. Change "this Subpart prescribes" to read "Sections 114–50.321 through 114–50.328 prescribe" in § 114–50.321.

d. Change "This Subpart describes" to read "Sections 114–50.351 through 114–50.355 describe" in § 114–50.351.

e. Change "Subpart D" to read "§ 114–50.331 through 114–50.335" in the following places:

§ 114–50.351
§ 114–50.352(a)(2)

f. Change "Subpart E" to read "§§ 114–50–341 through 114–50.343" in the following places:

§ 114–50.351
§ 114–50.355(a)
§ 114–50.361(a)

g. Change "this Subpart" to read "§ 114–50.361 through 114–50.362" in the following places:

§ 114–50.361(a) and (b)
§ 114–50.362 introductory text and (d)

h. In Appendix A, remove the subpart designations from each of the headings.

i. In Appendix A, under the heading "Real Property Acquisition," change "this Subpart" to read "§§ 114–50.31 through 114–50.318" in the three places where it occurs.

Subparts 114–50.1, 114–50.2, and 114–50.4 through 114–50.13 [Removed and Reserved]

4. The Part is further amended by removing and reserving Subparts 114–50.1, 114–50.2, and 114–50.4 through 114–50.13.

DEPARTMENT OF JUSTICE

41 CFR Part 128–18

FOR FURTHER INFORMATION CONTACT: Mr. Philip M. Zeidner, Department of Justice, Director, Facilities and Property Management Staff, Room 6315, Main Justice Building, 10th and Pennsylvania Avenue, NW., Washington, DC 20530.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department of Justice is codifying the rule in Title 41 of the CFR as a subpart rather than as a part. Therefore, the section numbering will be different from the common rulemaking. The differences are displayed in the Table of Contents of Subpart 128–18.50 below. Conforming amendments are being made to correct the internal references in light of the differences between the Department of Justice numbering and the common rulemaking.

This regulation, replaces the existing Department of Justice regulation published in 41 CFR Part 128–18.

List of Subjects in 41 CFR Part 128–18

Real property acquisition, Personal property, Relocation assistance.

Title 41 of the Code of Federal Regulations is amended by revising Part 128–18 as set forth at the end of this document.

Dated: February 21, 1986.

W. Lawrence Wallace,

Assistant Attorney General for Administration.

1. Part 128–18 is revised as set forth at the end of this document.

PART 128–18—ACQUISITION OF REAL PROPERTY

Subpart 128–18.50—Uniform Relocation Assistance and Real Property Acquisition for Federal and Federally-Assisted Programs

Sec.
128–18.5001 (Subpart A) General.
128–18.5001–1 (__.1) Purpose.
128–18.5001–2 (__.2) Definitions.
128–18.5001–3 (__.3) No duplication of payments.
128–18.5001–4 (__.4) Assurances, monitoring and corrective action.
128–18.5001–5 (__.5) Manner of notice.
128–18.5001–6 (__.6) Administration of jointly-funded projects.
128–18.5001–7 (__.7) Federal agency waiver of regulations.
128–18.5001–8 (__.8) Compliance with other laws and regulations.
128–18.5001–9 (__.9) Recordkeeping and reports.
128–18.5001–10 (__.10) Appeals.
128–18.5002 (Subpart B) Real Property Acquisition.
128–18.5002–1 (__.101) Applicability of acquisition requirements.
128–18.5002–2 (__.102) Basic acquisition policies.
128–18.5002–3 (__.103) Criteria for appraisals.
128–18.5002–4 (__.104) Review of appraisals.
128–18.5002–5 (__.105) Acquisition of tenant-owned improvements.
128–18.5002–6 (__.106) Expenses incidental to transfer to title to the agency.
128–18.5002–7 (__.107) Certain litigation expenses.
128–18.5002–8 (__.108) Donations.
128–18.5003 (Subpart C) General Relocation Requirements.
128–18.5003–1 (__.201) Purpose.
128–18.5003–2 (__.202) Applicability.
128–18.5003–3 (__.203) Relocation notices.
128–18.5003–4 (__.204) Availability of comparable replacement dwelling before displacement.
128–18.5003–5 (__.205) Relocation assistance advisory services.
128–18.5003–6 (__.206) Eviction for cause.
128–18.5003–7 (__.207) General requirements—claims for relocation payments.
128–18.5003–8 (__.208) Relocation payments not considered as income.
128–18.5004 (Subpart D) Payments for Moving and Related Expenses.
128–18.5004–1 (__.301) Payments for actual reasonable moving and related expenses—residential moves.
128–18.5004–2 (__.302) Fixed payment for moving expenses—residential moves.
128–18.5004–3 (__.303) Payment for actual reasonable moving and related expenses—nonresidential moves.
128–18.5004–4 (__.304) Fixed payment for moving expenses—nonresidential moves.
128–18.5004–5 (__.305) Ineligible moving and related expenses.
128–18.5005 (Subpart E) Replacement Housing Payments.
128–18.5005–1 (__.401) Replacement housing payments for 180-day homeowner-occupants.
128–18.5005–2 (__.402) Replacement housing payment for 90-day occupants.
128–18.5005–3 (__.403) Additional rules governing replacement housing payments.
128–18.5006 (Subpart F) Mobile Homes.
128–18.5006–1 (__.501) Applicability.
128–18.5006–2 (__.502) Moving and related expenses—mobile homes.
128–18.5006–3 (__.503) Replacement housing payments for 180-day mobile home owner-occupants.
128–18.5006–4 (__.504) Replacement housing payments for 90-day mobile home occupants.
128–18.5006–5 (__.505) Additional rules governing relocation payments to mobile home occupants.
128–18.5007 (Subpart G) Last Resort Housing.
128–18.5007–1 (__.601) Applicability.
128–18.5007–2 (__.602) Methods of providing replacement housing.

Appendix A—Section-by-section analysis.
Appendix B—Statistical report form.

Authority: Sec. 213, Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Pub. L. 91–646, 84 Stat. 1894 (42 U.S.C. 4601).

2. Part 128–18 is further amended as follows:

a. Change "this part" to read "this subpart" in the following places:

§ 128–18.5001–7
§ 128–18.5003–1
§ 128–18.5005–3(e)

b. Change "this subpart" to read "§ 128–18.5002" in the following places:

§ 128–18.5002–1 (a) and (b)
§ 128–18.5002–5 (b) and (e)

c. Change "This Subpart" to read "§ 128–18.5003" in § 128–18.5003–1.

d. Change "This Subpart" to read "§ 128–18.5006" in § 128–18.5006–1.

e. Change "Subpart D" to read "§ 128–18.5004" in the following places:

§ 128–18.5006–1

f. Change "Subpart E" to read "§ 128–18.5005" in the following places:

§ 128–18.5005–2(b)
§ 128–18.5006–1
§ 128–18.5006–5(a)
§ 128–18.5007–1(a)

g. Change "this subpart" to read "§ 128–18.5007" in the following places:

§ 128–18.5007–1 (a) and (b)
§ 128–18.5007–2 introductory text and (d)

h. Change "This Subpart G" to read "§ 128–18.5007" in § 128–18.5005–3(b).

i. In Appendix A change the subpart designations to read as set forth in the table of contents for Subpart 128–18.50 above.

j. In Appendix A under § 128–18.5002 entitled "Real Property Acquisition" change "this subpart" to read "this section" in the places where it occurs.

Real property acquisition, Relocation assistance.

Title 44 of the Code of Federal Regulations is amended by adding Part 25 as set forth at the end of this document.

February 11, 1986.

Julius W. Becton, Jr.,
Director.

PART 25—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION FOR FEDERAL AND FEDERALLY ASSISTED PROGRAMS

Subpart A—General

Sec.
25.1 Purpose.
25.2 Definitions.
25.3 No duplication of payments.
25.4 Assurances, monitoring and corrective action.
25.5 Manner of notices.
25.6 Administration of jointly-funded projects.
25.7 Federal agency waiver of regulations.
25.8 Compliance with other laws and regulations.
25.9 Recordkeeping and reports.
25.10 Appeals.

Sec.

Subpart B—Real Property Acquisition

25.101 Applicability of acquisition requirements.
25.102 Basic acquisition policies.
25.103 Criteria for appraisals.
25.104 Review of appraisals.
25.105 Acquisition of tenant-owned improvements.
25.106 Expenses incidental to transfer of title to the agency.
25.107 Certain litigation expenses.
25.108 Donations.

Subpart C—General Relocation Requirements

25.201 Purpose.
25.202 Applicability.
25.203 Relocation notices.
25.204 Availability of comparable replacement dwelling before displacement.
25.205 Relocation assistance advisory services.
25.206 Eviction for cause.
25.207 General requirements—claims for relocation payments.
25.208 Relocation payments not considered as income.

Subpart D—Payments for Moving and Related Expenses

25.301 Payment for actual reasonable moving and related expenses—residential moves.
25.302 Fixed payment for moving expenses—residential moves.
25.303 Payment for actual reasonable moving and related expenses—nonresidential moves.
25.304 Fixed payment for moving expenses—nonresidential moves.
25.305 Ineligible moving and related expenses.

Subpart E—Replacement Housing Payments

25.401 Replacement housing payment for 180-day homeowner-occupants.
25.402 Replacement housing payment for 90-day occupants.
25.403 Additional rules governing replacement housing payments.

Subpart F—Mobile Homes

25.501 Applicability.
25.502 Moving and related expenses—mobile homes.
25.503 Replacement housing payment for 180-day mobile homeowner-occupants.
25.504 Replacement housing payment for 90-day mobile home occupants.
25.505 Additional rules governing relocation payments to mobile home occupants.

Subpart G—Last Resort Housing

25.601 Applicability.
25.602 Methods of providing replacement housing.
Appendix A—Additional information.
Appendix B—Statistical report form.

Authority: Sec. 213, Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Pub. L. 91–646, 84 Stat. 1894 (42 U.S.C. 4601).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

45 CFR Part 15

FOR FURTHER INFORMATION CONTACT: Gary Houseknecht, Office of Assistance and Cost Policy at Room 513–D, Hubert H. Humphrey Building, 200 Independence Ave. SW Washington, D.C. 20201, or call (202) 245–7565.

ADDITIONAL SUPPLEMENTARY INFORMATION: Federal agencies are jointly publishing a final rule to adopt cost-effective policies and procedures governing the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970. (42 U.S.C. Sec. 4601.) The rule, as part of the President's regulatory relief program, is designed to reduce the burden of regulatory compliance and paperwork for the Department's assistance recipients.

This rule supersedes the existing Department of Health and Human Services regulation at 45 CFR Part 15. That rule was last revised on April 2, 1973 (38 FR 8492).

PART 15—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION FOR FEDERAL AND FEDERALLY ASSISTED PROGRAMS

Supart A—General

Sec.
15.1 Purpose.
15.2 Definitions.
15.3 No duplication of payments.
15.4 Assurances, monitoring and corrective action.
15.5 Manner of notices.
15.6 Administration of jointly-funded projects.
15.7 Federal agency waiver of regulations.
15.8 Compliance with other laws and regulations.
15.9 Recordkeeping and reports.
15.10 Appeals.

Subpart B—Real Property Acquisition

15.101 Applicability of acquisition requirements.
15.102 Basic acquisition policies.
15.103 Criteria for appraisals.
15.104 Review of appraisals.
15.105 Acquisition of tenant-owned improvements.

15.106 Expenses incidental to transfer of title to the agency.
15.107 Certain litigation expenses.
15.108 Donations.

Subpart C—General Relocation Requirements

15.201 Purpose.
15.202 Applicability.
15.203 Relocation notices.
15.204 Availability of comparable replacement dwelling before displacement.
15.205 Relocation assistance advisory services.
15.206 Eviction for cause.
15.207 General requirements—claims for relocation payments.
15.208 Relocation payments not considered as income.

Subpart D—Payments for Moving and Related Expenses

15.301 Payments for actual reasonable moving and related expenses—residential moves.
15.302 Fixed payment for moving expenses—residential moves.
15.303 Payments for actual reasonable moving and related expenses—nonresidential moves.
15.304 Fixed payment for moving expenses—nonresidential moves.
15.305 Ineligible moving and related expenses.

Subpart E—Replacement Housing Payments

15.401 Replacement housing payments for 180-day homeowner-occupants.
15.402 Replacement housing payments for 90-day occupants.
15.403 Additional rules governing replacement housing payments.

Subpart F—Mobile Homes

15.501 Applicability.
15.502 Moving and related expenses—mobile homes.
15.503 Replacement housing payments for 180-day mobile home owner-occupants.
15.504 Replacement housing payments for 90-day mobile home occupants.
15.505 Additional rules governing relocation payments to mobile home occupants.

Subpart G—Last Resort Housing

15.601 Applicability.
15.602 Methods of providing replacement housing.
Appendix A—Additional information.
Appendix B—Statistical report form.

Authority: Section 213, Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Public Law 91–646, 84 Stat. 1894 (42 U.S.C. 4601).

DEPARTMENT OF TRANSPORTATION

49 CFR Part 25

ACTION: Final rule; request for comments.

DATES: This rule is effective April 28, 1986.

Comments must be received on or before March 31, 1986.

ADDRESS: Submit written comments, preferably in triplicate, to FHWA Docket No. 79b, Federal Highway Administration, Room 4205, HHC–10, 400 Seventh Street, SW., Washington, D.C. 20590. All comments received will be available for examination at the above address between 8:30 a.m. and 3:30 p.m., e.t., Monday through Friday, except legal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne Kennedy, Director, Office of Right-of-Way, FHWA, (202–426–0342); Mr. Reid Alsop, Office of Chief Counsel, FHWA, (202–426–0800); or Mr. Joseph F. Canny, Acting Director, Office of Transportation Regulatory Affairs, OST, (202–426–4220); Department of Transportation, 400 7th Street, SW., Washington, D.C. 20590. Office hours (FHWA) Monday through Friday are from 7:45 a.m. to 4:15 p.m., ET. Office hours (OST) Monday through Friday are from 9:00 a.m. to 5:30 p.m., ET.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department of Transportation (DOT) today is publishing an amended version of its regulation establishing policies and procedures for implementing the Uniform Act. This amended version was developed in response to comments received by other Federal agencies to a Notice of Proposed Rulemaking published in the **Federal Register** on May 28, 1985 (50 FR 21712). DOT's final rule which was effective July 3, 1985 (50 FR 8955, March 5, 1985), is amended in order for it to conform with the Government-wide final rule. The amendments contained herein, except for the change in § 25.3 are not expected to have a significant effect on State highway operations or procedures as they are primarily changes needed to clarify the meaning and intent of the regulation. The preamble to the common final rule should be referred to for discussion and explanation of these amendments. While the Department does not anticipate any significant comment on the general provisions of this regulation as these remain unchanged from the July 3 final rule, the revisions to the text are numerous and it therefore wishes to afford an opportunity for comments following publication. Accordingly, interested parties will have 30 days to comment on the revisions as discussed in the preamble to the common rule.

Regarding section 25.3, on March 5, 1985, simultaneously with the publication of DOT's final rule, a Supplemental Notice of Proposed Rulemaking was published. This notice requested comments on a proposed substantive change to § 25.3 which concerns duplication of payments. While virtually all commenters favor a prohibition against duplication of payments, the majority were not in favor of adopting the language in the proposed rule. They expressed fear that an expansion of the current rule which prevents duplication of payments made under State laws of eminent domain to include payments made under any Federal, State or local law, would create administrative burdens of major proportions. Literally interpreted, the proposed language could create such burdens, but such was not the intent. Therefore, in response to the comments received, the intent of this paragraph has been clarified in Appendix A of this final rule at §___.3, that no Agency is required to conduct an exhaustive search for duplicative payments. It is only required to avoid creating a duplication based on the Agency's knowledge at the time a payment under these regulations is made. Based on this clarification of intent, DOT has adopted the proposed language at § 25.3 and has incorporated it into the amended final rule as published today.

Regulatory Evaluation

The Department has determined that this document does not constitute a major rule under the criteria of Executive Order 12291 or a significant rule under the Department's Regulatory Policies and Procedures. (44 FR 11034; February 26, 1979).

Paperwork Reduction Act Requirements

This rule contains information collection requirements. The requirements are contained in §§___.9(a), ___.9(c), ___.202, ___.206, and ___.303(b)(2). These are the identical items previously submitted by the Department to the Office of Management and Budget for review under the Paperwork Reduction Act (44 U.S.C. 3501 et seq.). OMB has approved them for use through December 31, 1986. The OMB approval number is 2105–0508. The Department will apply to OMB for approval of continued use of these reports at the appropriate time.

Subpart G—Last Resort Housing

__.601 Applicability.
__.602 Methods of providing replacement housing.
Appendix A—Additional information.
Appendix B—Statistical report form.

Subpart A—General

§__.1 Purpose.

The purpose of these regulations is to promulgate rules to implement the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601 et seq.), in accordance with the following objectives:

(a) To ensure that owners of real property to be acquired for Federal and federally-assisted projects are treated fairly and consistently, to encourage and expedite acquisition by agreements with such owners, to minimize litigation and relieve congestion in the courts, and to promote public confidence in Federal and federally-assisted land acquisition programs; and

(b) To ensure that persons displaced as a result of Federal or federally-assisted projects are treated fairly, consistently, and equitably so that such persons will not suffer disproportionate injuries as a result of projects designed for the benefit of the public as a whole.

§__.2 Definitions.

(a) *Agency*. The term "Agency" means the Federal agency, State or State

agency which acquires the real property or displaces a person (see §__.2(f)).

(b) *Business*. The term "business" means any lawful activity, except a farm operation, that is conducted:

(1) Primarily for the purchase, sale, lease, and/or rental of personal and/or real property, and/or for the manufacture, processing, and/or marketing of products, commodities, and/or any other personal property; or

(2) Primarily for the sale of services to the public; or

(3) Solely for the purpose of §__.303 of these regulations, conducted primarily for outdoor advertising display purposes, when the display must be moved as a result of the project; or

(4) By a nonprofit organization that has established its nonprofit status under applicable Federal or State law.

(c) *Comparable replacement dwelling*. The term "comparable replacement dwelling" means a dwelling which is:

(1) Decent, safe, and sanitary as described in §__.2(e).

(2) Functionally similar to the displacement dwelling with particular attention to the number of rooms and living space. (See Appendix A.)

(3) In an area that is not subject to unreasonable adverse environmental conditions, is not generally less desirable than the location of the displaced person's dwelling with respect to public utilities and commercial and public facilities, and is reasonably accessible to the person's place of employment.

(4) On a site that is typical in size for residential development with normal site improvements, including customary landscaping. The site need not include special improvements such as outbuildings, swimming pools, or greenhouses. (See also §__.403(a)(2).)

(5) Currently available to the displaced person on the private market. However, a comparable replacement dwelling for a person receiving government housing assistance before displacement may reflect similar government housing assistance. (See Appendix A.)

(6) Within the financial means of the displaced person.

(i) A replacement dwelling purchased by a homeowner in occupancy for at least 180 days prior to initiation of negotiations (180-day homeowner) is considered to be within the homeowner's financial means if the homeowner is paid the full price differential as described at §__.401(c), all increased mortgage interest costs as described at §__.401(d) (for last resort housing see Appendix A, §__.602) and all incidental expenses as described at §__.401(e).

(ii) A replacement dwelling rented by a displaced person is considered to be within his or her financial means if the monthly rent at the replacement dwelling does not exceed the monthly rent at the displacement dwelling, after taking into account any rental assistance which the person receives under these regulations. If the cost of any utility service is included in either rent, an appropriate adjustment must be made if necessary to ensure that like circumstances are compared. For a person who paid little or no rent before displacement, the market rent of the displacement, the market rent of the displacement dwelling may be used when computing costs (see Appendix A, §__.402(b)(1)).

(iii) Whenever a $15,000 replacement housing payment under §__.401 or a $4,000 replacement housing payment under §__.402 would be insufficient to ensure that a comparable replacement dwelling is available on a timely basis to a person, the Agency shall provide additional or alternative assistance under the last resort housing provisions at Subpart G, which may include increasing the replacement housing payment so that a replacement dwelling is within the displaced person's financial means.

(d) *Contribute materially*. The term "contribute materially" means that during the 2 taxable years prior to the taxable year in which displacement occurs, or during such other period as the Agency determines to be more equitable, a business or farm operation:

(1) Had average annual gross receipts of at least $5,000; or

(2) Had average annual net earnings of at least $1,000; or

(3) Contributed at least 33⅓ percent of the owner's or operator's average annual gross income from all sources.

(4) If the application of the above criteria creates an inequity or hardship in any given case, the Agency may approve the use of other criteria as determined appropriate.

(e) *Decent, safe, and sanitary dwelling*. The term "decent, safe, and sanitary dwelling" means a dwelling which meets applicable housing and occupancy codes. However, any of the following standards which are not met by an applicable code shall apply, unless waived for good cause by the Federal agency funding the project. The dwelling shall:

(1) Be structurally sound, weathertight, and in good repair.

(2) Contain a safe electrical wiring system adequate for lighting and other electrical devices.

(3) Contain a heating system capable of sustaining a healthful temperature (of approximately 70 degrees) for a displaced person, except in those areas where local climatic conditions do not require such a system.

(4) Be adequate in size with respect to the number of rooms and area of living space needed to accommodate the displaced person. There shall be a separate, well-lighted and ventilated bathroom that provides privacy to the user and contains a sink, bathtub or shower stall, and a toilet, all in good working order and properly connected to appropriate sources of water and to a sewage drainage system. In the case of a housekeeping dwelling, there shall be a kitchen area that contains a fully usable sink, properly connected to potable hot and cold water and to a sewage drainage system, and adequate space and utility service connections for a stove and refrigerator.

(5) Contains unobstructed egress to safe, open space at ground level. If the replacement dwelling unit is on the second story or above, with access directly from or through a common corridor, the common corridor must have at least two means of egress.

(6) For a displaced person who is handicapped, be free of any barriers which would preclude reasonable ingress, egress, or use of the dwelling by such displaced person.

(f) *Displaced person*.

(1) *General*. The term "displaced person" means any person (defined at §__.2(m)) who moves from the real property or moves his or her personal property from the real property:

(i) As a direct result of the Agency's acquisition of such real property in whole or in part for a project. This includes any person who moved from the real property as a result of the initiation of negotiations as described at §__.2(k); or

(ii) As a result of a written order from the acquiring Agency to vacate such real property for the project; or

(iii) As a result of the Agency's acquisition of, or written order to vacate, for a project, other real property on which the person conducts a business or farm operation. Eligibility as a displaced person under this subparagraph applies only for purposes of obtaining relocation assistance advisory services under §__.205 and moving expenses under §__.301, §__.302, or §__.303.

(2) *Persons not displaced*. The following is a nonexclusive listing of persons who do not qualify as a displaced person under these regulations.

BEST COPY AVAILABLE

VOL 51 ISS 39 FE 27 1986 UMI

(i) A person who moves before the initiation of negotiations (see also § __.403(e)); or

(ii) A person who initially enters into occupancy of the property after the date of its acquisition for the project; or

(iii) A person who is not required to relocate permanently as a direct result of a project. Such determination shall be made by the Agency in accordance with any guidelines established by the Federal agency funding the project (see also Appendix A); or

(iv) A person whom the Agency determines is not displaced as a direct result of a partial acquisition; or

(v) A person who, after receiving a notice of relocation eligibility (described at § __.203), is notified in writing that he or she will not be displaced for a project. Such notice shall not be issued unless the person has not moved and the Agency agrees to reimburse the person for any expenses incurred to satisfy any binding contractual relocation obligations entered into after the effective date of the notice of relocation eligibility; or

(vi) An owner-occupant who voluntarily sells his or her property (as described at § __.101(a) in Appendix A) after being informed in writing that if a mutually satisfactory agreement of sale cannot be reached, the Agency will not acquire the property. In such cases, however, any resulting displacement of a tenant is subject to these regulations; or

(vii) A person who retains the right of use and occupancy of the real property for life following its acquisition by the Agency; or

(viii) A person who retains the right of use and occupancy of the real property for a fixed term after its acquisition by the Department of Interior under P.L. 93-477 or P.L. 93-303.

(g) *Dwelling.* The term "dwelling" means the place of permanent or customary and usual residence of a person, according to local custom or law, including a single family house; a single family unit in a two-family, multi-family, or multi-purpose property; a unit of a condominium or cooperative housing project; a non-housekeeping unit; a mobile home; or any other residential unit.

(h) *Farm operation.* The term "farm operation" means any activity conducted solely or primarily for the production of one or more agricultural products or commodities, including timber, for sale or home use, and customarily producing such products or commodities in sufficient quantity to be capable of contributing materially to the operator's support.

(i) *Federal agency.* The term "Federal agency" means any department, agency, or instrumentality in the Executive Branch of the Government, any wholly owned Government corporation, and the Architect of the Capitol, the Federal Reserve Banks and branches thereof.

(j) *Federal financial assistance.* The term "Federal financial assistance" means any Federal grant, loan, or contribution, except a Federal guarantee or insurance.

(k) *Initiation of negotiations.* The term "initiation of negotiations" means the delivery of the initial written offer by the Agency to the owner or the owner's representative to purchase real property for a project for the amount determined to be just compensation, unless applicable Federal program regulations specify a different action to serve this purpose. However:

(1) If the Agency issues a notice of its intent to acquire the real property, and a person moves after that notice, but before delivery of the initial written purchase offer, the "initiation of negotiations" means the date the person moves from the property. (See also § __.505(c).)

(2) In the case of a permanent relocation to protect the public health and welfare, under the Comprehensive Environmental Response Compensation and Liability Act of 1980 (Pub. L. 96-510, or "Superfund") the "initiation of negotiations" means the formal announcement of such relocation or the Federal or federally-coordinated health advisory where the Federal Government later decides to conduct a permanent relocation.

(l) *Owner of displacement dwelling.* A displaced person is considered to have met the requirement to own a displacement dwelling if the person holds any of the following interests in real property acquired for a project:

(1) Fee title, a life estate, a 99-year lease, or a lease, including any options for extension, with at least 50 years to run from the date of acquisition; or

(2) An interest in a cooperative housing project which includes the right to occupy a dwelling; or

(3) A contract to purchase any of the interests or estates described in paragraphs (l) (1) or (2) of this section, or

(4) Any other interest, including a partial interest, which in the judgment of the Agency warrants consideration as ownership.

(m) *Person.* The term "person" means any individual, family, partnership, corporation, or association.

(n) *Salvage value.* The term "salvage value" means the probable sale price of an item, if offered for sale on the condition that it will be removed from the property at the buyer's expense, allowing a reasonable period of time to find a person buying with knowledge of the uses and purposes for which it is adaptable and capable of being used, including separate use of serviceable components and scrap when there is no reasonable prospect of sale except on that basis.

(o) *State.* The term "State" means any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, the Trust Territories of the Pacific Islands, or a political subdivision of any of these jurisidictions.

(p) *State agency.* The term "State agency" means any department, agency or instrumentality of a State or of a political subdivision of a State, or two or more States, or of two or more political subdivisions of a State or States.

(q) *Tenant.* The term "tenant" means a person who has the temporary use and occupancy of real property owned by another.

(r) *Uniform Act.* The term "Uniform Act" means the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (84 Stat. 1894; 42 U.S.C. 4601 et seq.; Pub. L. 91-646), and amendments thereto.

§ __.3 No duplication of payments.

No person shall receive any payment under these regulations if that person receives a payment under Federal, State, or local law which is determined to have the same purpose and effect as such payment under these regulations. (See Appendix A, § __.3.)

§ __.4 Assurances, monitoring and corrective action.

(a) *Assurances.* Before a Federal agency may approve any grant to, or contract or agreement with, a State agency under which Federal financial assistance will be made available for a project which results in real property acquisition or displacement that is subject to the Uniform Act, the State agency must provide appropriate assurances that it will comply with the Uniform Act and these regulations. A State agency's assurances under section 305 of the Uniform Act must contain specific reference to the State law which the Agency believes provides an exception to sections 301 or 302 of the Uniform Act. If, in the judgment of the Federal agency, Uniform Act compliance will be served, a State agency may provide these assurances at one time to cover all subsequent federally assisted programs or projects.

(b) *Monitoring and corrective action.* The Federal agency will monitor compliance with these regulations, and the State agency shall take whatever corrective action is necessary to comply with the Uniform Act and these regulations. The Federal agency may also apply sanctions in accordance with applicable program regulations.

(c) *Prevention of fraud, waste, and mismanagement.* The Agency shall take appropriate measures to carry out these regulations in a manner that minimizes fraud, waste, and mismanagement.

§ __.5 Manner of notices.

Each notice which the Agency is required to provide to a property owner or occupant under these regulations, except the notice described at § __.102(b), shall be personally served or sent by certified or registered first-class mail, return receipt requested, and documented in Agency files. Each notice shall be written in plain, understandable language. Persons who are unable to read and understand the notice must be provided with appropriate translation and counseling. Each notice shall indicate the name and telephone number of a person who may be contacted for answers to questions or other needed help.

§ __.6 Administration of jointly funded projects.

Whenever two or more Federal agencies provide financial assistance to an Agency or Agencies to carry out functionally or geographically related activities which will result in the acquisition of property or the displacement of a person, the Federal agencies may by agreement designate one such agency as the cognizant Federal agency. At a minimum, the agreement shall set forth the federally assisted activities which are subject to its terms and cite any policies and procedures, in addition to these regulations, that are applicable to the activities under the agreement. Under the agreement, the cognizant Federal agency shall assure that the project is in compliance with the provisions of the Uniform Act and these regulations. All federally assisted activities under the agreement shall be deemed a project for the purposes of these regulations.

§ __.7 Federal agency waiver of regulations.

The Federal agency funding the project may waive any requirement in this part not required by law if it determines that the waiver does not reduce any assistance or protection provided to an owner or displaced person under this part. Any request for a waiver shall be justified on a case-by-case basis.

§ __.8 Compliance with other laws and regulations.

The implementation of these regulations shall be in compliance with all applicable laws and implementing regulations, including the following:

(a) Section I of the Civil Rights Act of 1866 (42 U.S.C. 1982 et seq.).

(b) Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.).

(c) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. 3601 et seq.), as amended.

(d) The National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

(e) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 790 et seq.).

(f) Executive Order 12250—Leadership and Coordination of Non-Discrimination Laws.

(g) Executive Order 11063—Equal Opportunity and Housing, as amended by Executive Order 12259.

(h) Executive Order 11246—Equal Employment Opportunity.

(i) Executive Order 11625—Minority Business Enterprise.

(j) Executive Order 12259—Leadership and Coordination of Fair Housing in Federal Programs.

(k) The Flood Disaster Protection Act of 1973 (P.L. 93-234);

(l) Executive Orders 11988, Floodplain Management, and 11990, Protection of Wetlands.

(m) The Age Discrimination Act of 1975 (42 U.S.C. 6101 et seq.).

§ __.9 Recordkeeping and reports.

(a) *Records.* The Agency shall maintain adequate records of its acquisition and displacement activities in sufficient detail to demonstrate compliance with these regulations. These records shall be retained for at least 3 years after each owner of a property and each person displaced from the property receives the final payment to which he or she is entitled under these regulations.

(b) *Confidentiality of records.* Records maintained by an Agency in accordance with these regulations are confidential regarding their use as public information, unless applicable law provides otherwise.

(c) *Reports.* The Agency shall submit a report of its real property acquisition and displacement activities under these regulations if required by the Federal agency funding the project. A report will not be required more frequently than every 3 years, or as the Uniform Act provides, unless the Federal funding agency shows good cause.

§ __.10 Appeals

(a) *General.* The Agency shall promptly review appeals in accordance with the requirements of applicable law and these regulations.

(b) *Actions which may be appealed.* A person may file a written appeal with the Agency in any case in which the person believes that the Agency has failed to properly determine the person's eligibility for, or the amount of, a payment required under § __.106 or § __.107, or a relocation payment required under these regulations. The Agency shall consider a written appeal regardless of form.

(c) *Time limit for initiating appeal.* The Agency may set a reasonable time limit for a person to file an appeal. The time limit shall not be less than 60 days after the person receives written notification of the Agency's determination on the person's claim.

(d) *Right to representation.* A person has a right to be represented by legal counsel or other representative in connection with his or her appeal, but solely at the person's own expense.

(e) *Review of files by person making appeal.* The Agency shall permit a person to inspect and copy all materials pertinent to his or her appeal, except materials which are classified as confidential by the Agency. The Agency may, however, impose resonable conditions on the person's right to inspect, consistent with applicable laws.

(f) *Scope of review of appeal.* In deciding an appeal, the Agency shall consider all pertinent justification and other material submitted by the person, and all other available information that is needed to ensure a fair and full review of the appeal.

(g) *Determination and notification after appeal.* Promptly after receipt of all information submitted by a person in support of an appeal, the Agency shall make a written determination on the appeal, including an explanation of the basis on which the decision was made, and furnish the person a copy. If the full relief requested is not granted, the Agency shall advise the person of his or her right to seek judicial review.

(h) *Agency official to review appeal.* The Agency official conducting the review of the appeal shall be either the head of the Agency or his or her authorized designee. However, the official shall not have been directly involved in the action appealed.

Subpart B—Real Property Acquisition

§ __.101 Applicability of acquisition requirements.

(a) *General.* The requirements of this Subpart apply to any Agency acquisition of real property for a Federal or federally assisted project, except:

(1) Voluntary transactions that meet the criteria specified in Appendix A, § __.101(a).

(2) The acquisition of real property from a Federal agency, State, or State agency, if the acquiring Agency does not have the authority to acquire the property through condemnation.

(b) *Less-than-full-fee interest in real property.* The requirements of this Subpart apply to the acquisition of a life estate or a life use, to acquisition by leasing where the lease term, including option(s) for extension, is 50 years or more, and to the acquisition of permanent easements. (See also Appendix A, § __.101 (b).)

(c) *Federally-assisted projects.* For federally-assisted projects the provisions of §§ __.102, __.103, __.104, and __.105 apply to the extent practicable under State law. (See § __.4 (a).)

§ __.102 Basic acquisition policies.

(a) *Expeditious acquisition.* The Agency shall make every reasonable effort to acquire the real property expeditiously by negotiation.

(b) *Notice to owner.* As soon as feasible, the owner shall be notified of the Agency's interest in acquiring the real property and the basic protections provided to the owner by law and these regulations. (See also § __.203.)

(c) *Appraisal and invitation to owner.* Before the initiation of negotiations, the real property shall be appraised and the owner or the owner's designated representative shall be given an opportunity to accompany the appraiser during the appraiser's inspection of the property.

(d) *Establishment and offer of just compensation.* Before the initiation of negotiations, the Agency shall establish an amount which it believes is just compensation for the real property. The amount shall not be less than the approved appraisal of the fair market value of the property, taking into account the value of allowable damages or benefits to any remaining property. (See also § __.104.) Promptly thereafter, the Agency shall make a written offer to the owner to acquire the property for the full amount believed to be just compensation.

(e) *Summary statement.* Along with the initial written purchase offer, the owner shall be given a written statement of the basis for the offer of just compensation, which shall include:

(1) A statement of the amount offered as just compensation. In the case of a partial acquisition, the compensation for the real property to be acquired and the compensation for damages, if any, to the remaining real property shall be separately stated.

(2) A description and location identification of the real property and the interest in the real property to be acquired.

(3) An identification of the buildings, structures, and other improvements (including removable building equipment and trade fixtures) which are considered to be part of the real property for which the offer of just compensation is made. Where appropriate, the statement shall identify any separately held ownership interest in the property, e.g., a tenant-owned improvement, and indicate that such interest is not covered by the offer.

(f) *Basic negotiation procedures.* The Agency shall make reasonable efforts to contact the owner or the owner's representative and (1) discuss its offer to purchase the property including the basis for the offer of just compensation, and (2) explain its acquisition policies and procedures, including its payment of incidental expenses in accordance with § __.106. The owner shall be given reasonable opportunity to consider the offer and present material which the owner believes is relevant to determining the value of the property and to suggest modification in the proposed terms and conditions of the purchase. The Agency shall consider the owner's presentation.

(g) *Updating offer of just compensation.* If the information presented by the owner, or a material change in the character or condition of the property, indicates the need for new appraisal information, or if a significant delay has occurred since the time of the appraisal(s) of the property, the Agency shall have the appraisal(s) updated or obtain a new appraisal(s). If the latest appraisal information indicates that a change in the purchase offer is warranted, the Agency shall promptly reestablish just compensation and offer that amount to the owner in writing.

(h) *Coercive action.* The Agency shall not advance the time of condemnation, or offer negotiations or condemnation or the deposit of funds with the court, or take any other coercive action in order to induce an agreement on the price to be paid for the property.

(i) *Administrative settlement.* The purchase price for the property may exceed the amount offered as just compensation when reasonable efforts to negotiate an agreement at that amount have failed and an authorized Agency official approves such administrative settlement as being reasonable, prudent, and in the public interest. When Federal funds pay for or participate in acquisition costs, a written justification shall be prepared which indicates that available information (e.g., appraisals, recent court awards, estimated trail costs, or valuation problems) supports such a settlement.

(j) *Payment before taking possession.* Before requiring the owner to surrender possession of the real property, the Agency shall—

(1) Pay the agreed purchase price to the owner; or

(2) In the case of a condemnation, deposit with the court, for the benefit of the owner, an amount not less than the Agency's approved appraisal of the fair market value of such property, or the court award of compensation in the condemnation proceeding for the property.

In exceptional circumstances, with the prior approval of the owner, the Agency may obtain a right-of-entry for construction purposes before making payment available to an owner.

(k) *Uneconomic remnant.* If the acquisition of only a portion of a property would leave the owner with an uneconomic remnant, the Agency shall offer to acquire the uneconomic remnant along with the portion of the property needed for the project. An uneconomic remnant is a remaining part of the property in which the owner is left with an interest that the Agency determines has little or no utility or value to the owner.

(l) *Inverse condemnation.* If the Agency intends to acquire any interest in real property by exercise of the power of eminent domain, it shall institute formal condemnation proceedings and not intentionally make it necessary for the owner to institute legal proceedings to prove the fact of the taking of the real property.

(m) *Fair rental.* If the Agency permits a former owner or tenant to occupy the real property after acquisition for a short term or a period subject to termination by the Agency on short notice, the rent shall not exceed the fair market rent for such occupancy.

§ __.103 Criteria for appraisals.

(a) *Definition of appraisal.* An appraisal is a written statement independently and impartially prepared by a qualified appraiser setting forth an opinion of defined value of an adequately described property as of a

specific date, supported by the presentation and analysis of relevant market information.

(b) *Standards of appraisal.* The format and level of documentation for an appraisal depend on the complexity of the appraisal problem. The Agency shall develop minimum standards for appraisals consistent with established and commonly accepted appraisal practice for those acquisitions which, by virtue of their low value or simplicity, do not require the in-depth analysis and presentation necessary in a detailed appraisal. A detailed appraisal shall be prepared for all other acquisitions. A detailed appraisal shall reflect nationally recognized appraisal standards, including, to the extent appropriate, the Uniform Appraisal Standards for Federal Land Acquisition. An appraisal must contain sufficient documentation, including valuation data and the appraiser's analysis of that data, to support his or her opinion of value. At a minimum, the appraisal shall contain the following items:

(1) The purpose and/or the function of the appraisal, a definition of the estate being appraised, and a statement of the assumptions and limiting conditions affecting the appraisal.

(2) An adequate description of the physical characteristics of the property being appraised (and, in the case of a partial acquisition, and adequate description of the remaining property), a statement of the known and observed encumbrances, if any, title information, location, zoning, present use, an analysis of highest and best use, and at least a 5-year sales history of the property.

(3) All relevant and reliable approaches to value consistent with commonly accepted professional appraisal practices. When sufficient market sales data are available to reliably support the fair market value for the specific appraisal problem encountered, the Agency, at its discretion, may require only the market approach. If more than one approach is utilized, there shall be an analysis and reconciliation of approaches to value that are sufficient to support the appraiser's opinion of value.

(4) A description of comparable sales, including a description of all relevent physical, legal, and economic factors such as parties to the transaction, source and method of financing, and verification by a party involved in the transaction.

(5) A statement of the value of the real property to be acquired and, for a partial acquisition, a statement of the value of the damages and benefits, if any, to the remaining real property.

(6) The effective date of valuation, date of appraisal, signature, and certification of the appraiser.

(c) *Influence of the project on just compensation.* To the extent permitted by applicable law, the appraiser shall disregard any decrease or increase in the fair market value of the real property caused by the project for which the property is to be acquired, or by the likelihood that the property would be acquired for the project, other than that due to physical deterioration within the reasonable control of the owner.

(d) *Owner retention of improvements.* If the owner of a real property improvement is permitted to retain it for removal from the project site, the amount to be offered for the interest in the real property to be acquired shall be not less than the difference between the amount determined to be just compensation for the owner's entire interest in the real property and the salvage value (defined at § __.2(n)) of the retained improvement.

(e) *Qualifications of appraisers.* The Agency shall establish criteria for determining the minimum qualifications of appraisers. Appraiser qualifications shall be consistent with the level of difficulty of the appraisal assignment. The Agency shall review the experience, education training, and other qualifications of appraisers, including review appraisers, and utilize only those determined to be qualified.

(f) *Conflict of interest.* No appraiser or review appraiser shall have any interest, direct or indirect, in the real property being appraised for the Agency that would in any way conflict with the preparation or review of the appraisal. Compensation for making an appraisal shall not be based on the amount of the valuation. No appraiser shall act as a negotiator for real property which that person has appraised, except that the Agency may permit the same person to both appraise and negotiate an acquisition where the value of the acquisition is $2,500, or less.

§ __.104 Review of appraisals.

The Agency shall have an appraisal review process and, at a minimum:

(a) A qualified reviewing appraiser shall examine all appraisals to assure that they met applicable appraisal requirements and shall, prior to acceptance, seek necessary corrections or revisions.

(b) If the reviewing appraiser is unable to approve or recommend approval of an appraisal as an adequate basis for the establishment of just compensation, and it is determined that it is not practical to obatin an additional appraisal, the reviewing appraiser may develop appraisal documentation in accordance with § __.103 to support an approved or recommended value.

(c) The review appraiser's certification of the recommended or approved value of the property shall be set forth in a signed statement which identifies the appraisal reports reviewed and explains the basis for such recommendation or approval. Any damages or benefits to any remaining property shall also be identified in the statement.

§ __.105 Acquisition of tenant-owned improvements.

(a) *Acquisition of Improvements.* When acquiring any interest in real property, the Agency shall offer to acquire at least an equal interest in all buildings, structures, or other improvements located upon the real property to be acquired, which it requires to be removed or which it determines will be adversely affected by the use to which such real property will be put. This shall include any improvement of a tenant-owner who has the right or obligation to remove the improvement at the expiration of the lease term.

(b) *Improvements considered to be real property.* Any building, structure, or other improvement, which would be considered to be real property if owned by the owner of the real property on which it is located, shall be considered to be real property for purposes of this Subpart.

(c) *Appraisal and establishment of just compensation for tenant-owned improvements.* Just compensation for a tenant-owned improvement is the amount which the improvement contributes to the fair market value of the whole property or its salvage value, whichever is greater. (Salvage value is defined at § __.2(n).)

(d) *Special conditions.* No payment shall be made to a tenant-owner for any real property improvement unless:

(1) The tenant-owner, in consideration for the payment, assigns, transfers, and releases to the Agency all of the tenant-owner's right, title, and interest in the improvement; and

(2) The owner of the real property on which the improvement is located disclaims all interest in the improvement; and

(3) The payment does not result in the duplication of any compensation otherwise authorized by law.

(e) *Alternative compensation.* Nothing in this Subpart shall be construed to deprive the tenant-owner of any right to reject payment under this Subpart and to obtain payment for such property

VOL
51
ISS
39
FE
27
1986
UMI

interests in accordance with other applicable law.

§ ___.106 Expenses incidental to transfer of title to the Agency.

The owner of the real property shall be reimbursed for all reasonable expenses the owner necessarily incurred for:

(a) Recording fees, transfer taxes, documentary stamps, evidence of title, boundary surveys, legal descriptions of the real property, and similar expenses incidental to conveying the real property to the Agency. However, the Agency is not required to pay costs solely required to perfect the owner's title to the real property; and

(b) Penalty costs and other charges for prepayment of any preexisting recorded mortgage entered into in good faith encumbering the real property; and

(c) The pro rata portion of any prepaid real property taxes which are allocable to the period after the Agency obtains title to the property or effective possession of it, whichever is earlier.

Whenever feasible, the Agency shall pay these costs directly so that the owner will not have to pay such costs and then seek reimbursement from the Agency.

§ ___.107 Certain litigation expenses.

The owner of the real property shall be reimbursed for any reasonable expenses, including reasonable attorney, appraisal, and engineering fees, which the owner actually incurred because of a condemnation proceeding, if:

(a) The final judgment of the court is that the Agency cannot acquire the real property by condemnation; or

(b) The condemnation proceeding is abandoned by the Agency other than under an agreed-upon settlement; or

(c) The court having jurisdiction renders a judgment in favor of the owner in an inverse condemnation proceeding or the Agency effects a settlement of such proceeding.

§ ___.108 Donations.

Nothing in these regulations shall prevent a person, after being informed of the right to receive just compensation, based on an appraisal of the real property, from making a gift or donation of real property or any part thereof, or any interest therein, or of any compensation paid therefor, to the Agency. The Agency is responsible for assuring that an appraisal of the real property is obtained unless the owner releases the Agency from such obligation.

Subpart C—General Relocation Requirements

§ ___.201 Purpose.

This Subpart prescribes general requirements governing the provision of relocation payments and other relocation assistance under the regulations in this Part.

§ ___.202 Applicability.

These requirements apply to the relocation of any displaced person as defined at § ___.2(f).

§ ___.203 Relocation notices.

(a) *General information notice.* As soon as feasible, a person scheduled to be displaced shall be furnished with a general written description of the Agency's relocation program which does at least the following:

(1) Informs the person that he or she may be displaced for the project and generally describes the relocation payment(s) for which the person may be eligible, the basic conditions of eligibility, and the procedures for obtaining the payment(s).

(2) Informs the person that he or she will be given reasonable relocation advisory services, including referrals to replacement properties, help in filing payment claims, and other necessary assistance to help the person successfully relocate.

(3) Informs the person that he or she will not be required to move without at least 90 days' advance written notice (see paragraph (c) of this section), and informs any person to be displaced from a dwelling that he or she cannot be required to move permanently unless at least one comparable replacement dwelling has been made available.

(4) Describes the person's right to appeal the Agency's determination as to eligibility for, or the amount of, any relocation payment for which the person may be eligible.

(b) *Notice of relocation eligibility.* Eligibility for relocation assistance shall begin on the date of initiation of negotiations (defined in § ___.2(k)) for the occupied property. When this occurs, the Agency shall promptly notify all occupants in writing of their eligibility for applicable relocation assistance.

(c) *Ninety-day notice.*

(1) *General.* No lawful occupant shall be required to move unless he or she has received at least 90 days advance written notice of the earliest date by which he or she may be required to move.

(2) *Timing of notice.* The displacing agency may issue the notice 90 days before it expects the person to be displaced or earlier.

(3) *Content of notice.* The 90-day notice shall either state a specific date as the earliest date by which the occupant may be required to move, or state that the occupant will receive a further notice indicating, at least 30 days in advance, the specific date by which he or she must move. If the 90-day notice is issued before a comparable replacement dwelling is made available, the notice must state clearly that the occupant will not have to move earlier than 90 days after such a dwelling is made available. (See § ___.204(a).)

(4) *Urgent need.* In unusual circumstances, an occupant may be required to vacate the property on less than 90 days advance written notice if the Agency determines that a 90-day notice is impracticable, such as when the person's continued occupancy of the property would constitute a substantial danger to health or safety. A copy of the Agency's determination shall be included in the applicable case file.

§ ___.204 Availability of comparable replacement dwelling before displacement.

(a) *General.* No person to be displaced shall be required to move from his or her dwelling unless at least one comparable replacement dwelling (defined at § ___.2(c)) has been made available to the person. Where possible, three or more comparable replacement dwellings shall be made available. A comparable replacement dwelling will be considered to have been made available to a person, if:

(1) The person is informed of its location; and

(2) The person has sufficient time to negotiate and enter into a purchase agreement or lease for the property; and

(3) Subject to reasonable safeguards, the person is assured of receiving the relocation assistance and acquisition payment to which the person is entitled in sufficient time to complete the purchase or lease of the property.

(b) *Circumstances permitting waiver.* The Federal agency funding the project may grant a waiver of the policy in paragraph (a) of this section in any case where it is demonstrated that a person must move because of:

(1) A major disaster as defined in section 102(c) of the Disaster Relief Act of 1974 (42 U.S.C. 5121); or

(2) A presidentially declared national emergency; or

(3) Another emergency which requires immediate vacation of the real property, such as when continued occupancy of the displacement dwelling constitutes a substantial danger to the health or safety of the occupants or the public.

(c) *Basic conditions of emergency move.* Whenever a person is required to relocate for a temporary period because of an emergency as described in paragraph (b) of this section, the Agency shall:

(1) Take whatever steps are necessary to assure that the person is temporarily relocated to a decent, safe, and sanitary dwelling; and

(2) Pay the actual reasonable out-of-pocket moving expenses and any reasonable increase in monthly housing costs incurred in connection with the temporary relocation; and

(3) Make available to the displaced person as soon as feasible, at least one comparable replacement dwelling. (For purposes for filing a claim and meeting the eligibility requirements for a relocation payment, the date of displacement is the date the person moves from the temporarily-occupied dwelling.)

§ ___.205 Relocation assistance advisory services.

(a) *General.* The Agency shall carry out a relocation assistance advisory program which satisfies the requirements of Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.), Title VIII of the Civil Rights Act of 1968 (42 U.S.C. 3601 et seq.), and Executive Order 11063 (27 FR 11527), and offers the services described in paragraph (b) of this Section. If the Agency determines that a person occupying property adjacent to the real property acquired for the project has caused substantial economic injury because of such acquisition, it may offer the services to such person.

(b) *Services to be provided.* The advisory program shall include such measures, facilities, and services as may be necessary or appropriate in order to:

(1) Determine the relocation needs and perferences of each person to be displaced and explain the relocation payments and other assistance for which the person may be eligible, the related eligibility requirements, and the procedures for obtaining such assistance. This shall include a personal interview with each person.

(2) Provide current and continuing information on the availability, purchase prices, and rental costs of comparable replacement dwellings, and explain that the person cannot be required to move unless at least one comparable replacement dwelling is made available as set forth in § ___.204(a).

(i) As soon as feasible, the Agency shall inform the person in writing of the specific comparable replacement dwelling and the price or rent used for establishing the upper limit of the replacement housing payment (see § ___.403 (a) and (b)) and the basis for the determination, so that the person is aware of the maximum replacement housing payment for which he or she may qualify.

(ii) Where feasible, housing shall be inspected prior to being made available to assure that it meets applicable standards. (See § ___.2 (c) and (e).) If such an inspection is not made, the person to be displaced shall be notified that a replacement housing payment may not be made unless the replacement dwelling is subsequently inspected and determined to be decent, safe, and sanitary.

(iii) Whenever possible, minority persons shall be given reasonable opportunities to relocate to decent, safe, and sanitary replacement dwellings, not located in an area of minority concentration, that are within their financial means. This policy, however, does not require an Agency to provide a person a larger payment than is necessary to enable a person to relocated to a comparable replacement dwelling.

(iv) All persons, especially the elderly and handicapped, shall be offered transportation to inspect housing to which they are referred.

(3) Provide current and continuing information on the availability, purchase prices, and rental costs of comparable and suitable commercial and farm properties and locations. Assist any person displaced from a business or farm operation to obtain and become established in a suitable replacement location.

(4) Minimize hardships to persons in adjusting to relocation by providing counseling, advice as to other sources of assistance that may be available, and such other help as may be appropriate.

(5) Supply persons to be displaced with appropriate information concerning Federal and State housing programs, disaster loans and other programs administered by the Small Business Administration, and other Federal and State programs offering assistance to persons to be displaced.

(c) *Coordination of relocation activities.* Relocation activities shall be coordinated with project work and other displacement-causing activities to ensure that, to the extent feasible, persons displaced receive consistent treatment and the duplication of functions is minimized.

§ ___.206 Eviction for cause.

Eviction for cause must conform to applicable State and local law. Any person who has lawfully occupied the real property, but who is later evicted for cause on or after the date of the initiation of negotiations, retains the right to the relocation payments and other assistance set forth in these regulations. For purposes of determining eligibility for relocation payments, the date of displacement is the date the person moves or the date a comparable replacement dwelling is made available, whichever is later.

§ ___.207 General requirements—claims for relocation payments.

(a) *Documentation.* Any claim for a relocation payment shall be supported by such documentation as may be reasonably required to support expenses incurred, such as bills, certified prices, appraisals, or other evidence of such expenses. A displaced person must be provided reasonable assistance necessary to complete and file any required claim for payment.

(b) *Expeditious payments.* The Agency shall review claims in an expeditious manner. The claimant shall be promptly notified as to any additional documentation that is required to support the claim. Payment for a claim shall be made as soon as feasible following receipt of sufficient documentation to support the claim.

(c) *Advance payments.* If a person demonstrates the need for an advance relocation payment in order to avoid or reduce a hardship, the Agency shall issue the payment, subject to such safeguards as are appropriate to ensure that the objective of the payment is accomplished.

(d) *Time for filing.* All claims for a relocation payment shall be filed with the Agency within 18 months after:

(1) For tenants, the date of displacement;

(2) For owners, the date of displacement or the date of the final payment for the acquisition of the real property, whichever is later.

This time period shall be waived by the Agency for good cause.

(e) *Multiple occupants of one diplsacement dwelling.* If two or more occupants of the displacement dwelling move to separate replacement dwellings, each occupant is entitled to a reasonable prorated share, as determined by the Agency, of any relocation payments that would have been made if the occupants moved together to a comparable replacement dwelling. However, if the Agency determines that two or more occupants maintained separate households within the same dwelling, such occupants have separate entitlements to relocation payments.

VOL
51
ISS
39
FE
27
1986
UMI

(f) *Deductions from relocation payments.* An Agency shall deduct the amount of any advance relocation payment from the relocation payment(s) to which a displaced person is otherwise entitled. Similarly, a Federal agency shall, and a State agency may, deduct from relocation payments any rent that the displaced person owes the Agency; provided that no deduction shall be made if it would prevent the displaced person from obtaining a comparable replacement dwelling as required by § __.204 of these regulations. The Agency shall not withhold any part of a relocation payment to a displaced person to satisfy an obligation to any other creditor.

(g) *Notice of denial of claim.* If the Agency disapproves all or part of a payment claimed or refuses to consider the claim on its merits because of untimely filing or other grounds, it shall promptly notify the claimant in writing of its determination, the basis for its determination, and the procedures for appealing that determination.

§ __.208 Relocation payments not considered as income.

No relocation payment received by a displaced person under these regulations shall be considered as income for the purpose of the Internal Revenue Code of 1954, or for the purpose of determining the eligibility or the extent of eligibility of any person for assistance under the Social Security Act or any other Federal law.

Subpart D—Payment for Moving and Related Expenses

§ __.301 Payment for actual reasonable moving and related expenses—residential moves.

Any displaced owner-occupant or tenant of a dwelling who qualifies as a displaced person (defined at § __.2(f)) is entitled to payment of his or her actual moving and related expenses, as the Agency determines to be reasonable and necessary, including expenses for:

(a) Transportation of the displaced person and personal property. Transportation costs for a distance beyond 50 miles are not eligible, unless the Agency determines that relocation beyond 50 miles is justified.

(b) Packing, crating, unpacking, and uncrating of the personal property.

(c) Disconnecting, dismantling, removing, reassembling, and reinstalling relocated household appliances, and other personal property.

(d) Storage of the personal property for a period not to exceed 12 months, unless the Agency determines that a longer period is necessary.

(e) Insurance for the replacement value of the property in connection with the move and necessary storage.

(f) The replacement value of property lost, stolen, or damaged in the process of moving (not through the fault or negligence of the displaced person, his or her agent, or employee) where insurance covering such loss, theft, or damage is not reasonably available.

(g) Other moving-related expenses that are not listed as ineligible under § __.305, as the Agency determines to be reasonable and necessary.

§ __.302 Fixed payment for moving expenses—residential moves.

Any person displaced from a dwelling, or a seasonal residence, is entitled to receive a fixed payment in lieu of a payment for actual moving and related expenses under § __.301, that consists of:

(a) A moving expense allowance not to exceed $300 which shall be determined in accordance with the applicable moving allowance schedule approved by the Federal Highway Administration; and

(b) A dislocation allowance of $200.

§ __.303 Payment for actual reasonable moving and related expenses—nonresidential moves.

(a) *Eligible costs.* Any business or farm operation which qualifies as a displaced person (defined at § __.2(f)) is entitled to payment for such actual moving and related expenses, as the Agency determines to be reasonable and necessary, including expenses for:

(1) Transportation of personal property. Transportation costs for a distance beyond 50 miles are not eligible, unless the Agency determines that relocation beyond 50 miles is justified.

(2) Packing, crating, unpacking, and uncrating of the personal property.

(3) Disconnecting, dismantling, removing, reassembling, and reinstalling relocated machinery, equipment, and other personal property, including substitute personal property described at § __.303(a)(12). This includes connection to utilities available nearby. It also includes modifications to the personal property necessary to adapt it to the replacement structure, the replacement site, or the utilities at the replacement site, and modifications necessary to adapt the utilities at the replacement site to the personal property. (Expenses for providing utilities from the right-of-way to the building or improvement are excluded.)

(4) Storage of the personal property for a period not to exceed 12 months, unless the Agency determines that a longer period is necessary.

(5) Insurance for the replacement value of the personal property in connection with the move and necessary storage.

(6) Any license, permit, or certification required of the displaced person at the replacement location. However, the payment may be based on the remaining useful life of the existing license, permit, or certification.

(7) The replacement value of property lost, stolen, or damaged in the process of moving (not through the fault or negligence of the displaced person, his or her agent, or employee) where insurance covering such loss, theft, or damage is not reasonably available.

(8) Professional services necessary for—

(i) Planning the move of the personal property;

(ii) Moving the personal property; and

(iii) Installing the relocated personal property at the replacement location.

(9) Relettering signs and replacing stationery on hand at the time of displacement that are made obsolete as a result of the move.

(10) Actual direct loss of tangible personal property incurred as a result of moving or discontinuing the business or farm operation. The payment shall consist of the lesser of:

(i) The fair market value of the item for continued use at the displacement site, less the proceeds from its sale. (To be eligible for payment, the claimant must make a good faith effort to sell the personal property, unless the Agency determines that such effort is not necessary. When payment for property loss is claimed for goods held for sale, the fair market value shall be based on the cost of goods to the business, not the potential selling price.); or

(ii) The estimated cost of moving the item, but with no allowance for storage. (If the business or farm operation is discontinued, the estimated cost shall be based on a moving distance of 50 miles.)

(11) The reasonable cost incurred in attempting to sell an item that is not to be relocated.

(12) Purchase of substitute personal property. If an item of personal property which is used as part of a business or farm operation is not moved but is promptly replaced with a substitute item that performs a comparable function at the replacement site, the displaced person is entitled to payment of the lesser of:

(i) The cost of the substitute item, including installation costs at the replacement site, minus any proceeds from the sale or trade-in of the replaced item; or

(ii) The estimated cost of moving and reinstalling the replaced item but with no allowance for storage. At the Agency's discretion, the estimated cost for a low cost or uncomplicated move may be based on a single bid or estimate.

(13) Searching for a replacement location. A displaced business or farm operation is entitled to reimbursement for actual expenses, not to exceed $1,000, as the Agency determines to be reasonable, which are incurred in searching for a replacement location, including:

(i) Transportation.

(ii) Meals and lodging away from home.

(iii) Time spent searching, based on reasonable salary or earnings.

(iv) Fees paid to a real estate agent or broker to locate a replacement site, exclusive of any fees or commissions related to the purchase of such site.

(14) Other moving-related expenses that are not listed as ineligible under § __.305, as the Agency determines to be reasonable and necessary.

(b) *Notification and inspection.* The following requirements apply to payments under this section:

(1) The Agency shall inform the displaced person, in writing, of the requirements of paragraphs (b) (2) and (3) of this section as soon as possible after the initiation of negotiations. This information may be included in the relocation information provided to the displaced person as set forth in § __.203.

(2) The displaced person must provide the Agency reasonable advance written notice of the approximate date of the start of the move or disposition of the personal property and a list of the items to be moved, However, the Agency may waive this notice requirement after documenting its file accordingly.

(3) The displaced person must permit the Agency to make reasonable and timely inspections of the personal property at both the displacement and replacement sites and to monitor the move.

(c) *Self-moves.* If the displaced person elects to take full responsibility for the move of the business or farm operation, the Agency may make a payment for the person's moving expenses in an amount not to exceed the lower of two acceptable bids or estimates obtained by the Agency or prepared by qualified staff. At the Agency's discretion, a payment for a low cost or uncomplicated move may be based on a single bid or estimate.

(d) *Transfer of ownership.* Upon request and in accordance with applicable law, the claimant shall transfer to the Agency ownership of any personal property that has not been moved, sold, or traded in.

(e) *Advertising signs.* The amount of a payment for direct loss of an advertising sign which is personal property shall be the lesser of:

(1) The depreciated reproduction cost of the sign, as determined by the Agency, less the proceeds from its sale; or

(2) The estimated cost of moving the sign, but with no allowance for storage.

§ __.304 Fixed payment for moving expenses—Nonresidential moves.

(a) *Business.* A displaced business (except an outdoor advertising display business or a nonprofit organization) may be eligible to choose a fixed payment in lieu of a payment for actual moving and related expenses. The payment shall equal the average annual net earnings of the business, as computed in accordance with paragraph (e) of this section, but not less than $2,500 nor more than $10,000. The displaced business is eligible for the payment if the Agency determined that:

(1) The business cannot be relocated without a substantial loss of its existing patronage (clientele or net earnings). A business is assumed to meet this test unless the Agency demonstrates that it will not suffer a substantial loss of its existing patronage; and

(2) The business is not part of a commercial enterprise having another establishment, which is not being acquired by the Agency, and which is under the same ownership and engaged in the same or similar business activities. (For purposes of this rule a remaining business facility that did not contribute materially to the income of the displaced person during the 2 taxable years prior to displacement shall not be considered "another establishment."); and

(3) The business contributed materially to the income of the displaced person during the 2 taxable years prior to displacement (see § __.2(d)).

(b) *Determining the number of businesses.* In determining whether two or more displaced legal entities constitute a single business which is entitled to only one fixed payment, all pertinent factors shall be considered, including the extent to which:

(1) The same premises and equipment are shared;

(2) Substantially identical or interrelated business functions are carried out and business and financial affairs are commingled;

(3) The entities are held out to the public, and to those customarily dealing with them, as one business; and

(4) The same person or closely related persons own, control, or manage the affairs of the entities.

(c) *Farm operation.* A displaced farm operation (defined at § __.2(h) may choose a fixed payment in lieu of a payment for actual moving and related expenses in an amount equal to its average annual net earnings as computed in accordance with paragraph (e) of this section, but not less than $2,500 nor more than $10,000. In the case of a partial acquisition of land which was a farm operation before the acquisition, the fixed payment shall be made only if the Agency determines that:

(1) The acquisition of part of the land caused the operator to be displaced from the farm operation on the remaining land; or

(2) The partial acquisition caused a substantial change in the nature of the farm operation.

(d) *Nonprofit organization.* A displaced nonprofit organization may choose a fixed payment in lieu of a payment for actual moving and related expenses of $2,500, if the Agency determines that it:

(1) Cannot be relocated without a substantial loss of existing patronage (membership or clientele). A nonprofit organization is assumed to meet this test, unless the Agency demonstrates otherwise; and

(2) Is not part of an enterprise having at least one other establishment engaged in the same or similar activity which is not being acquired by the Agency.

(e) *Average annual net earnings of a business or farm operation.* The average annual net earnings of a business or farm operation are one-half of its net earnings before Federal, State, and local income taxes during the 2 taxable years immediately prior to the taxable year in which it was displaced. If the business or farm was not in operation for the full 2 taxable years prior to displacement, net earnings shall be based on the actual period of operation at the displacement site during the 2 taxable years prior to displacement, projected to an annual rate. Average annual net earnings may be based upon a different period of time when the Agency determines it to be more equitable. Net earnings include any compensation obtained from the business or farm operation by its owner, the owner's spouse, and dependents. The displaced person shall furnish the Agency proof of net earnings through income tax returns, certified financial statements, or other

VOL 51 ISS 39 FE 27 1986 UMI

reasonable evidence which the Agency determines is satisfactory.

§ __.305 Ineligible moving and related expenses.

A displaced person is not entitled to payment for:

(a) The cost of moving any structure or other real property improvement in which the displaced person reserved ownership. However, this rule does not preclude the computation under § __.401(c)(4)(iii); or

(b) Interest on a loan to cover moving expenses; or

(c) Loss of goodwill; or

(d) Loss of profits; or

(e) Loss of trained employees; or

(f) Any additional operating expenses of a business or farm operation incurred because of operating in a new location; or

(g) Personal injury; or

(h) Any legal fee or other cost for preparing a claim for a relocation payment or for representing the claimant before the Agency; or

(i) Expenses for searching for a replacement dwelling; or

(j) Physical changes to the real property at the replacement location of a business or farm operation except as provided in § __.303(a)(3); or

(k) Costs for storage of personal property on real property already owned or leased by the displaced person.

Subpart E—Replacement Housing Payments

§ __.401 Replacement housing payment for 180-day homeowner-occupants.

(a) *Eligibility.* A displaced person is eligible for the replacement housing payment for a 180-day homeowner-occupant if the person:

(1) Has actually owned and occupied the displacement dwelling for not less than 180 days immediately prior to the initiation of negotiations; and

(2) Purchases and occupies a decent, safe, and sanitary replacement dwelling within 1 year after the later of:

(i) The date the person receives final payment for the displacement dwelling or, in the case of condemnation, the date the required amount is deposited in the court, or

(ii) The date the person moves from the displacement dwelling.

(b) *Amount of payment.* The replacement housing payment for an eligible 180-day homeowner-occupant may not exceed $15,000. (See also § __.403(b).) The payment shall be the sum of:

(1) The amount by which the cost of a replacement dwelling exceeds the acquisition cost of the displacement dwelling, as determined in accordance with paragraph (c) of this section; and

(2) The increased interest costs and other debt service costs to be incurred in connection with the mortgage(s) on the replacement dwelling, as determined in accordance with paragraph (d) of this section; and

(3) The reasonable expenses incidental to the purchase of the replacement dwelling, as determined in accordance with paragraph (e) of this section.

(c) *Price differential.*

(1) *Determination of price differential.* The price differential to be paid under paragraph (b)(1) of this section is the amount which must be added to the acquisition cost of the displacement dwelling to provide a total amount equal to the lesser of:

(i) The reasonable cost of a comparable replacement dwelling as determined in accordance with § __.403(a); or

(ii) The purchase price of the decent, safe, and sanitary replacement dwelling actually purchased and occupied by the displaced person.

(2) *Mixed-use and multifamily properties.* If the displacement dwelling was part of a property that contained another dwelling unit and/or space used for non-residential purposes, and/or is located on a lot larger than typical for residential purposes, only that portion of the acquisition payment which is actually attributable to the displacement dwelling shall be considered its acquisition cost when computing the price differential.

(3) *Insurance proceeds.* To the extent necessary to avoid duplicate compensation, the amount of any insurance proceeds received by a person in connection with a loss to the displacement dwelling due to a catastrophic occurrence (fire, flood, etc.) shall be included in the acquisition cost of the displacement dwelling when computing the price differential. (Also see § __.3.)

(4) *Owner retention of displacement dwelling.* If the owner retains ownership of his or her dwelling, moves it from the displacement site, and reoccupies it on a replacement site, the purchase price of the replacement dwelling, shall be the sum of:

(i) The cost of moving and restoring the dwelling to a condition comparable to that prior to the move; and

(ii) The cost of making the unit a decent, safe, and sanitary replacemet dwelling (defined at § __.2(e)); and

(iii) The current fair market value for residential use of the replacement site (see Appendix A, § __.401(c)(4)(iii)), unless the claimant rented the displacement site and there is a reasonable opportunity for the claimant to rent a suitable replacement site; and

(iv) The retention value of the dwelling, if such retention value is reflected in the "acquisition cost" used when computing the replacement housing payment.

(d) *Increased mortgage interest costs.* The amount to be paid under § __.401(b)(2) is the sum of the present value of the following two items: The increase in interest costs that result when the mortgage interest rate on the replacement dwelling exceeds the mortgage interest rate on the displacement dwelling, and other debt service costs. The following rules apply to the computation:

(1) The payment shall be based only on bona fide mortgages that were a valid lien on the displacement dwelling for at least 180 days prior to the initiation of negotiations. All such mortgages on the displacement dwelling shall be used to compute the payment.

(2) The payment shall be based on the unpaid mortgage balance on the displacement dwelling or the new mortgage amount, whichever is less.

(3) The payment shall be based on the remaining term of the mortgage on the displacement dwelling or the actual term of the new mortgage, whichever is shorter.

(4) The interest charge on the new mortgage shall not exceed the prevailing interest rate currently charged by mortgage lending institutions in the area in which the replacement dwelling is located.

(5) The present value of the increased interest costs shall be computed at the prevailing interest rate paid on savings deposits by commercial banks in the area in which the replacement dwelling is located.

(6) Purchaser's points and loan origination or assumption fees, but not seller's points, shall be paid to the extent—

(i) They are not paid as incidental expenses;

(ii) They do not exceed rates normal to similar real estate transactions in the area; and

(iii) The Agency determines them to be necessary.

The computation of such points and fees shall be based on the unpaid mortgage balance on the displacement dwelling or the new mortgage amount, whichever is less.

(e) *Incidental expenses.* The incidental expenses to be paid under paragraph (b)(3) of this section or § __.402(c)(1) are those necessary and reasonable costs actually incurred by

the displaced person incident to the purchase of a replacement dwelling, and customarily paid by the buyer, including:

(1) Legal, closing, and related costs, including those for title search, preparing conveyance instruments, notary fees, preparing surveys and plats, and recording fees.

(2) Lender, FHA, or VA application and appraisal fees.

(3) Loan origination or assumption fees that do not represent prepaid interest.

(4) Certification of structural soundness and termite inspection when required.

(5) Credit report.

(6) Owner's and mortgagee's evidence of title, e.g., title insurance, not to exceed the costs for a comparable replacement dwelling.

(7) Escrow agent's fee.

(8) State revenue or documentary stamps, sales or transfer taxes (not to exceed the costs for a comparable replacement dwelling).

(9) Such other costs as the Agency determines to be incidental to the purchase.

(f) *Rental assistance payment for 180-day homeowner.*

A 180-day homeowner-occupant, who is eligible for a replacement housing payment under § __.401(a) but elects to rent a replacement dwelling, is eligible for a rental assistance payment not to exceed $4,000, computed and disbursed in accordance with § __.402(b).

§ __.402 Replacement housing payment for 90-day occupants.

(a) *Eligibility.* A tenant or owner-occupant displaced from a dwelling is entitled to a payment not to exceed $4,000 for rental assistance, as computed in accordance with paragraph (b) of this section, or downpayment assistance, as computed in accordance with paragraph (c) of this section, if such displaced person:

(1) Has actually and lawfully occupied the displacement dwelling for at least 90 days immediately prior to the initiation of negotiations; and

(2) Has rented, or purchased, and occupied a decent, safe, and sanitary replacement dwelling within 1 year (unless the Agency extends this period for good cause) after:

(i) For a tenant, the date he or she moves from the displacement dwelling, or

(ii) For an owner-occupant, the later of:

(A) The date he or she receives final payment for the displacement dwelling, or in the case of condemnation, the date the required amount is deposited with the court; or

(B) The date he or she moves from the displacement dwelling.

(b) *Rental assistance payment.*

(1) *Amount of payment.* An eligible displaced person who rents a replacement dwelling is entitled to a payment not to exceed $4,000 for rental assistance. (See also § __.403(b).) Such payment shall be 48 times the amount obtained by subtracting the average monthly rent of the displacement dwelling for a reasonable period prior to displacement, as determined by the Agency (for an owner-occupant or tenant who pays little or no rent, the average cost for rent shall be the fair market rent; see Appendix A, Subpart E), from the lesser of:

(i) The monthly rent for a comparable replacement dwelling; or

(ii) The monthly rent for the decent, safe, and sanitary replacement dwelling actually occupied by the displaced person.

(2) *Utility services.* Any utility service which is included in the monthly rent for either the displacement dwelling or the comparable replacement dwelling must be included when computing the rental assistance payment. Appropriate adjustments to reflect the cost of utility services shall be made, if necessary to ensure that like circumstances are compared.

(3) *Manner of disbursement.* The payment under this section shall be disbursed in a lump sum, unless the Agency determines on a case-by-case basis, for good cause, that the payment should be made in installments.

(c) *Downpayment assistance payment.*

(1) *Amount of payment.* An eligible displaced person who purchases a replacement dwelling is entitled to a payment for downpayment assistance not to exceed $4,000. Such payment shall be the full amount of the first $2,000 of the required downpayment and incidental expenses (see § __.401(e)) plus one-half of any amount required over $2,000, provided that the displaced person matches equally the amount in excess of $2,000. A displaced person eligible to receive a replacement housing payment for a 180-day homeowner-occupant under § __.401 is not eligible for this payment.

(2) *Required downpayment.* For purposes of this section, the term "required downpayment" means the downpayment ordinarily required to obtain conventional loan financing for the decent, safe, and sanitary dwelling actually purchased and occupied. However, if the downpayment actually required of a displaced person for the purchase of the replacement dwelling exceeds the amount ordinarily required, the amount of the "required downpayment" shall be the amount which the Agency determines is necessary for the downpayment.

(3) *Application of payment.* The full amount of the replacement housing payment for downpayment assistance must be applied to the purchase price of the replacement dwelling and related incidental expenses.

§ __.403 Additional rules governing replacement housing payments.

(a) *Determining cost of comparable replacement dwelling.* The upper limit of a replacement housing payment shall be based on the cost of a comparable replacement dwelling (defined at § __.2(c)).

(1) If available, at least three comparable replacement dwellings shall be examined and the payment computed on the basis of the dwelling most nearly representative of, and equal to, or better than, the displacement dwelling. An adjustment shall be made to the asking price of any dwelling, to the extent justified by local market data (see also § __.205(b)(2)(i)). An obviously overpriced dwelling may be ignored.

(2) If the site of the comparable replacement dwelling lacks a major exterior attribute of the displacement dwelling site, (e.g., the site is significantly smaller or does not contain a swimming pool), the value of such attribute shall be subtracted from the acquisition cost of the displacement dwelling for purposes of computing the payment. If the acquisition of a portion of a typical residential property causes the displacement of the owner from the dwelling and the remainder is a buildable residential lot, the Agency may offer to purchase the entire property. If the owner refuses to sell the remainder to the Agency, the fair market value of the remainder may be added to the acquisition cost of the displacement dwelling for purposes of computing the replacement housing payment.

(3) To the extent feasible, comparable replacement dwellings shall be selected from the neighborhood in which the displacement dwelling was located or, if that is not possible, in nearby or similar neighborhoods where housing costs are generally the same or higher.

(b) *Applicability of last resort housing.* Whenever a $15,000 replacement housing payment under § __.401 or a $4,000 replacement housing payment under § __.402 would be insufficient to ensure that a comparable replacement dwelling is available on a timely basis to a person, the Agency

VOL
51
ISS
39
FE
27
1986
UMI

shall provide additional or alternative assistance under the last resort housing provisions at Subpart G, which may include increasing the replacement housing payment so that a replacement dwelling is within the displaced person's financial means as described in § __.2(c)(6)).

(c) *Inspection of replacement dwelling.* Before making a replacement housing payment or releasing a payment from escrow, the Agency or its designated representative shall inspect the replacement dwelling and determine whether it is a decent, safe, and sanitary dwelling as defined at § __.2(e).

(d) *Purchase of replacement dwelling.* A displaced person is considered to have met the requirement to purchase a replacement dwelling, if the person:

(1) Purchases a dwelling; or

(2) Purchases and rehabilitates a substandard dwelling; or

(3) Relocates a dwelling which he or she owns or purchases; or

(4) Constructs a dwelling on a site he or she owns or purchases; or

(5) Contracts for the purchase or construction of a dwelling on a site provided by a builder or on a site the person owns or purchases.

(e) *Occupancy requirements for displacement or replacement dwelling.* No person shall be denied eligibility for a replacement housing payment solely because the person is unable to meet the occupancy requirements set forth in these regulations for a reason beyond his or her control, including:

(1) A disaster, an emergency, or an imminent threat to the public health or welfare, as determined by the President, the Federal agency funding the project, or the Agency; or

(2) Another reason, such as a delay in the construction of the replacement dwelling, military reserve duty, or hospital stay, as determined by the Agency.

(f) *Conversion of payment.* A displaced person who initially rents a replacement dwelling and receives a rental assistance payment under § __.402(b) is eligible to receive a payment under § __.401 or § __.402(c) if he or she meets the eligibility criteria for such payments, including purchase and occupancy within the prescribed 1-year period. Any portion of the rental assistance payment that has been disbursed shall be deducted from the payment computed under § __.401 or § __.402(c).

(g) *Payment after death.* A replacement housing payment is personal to the displaced person and upon his or her death the undisbursed portion of any such payment shall not be paid to the heirs or assigns, except that:

(1) The amount attributable to the displaced persons period of actual occupancy of the replacement housing shall be paid.

(2) The full payment shall be disbursed in any case in which a member of a displaced family dies and the other family member(s) continue to occupy a decent, safe, and sanitary replacement dwelling.

(3) Any portion of a replacement housing payment necessary to satisfy the legal obligation of an estate in connection with the selection of a replacement dwelling by or on behalf of a deceased person shall be disbursed to the estate.

Subpart F—Mobile Homes

§ __.501 Applicability.

This Subpart describes the requirements governing the provision of relocation payments to a person displaced from a mobile home and/or mobile homesite who meets the basic eligibility requirements of these regulations. Except as modified by this Subpart, such a displaced person is entitled to a moving expense payment in accordance with Subpart D and a replacement housing payment in accordance with Subpart E to the same extent and subject to the same requirements as persons displaced from conventional dwellings.

§ __.502 Moving and related expenses—Mobile homes.

A tenant or owner-occupant displaced from a mobile home or mobile homesite is entitled to a payment for the cost of moving his or her personal property on an actual cost basis in accordance with § __.301 or, as an alternative, on the basis of a fixed payment under § __.302. (However, if the mobile home is not acquired but the owner obtains a replacement housing payment under one of the circumstances described at § __.503(c), the owner is not eligible for payment for moving the mobile home.) The following rules apply to payments for actual moving expenses under § __.301:

(a) A displaced mobile homeowner, who moves the mobile home to a replacement site, is eligible for the reasonable cost of disassembling, moving, and reassembling any attached appurtenances (such as porches, decks, skirting and awnings) which were not acquired, anchoring of the unit, and utility "hook-up" charges.

(b) If a mobile home requires repairs and/or modifications so that it can be moved and/or made decent, safe and sanitary, and the Agency determines that it would be practical to relocate it, the reasonable cost of such repairs and/or modifications is reimbursable.

(c) A nonreturnable mobile home park entrance fee is reimbursable to the extent it does not exceed the fee at a comparable mobile home park, if the person is displaced from a mobile home park or the Agency determines that payment of the fee is necessary to effect relocation.

§ __.503 Replacement housing payment for 180-day mobile homeowner-occupants.

A displaced owner-occupant of a mobile home is entitled to a replacement housing payment, not to exceed $15,000, under § __.401 if:

(a) The person both owned the displacement mobile home and occupied it on the displacement site for at least 180 days immediately prior to the initiation of negotiations;

(b) The person meets the other basic eligibility requirements at § __.401(a); and

(c) The Agency acquires the mobile home and/or mobile homesite, or the mobile home is not acquired by the Agency but the owner is displaced from the mobile home because the Agency determines that the mobile home:

(1) Is not and cannot economically be made decent, safe, and sanitary; or

(2) Cannot be relocated without substantial damage or unreasonable cost; or

(3) Cannot be relocated because there is no available comparable replacement site; or

(4) Cannot be relocated because it does not meet mobile home park entrance requirements.

If the mobile home is not actually acquired, but the Agency determines that it is not practical to relocate it, the acquisition cost of the displacement dwelling used when computing the price differential amount, described at § __.401(c), shall include the salvage value or trade-in value of the mobile home, whichever is higher.

§ __.504 Replacement housing payments for 90-day mobile home occupants.

A displaced tenant or owner-occupant of a mobile home is eligible for a replacement housing payment, not to exceed $4,000, under § __.402 if:

(a) The person actually occupied the displacement mobile home on the displacement site for at least 90 days immediately prior to the initiation of negotiations;

(b) The person meets the other basic eligibility requirements at § __.402(a); and

(c) The Agency acquires the mobile home and/or mobile homesite, or the mobile home is not acquired by the Agency but the owner or tenant is displaced from the mobile home because of one of the circumstances described at § __.503(c).

§ __.505 Additional rules governing relocation payment to mobile home occupants.

(a) *Replacement housing payment based on dwelling and site.* Both the mobile home and mobile homesite must be considered when computing a replacement housing payment. For example, a displaced mobile home occupant may have owned the displacement mobile home and rented the site or may have rented the displacement mobile home and owned the site. Also, a person may elect to purchase a replacement mobile home and rent a replacement site, or rent a replacement mobile home and purchase a replacement site. In such cases, the total replacement housing payment shall consist of a payment for a dwelling and a payment for a site, each computed under the applicable section in Subpart E. However, the total replacement housing payment under Subpart E shall not exceed the maximum payment (either $15,000 or $4,000) permitted under the section that governs the computation for the dwelling. (See also § __.403(b).)

(b) *Cost of comparable replacement dwelling.*

(1) If a comparable replacement mobile home is not available, the replacement housing payment shall be computed on the basis of the reasonable cost of a conventional comparable replacement dwelling.

(2) If the Agency determines that it would be practical to relocate the mobile home, but the owner-occupant elects not to do so, the Agency may determine that, for purposes of computing the price differential under § __.401(c), the cost of a comparable replacement dwelling is the sum of—

(i) The value of the mobile home;

(ii) The cost of any necessary repairs or modifications; and

(iii) The estimated cost of moving the mobile home to a replacement site.

(c) *initiation of negotiations.* If the mobile home is not actually acquired, but the occupant is considered displaced under these regulations, the "initiation of negotiations" is the initiation of negotiations to acquire the land, or, if the land is not acquired, the written notification that he or she is a displaced person under these regulations.

(d) *Person moves mobile home.* If the owner is reimbursed for the cost of moving the mobile home under these regulations, he or she is not eligible to receive a replacement housing payment to assist in purchasing or renting a replacement mobile home. The person may, however, be eligible for assistance in purchasing or renting a replacement site.

(e) *Partial acquisition of mobile home park.* The acquisition of a portion of a mobile home park property may leave a remaining part of the property that is not adequate to continue the operation of the park. If the Agency determines that a mobile home located in the remaining part of the property must be moved as a direct result of the project, the owner and any tenant shall be considered a displaced person who is entitled to relocation payments and other assistance under these regulations.

Subpart G—Last Resort Housing

§ __.601 Applicability.

(a) *Basic determination to provide last resort housing.* A person cannot be required to move from his or her dwelling unless at least one comparable replacement dwelling is made available to the person. Whenever an Agency determines that a replacement housing payment under Subpart E would not be sufficient to provide a comparable replacement dwelling on a timely basis to the person, the Agency is authorized to take appropriate measures under this Subpart to provide such a dwelling. The Agency's obligation to ensure that a comparable replacement dwelling is available shall be met when such a dwelling, or assistance necessary to provide such a dwelling, is offered under the provisions of this Subpart.

(a) *Basic rights of persons to be displaced.* The provisions of this Subpart do not deprive any displaced person of any rights the person may have under the Uniform Act or any implementing regulations. The Agency shall not require any displaced person to accept a dwelling provided by the Agency under the procedures in this Subpart (unless the Agency and the displaced person have entered into a contract to do so) in lieu of any acquisition payment or any relocation payment for which the person may otherwise be eligible. A 180-day homeowner-occupant who is eligible for a payment under § __.401 is entitled to a reasonable opportunity to purchase a comparable replacement dwelling. (See Appendix A, § __.601(b).)

§ __.602 Methods of providing replacement housing.

Agencies shall have broad latitude in implementing this Subpart, but implementation shall be on a reasonable cost basis. The methods of providing last resort housing include, but are not limited to:

(a) Rehabilitation of and/or additions to an existing replacement dwelling.

(b) The construction of a new replacement dwelling.

(c) The provision of a direct loan, which requires regular amortization or deferred repayment. The loan may be unsecured or secured by the real property. The loan may bear interest or be interest-free.

(d) A replacement housing payment in excess of the limits set forth in § __.401 or § __.402. A rental assistance subsidy under this Subpart may be provided in installments or in a lump sum.

(e) The relocation and, if necessary, rehabilitation of a dwelling.

(f) The purchase of land and/or a replacement dwelling by the displacing agency and subsequent sale or lease to, or exchange with, a displaced person.

(g) The removal of barriers to the handicapped.

Appendix A—Additional Information

This appendix provides additional information to explain the intent of certain provisions of the rule.

Subpart A—General

Section __.2(c) Definition of comparable replacement dwelling.

The requirement in § __.2(c)(2) that a comparable replacement dwelling be "functionally similar" to the displacement dwelling means that it must perform the same function, provide the same utility, and be capable of contributing to a comparable style of living as the displacement dwelling. While it need not possess every feature of the displacement dwelling, the principal features must be present.

Generally, functional similarity is an objective standard, reflecting the range of purposes for which the various features of a dwelling may physically be used. However, in determining whether a replacement dwelling is functionally similar to the displacement dwelling, the Agency may consider reasonable trade-offs in specific features when the replacement unit is "equal or better than" the displacement dwelling.

For example, if the displacement dwelling contains a pantry and a similar dwelling is not available, a replacement dwelling with ample kitchen cupboards may be acceptable. Insulated and heated space in a garage might prove an adequate substitute for basement workshop space. A dining area may substitute for a separate dining room.

VOL
51
ISS
39
FE
27
1986
UMI

Under some circumstances, attic space could substitute for basement space for storage purposes, and vice versa.

Only in unusual circumstances may a comparable replacement dwelling contain fewer rooms or consequentially less living space than the displacement dwelling. Such may be the case when a decent, safe, and sanitary replacement dwelling (which by definition is "adequate to accommodate" the displaced person) may be found to be "functionally similar" to a larger but very run-down substandard displacement dwelling.

Section __2(c)(5) requires that a comparable replacement dwelling for a person who is not receiving assistance under any government housing program before displacement must be currently available on the private market without any subsidy under a government housing program.

A public housing unit may qualify as a comparable replacement dwelling only for a person displaced from a public housing unit; a privately-owned dwelling with a housing program subsidy tied to the unit may qualify as a comparable replacement dwelling only for a person displaced from a similarly subsidized unit or public housing; a housing program subsidy to a person (not tied to the building), such as a HUD Section 8 Existing Housing Program Certificate or a Housing Voucher, may be reflected in an offer of a comparable replacement dwelling to a person receiving a similar subsidy or occupying a privately-owned subsidized unit or public housing unit before displacement.

However, nothing in these regulations prohibits an Agency from offering, or precludes a person from accepting, assistance under a government housing program, even if the person did not receive similar assistance before displacement. However, the Agency is obligated to inform the person of his or her options under these regulations. (If a person accepts assistance under a government housing program, the rental assistance payment under § __.402 would be computed on the basis of the person's actual out-of-pocket cost for the replacement housing.)

Section __2(f)(2) Persons not displaced.

Section __2(f)(2)(iii) recognizes that there are circumstances where the acquisition of real property takes place without the intent or necessity that an occupant of the property be displaced. Because such occupants are not considered "displaced persons" under these regulations, great care must be exercised to ensure that they are treated fairly and equitably. For example, if the tenant-occupant of a dwelling will not be displaced, but is required to relocate temporarily in connection with the project, the temporarily-occupied housing must be decent, safe and sanitary and the tenant must be reimbursed for all reasonable out-of-pocket expenses incurred in connection with the temporary relocation, including moving expenses and increased housing costs during the temporary relocation.

It is also noted that any person who disagrees with the Agency's determination that he or she is not a displaced person under these regulations may file an appeal in accordance with § __.10.

Section __2(k) Initiation of negotiations.

This section of the rule provides a special definition for acquisitions and displacements under Pub. L. 96–510 or Superfund. These activities differ under Superfund in that relocation may precede acquisition, the reverse of the normal sequence. Superfund is a program designed to clean up hazardous waste sites. When such a site is discovered, it may be necessary, in certain limited circumstances, to alert the public to the danger and to the advisability of moving immediately. If a decision is made later to permanently relocate such persons, those who had moved earlier would no longer be on site when a formal, written offer to acquire the property was made and thus would lose their eligibility for a replacement housing payment. In order to prevent this unfair outcome, we have provided a definition which is based on the public health advisory or announcement of permanent relocation.

Section __3 No duplication of payments.

This section prohibits an Agency from making a payment to a person under these regulations that would duplicate another payment the person receives under Federal, State, or local law. The Agency is not required to conduct an exhaustive search for such other payments; it is only required to avoid creating a duplication based on the Agency's knowledge at the time a payment under these regulations is computed.

Section __9(c) Reports.

This regulation allows Federal agencies to require the submission of a report on activities under the Uniform Act no more frequently than once every three years. The report, if required, will cover activities during the Federal fiscal year immediately prior to the submission date. In order to minimize the administrative burden on Agencies implementing this rule, a basic report form (see Appendix B) has been developed which, with only minor modifications, would be used in all Federal and federally-assisted programs or projects.

Subpart B—Real Property Acquisition

Section __101(a) General.

The provisions of this Subpart apply to real property acquisition for the following types of Federal or federally-assisted programs or projects:

(1) Those carried out under the threat of eminent domain, including amicable agreements under the threat of such power.

(2) Where there is an intended, planned, or designated project area, and all or substantially all of the property within that area is eventually intended to be acquired. Such acquisitions are subject to the requirements of this Subpart whether or not the Agency has or intends to use the power of eminent domain.

Provided it does not conflict with the foregoing, an Agency may determine that the requirements of this Subpart do not apply to an acquisition if all of the following conditions are present:

(1) No specific site or property needs to be acquired, although the Agency may limit its search for alternative sites to a general geographic area.

(2) The property to be acquired is not part of an intended, planned, or designated project area where all or substantially all of the property within the area is eventually to be acquired.

(3) The Agency will not acquire the property in the event negotiations fail to result in an amicable agreement, and the owner is so informed.

Acquisitions meeting the foregoing criteria are classified as voluntary transactions. The essence of a voluntary transaction is the conditions surrounding the transaction, not the type of transaction itself. A voluntary transaction may involve a donation, an exchange, or a market sale, if the transaction is without compulsion on the part of the Agency.

In those situations where an Agency wishes to purchase more than one site within a geographic area on a "voluntary transaction" basis, it is intended that all owners be treated similarly.

Although the displacement of the owner-occupant of the real property as a result of a voluntary transaction is not subject to these regulations (see § __.2(f)(2)(vi)), the displacement of a

tenant-occupant of the real property is subject to these regulations.

Section __101(b) Less-than-full-fee interest in real property.

This provision provides a benchmark beyond which the requirements of the subpart clearly apply to leases. However, the Agency may apply the regulations to any less-than-full-fee acquisition which is short of 50 years but which in its judgment should be covered.

Section __102(d) Establishment of offer of just compensation.

The initial offer to the property owner may not be less than the amount of the Agency's approval appraisal, but may exceed that amount if the Agency determines that a greater amount reflects just compensation for the property.

Section __102(f) Basic negotiation procedures.

It is intended that an offer to an owner be adequately presented, and that the owner be properly informed. Personal, face-to-face contact should take place, if feasible, but this section is not intended to require such contact in all cases.

Section __102(i) Administrative settlement.

This section provides guidance on administrative settlement as an alternative to judicial resolution of a difference of opinion on the value of a property, in order to avoid unnecessary litigation and congestion in the courts.

All relevant facts and circumstances should be considered by an Agency official delegated this authority. Appraisers, including reviewing appraisers, must not be pressured to adjust their estimate of value for the purpose of justifying such settlements. Such action would invalidate the appraisal process.

Section __102(j) Payment before taking possession.

It is intended that a right-of-entry for construction purposes be obtained only in the exceptional case, such as an emergency project, when there is no time to make an appraisal and purchase offer and the property owner is agreeable to the process.

Section __102(m) Fair Rental.

Section 301(6) of the Uniform Act limits what an Agency may charge when a former owner or previous occupant of a property is permitted to rent the property for a short term or when occupancy is subject to termination by the Agency on short notice. Such rent may not exceed "the fair rental value . . . to a short-term occupier." The Agency's right to terminate occupancy on short notice (whether or not the renter also has that right) supports the establishment of a lesser rental than might be found in a longer, fixed-term situation.

Section __103(b) Standards of appraisal.

In paragraph (b)(3) of this section, it is intended that all relevant and reliable approaches to value be utilized. However, where an Agency determines that the market approach will be adequate by itself because of the type of property being appraised and the availability of sales data, it may limit the appraisal assignment to the market approach.

Section __103(c) Influence of the project on just compensation.

As used in this section, the term "project" is intended to mean an undertaking which is planned, designed, and intended to operate as a unit.

Because of the public knowledge of the proposed project, property values may be affected. A property owner should not be penalized because of a decrease in value caused by the proposed project nor reap a windfall at public expense because of increased value created by the proposed project.

Section __103(f) Conflict of interest.

The overall objective is to minimize the risk of fraud and mismanagement and to promote public confidence in Federal and federally-assisted land acquisition practices. Recognizing that the costs may outweigh the benefits in some circumstances, the rule provides that the same person may both appraise and negotiate an acquisition, if the value is $2,500 or less. However, it should be noted that all appraisals must be reviewed in accordance with § __.104. This includes appraisals of real property valued at $2,500, or less.

Section __104 Review of appraisals.

This section recognizes that Agencies differ in the authority delegated to the review appraiser. In some cases the reviewer establishes the amount of the offer to the owner and in other cases the reviewer makes a recommendation which is acted on at a higher level. It is also within Agency discretion to decide whether a second review is needed if the first review appraiser establishes a value different from that in the appraisal report or reports on a property.

Before acceptance of an appraisal, the review appraiser must determine that the appraiser's documentation, including valuation data and the analyses on that data, demonstrates the soundness of the appraiser's opinion of value. The qualifications of the review appraiser and the level of explanation of the basis for the reviewer's recommended or approved value depend on the complexity of the appraisal problem. For a low value property requiring an uncomplicated valuation process, the reviewer's approval, endorsing the appraiser's report, may satisfy the requirement for the reviewer's statement.

Section __106 Expenses incidental to transfer of title to the agency.

Generally, the Agency is able to pay such incidental costs directly and, where feasible, is required to do so. In order to prevent the property owner from making unnecessary out-of-pocket expenditures and to avoid duplication of expenses, the property owner should be informed early in the acquisition process of the Agency's intent to make such arrangements. In addition, it is emphasized that such expenses must be reasonable and necessary.

Section __108 Donations.

This section provides that the Agency must obtain an appraisal and offer the full amount of just compensation due unless the owner, after being fully informed of such policies, releases the Agency from these obligations.

Subpart C—General Relocation Requirements

Section __204(a) Availability of comparable replacement dwelling before displacement.

This provision requires that no one may be required to move from a dwelling without one comparable replacement dwelling having been made available. In addition, this regulation requires that, "Where possible, three or more comparable replacement dwellings shall be made available." Thus the basic standard for the number of referrals required under this rule is three. Only in situations where three comparable replacement dwellings are not available (e.g., when the local housing market does not contain three comparable dwellings) may the Agency make fewer than three referrals.

Section __205 Relocation assistance advisory services.

Section __205(b)(2)(iii) is intended to emphasize that if the comparable replacement dwellings are located in areas of minority concentration,

VOL
51
ISS
39
FE
27
1986
UMI

minority persons should, if possible, also be given opportunities to relocate to replacement dwellings not located in such areas.

Section __206 Eviction for cause.

Basic eligibility for assistance is established on the basis of facts existing as of the date of the initiation of negotiations. Once the Agency has determined that a person has satisfied such requirements, there is no basis for changing that determination.

Section __207 General requirements—claims for relocation payments.

Section __207(a) allows an Agency to make a payment for low cost or uncomplicated moves without additional documentation, as long as the payment is limited to the amount of the lowest acceptable bid or estimate.

Subpart E—Replacement Housing Payments

The provision in § __401(c)(4)(iii) to use the current fair market value for residential use does not mean the Agency must have an appraisal made. Any reasonable method at arriving at the fair market value may be used.

The provision in § __402(b)(1) to use the fair market rent for the displacement dwelling is intended to address the computation of payments for homeowner-occupants (who, of course, paid no rent before displacement) and those unusual situations in which a tenant is paying an unreasonably low rent and a payment based on such rent would provide a windfall. The provision is not intended to apply in those situations where the use of the fair market rent would result in a hardship because of the displaced person's income or other special circumstances.

Subpart F—Mobile Homes

Section __503(c) Replacement housing payment for 180-day mobile homowner-occupants.

A 180-day owner-occupant who is displaced from a mobile home on a rented site may be eligible for a replacement housing payment for a dwelling computed under § __401 and a replacement housing payment for a site computed under § __402. A 180-day owner-occupant of both the mobile home and the site, who relocates the mobile home, may be eligible for a replacement housing payment under § __401 to assist in the purchase of a replacement site or, under § __402, to assist in renting a replacement site.

Subpart G—Last Resort Housing

Section __601(a) Basic determination to provide last resort housing.

No additional guidelines for implementation are included in the regulation because additional requirements would tend to limit the flexibility considered necessary or appropriate to provide comparable replacement housing on a timely basis.

Section __601(b) Basic rights of persons to be displaced.

This paragraph affirms the right of a 180-day homeowner-occupant, who is eligible for a replacement housing payment under § __401, to a reasonable opportunity to purchase a comparable replacement dwelling. However, it should be read in conjunction with the definition of "owner of displacement dwelling" at § __2(l). The Agency is not required to provide persons owning only a fractional interest in the displacement dwelling a greater level of assistance to purchase a replacement dwelling than the Agency would be required to provide such persons if they owned fee simple title to the displacement dwelling. If such assistance is not sufficient to buy a replacement dwelling, the Agency may provide additional purchase assistance or rental assistance.

Section __602 Methods of providing replacement housing.

The use of cost effective means of providing replacement housing is implied throughout the regulation. The term "reasonable cost" is used here to underline the fact that while innovative means to provide housing are allowed, they should be cost-effective.

Whenever last resort housing assistance is provided to a 180-day homeowner-occupant who must pay a higher interest rate for a new mortgage, reimbursement of increased mortgage interest costs may be based on the "buy down" approach, rather than the more costly formula at § __401(d). Under the "buy down" approach, a lump sum payment is made to reduce the amount of the new mortgage to the amount which can be amortized with the same repayment schedule (payment amounts and due dates) as the mortgage on the displacement dwelling. However, the "buy down" approach shall not be used to reduce a payment to less than $15,000 if the payment computed under § __401 would equal $15,000.

Appendix B—Statistical Report Form

This appendix sets forth the statistical information which may be collected from Agencies in accordance with § __9(c).

General

1. *Report coverage.* This report covers all relocation and real property acquisition activities under a Federal or a federally assisted project or program subject to the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Pub. L. 91–646 (herein called the "Uniform Act").

2. *Report period.* Activities shall be reported on a Federal Fiscal Year basis, i.e., October 1–September 30, for the year in which the report is required.

3. *Where and when to submit report.* Submit an original and two copies of this report to (*Name and Address of Federal Agency*) as soon as possible after September 30, but *NOT LATER THAN NOVEMBER 15* of the year in which the report is due.

4. *How to report relocation payments.* The full amount of a relocation payment shall be reported as if disbursed in the year during which the payment was approved, regardless of whether the payment is to be paid in installments.

5. *How to report dollar amounts.* Round off all money entries in Parts B and C to the nearest dollar.

6. *Statutory references.* The references in parentheses in Part B indicate the section of the Uniform Act that authorizes the cost.

Part A. Persons Displaced

Report in Part A the number of persons ("households," "businesses, including nonprofit organizations," and "farms") who were permanently displaced during the report year by project or program activities and moved to their replacement dwelling or location. This includes businesses, nonprofit organizations and farms which, upon displacement, discontinued operations. The category "households" includes all families and individuals. A family shall be reported as "one" household, *not* by the number of people in the family unit. Persons shall be reported according to their status as "owners" or "tenants" of the property from which displaced.

Part B. Relocation Payments and Expenses

Columns (a) or (b). Report in Column (a) the number of claims approved during the report year. Report in Column (b) the total amount represented by the claims reported in Column (a).

Line 10b, Column (b). Report in Column (b) the amount of increased mortgage interest costs that was

included in the total amount approved for Replacement Housing Payments for Homeowners on Line 10a, Column (b). Leave Line 10b, Column (a) blank.

Line 13. Report in Column (a) the number of households displaced by project or program activities which were provided assistance in accordance with section 206(a) of the Uniform Act. Report in Column (b) the total financial assistance under Section 206(a) allocable to the households reported in Column (a). (If a household received financial assistance under section 203 or section 204 as well as under section 206(a) of the Uniform Act, report the household as a claim in Column (a), but in Column (b) report only the amount of financial assistance allocable to section 206(a). For example, if a tenant-household receives a payment of $5,000 to rent a replacement dwelling, the sum of $4,000 shall be included on Line 11, Column (b), and $1,000 shall be included on Line 13, Column (b).)

Line 14. Report on Line 14 all administrative costs incurred during the report year in connection with providing relocation advisory assistance and services under section 205 of the Uniform Act.

Part C. Real Property Acquisition Subject to Uniform Act

Line 16, Columns (a) and (b). Report in Column (a) all parcels acquired during the report year where title or possession was vested in the acquiring agency during the reporting period. (Include parcels acquired without Federal financial assistance, if there was or will be Federal financial assistance in other phases of the project or program.) Report in Column (b) the total of the amounts paid, deposited in court, or otherwise made available to a property owner pursuant to applicable law in order to vest title or possession in the acquiring agency.

Line 17. Report on Line 17 the number of parcels reported on Line 16 that were acquired by condemnation where price disagreement was involved. Leave Line 17, Column b), blank.

Part D. Relocation Appeals Filed During Report Year

Line 18. Report on Line 18 the total number of relocation appeals filed during the report year by a person alleging the Agency failed to properly determine the person's eligibility for, or the amount of, a relocation payment required under these regulations.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

ST. LOUIS, MO

WHEN: March 11; 9 am,
WHERE: Room 1612,
Federal Building,
1520 Market Street,

Title 3—

The President

Executive Order 12552 of February 25, 1986

Productivity Improvement Program for the Federal Government

By the authority vested in me as President by the Constitution and laws of the United States of America, including the Budget and Accounting Act of 1921, as amended, and in order to establish a comprehensive program for the improvement of productivity throughout all Executive departments and agencies, it is hereby ordered as follows:

Section 1. There is hereby established a government-wide program to improve the quality, timeliness, and efficiency of services provided by the Federal government. The goal of the program shall be to improve the quality and timeliness of service to the public, and to achieve a 20 percent productivity increase in appropriate functions by 1992. Each Executive department and agency will be responsible for contributing to the achievement of this goal.

Sec. 2. As used in this Order, the term:

(a) "Productivity" means the efficiency with which resources are used to produce a government service or product at specified levels of quality and timeliness;

(b) "Services" means those functions and activities performed by the Federal government to achieve program objectives;

(c) "Common agency functions" means those functions which are found in more than one agency, such as awarding grants or loans to individuals or institutions, providing direct benefit payments, processing claims, or furnishing health care;

(d) "Common government functions" means those functions that are common to every agency, such as administrative services;

(e) "Measurement system" means both the specific measures used to determine whether standards of quality, timeliness, and efficiency of services are being met, and the procedures for the collection and reporting of data resulting from application of productivity measures;

(f) "Organizational performance standard" means a statement which quantifies and describes the desired level of quality, timeliness, and efficiency of services to be provided by an organization;

(g) "Management review" means the review by the Director of the Office of Management and Budget, as part of the budget process, of agency accomplishments and plans for management and productivity improvements.

Sec. 3. The head of each Executive department and agency shall:

(a) Use the agency's planning process to review current functions, develop agency goals and objectives for improvement in services, and to identify those functions which offer the most significant opportunity for major gains in quality, timeliness, and efficiency.

(b) Develop and submit annually to the Office of Management and Budget a productivity plan. Each plan shall conform to the policy guidance issued by the Director of the Office of Management and Budget, pursuant to Section 5 of this Order, and shall:

(1) set forth the agency's productivity goals and objectives;

VOL 51 ISS 40 FE 28 1986 UMI

(2) target priorities for the year, and expand coverage each subsequent year to additional appropriate functions and programs, with the objective of broadest possible coverage on all appropriate functions by 1992;

(3) describe the proposed actions designed to make the agency's operations and delivery of services more efficient and responsive;

(4) describe the methods, including efficiency reviews and cost comparisons with the private sector, that the agency will use either to improve its own service, or to make use of commercial services available in the private sector when it is economical to do so; and,

(5) describe the measurement systems to be used by the agency to gauge quality, timeliness, and efficiency.

(c) Implement the productivity program after the management review by the Director of the Office of Management and Budget as provided in Section 6.

(d) Assess annually the agency's progress toward achieving objectives and priorities, including documented gains and cost savings. This assessment will form the basis of the agency's report to the Domestic Policy Council as required by Section 4.

(e) Designate a senior official responsible for guiding the agency's productivity improvement program;

(f) Inform agency managers and employees that they are expected to be responsible for improvements in the quality, timeliness, and efficiency of services;

(g) Encourage employee participation in the productivity program through employee training, incentives, recognition, rewards and by taking actions to minimize negative impacts on employees which may occur as a result of the productivity program.

Sec. 4. The head of each Executive department and agency shall report annually to the President through the Domestic Policy Council on accomplishments achieved under the plan.

Sec. 5. The Director of the Office of Management and Budget is authorized to:

(a) Develop and promulgate goals, policies, principles, standards, and guidelines for the effective administration of this Order by Executive departments and agencies;

(b) Identify and propose the elimination of statutory barriers that inhibit opportunities to make improvements in productivity; and

(c) In consultation with the agencies, select and develop organizational performance standards for those common government and common agency functions that are appropriate targets for improvement in quality, timeliness, and efficiency.

Sec. 6. The Director shall review, through the management review process, each agency's productivity plan based upon the requirements and guidance issued pursuant to Section 5 of this Order. Nothing in this subsection shall be construed as displacing agency responsibilities delegated by law.

Sec. 7. The Director of the Office of Management and Budget shall submit to Congress, in conjunction with the President's budget, a report on productivity plans and accomplishments of the agencies and the government as a whole.

Sec. 8. The Director of the Office of Personnel Management shall:

(a) review incentive practices and programs and other personnel policies and practices which relate to the productivity of the Federal work force and make or recommend such changes as will support productivity improvement;

(b) develop programs to minimize negative impacts on employees; such programs should include, among others, continued development of retraining and job placement alternatives; and

(c) develop and implement training programs for Federal employees to assist them in their performance of productivity improvement tasks.

The Director of the Office of Personnel Management will report to the Office of Management and Budget on actions taken pursuant to this Section.

Rules and Regulations

Federal Register
Vol. 51, No. 40
Friday, February 28, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Parts 418, 419, 420, 421, 424, 427, 432, and 448

[Docket No. 3166S]

Prevented Planting Endorsement to Barley, Corn, Cotton, ELS Cotton, Grain Sorghum, Oat, Rice, and Wheat Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Interim rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) hereby amends the Wheat, Barley, Grain Sorghum, Cotton, Rice, Oat, Corn, and ELS Cotton Crop Insurance Regulations (7 CFR Parts 418, 419, 420, 421, 424, 427, 432, and 448, respectively), effective for the 1986 and succeeding crop years. The intended effect of this rule is to provide for a prevented planting optional endorsement allowing prevented planting insurance coverage in all areas where feed grains, wheat, cotton or rice are produced.

The authority for the promulgation of this rule is contained in the Federal Crop Insurance Act, as amended.

DATES: Effective date: February 28, 1986.

Comment date: Written comments, data, and opinions on this interim rule must be submitted not later than April 29, 1986, to be sure of consideration.

ADDRESS: Written comments on this interim rule should be sent to the Office of the Manager, Federal Crop Insurance Corporation, Room 4096, South Building, U.S. Department of Agriculture, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 447-3325.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established by Departmental Regulation 1512-1. This action constitutes a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for the regulations affected by this action remain unchanged and are made part of each regulation affected by this rule.

Merritt W. Sprague, Manager, FCIC, (1) has determined that this action is not a major rule as defined by Executive Order 12291 because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) major increases in costs or prices for consumers, individual industries, federal, State, or local governments, or a geographical region; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) certifies that this action will not increase the federal paperwork burden for individuals, small businesses, and other persons.

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Merritt W. Sprague, Manager, FCIC, has determined that an emergency situation exists which precludes notice and other public procedure. The Food Security Act of 1985 provides that if the Secretary of Agriculture determines that producers were prevented from planting any portion of the acreage intended for feed grains, wheat, cotton, or rice to such crop or other non-conserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make prevented planting disaster payments to the producers. Such producers will not be eligible for such payments if prevented planting crop insurance is available to the producers under the Federal Crop Insurance Act.

The current FCIC prevented planting crop insurance policy is presently offered on an experimental basis in a limited number of counties. The existing program does not cover loss from causes other than excess moisture as required by the Food Security Act of 1985 relative to prevented planting disaster payments. The experience gained to date indicates that the existing pilot program should not be expanded to a nationwide offer as such a program would be unlikely to attract participation except from those producers who perceive themselves to be in a very high risk situation.

The Corporation intends to provide a prevented planting program consistent with the requirements of the Farm Security Act of 1985 in all areas. The Corporation will also maintain the current experimental prevented planting program in those counties where such program is now being offered as a viable alternative for at least this crop year.

FCIC has determined that, because of the late passage of the Food Security Act of 1985, and the need to provide a prevented planting program consistent with the requirements found in the Food Security Act of 1985 relative to prevented planting disaster payments, it would be prudent and cost effective to offer the new prevented planting endorsement to all producers of certain ASCS program crops, and allow those prevented planting program policyholders who are currently insured the option to retain the present program for this crop year only, or to cancel the present policy and apply for the newly available coverage.

FCIC is providing a prevented planting insurance endorsement to crop insurance contracts on the acreage of Agricultural Stabilization and Conservation Service (ASCS) program crops (wheat, barley, corn, grain sorghum, oats, upland cotton, ELS cotton, and rice) when the producers are participating in the ASCS Acreage Reduction or set-aside programs.

VOL 51 ISS 40 FE 28 1986 UMI

The Prevented Planting Crop Insurance endorsement contained herein provides for protection against prevention of planting due to drought, flood, or other natural disaster caused by adverse weather conditions beyond the control of the producer occurring within the insurance period.

To be eligible for protection, the producer must participate in the acreage reduction or set-aside program offered by ASCS and hold a valid crop insurance contract on the qualifying crop. For 1986 only, special provisions apply to permit eligibility for prevented planting coverage even though the sales may be closed for the required qualifying crop insurance contract.

All existing prevented planting crop insurance policies now in effect will be honored through the current crop year. Insurance will be made available under the new 1986 prevented planting crop insurance endorsement contained herein to persons who had such insurance if the policyholders agree to cancel their present policies. A new application for insurance must be signed before the applicable sales closing date to effect a change.

Written comments on this interim rule are solicited by FCIC for 60 days after publication in the **Federal Register** and any written comments made pursuant to this rule will be available for public inspection in the Office of the Manager, Federal Crop Insurance Corporation, Room 4096, South Building, U.S. Department of Agriculture, Washington, DC, 20250, during regular business hours, Monday through Friday. This rule will be scheduled for review so that any amendment made necessary by comments received may be published as quickly as possible.

List of Subjects in 7 CFR Parts 418, 419, 420, 421, 424, 427, 432, and 448

Crop Insurance, Wheat, Barley, Grain sorghum, Cotton, Rice, Oat, Corn, ELS Cotton.

Interim Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), the Federal Crop Insurance Corporation hereby amends that Wheat, Barley, Grain Sorghum, Cotton, Rice, Oat, Corn, and ELS Cotton Crop Insurance Regulations (7 CFR Parts 418, 419, 420, 421, 424, 427, 432, and 448, respectively), effective for the 1986 and succeeding crop years, in the following instances:

1. The Authority citation for 7 CFR Parts 418, 419, 420, 421, 424, 427, 432, and 448, continues to read as follows:

Authority: Secs. 506, 516, Pub. L. 75–430, 52 Stat. 73, 77, as amended (7 U.S.C. 1506, 1516).

2. 7 CFR Parts 418, 420, 421, 424, 427, 432, and 448 are amended by adding new §§ 418.8, 420.8, 421.8, 424.8, 427.8, 432.8 and 448.8, and 7 CFR Part 419 is amended by adding a new § 419.9, to read as follows:

§ ___ Prevented planting endorsement.

(a) A prevented planting crop insurance endorsement on the qualifying crop will be available to all insureds having a qualifying crop insurance contract under the provisions of this Part and who participate in the ASCS Acreage Reduction Program or set-aside program. This endorsement is not continuous. Application must be made annually for the prevented planting endorsement on or prior to the prevented planting sales closing date established by the actuarial table or the endorsement.

(b) for the 1986 fall crop only (planted in fall of 1985) procedures are established for the purchase of the prevented planting endorsement without the underlying policy of insurance and a special sales closing date has been assigned.

(c) The provisions of the Prevented Planting Crop Insurance Endorsement for the 1986 and succeeding crop years are as follows:

Federal Crop Insurance Corporation

Prevented Planting Crop Insurance Endorsement

(This is an annual election to be made by the insured before the date specified in Section 3.)

Agreement to Insure: We will provide the insurance described in this endorsement in return for the premium and your compliance with all applicable provisions.

Throughout this endorsement, "you" and "your" refer to the insured shown on the accepted Application and "we," "us," and "our" refer to the Federal Crop Insurance Corporation.

All provisions of the qualifying crop policy not in conflict with this endorsement are applicable.

1986 Special Provisions

(Applicable to the 1986 crop year only)

A. The sales closing and intended acreage report dates will be April 15, 1986.

B. If the sales closing date for the qualifying crop insurance program is March 31, 1986, or earlier, and the applicant for the prevented planting endorsement is not insured for the qualifying crop, the terms and conditions of the applicable qualifying crop insurance contract shall become a part of the prevented planting endorsement even though no liability or premium will attach for the qualifying crop insurance contract. In this event, the following elections will apply:

(1) The 65% level of coverage; and

(2) The highest available price election.

Further, the intended acreage may not exceed the base acreage for the qualifying crop established by the county ASCS office, less the intended reduction of acreage necessary to comply with ASCS program requirements.

General Terms and Conditions

1. Causes of loss.

a. The insurance provided is against the unavoidable prevention of planting insured acreage to the qualifying crop or other non-conserving crop during the insurance period due to drought, flood, or other natural disaster beyond the control of the producer occurring within the insurance period, unless those causes are excepted, excluded, or limited by the actuarial table.

b. We will not cover any prevention of planting (i) because of the failure to plant insured acreage due to a cause other than those listed in Subsection 1a. or (ii) when most producers in the surrounding area in similar circumstances were able to plant the qualifying crop or other non-conserving crops.

2. Acreage and share insured

a. The acreage insured for each crop year will be the cultivated acreage in the county intended to be planted for harvest to the qualifying crop, in which you have a share, as reported by you or as determined by us, whichever we elect, and for which a premium rate is provided by the actuarial table.

b. The insured share is your share as landlord, owner-operator, or tenant in the insured acreage at the time insurance attaches.

c. Unless otherwise authorized by the actuarial table, we will not insure any acreage intended for planting by you unless you have a valid crop insurance contract for the current crop year on the qualifying crop.

d. You must participate in the ASCS acreage reduction or set-aside program for the qualifying crop for the crop year on at least one farm which is part of the insured unit.

3. Report of acreage and share.

You must report on our form:

a. All the cultivated acreage of the qualifying crop intended for planting in the county in which you have a share; and

b. Your share at the time of reporting.

You must designate separately any acreage that is not insurable. This report must be submitted annually on or before the reporting date established by the actuarial table. All indemnities may be determined on the basis of information you submit on this report.

If you do not submit this report by the reporting date, we may elect to determine the insured acreage and share or we may deny liability on the unit. Any report submitted by you may be revised only upon our approval.

4. Amounts of insurance and coverage levels.

a. The amount of insurance per acre is computed by multiplying the yield guarantee for the qualifying crop times the price election chosen for the qualifying crop times .35.

b. The coverage level is the same as that chosen for the qualifying crop.

5. Annual premium.

a. The annual premium is earned and payable on the date insurance attaches. The amount is computed by multiplying the amount of insurance per acre times the premium rate, times the insured acreage, times your share on the date insurance attaches.

b. Interest will accure at the same rate and terms on any unpaid premium balance as applicable to the qualifying crop insurance contract.

6. Insurance period.

Insurance attaches or is considered to have attached 45 days prior to the sales closing date of the qualifying crop insurance contract for the crop year and ends at the earliest of:

a. Planting of the insured acreage to the qualifying crop or other no-conserving crop; or

b. The prevented planting date.

7. Notice of damage or loss.

a. If you fail to plant the guaranteed acreage and expect to claim an indemnity on the unit, you must give us notice in writing not later than 5 days after the prevented planting date.

b. We may reject any claim for indemnity if you fail to comply with any of the requirements of this section or section 8.

8. Claim for indemnity.

a. Any claim for indemnity on a unit must be submitted to us on our form at the time a claim is or should be filed for the qualifying crop.

b. We will not pay any indemnity unless you:

(1) Establish that any prevention of planting on the unit was directly caused by one or more of the insured causes during the insurance period for the crop year for which the indemnity is claimed;

(2) Establish that a production loss was sustained on the qualifying crop when the yield guarantee per acre of that crop is multiplied by the intended acres for planting; and

(3) Furnish all information we require concerning the loss.

c. The indemnity will be determined on the unit by:

(1) Multiplying the insured acreage times the amount of insurance;

(2) Subtracting therefrom the amount obtained by multiplying the planted acreage, plus any acreage intended for planting from which a forage crop is harvested, plus any acreage which could have been planted, times the amount of insurance;

(3) Multiplying this result by your share; and

(4) Subtracting therefrom your share of any production of the qualifying crop which is in excess of the total guaranteed production on all units of the qualifying crop, insured or eligible for insurance, in the county, multiplied by the selected price election.

9. Life of contract: cancellation and termination.

a. This contract will be in effect for the crop year specified on the application and may not be canceled by you for such crop year. This contract is for one year or until the termination date, whichever occurs first. It may be renewed for each succeeding crop year if you apply and report your intended acreage for planting at least 45 days prior to the sales closing date of the qualifying crop.

c. This contract will not be renewed by us if any amount due us on this or any other contract with you is not paid on or before the termination date preceding such crop year for the contract on which the amount is due.

d. The termination date is 30 days after the prevented planting date.

10. Contract changes.

We may change any terms and provisions of the contract from year to year. All contract changes will be available at your service office 30 days prior to the sales closing date for this insurance.

11. Meaning of terms

For the purposes of prevented planting crop insurance:

a. "Cultivated acreage intended for planting" means land that was ready or, except for insured causes, could have been made ready for planting, but does not include land:

(1) On which a perennial forage crop is being grown or on which the qualifying crop or other non-conserving crop was planted prior to the prevented planting acreage reporting date; or

(2) Which was not or would not have been planted to comply with any other United States Department of Agriculture or state programs or for any other reason.

b. "Insurable acreage" means the land classified as insurable by us for the qualifying crop and shown as such by the actuarial table.

c. "Non-conserving crop" means any annual crop planted for harvest as food, feed, or fiber.

d. "Planted acreage" means the insured acreage:

(1) Planted to any qualifying crop or non-conserving crop during the insurance period; or

(2) Which could have been planted during the insurance period to a qualifying crop or non-conserving crop normally included in your farming operation.

e. "Prevented planting date" means the latest date established by the crop actuarial tables that we will insure any spring-planted crop in the county, except tobacco. This date coincides with any extended date or final date offered under any late planting agreement option.

f. "Qualifying crop" means the ASCS program crop (wheat, corn, grain sorghum, barley, oats, cotton, or rice) which is also insured.

g. "Unit" means all insurable acreage in the county which you intend for planting to the qualifying crop prior to the prevented planting date for the crop year at the time insurance first attaches under this policy for the crop year. The unit will be determined when the acreage is reported. Errors in reporting such units may be corrected by us when adjusting a loss.

h. "Yield guarantee" means the result of multiplying your average yield for the qualifying crop, as determined by us, by the percentage representing the coverage level chosen by you.

Done in Washington, DC, on February 3, 1986.

Merritt W. Sprague,

Manager, Federal Crop Insurance Corporation.

7 CFR Parts 801 and 802

Official Performance and Procedural Requirements for Grain Weighing and Inspection Equipment and Related Grain Handling Systems

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: In compliance with the requirements for periodic review of existing regulations, the Federal Grain Inspection Service (FGIS or Service) is finalizing with slight modification as a final rule, a proposed rule in which certain changes were proposed to be made to the regulations under the United States Grain Standards Act (Act), as amended, concerning the Official Performance and Procedural Requirements for Grain Weighing and Inspection Equipment and Related Grain Handling Systems. This action amends the regulations by incorporating by reference the applicable requirements of National Bureau of Standards (NBS) Handbook 44, "Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices," 1985 edition (Handbook 44) and NBS Handbook 105–1, "Specifications and Tolerances for Field Standard Weights" (Handbook 105–1); clarifying the scope and format of the requirements of the current Parts 801 and 802; and revising the tolerances for scales, near-infrared reflectance (NIR) analyzers, and Kjeldahl analyses, so as to update the regulations to reflect current commercial standards. The changes will condense and reduce the text of the regulations and will simplify the overall language of the regulations to facilitate their use.

EFFECTIVE DATE: March 31, 1986. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of March 31, 1986.

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., Information Resources Staff, USDA, FGIS, Room 0667 South Building, 1400 Independence Avenue, SW., Washington, DC 20250, telephone (202) 382–1738.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This final rule has been issued in conformance with Executive Order 12291 and Departmental Regulation 1512–1. This action has been classified as nonmajor because it does not meet the criteria for a major regulation established in the Order.

Regulatory Flexibility Act Certification

Dr. Kenneth A. Gilles, Administrator, FGIS, has determined that this final rule will not have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act (5 U.C.S. 601 *et seq.*) because most users of the official inspection and weighing services and those entities that perform these services do not meet the requirements for small entities.

Final Action

Part 801 of the regulations, *Official Performance Requirements for Grain Inspection Equipment*, prescribes specifications, tolerances, and other technical requirements for official grain inspection equipment and related sample handling systems used in performing official services.

Part 802 of the regulations, *Official Performance and Procedural Requirements for Grain Weighing Equipment and Related Grain Handling Systems*, sets forth certain procedures, specifications, tolerances, and other technical requirements for grain weighing equipment and related grain handling systems used in performing Class X or Class Y weighing services.

The review of the regulations concerning Official Performance and Procedural Requirements for Grain Weighing and Inspection Equipment and Related Grain Handling Systems (7 CFR 801.1–801.12 and 7 CFR 802.0–802.13) included a determination of continued need for and consequences of the regulations. An objective of the review was to ensure that the regulations were serving their intended purpose, the language was clear, and the regulations were consistent with FGIS policy and authority. FGIS has determined that, in general, these regulations are serving their intended purpose, are consistent with FGIS policy and authority, and should remain in effect. The regulations, particularly Part 802, contained requirements that are also covered in NBS Handbooks 44 and 105–1 and in the FGIS Weighing Handbook. In order to condense and reduce the text of the regulations, thereby eliminating unnecessary duplication, FGIS is incorporating by reference the text of NBS Handbooks 44 and 105–1, with some exceptions. Additionally, certain information deleted from the regulations will continue to appear as provisions set forth in the FGIS Weighing Handbook. This will reduce the text of the regulations as appropriate, and simplify and facilitate the use of the regulations. In the July 22, 1985, Federal Register (50 FR 29869), FGIS proposed that certain sections of the regulations be revised. Except for some additional Handbook 44 requirements being incorporated by reference and other miscellaneous changes made for clarity and accuracy, the changes which appear in this final rule are the same as those proposed. This final rule revises these sections as follows:

1. Section 801.2, *Meaning of terms*, by removing the definition for balances because the tolerances for balances were removed from 7 CFR Part 801 so as to consolidate all the tolerances for balances in one Part of the regulations; renumbering the remaining definitions, as appropriate; revising the definition title *Master inspection equipment* to *National standard equipment* and the definition title *Grain divider* to *Divider* to more clearly describe the equipment; adding a definition for *Transfer standard* for clarity; and revising certain definitions by simplifying, clarifying, and removing unnecessary language to promote a better understanding of the requirements.

2. Section 801.3, *Tolerance for balances*, by removing the entire section because these tolerances are incorporated by reference in 7 CFR Part 802.

3. Sections 801.4, *Tolerances for barley pearlers*, 801.5, *Tolerances for dockage testers*, 801.6, *Tolerances for diverter-type mechanical samplers*, 801.7, *Tolerances for moisture meters*, 801.9, *Tolerances for sieve devices*, 801.10, *Tolerances for test weight apparatuses*, and 801.11, *Tolerances for dividers*, by consolidating the footnote references into the body of the text; clarifying the scope of the tolerances by stating, where appropriate, the type of grain and standard used to test the equipment; and redesignating §§ 801.4–801.7 and 801.9–801.11 as §§ 801.3–801.6 and 801.8–801.10, respectively. These revisions will facilitate the use of the regulations.

4. Section 801.7, *Tolerances for moisture meters*, by revising the tolerance title "FGIS/Master standard meters" to "Headquarters standard meters" to indicate more clearly that the National standard meter is the reference standard against which the Headquarters standard meters are tested. The tolerance title was proposed as "FGIS standard meters." In this final rule, the title has been changed to "Headquarters standard meters" to eliminate any confusion and for clarity.

5. Section 801.8, *Tolerances for near-infrared reflectance (NIR) analyzers and Kjeldahl analyses*, by revising for accuracy the tolerances for near-infrared reflectance (NIR) analyzers and Kjeldahl analyses and redesignating as § 801.7. The revised tolerances have been used on a trial basis since May 1982 to improve accuracy. All officially approved NIR analyzers and Kjeldahl laboratories have been tested using the revised tolerances and found to be capable of meeting these established tolerances. This action updates the regulations to reflect current commercial standards.

6. Section 801.10, *Tolerances for test weight apparatuses*, by revising the tolerance titles for the test weight apparatuses to clarify the manner in which these tolerances are to be applied to electronic test weight computer/scales.

7. Section 801.11, *Tolerances for dividers*, by combining the tolerances for dividers and restating the tolerance as a percentage instead of the present weight basis in order to simplify its use and clarify its application. The previous tolerances were only applicable to two-way dividers. In the last two years the Service approved several models of three- and four-way dividers using tolerances based upon a mathematical extrapolation of the previous two-way divider tolerances. The revised tolerances reflect these mathematical extrapolations.

8. Section 801.12, *Related design requirements*, by revising the related design requirements to simplify and clarify the language in order to facilitate their use and redesignating as § 801.11.

9. Sections 802.1, *Meaning of terms*, 802.2, *General requirements*, 802.3, *Design of indicating and recording elements and of recorded representations*, 802.4, *Design of balance, tare, dampening, and arresting mechanisms*, 802.5, *Design of weighing elements*, 802.6, *Design of weighbeams and poises*, 802.7, *Marking requirements*, 802.8, *Installation requirements*, 802.9, *User requirements*, 802.10, *Tolerances and sensitivity requirements*, 802.11, *Weight-indicating and weight-recording devices and representations*, 802.12, *Railroad track scales; additional requirements*, and 802.13, *Test standards and counterpoise weights*, by removing and incorporating by reference the requirements of the 1985 edition of NBS Handbooks 44 and 105–1, with the exception of those

Handbook 44 requirements which do not pertain to or are not practical for FGIS grain scales. As discussed below, comments were received which recommended that additional Handbook 44 provisions be incorporated by reference. This final rule will provide for incorporation by reference of additional portions of Handbook 44, as appropriate. Therefore, all of proposed §§ 802.1 and 802.2 will be removed. Those provisions of Handbook 44 that are not incorporated by reference are specified in § 802.0(b). Proposed § 802.3 is redesignated as § 802.1 by the final rule.

Since the FGIS regulations were approved in 1980, many of the Handbook 44 requirements have been revised and expanded to encompass the requirements necessary for official grain weight certification. FGIS has discussed adopting the applicable requirements of NBS handbook 44 with the FGIS Advisory Committee and grain industry organizations and determined that the requirements in the 1985 edition of Handbook 44 and 105–1, pertaining to the scales under the jurisdiction of FGIS, are substantially the same as the present FGIS regulations. Therefore, FGIS has determined that these regulations should be incorporated by reference into the Code of Federal Regulations in paragraph (a) of revised § 802.0.10. Sections 802.0, *Applicability*, and 802.13(g), *Qualified laboratories*, by simplifying, clarifying, condensing, and removing unnecessary language to facilitate the use of the regulations and redesignating § 802.13(g) as § 802.1. In addition, certain track scale requirements pertaining to obsolete equipment and the requirements for monitoring test weights during movement to and from storage were removed because they are no longer necessary or applicable.

Comments were to be submitted by September 20, 1985. Eighteen organizations, including State and private weights and measures organizations and grain trade groups, commented on the proposed changes to the regulations. Two of the organizations were in favor of the proposed regulations in their entirety. The other commenters were also in favor of the proposed regulations but recommended that additional Handbook 44 requirements and codes be incorporated by reference.

Fifteen commenters recommended that the requirements in Handbook 44 that pertain to grain scales be adopted in their entirety. As proposed, certain requirements of Handbook 44 would not be incorporated by reference. These proposed exceptions related to Handbook 44 requirements that did not pertain to grain scales or were different from FGIS requirements under the Act which generally are more stringent for FGIS program purposes than NBS Handbook 44; e.g., grain hopper scale tolerances, vehicle and trade scale class requirements, and minimum test weight requirements for vehicle and trade scales. Under the proposal, these tolerances and minimum weight requirements would continue to appear in Part 802, as revised.

The comments received on the proposed rule indicated that a number of grain industry trade groups and weights and measures organizations strongly supported adoption of the additional Handbook 44 requirements. In view of the above, FGIS has determined that incorporation by reference of the additional provisions of Handbook 44, specified below, will maintain program integrity even though certain tolerances will become less stringent. This revision will further simplify and facilitate use of the regulations. Nonetheless, those provisions of Handbook 44 that do not pertain to or are not practical for FGIS grain scales are not incorporated by reference. Accordingly, Part 802 has been revised to reflect the incorporation by reference of the Handbook 44 requirements in the notice of proposed rulemaking and these additional Handbook 44 requirements: Scale Code (2.20) sections N.2, N.2.1, T.2.10, T.3.7, T.3.7.1, T.3.8.1–2, and UR.1.1.7; and New Scale Code (2.20) sections N.3, N.3.1, and T.1.3. Incorporation of these additional requirements will revise FGIS requirements in the following manner:

1. The minimum test weight requirement for all scales with a capacity greater than 40,000 pounds, except railway track scales and automatic bulk weighing systems, shall be 12.5 percent of capacity or 10,000 pounds whichever is greater; a change from 10.0 percent of capacity.

2. The minimum test weight requirement for railway track scales shall be 30,000 pounds; a change from 50,000 pounds.

3. The minimum tolerance for railway track scales shall be 30 pounds; a change from 25 pounds.

4. The basic tolerance for vehicle scales shall be that tolerance established for Class IIIL scales; a change from a maintenance tolerance of 0.1 percent and an acceptance tolerance of 0.05 percent.

5. The basic maintenance tolerance for nonautomatic hopper scales, installed prior to January 1, 1986, and all automatic bulk weighing systems, shall be 0.1 percent of applied test load; a change from 0.05 percent.

6. The basic tolerance for railway track scales shall be that tolerance established for Class IIIL scales; a change from a maintenance tolerance of 0.1 percent and an acceptance tolerance of 0.05 percent.

7. For railway track scales, the value of the scale division shall be not greater than 20 pounds for nonautomatic indicating scales and not greater than 100 pounds for automatic indicating scales; a change from 50 pounds for both types.

As a result of the aforementioned changes, the Service is incorporating by reference the General Code, the Scale Codes, the Automatic Bulk Weighing Systems Code, and the Weights Code of the 1985 edition of Handbook 44 in their entirety with the exception of those requirements concerning coupled-in-motion weighing and influence factors. The coupled-in-motion requirements (Scale Code (2.20) sections N.2.1.1, T.3.8.3, and T.3.8.4, and New Scale Code (2.20) sections N.3.1.1, T.1.9, T.N.3.6, and T.N.3.6.1–4) were not adopted because the relative inaccuracy of this type of weighing at this time. The influence factor requirements (New Scale Code (2.20) section T.N.8) were not adopted because NBS has determined that it is not feasible to implement these requirements prior to January 1, 1988.

Two commenters also recommended that the Service adopt the Handbook 44 requirements for moisture meters. The Handbook 44 requirements for moisture meters are not feasible for testing the number and type of moisture meters used for official inspection purposes. In addition, adoption of Handbook 44 requirements for moisture meters would significantly raise program costs for this type activity.

Miscellaneous nonsubstantive changes are made to provisions of Parts 801 and 802 in this final rule for clarity and accuracy. For example, a subparagraph (b) has been added to section 802.1, *Qualified laboratories*, to specifically reference type evaluation laboratories. Section 802.0(a) is rewritten to clarify that portion of Handbook 44 and all of Handbook 105–1 are incorporated by reference. While the FGIS Weighing Handbook is applicable to all scales used for official grain weight and certification, it is not incorporated by reference. In addition, this final rule changes for accuracy, section 801.6(a), as proposed, by deleting tolerances for sample exchanges and section 801.8, as proposed, by changing the reference for

VOL 51 ISS 40 FE 28 1986 UMI

a sieve description from ⁵⁄₆₄ x ¾ inch slotted to 5.⁵⁄₆₄ x ¾ inch slotted.

Administrative practice and procedure, Export, Grain, Incorporation by reference.

Accordingly, 7 CFR Parts 801 and 802 are revised as follows:

PART 801—OFFICIAL PERFORMANCE REQUIREMENTS FOR GRAIN INSPECTION EQUIPMENT

Sec.
801.1 Applicability.
801.2 Meaning of terms.
801.3 Tolerances for barley pearlers.
801.4 Tolerances for dockage testers.
801.5 Tolerances for diverter-type mechanical samplers.
801.6 Tolerances for moisture meters.
801.7 Tolerances for near-infrared reflectance (NIR) analyzers and Kjeldahl analyses.
801.8 Tolerances for sieves.
901.9 Tolerances for test weight apparatuses.
801.10 Tolerances for dividers.
801.11 Related design requirements.

Authority: Pub. L. 94-582, 90 Stat. 2867, as amended, (7 U.S.C. 71 *et seq.*)

§ 801.1 Applicability.

The requirements set forth in this Part 801 describe certain specifications, tolerances, and other technical requirements for official grain inspection equipment and related sample handling systems used in performing inspection services under the Act.

§ 801.2 Meaning of terms.

(a) *Construction.* Words used in the singular form in this part shall be considered to imply the plural and vice versa, as appropriate.

(b) *Definitions.* The definitions of terms listed in the Part 800 shall have the same meaning when the terms are used in this Part 801. For the purposes of this part, the following terms shall have the meanings given for them below.

(1) *Avoirdupois weight.* A unit of weight based on a pound of 16 ounces.

(2) *Barley pearler.* An approved laboratory device used to mechanically dehull kernels of barley or other grain.

(3) *Deviation from standard.* In testing inspection equipment for accuracy, the variation between (i) the individual test result from the equipment that is being tested and (ii) the reference standard or the individual test result from the standard (or National standard) equipment, as applicable.

(4) *Direct comparison method.* An equipment testing procedure wherein transfer standards are tested at the same time and place to compare the performance of two or more units of the same inpsection equipment. One unit of the equipment used in the test shall be standard inspection equipment. (See also sample exchange method).

(5) *Diverter-type mechanical sampler (primary).* An approved device used to obtain representative portions from a flowing stream of grain.

(6) *Diverter-type mechanical sampler (secondary).* An approved device used to subdivide the portions of grain obtained with a diverter-type mechanical sampler (primary).

(7) *Divider.* An approved laboratory device used to mechanically divide a sample of grain into two or more representative portions.

(8) *Dockage tester.* An approved laboratory device used to mechanically separate dockage and/or foreign material from grain.

(9) *Maintenance tolerance.* An allowance established for use in determining whether inspection equipment should be approved for use in performing official inspection services.

(10) *Mean deviation from standard.* In testing inspection equipment for accuracy, the variation between (i) the average fo the test results from the equipment that is being tested and (ii) the reference standard or the average of the test results from the standard (or National standard) equipment, as applicable.

(11) *Metric weight.* A unit of weight based on the kilogram of 1,000 grams.

(12) *Moisture meter.* An approved laboratory device used to indicate directly or through conversion and/or correction tables the moisture content of grain including cereal grains and oil seeds.

(13) *National standard inspection equipment.* A designated approved unit of inspection equipment used as the reference in determining the accuracy of standard inspection equipment.

(14) *Official inspection equipment.* Equipment approved by the Service and used in performing official inspection services.

(15) *Sample exchange method.* An equipment testing procedure wherein transfer standards are tested to compare the performance of two or more units of the same inspection equipment installed at different locations. One unit of the equipment used in the test shall be standard inspection equipment. (See also direct comparison method.)

(16) *Sieves.* Approved laboratory devices with perforations for use in separating particles of various sizes.

(17) *Standard inspection equipment.* An approved unit of inspection equipment that is designated by the Service for use in determining the accuracy of official inspection equipment.

(18) *Test weight.* The avoirdupois weight of the grain or other material in a level-full Winchester bushel.

(19) *Test weight apparatus.* An approved laboratory device used to measure the test weight (density) of a sample of grain.

(20) *Transfer standard.* The medium (device or material) by which traceability is transferred from one inspection equipment standard unit to another unit.

(21) *Winchester bushel.* A container that has a capacity of 2,150.42 cubic inches (32 dry quarts).

§ 801.3 Tolerances for barley pearlers.

The maintenance tolerances for barley pearlers used in performing official inspection services shall be:

Item	Tolerance
Timer switch:	
0 to 60 seconds	±5 seconds, deviation from standard clock.
61 to 90 seconds	±7 seconds, deviation from standard clock.
Over 90 seconds	±10 seconds, deviation from standard clock.
Pearled portion	±1.0 gram, mean deviation from standard barley pearler using barley.

§ 801.4 Tolerances for dockage testers.

The maintenance tolerances for dockage testers used in performing official inspection services shall be:

Item	Tolerance
Air separation	±0.10 percent, mean deviation from standard dockage tester using Hard Red Winter wheat.
Riddle separation	±0.10 percent, mean deviation from standard dockage tester using Hard Red Winter wheat.
Sieve separation	±0.10 percent, mean deviation from standard dockage tester using Hard Red Winter wheat.
Total dockage separation.	±0.15 percent, mean deviation from standard dockage tester using Hard Red Winter wheat.

§ 801.5 Tolerance for diverter-type mechanical samplers.

The maintenance tolerance for diverter-type mechanical samplers (primary, or primary and secondary in combination) used in performing official inspection services shall be ±10 percent, mean deviation from standard sampling device using corn or the same type of grain that the system will be used to sample.

§ 801.6 Tolerances for moisture meters.

The maintenance tolerances for moisture meters used in performing official inspection services shall be:

(a) Headquarters standard meters.

Moisture range	Tolerance	
	Direct comparison	Sample exchange
Low	±0.05 percent moisture, mean deviation from National standard moisture meter using Hard Red Winter wheat.	
Mid	±0.05 percent moisture, mean deviation from National standard moisture meter using Hard Red Winter wheat.	
High	±0.05 percent moisture, mean deviation from National standard moisture meter using Hard Red Winter wheat.	

(b) All other than Headquarters standard meters.

Moisture range	Tolerance	
	Direct comparison	Sample exchange
Low	±0.15 percent moisture, mean deviation from standard moisture meter using Hard Red Winter wheat.	±0.20 percent moisture, mean deviation from standard moisture meter using Hard Red Winter wheat.
Mid	±0.10 percent moisture, mean deviation from standard moisture meter using Hard Red Winter wheat.	±0.15 percent moisture, mean deviation from standard moisture meter using Hard Red Winter wheat.
High	±0.15 percent moisture, mean deviation from standard moisture meter using Hard Red Winter wheat.	±0.20 percent moisture, mean deviation from standard moisture meter using Hard Red Winter wheat.

§ 801.7 Tolerances for near-infrared reflectance (NIR) analyzers and Kjeldahl analyses.

(a) *NIR.* The maintenance tolerance for NIR analyzers used in performing official inspection services shall be ±0.15 percent, mean deviation from standard Kjeldahl using wheat.

(b) *Kjeldahl.* The maintenance tolerance for Kjeldahl analyses used in performing official inspection services shall be ±0.15 percent, standard deviation.

§ 801.8 Tolerances for sieves.

The maintenance tolerances for sieves used in performing official inspection services shall be:

(a) Thickness of metal: ±0.0015 inch.

(b) Accuracy of perforation: ±0.001 inch from design specification.

(c) Sieving accuracy:

Sieve description	Tolerance	
	Direct comparison	Sample exchange
.064 x ⅜ inch oblong	±0.2 percent, mean deviation from standard sieve using wheat.	±0.3 percent, mean deviation from standard sieve using wheat.
⁵⁄₆₄ x ¾ inch slotted	±0.3 percent, mean deviation from standard sieve using barley.	±0.5 percent, mean deviation from standard sieve using barley.
5.⁵⁄₆₄ x ¾ inch slotted	±0.5 percent, mean deviation from standard sieve using barley.	±0.7 percent, mean deviation from standard sieve using barley.
⁶⁄₆₄ x ¾ inch slotted	±0.7 percent, mean deviation from standard sieve using barley.	±1.0 percent, mean deviation from standard sieve using barley.

§ 801.9 Tolerances for test weight apparatuses.

The maintenance tolerances for test weight per bushel apparatuses used in performing official inspection services shall be:

Item	Tolerance
Beam/scale accuracy	±0.10 pound per bushel deviation at any reading, using test weights.
Overall accuracy	±0.15 pound per bushel, mean deviation from standard test weight apparatus using wheat.

§ 801.10 Tolerance for dividers.

The maintenance tolerance for dividers used in performing official inspection services shall be ±1.0 percent, mean deviation from target value using wheat.

§ 801.11 Related design requirements.

(a) *Suitability.* The design, construction, and location of official sampling and inspection equipment and related sample handling systems shall be suitable for the official sampling and inspection activities for which the equipment is to be used.

(b) *Durability.* The design, construction, and material used in official sampling and inspection equipment and related sample handling systems shall assure that, under normal operating conditions, operating parts will remain fully operable, adjustments will remain reasonably constant, and accuracy will be maintained between equipment test periods.

(c) *Marking and identification.* Official sampling and inspection equipment for which tolerances have been established shall be permanently marked to show the manufacturer's name, initials, or trademark; the serial number of the equipment; and the model, the type, and the design or pattern of the equipment. Operational controls for mechanical samplers and related sample handling systems, including but not limited to pushbuttons and switches, shall be conspicuously identified as to the equipment or activity controlled by the pushbutton or switch.

(d) *Repeatability.* Official inspection equipment when tested in accordance with §§ 800.217 and 800.219 shall, within the tolerances prescribed in §§ 801.3 through 801.10, be capable of repeating its results when the equipment is operated in its normal manner.

(e) *Security.* Mechanical samplers and related sample handling systems shall provide a ready means of sealing to deter unauthorized adjustments, removal, or changing of component parts or timing sequence without removing or breaking the seals; and otherwise be designed, constructed, and installed in a manner to prevent deception by any person.

(f) *Installation requirements.* Official sampling and inspection equipment and related sample handling systems shall be installed (1) at a site approved by the Service, (2) according to the manufacturer's instructions, and (3) in such a manner that neither the operation nor the performance of the equipment or system will be adversely affected by the foundation, supports, or any other characteristic of the installation.

VOL 51 ISS 40 FE 28 1986 UMI

PART 802—OFFICIAL PERFORMANCE AND PROCEDURAL REQUIREMENTS FOR GRAIN WEIGHING EQUIPMENT AND RELATED GRAIN HANDLING SYSTEMS

Sec.
802.0 Applicability.
802.1 Qualified laboratories.

Authority: Pub. L. 94–582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

§ 802.0 Applicability.

(a) The requirements set forth in this Part 802 describe certain specifications, tolerances, and other technical requirements for grain weighing equipment and related grain handling systems used in performing Class X or Class Y weighing services and inspection services under the Act. All scales used for official grain weight and inspection certification shall meet applicable requirements contained in the FGIS Weighing Handbook; the General Code, the Scale Codes, the Automatic Bulk Weighing Systems Code, and the Weights Code of the 1985 edition of National Bureau of Standards' (NBS) Handbook 44, "Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices" (Handbook 44); and NBS Handbook 105–1, "Specifications and Tolerances for Field Standard Weights" (Handbook 105–1). Pursuant to the provisions of 5 U.S.C. 552(a), with the exception of the Handbook 44 requirements listed in paragraph (b), the materials in Handbooks 44 and 105–1 are incorporated by reference as they exist on the date of approval and a notice of any change in these materials will be published in the **Federal Register**. The NBS Handbooks are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20403. These are also available for inspection at the Office of the Federal Register, Room 8401, 1100 "L" Street, N.W., Washington, D.C.

(b) The following Handbook 44 requirements are not incorporated by reference:

Scales Code (2.20)
  N.2.1.1—For coupled-in-motion tests.
  T.3.8.3—Weighing coupled-in-motion used for individual car weights.
  T.3.8.4—Weighing coupled-in-motion used for unit train weights.
New Scales Code (2.20)
  N.3.1.1—Test train.
  T.1.9—Railway track scales weighing in motion.
  T.N.3.6—In motion weighing.
  T.N.3.6.1–4—In motion weighing.
  T.N.8—Influence factors.

§ 802.1 Qualified laboratories.

(a) *Metrology laboratories.* (1) Any State metrology laboratory currently approved by the NBS ongoing certification program having auditing capability is automatically approved by the Service.

(2) Any county or city weights and measures jurisdiction approved by NBS or by their respective NBS-Certified State laboratory as being equipped with appropriate traceable standards and trained staff to provide valid calibration is approved by the Service. The State approval may be documented by a certificate or letter. The jurisdiction must be equipped to provide suitable certification documentation.

(3) Any commercial industrial laboratory primarily involved in the business of sealing and calibrating test weights (standards) will be approved by the Service provided:

(i) It requests written authority to perform tolerance testing of weights used within the Service's program(s) through their approved State jurisdiction. Copies of its request and written reference regarding the State decision shall be provided to the Service. A positive decision by the State will be required as a prerequisite to the Service's granting approval to any commercial laboratory to tolerance test the weights used in testing scales under the jurisdiction of the Service;

(ii) It has NBS traceable standards (through the State) and trained staff to perform calibrations in a manner prescribed by NBS and/or the State;

(iii) It is equipped to provide suitable certification documentation;

(iv) It permits the Service to make onsite visits to laboratory testing space.

(4) Approval of the commercial industrial laboratory will be at the Service's discretion. Once it has obtained approval, the commercial industrial laboratory maintains its site in a manner prescribed by the State and the Service.

(b) *Type evaluation laboratories.* Any State measurement laboratory currently certified by NBS in accordance with its program for the Certification of Capability of State Measurement Laboratories to conduct evaluations under the National Type Evaluation Program is approved by the Service.

Dated: February 12, 1986.

Kenneth A. Gilles,
Administrator.

BILLING CODE 3410-EN-M

Agricultural Marketing Service

7 CFR Parts 905 and 913

Oranges, Grapefruit, Tangerines, and Tangelos Grown in Florida; and Grapefruit Grown in the Interior District in Florida; Redistricting and Reapportionment of Grower Members

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule redefines grower districts and reapportions grower members on the Citrus Administrative Committee (CAC) and the Interior Grapefruit Marketing Committee (IGMC) under Marketing Order Nos. 905 and 913, respectively. The rule is based on changes in the average percentage of acreage, production, and shipments of regulated fruits during the preceding five-year period (1980–1985). The changes were recommended at meetings of the CAC and IGMC held on February 4, 1986.

EFFECTIVE DATE: February 28, 1986.

FOR FURTHER INFORMATION CONTACT: George J. Kelhart, Acting Chief, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250. Telephone: (202) 475–3919.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum No. 1512–1 and Executive Order 12291, and has been designated a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that these actions will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities for their own behalf. Thus, both statutes have small entity orientation and compatibility.

It is estimated that approximately 95 handlers of citrus under the Marketing Order for Oranges, Grapefruit, Tangerines, and Tangelos Grown in Florida, and approximately 57 handlers of grapefruit under the Marketing Order for Grapefruit Grown in the Interior District in Florida will be subject to regulations during the course of the current season and that the great majority of these groups may be classified as small entities. While regulations issued under these orders impose some costs on affected handlers and the number of such firms may be substantial, the added burden imposed on small entities, if present at all, is not significant.

It is found that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** (5 U.S.C. 553). Pursuant to §§ 905.14 and 913.14 of the subject Marketing Orders, any redistricting and reapportionment must be announced on or before March 1 of the then current fiscal period. This deadline cannot be met with an effective date 30 days after publication.

Notice of these actions was published in the **Federal Register** on February 13, 1986 (51 FR 5361). Interested persons were invited to submit written comments by February 24, 1986. No comments were received.

Section 905.13 of the order covering Florida oranges, grapefruit, tangerines and tangelos defines five citrus districts comprising the production area for purposes of grower representation on the CAC. The apportionment of grower members for each citrus district is described in § 905.23. Currently, each district is represented by two grower members and alternates except Citrus District Two, which has one grower member and alternate, for a total of nine grower members on the CAC.

Section 905.14 of the order authorizes the CAC, with the approval of the Secretary, to redefine the districts into which the production area is divided or reapportion or otherwise change the grower membership of the districts, or both. The membership of the CAC must consist of at least eight but not more than nine grower members. The number of members from each district and the grouping of the districts are based, insofar as practicable, upon the respective averages for the immediately preceding five fiscal periods of: (1) The volume of fruit shipped from each district; (2) the volume of fruit produced in each district; and (3) the total number of acres of citrus in each district.

During the five year period (1980–85), the combined average percentages for Marketing Order 905 are as follows: Citrus District One, 16.54 percent; Citrus District Two, 8.36 percent; Citrus District Three, 30.59 percent, Citrus District Four, 23.39 percent; and Citrus District Five, 21.12 percent. The average percent of Citrus District Two shows a decrease in acreage, production, and shipments for the five-year period. This final rule will: (1) Combine Citrus Districts One and Two to become Citrus District One with two grower members and alternates; (2) change Citrus District Five to Citrus District Two with two grower members and alternates; (3) change Citrus District Four to Citrus District Three with two grower members and alternates; and (4) change Citrus District Three to Citrus District Four with three grower members and alternates. The action will result in more proportionate averages as follows: Citrus District One, 24.90 percent; Citrus District Two, 21.12 percent, Citrus District Three, 23.39 percent; and Citrus District Four, 30.59 percent.

For Florida Interior District grapefruit, § 913.13 of the order defines four grower districts for purposes of grower representation on the IGMC. The apportionment of grower members for each grower district is described in § 913.16 of the order. Currently, Grower Districts Two and Three are each represented by one grower member and alternate; Grower District One has two grower members and alternates; and Grower District Four has three grower members and alternates for a total of seven grower members on the IGMC.

Section 913.14 authorizes the IGMC, with the approval of the Secretary, to redefine the districts into which the production area is divided or reapportion or otherwise change the grower membership of the districts, or both. The membership of the IGMC must consist of at least six but not more than seven grower members. The redistricting of grower districts and the reapportionment of grower members are based on the same criteria as contained in § 905.14 for Florida citrus.

The combined average percentages for M.O. 913 during the 1980–85 five-year period are: Grower District One, 21.09 percent; Grower District Two, 7.74 percent; Grower District Three, 26.48 percent; and Grower District Four, 44.69 percent. This final rule will: (1) Combine Grower Districts One and Two to become Grower District One with two grower members and alternates; (2) change Grower District Four to Grower District Two with three grower members and alternates; and (3) change the representation from one grower member and alternate to two grower members and alternates in Grower District Three. This action will result in the following average percentages: Grower District One, 28.83 percent; Grower District Two, 44.69 percent; and Grower District Three, 26.48 percent.

After consideration of all relevant matter presented, the information and recommendations submitted by the CAC and IGMC, and other available information, it is further found that the redistricting of districts and reapportionment of grower members under §§ 905.14 and 913.14, as hereinafter set forth, will tend to effectuate the declared policy of the act.

List of Subjects in 7 CFR Parts 905 and 913

Marketing Agreements and Orders, Oranges, Grapefruit, Interior District, Tangerines, Tangelos, and Florida.

1. The authority citation for 7 CFR Parts 905 and 913 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

PART 905—[AMENDED]

2. A new § 905.114 is added to Subpart—Rules and Regulations (7 CFR §§ 905.120—905.152) to read as follows:

§ 905.114 Redistricting of citrus districts and reapportionment of grower members.

Pursuant to § 905.14, the citrus districts and membership allotted each district shall be as follows:

(a) "Citrus District One" shall include the Counties of Hillsborough, Pinellas, Pasco, Hernando, Citrus, Sumter, Lake, Osceola, Orange, Seminole, Alachua, Putnam, St. Johns, Flagler, Marion, Levy, Duval, Nassau, Baker, Union, Bradford, Columbia, Clay, Gilchrist, and Suwannee, and County Commissioner's Districts One, Two, and Three of Volusia County, and that part of the Counties of Indian River and Brevard not included in Regulation Area II. This district shall have two grower members and alternates.

(b) "Citrus District Two" shall include the County of Polk. This district shall have two grower members and alternates.

(c) "Citrus District Three" shall include the Counties of Manatee, Sarasota, Hardee, Highlands, Okeechobee, Glades, De Soto, Charlotte, Lee, Hendry, Collier, Monroe, Dade, Broward, and that part of the Counties of Palm Beach and Martin not included in Regulation Area II. This district shall have two grower members and alternates.

(d) "Citrus District Four" shall include the County of St. Lucie and that part of the Counties of Brevard, Indian River, Martin, and Palm Beach described as lying within Regulation Area II, and County Commissioner's Districts Four and Five of Volusia County. This district shall have three grower members and alternates.

PART 913—[AMENDED]

3. A new § 913.114 is added to Subpart—Rules and Regulations (7 CFR §§ 913.120–913.166) to read as follows:

§ 913.114 Redistricting of grower districts and reapportionment of grower members.

Pursuant to § 913.14, the grower districts and membership allotted each district shall be as follows:

(a) "Grower District One" shall include the Counties of Hillsborough, Pinellas, Pasco, Hernando, Citrus, Sumter, Lake, Osceola, Orange, Seminole, Alachua, Putnam, St. Johns, Flagler, Marion, Levy, Duval, Nassau, Baker, Union, Bradford, Columbia, Clay, Gilchrist, and Suwanee, and County Commissioner's Districts 1, 2, and 3 of Volusia County, and that part of the Counties of Indian River and Brevard which is included in the Interior District. This district shall have two grower members and alternates.

(b) "Grower District Two" shall include the County of Polk. This district shall have three grower members and alternates.

(c) "Grower District Three" shall include the Counties of Manatee, Sarasota, Hardee, Highlands, Okeechobee, Glades, De Soto, Charlotte, Lee, Hendry, Collier, Monroe, Dade, Broward, and the parts of the Counties of Palm Beach and Martin which are included in the Interior District. This district shall have two grower members and alternates.

Dated: February 26, 1986.

Thomas R. Clark,

Deputy Director, Fruit and Vegetable Division.

7 CFR Parts 979 and 987

Expenses and Assessment Rates for Specified Marketing Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule authorizes expenditures and establishes assessment rates under Marketing Orders 979 and 987 for the 1985–86 fiscal period. Funds to administer these programs are derived from assessments on handlers.

EFFECTIVE DATES: October 1, 1985—September 30, 1986 (§§ 979.208, and 987.330).

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Acting Chief, Marketing Order Administration Branch, F&V Division, AMS, USDA, Washington, D.C. 20250 (202) 447-5552.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Secretary's Memorandum No. 1512-1 and Executive Order 12291 and has been designated a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has certified that these actions will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities for their own behalf. Thus both statutes have small entity orientation and compatibility.

The rule authorizes expenditures and establishes assessment rates under Marketing Orders 979 and 987 for the 1985–86 fiscal period.

The assessment rates prescribed herein represent only a small fraction of the crop values of the specified commodities. It is estimated that approximately 35 handlers of Texas melons and 26 handlers of California dates are currently subject to regulation under marketing orders each season, and the great majority of this group may be classified as small entities. While regulations issued under these orders impose some costs on affected handlers and the number of such firms may be substantial, the added burden on small entities, if present at all, is not significant.

These marketing orders are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). These actions are based upon the recommendations and information submitted by each committee established under the respective marketing orders, and upon other information. It is found that the expenses and rates of assessment, as hereinafter provided, will tend to effectuate the declared policy of the act.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice and engage in public rulemaking and good cause exists for not postponing the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553). Each order requires that the rate of assessment for a particular fiscal period shall apply to all assessable fruits and vegetables handled from the beginning of such period. To enable the committee to meet current fiscal obligations, approval of the expenses is necessary without delay. It is necessary to effectuate the declared policy of the act to make these provisions effective as specified and handlers have been apprised of such provisions, and the effective time.

List of Subjects in 7 CFR 979 and 987

Marketing agreements and orders; Melons, Dates, Texas, and California.

1. The authority citation for 7 CFR Parts 979 and 987 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Therefore, §§ 979.207 and 987.329 are removed and new §§ 979.208 and 987.330 are added to read as follows: (The followng sections prescribed expenses and assessment rates and will not be published in the Code of Federal Regulations.)

PART 979—MELONS GROWN IN SOUTH TEXAS

§ 979.208 Expenses and assessment rate.

Expenses of $195,519 by the South Texas Melon Committee are authorized, and an assessment rate of $0.015 per carton of melons is established for the fiscal period ending September 30, 1986. In accordance with the provisions of § 979.42, late payment charges of one and one-half percent per month shall be charged on the unpaid balance for each past due account. An account is past due 30 days after the billing date. Unexpended funds may be carried over as a reserve.

PART 987—DOMESTIC DATES PRODUCED OR PACKED IN RIVERSIDE COUNTY, CALIFORNIA

§ 987.330 Expenses and assessment rate.

Expenses of $26,050 by the California Date Administrative Committee are authorized, and an assessment rate payable by each handler in accordance with § 987.72 of 8 cents per hundredweight of assessable dates is established for the crop year ending September 30, 1986. Any unexpended funds from that crop may be used temporarily during the first four months of the ensuing crop year, and thereafter shall be credited or refunded to the handler from whom collected.

Dated: February 21, 1986.

Thomas R. Clark,

Acting Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 86-013]

Specifically Approved States Authorized To Receive Mares and Stallions Imported From CEM-Affected Countries

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: This document affirms the interim rule which amended the regulations by adding Wisconsin to the lists of approved States authorized to receive certain mares and stallions imported into the United States from countries affected with contagious equine metritis (CEM). This action is taken because the Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service, has determined that Wisconsin has laws or regulations in effect to require the additional inspection, treatment, and testing of such horses to further ensure their freedom from CEM as required by the regulations. The amendments are necessary in order to avoid the imposition of unnecessary restrictions on importers of mares and stallions from countries affected with CEM.

EFFECTIVE DATE: February 28, 1986.

FOR FURTHER INFORMATION CONTACT: Dr. Allan A. Furr, Import-Export Animals and Products Staff, VS, APHIS, USDA, Room 846, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8170.

SUPPLEMENTARY INFORMATION:

Background

Section 92.2(i) of the regulations in 9 CFR Part 92, among other things, authorizes the importation of certain horses (mares and stallions over 731 days of age) into the United States from countries affected with contagious equine metritis (CEM) when specific requirements to prevent their introducing CEM into the United States are met, and the animals imported are moved into approved States for further inspection, treatment, and testing.

A document published in the **Federal Register** on November 29, 1985 (50 FR 49028–49029), set forth an interim rule amending § 92.4 of the regulations by adding Wisconsin to the lists of approved States authorized to receive these mares and stallions. The addition of Wisconsin to the lists was based on the findings that it meets certain minimum standards concerning treatment, testing, and handling procedures for these mares and stallions.

The interim rule was made effective upon publication. Comments were solicited for 60 days after publication of the amendments. No comments were received. The factual situation which was set forth in the document of November 29, 1985, still provides a basis for the amendments.

Executive Order 12291 and Regulatory Flexibility Act

This rule is issued in conformance with Executive Order 12291 and has been determined to be not a major rule. Based on information compiled by the Department, it has been determined that this rule will not have a significant effect on the economy; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

It is anticipated that fewer than 20 mares and stallions from countries affected with CEM will be imported into the State of Wisconsin annually. This compares with approximately 3,340 such animals imported into the entire United States during Fiscal Year 1984 and with approximately 36,000 horses of all classes imported into the United States during the same period.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. (See 7 CFR Part 3015, Subpart V).

List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Transportation, Wildlife.

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

Accordingly, the interim rule amending 9 CFR Part 92 which was published at 50 FR 49028–49029 on November 29, 1985, is adopted as a final rule.

Authority: 7 U.S.C. 1622; 19 U.S.C. 1306; 21 U.S.C. 102–105, 111, 134a, 134b, 134c, 134d, 134f, and 135; 7 CFR 2.17, 2.51, and 371.2(d).

Done at Washington, DC, this 25th day of February 1986.

J.K. Atwell,

Deputy Administrator, Veterinary Services.

BILLING CODE 3410-34-M

FEDERAL RESERVE SYSTEM

12 CFR Part 265

[Docket No. R-0566]

Rules Regarding Delegation of Authority

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board is amending 12 CFR Part 265, its Rules Regarding Delegation of Authority, to delegate authority to permit foreign subsidiaries of U.S. banking organizations to hold shares of U.S. affiliates as part of internal reorganizations. The delegation is intended to expedite processing of applications that raise no substantial issues.

EFFECTIVE DATE: February 21, 1986.

FOR FURTHER INFORMATION CONTACT: James Keller, Manager, International Banking Applications, Division of Banking Supervision and Regulation (202/452-2523); or Kathleen M. O'Day, Senior Counsel, Legal Division (202/452-3786); Board of Governors of the Federal Reserve System, Washington, DC 20551.

SUPPLEMENTARY INFORMATION: Section 4(c)(13) of the Bank Holding Company Act (12 U.S.C. 1843(c)(13)) permits a U.S. banking organization to invest in a

VOL 51
ISS 40
FE 28
1986
UMI

foreign company that does not do business in the United States except as an incident to its foreign business. As a general matter, this does not permit a foreign subsidiary of a U.S. banking organization to hold shares of U.S. companies. The Board, however, has permitted a foreign subsidiary to hold shares of a U.S. affiliate where the investment in the shares is part of an internal reorganization or transfer of funds from outside the United States to the U.S. affiliate and may be viewed as a provision of services to the parent by the foreign subsidiary. The Board is amending its delegation rules to authorize the Director of the Division of Banking Supervision and Regulation in consultation with the General Counsel, to permit such a foreign subsidiary of a U.S. banking organization to hold shares in a U.S. affiliate in such circumstances, *i.e.*, as part of an internal reorganization or transfer of funds.

The provisions of 5 U.S.C. 553 relating to notice, public participation and deferred effective date are not followed in connection with the adoption of this amendment because the changes involved are procedural in nature and do not constitute substantive rules subject to the requirement of that section.

Pursuant to section 605(b) of the Regulatory Flexibility Act (Pub. L. 96-354; 5 U.S.C. 601 *et. seq.*), the Board of Governors of the Federal Reserve System certifies that the amendment adopted will not have a significant economic impact on a substantial number of small entities that would be subject to the regulation.

List of Subjects in 12 CFR Part 265

Authority delegations [Government agencies], Banks, Banking, Federal Reserve System.

PART 265—[AMENDED]

12 CFR Part 265 is amended as follows:

1. The authority citation for Part 265 continues to read as follows:

Authority: Sec. 11, 38 Stat. 261; 12 U.S.C. 248.

2. 12 CFR Part 265 is amended by adding a new paragraph § 265.2(c)(34) to read as follows:

§ 265.2 Specific functions delegated to Board employees and to Federal Reserve Banks.

(c) * * *

(34) Under the provisions of Subpart A of part 211 of this chapter (Regulation K) and after consultation with the General Counsel, to permit a foreign subsidiary of a bank holding company to invest in shares of a U.S. affiliate of the banking holding company where the investment is made as part of an internal corporate reorganization or an internal transfer of funds, subject to such conditions and terms as the Director and the General Counsel deem appropriate and consistent with the purposes of Regulation K.

By order of the Board of Governors, February 21, 1986.

William W. Wiles,

Secretary of the Board.

[FR Doc. 86-4308 Filed 2-27-86; 8:45 am]

BILLING CODE 6210-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 85-NM-64-AD; Amdt. 39-5243]

Airworthiness Directives, Fokker B.V. Model F28 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that requires repetitive inspections, and repair, if necessary, of the center wing rear spar end fittings on certain Fokker Model F28 series airplanes. Several cases of cracked fittings due to stress corrosion were found during inspection by the manufacturer. Uncorrected cracked fittings could result in structural failure of the wing.

EFFECTIVE DATE: April 7, 1986.

ADDRESSES: The service bulletin specified in this AD may be obtained from the Manager, Maintenance and Engineering, Fokker B.V., Product Support, P.O. Box 7600, 1117ZJ Schiphol Oost, The Netherlands. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Mark E. Baldwin, Standardization Branch, ANM-113; telephone (206) 431-2978. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive which requires repetitive inspections, and repair, if necessary, of the center wing rear spar end fittings on certain Fokker Model F28 airplanes was published in the **Federal Register** on July 22, 1985 (50 FR 29804). Several cases of cracked fittings due to stress corrosion were found during inspection by the manufacturer. The inspections, and repairs, if necessary, are required within six years after initial delivery and at intervals not to exceed one year thereafter. This action is considered necessary to maintain the structural integrity of the wing.

The comment period for the proposal, which ended September 10, 1985, afforded interested persons an opportunity to participate in making the rule. Due consideration has been given to the comment received, which was from an organization representing an airline operator. The commenter offered no objections to the proposed AD.

After careful review of the available data, the FAA has determined that air safety and the public interest require the adoption of the rule without change.

It is estimated that there are 30 airplanes on the U.S. Register which are affected by this AD, that it will take approximately 3 manhours per airplane per year to conduct the required inspections, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost to U.S. operators will be $3,600 per year.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities because of the minimal cost of compliance per airplane ($120.). A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

PART—39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends Section 39.13 of Part 39 of the Federal Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following airworthiness directive:

Fokker B.V.: Applies to Model F28 airplanes, certificated in any category:

Serial Numbers:
11003 to 11189 inclusive
11190 to 11192 inclusive (RH side only)
11991 and 11992

To prevent failures of the wing center section, accomplish the following, unless already accomplished, within the next 60 days after the effective date of this AD, or before the airplane reaches six years of age (from date of delivery), whichever occurs later:

A. Inspect the center wing rear spar end fittings, and repair if cracks are found, in accordance with Fokker Service Bulletin F28/57-73, dated June 18, 1984.

B. Repeat the inspection and repairs required by paragraph A., above, at intervals not to exceed one year.

C. Alternate means of compliance which provide an acceptable level of safety may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service document from the manufacturer may obtain copies upon request to the Manager, Maintenance and Engineering, Fokker B.V., Product Support, P.O. Box 7600, 1117ZJ Schiphol Oost, The Netherlands. This document may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective April 7, 1986.

Issued in Seattle, Washington, on January 21, 1986.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

[FR Doc. 86-4303 Filed 2-27-86; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 85-NM-118-AD; Amdt. 39-5242]

Airworthiness Directives; Gates Learjet Models 25, 25A, 25B, and 25C Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revises an existing airworthiness directive (AD) applicable to certain Gates Learjet Model 25 series airplanes, to extend the inspection interval for Stall Warning Accelerometers from 165 hours to 220 hours time-in-service. This will permit operators to perform this inspection in conjunction with other airplane maintenance schedules.

DATE: Effective April 7, 1986.

ADDRESSES: The applicable service information may be obtained from Gates Learjet Corporation, P.O. Box 7707, Wichita, Kansas 67277. This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or FAA, Central Region, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas.

FOR FURTHER INFORMATION CONTACT: Robert B. Jackson, Aerospace Engineer, Wichita Aircraft Certification Office, FAA, Central Region, 1801 Airport Road, Mid-Continent Airport, Wichita, Kansas 67209; telephone (316) 946-4419.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations by revising AD 82-01-04R1 to increase the repetitive inspection interval of the Stall Warning Accelerometer Unit from 165 hours to 220 hours time-in-service, was published in the Federal Register on November 13, 1985 (50 FR 46777). In addition, the proposed amendment would revise paragraph G. of the AD to reflect the correct address of the Wichita Aircraft Certification Office.

The comment period closed January 3, 1986, and interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the one comment which was received. The commenter strongly supported the proposal.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

It is estimated that 180 airplanes of U.S. registry will be affected by this AD. It has been determined that the requirements of this AD may actually reduce operators' costs since the required inspection may be accomplished in conjunction with other regularly scheduled airplane maintenance and inspections.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

Aviation safety, Aircraft.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By revising paragraphs D. and G. of Airworthiness Directive (AD) 82-01-04 R1, Amendment 39-4751, as follows:

"D. To ensure proper operation of the Stall Warning Accelerometer Unit, unless previously inspected in the last 100 hours time-in-service before the effective date of this AD, within the next 50 hours time-in-service, and at intervals not to exceed 220 hours time-in-service thereafter, perform the inspection of the Stall Warning Accelerometer in accordance with Gates Learjet Service Bulletin SB 23/24/25-301B, as appropriate."

"G. Alternate means of compliance which provide an acceptable level of safety may be used when approved by the Manager, Wichita Aircraft Certification Office, FAA, Central Region, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209."

All persons affected by this proposal who have not already received the applicable service information from the manufacturer may obtain copies upon request to Gates Learjet Corporation, P.O. Box 7707, Wichita, Kansas 67277. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or FAA, Central Region, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas.

This amendment becomes effective April 7, 1986.

Issued in Seattle, Washington, on February 21, 1986.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 86–ANM–10]

Correction to Description of Great Falls, MT, Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The description of the Great Falls, Montana, transition area contains an incorrect reference to Airway V–257. The airway should be V–247. This action corrects the description.

DATES: Effective date—0901 UTC, March 31, 1986.

Comments must be received on or before May 2, 1986.

ADDRESSES: Send comments on the rule to: Manager, Airspace & System Management Branch, ANM–530, Federal Aviation Administration, Docket No. 86–ANM–10, 17900 Pacific Highway South, C–68966, Seattle, WA 98168.

The official docket may be examined in the Regional Counsel's Office at the same address.

An informal docket may also be examined during normal business hours at the address listed above.

FOR FURTHER INFORMATION CONTACT: Katherine Paul, Airspace Technical Specialist, ANM–535, Federal Aviation Administration, Docket No. 86–ANM–10, 17900 Pacific Highway South, C–68966, Seattle, WA 98168, Telephone: (206) 431–2530.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves correcting a reference to Airway V–257 in the description of the Great Falls, Montana, transition area and, thus, was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations corrects a reference to Airway 257 in the description of the Great Falls, Montana, transition area. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6A dated January 2, 1985.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in CFR Part 71

Transition areas/Aviation safety.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. By amending § 71.181 as follows:

Great Falls, Montana (Revised)

That airspace extending upward from 700 feet above the surface within a 17-mile radius of Malmstrom AFB (lat. 47°30′05″N/long. 111°11′20″W) within 3 miles each side of the Great Falls VORTAC 157 radial, extending from the 17-mile radius area to 21.5 miles southeast of the VORTAC, and within 9 miles northwest of and 13 miles southeast of the Great Falls VORTAC 225 radial, extending from the 17-mile radius area to 15 miles southwest of the VORTAC. That airspace extending upward from 1,200 feet above the surface within a 60-mile radius of the Great Falls VORTAC; and that airspace beginning 60 miles southeast of the Great Falls VORTAC from the south edge of V–113, east to the west edge of V–187, southeast to the intersect of the east edge of V–247, northwest to the intersect of the 60-mile radius of great Falls VORTAC; excluding that portion overlying the Billings, Montana, and Helena, Montana, 1,200-foot transition areas.

Issued in Seattle, Washington, on February 20, 1986.

David E. Jones,

Manager, Air Traffic Division, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 85–ANM–31]

Amendment to Transition Area; Wenatchee, WA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action alters the transition area at Wenatchee, Washington, to accommodate a new VOR/DME–C instrument approach to the Pangborn Field Airport at Wenatchee, Washington.

EFFECTIVE DATE: 0901 UTC, April 3, 1986.

FOR FURTHER INFORMATION CONTACT: Robert L. Brown, Airspace & Procedures Specialist, ANM–534, Federal Aviation Administration, Docket No. 85–ANM–31, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168, Telephone: (206) 431–2534.

SUPPLEMENTARY INFORMATION:

History

On Friday, December 20, 1985, the FAA proposed to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by amending the transition area for Wenatchee, Washington (51 FR 3944).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6A dated January 2, 1985.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations amends the Wenatchee, Washington, transition area. This action is necessary to provide controlled airspace to accommodate a new VOR/DME–C instrument approach to the Pangborn Field Airport. This action will ensure segregation of aircraft using approach procedures in instrument

weather conditions and other aircraft operating in visual weather conditions.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Transition areas, Aviation safety.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

1. The authority citation for Part 71, continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. By amending § 71.181 as follows:

§ 71.181 [Amended]

Wenatchee, Washington, Transition Area (Amended)

That airspace extending upward from 700 feet above the surface within 4 miles each side of the Wenatchee VOR 124° radial, extending from the VOR to 12.5 miles southeast of the VOR and that airspace between the 5-mile radius circle of the Pangborn Field Airport (lat 47°23′56″N, long. 120°12′20″W) and the 11 DME arc of the Wenatchee VOR/DME bounded by the north edge of V–120 clockwise to the Wenatchee VOR/DME 327°T (305°M) radial, including that airspace within a 1-mile radius of Francher Field, Washington (lat. 47°28′55″N, long. 120°16′40″W); that airspace extending upward from 1,200 feet above the surface within 5 miles south and 8 miles north of the Wenatchee VOR 092° and 272° radials, extending 7 miles west to 14 miles east of the VOR and within 5 miles southwest and 9.5 miles northeast of the 124° radial, extending from the VOR/DME to 23 miles southeast of the VOR and that airspace between the 11 DME and the 19 DME arcs of the Wenatchee VOR/DME bounded by the north edge of V–120 clockwise to the Wenatchee VOR/DME 327°T (305°M) radial.

Issued in Seattle, Washington, on February 20, 1986.

14 CFR Part 71

[Airspace Docket No. 85–ANM–5]

Amendment to Transition Area; Douglas, WY; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: This action corrects Federal Register Document 86–1869. The final rule airspace description which was published for the Douglas, Wyoming, transition area to be effective March 13, 1986, contained reference to an erroneous state boundary and an incomplete description of the 1,200 foot transition area. This action corrects these errors.

EFFECTIVE DATE: March 13, 1986.

FOR FURTHER INFORMATION CONTACT: Robert L. Brown, Airspace & Procedures Specialist, ANM–534, Federal Aviation Administration, Docket No. 85–ANM–5, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168, Telephone: (206) 431–2534.

SUPPLEMENTARY INFORMATION:

History

Federal Register Document 86–1869 was published on January 31, 1986 (51 FR 3944) that amended the 700 foot transition area at Douglas, Wyoming. This action was necessary due to the relocation of the Converse County Airport, Douglas, Wyoming. It was discovered that the airspace description published in the final rule contained reference to an erroneous state boundary and an incomplete description of the 1,200 foot transition area. This action corrects these discrepancies.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Transition areas, Aviation safety.

Adoption of the Correction

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, **Federal Register** Document 86–1869, as published in the **Federal Register** on January 31, 1986 (51 FR 3944) is corrected as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983) (14 CFR 11.69).

§ 71.181 [Corrected]

2. By correcting § 71.181 as follows:

Douglas, Wyoming, Transition Area [Amended]

That airspace extending upward from 700 feet above the surface within a 10.5 mile radius of the Converse County Airport, Douglas, Wyoming, (lat. 42°47′46″ N, long. 105°23′08″ W); and that airspace extending upward from 1,200 feet above the surface within the area bounded by a line beginning at a point at lat. 43°14′00″ N, long. 105°28′01″ W; east along the south edge of V–26 to lat. 43°28′30″ N, long. 104°30′00″ W; to lat. 43°00′00″ N, long. 104°30′00″ W; east to the Wyoming-South Dakota-Nebraska State boundary, south to the north edge of V–100, west to the west edge of V–19, northwest to lat. 42°27′30″ N, long. 105°52′05″ W; thence to point of beginning, excluding the Casper and Cheyenne, Wyoming, transition areas.

Issued in Seattle, Washington, on February 20, 1986.

David E. Jones,

Manager, Air Traffic Division, Northwest Mountain Region.

Alteration to Christiansted St. Croix, VI, Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action enlarges the Christiansted St. Croix, VI, Transition Area to accommodate operations conducted under instrument flight rules

VOL 51
ISS 40
FE 28
1986
UMI

(IFR) from Christiansted Harbor Seaplane Base.

EFFECTIVE DATE: 0901 UTC, May 8, 1986.

FOR FURTHER INFORMATION CONTACT: William C. Davis, Airspace and Air Traffic Rules Branch (ATO-230), Airspace—Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

On November 22, 1985, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to provide sufficient controlled airspace within which operations conducted under IFR from Christiansted Harbor Seaplane Base would be afforded the protection of increased VFR minimums associated with controlled airspace (50 FR 48220). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6A dated January 2, 1985.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations enlarges the Christiansted, St. Croix, VI, Transition Area to accommodate IFR departure operations from the Christiansted Harbor Seaplane Base.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Transition areas.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. § 71.181 is amended as follows:

Christiansted, St. Croix, VI [Amended]

By removing the words "and that airspace" and substituting the words "within a 6.5-mile radius of Christiansted Harbor Seaplane Base (lat. 17°45'11" N., long. 64°42'24" N.); and that airspace" and by removing "VOR" wherever it appears and substituting "VOR/DME." Also, by removing "068°" wherever it appears and substituting "069°."

Issued in Washington, DC, on February 21, 1986.

Shelomo Wugalter,

Manager, Airspace—Rules and Aeronautical Information Division.

14 CFR Part 73

[Airspace Docket No. 86-AWA-1]

Alteration of Restricted Areas R-3202A, B and C—Saylor Creek, ID

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the times of use for Restricted Areas R-3202A, B and C, located near Saylor Creek, ID, indicating more accurately when the areas are being utilized. This action will reduce the time the restricted areas are in effect.

EFFECTIVE DATE: 0901 U.T.C., May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Andrew B. Oltmanns, Airspace and Aeronautical Information Requirements Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-3128.

SUPPLEMENTARY INFORMATION:

The Rule

This amendment to Part 73 of the Federal Aviation Regulations (14 CFR Part 73) changes the times of use for Restricted Areas R-3202A, B and C, located near Saylor Creek, ID, from "daily, 0600-0200, local time; other times by NOTAM" to "Monday-Friday, 0800-0000 local time; other times by NOTAM." Because this would amend the time of designation to reflect actual times of use and would reduce the time the restricted areas are in effect, I find that notice and public procedure under 5 U.S.C. 553(b) are unnecessary because this action is a minor amendment in which the public would not be particularly interested. Section 73.32 of Part 73 of the Federal Aviation Regulations was republished in Handbook 7400.6A dated January 2, 1985.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

14 CFR Part 73

[Airspace Docket No. 85-AGL-29]

Change in Time of Designation of Restricted Areas R-4201A and R-4201B, Camp Grayling, MI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the time of designation for R-4201A and R-4201B, Camp Grayling, MI. A "continuous" time of designation of these restricted areas is no longer required by the using agency. The time changes will more accurately reflect actual use, will release time periods during which the areas are available for public access, and will provide for the more efficient utilization of airspace.

DATE: Effective 0901 U.T.C., May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Paul Gallant, Airspace and Aeronautical Information Requirements Branch ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-3128.

The Rule

This amendment to part 73 of the Federal Aviation Regulations (14 CFR Part 73) reduces the times of use for Restricted Areas R-4201A and R-4201B, Camp Grayling, MI, from "continuous" to "0800-1600 local time, Tuesday-Saturday; other times by NOTAM" for R-4201A and to "0001 Saturday-2359 Sunday local time; other times by NOTAM" for R-4201B. The Department of the Army has indicated that continuous use of R-4201A and R-4201B is no longer required. Because this would amend the time of designation to reflect actual times of use and reduce the time that the restricted areas are in effect, this action is a minor amendment in which the public would not be particularly interested. For this reason, I find that notice and public procedure under 5 U.S.C. 553(b) are unnecessary. Section 73.42 of part 73 of the Federal Aviation Regulations was republished in Handbook 7400.6A dated January 2, 1985.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 73

Aviation safety, Restricted areas.

Adoption of the Amendment

PART 73—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 73 of the Federal Aviation Regulations (14 CFR part 73) is amended as follows:

1. The authority citation for Part 73 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510, 1522; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. Section 73.42 is amended as follows:

R-4201A Camp Grayling, MI [Amended]

By removing the word "Continuous" and substituting the words "0800-1600 local time, Tuesday-Saturday; other times by NOTAM."

R-4201B Camp Grayling, MI [Amended]

By removing the word "Continuous" and substituting the words "0001 Saturday-2359 Sunday local time; other times by NOTAM."

Issued in Washington, D.C., on February 21, 1986.

Shelomo Wugalter,

Manager, Airspace-Rules and Aeronautical Information Division.

14 CFR Part 75

[Airspace Docket No. 85-AWA-52]

Alteration and Establishment of Jet Routes—Expanded East Coast Plan

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters Jet Route J-79 and establishes new Jet Route J-193 which are located in the vicinity of Richmond, VA. The realignment alleviates congestion and compression of traffic in the airspace between New England and Florida. This amendment is a portion of the Expanded East Coast Plan (EECP) that is designed to make optimum use of limited airspace along the east coast corridor. The jet routes in this docket, J-79 and J-193, were removed from ASD 85-AWA-41, due to technical problems that could not be resolved in time to make the effective date of March 13, 1986. The EECP will be implemented in several segments until completed.

EFFECTIVE DATE: 0901 UTC, May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 426-8626.

SUPPLEMENTARY INFORMATION:

History

On October 16, 1985, the FAA proposed to amend Part 75 of the Federal Aviation Regulations (14 CFR Part 75) to alter the descriptions of J-174, J-40, J-191, J-79 and establish J-193 in ADS 85-AWA-41 (50 FR 41905). Due to technical problems with NAVAIDs, J-79 and J-193 were removed from ASD 85-AWA-41 and are processed under this rule with a May 8, 1986, effective date. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Section 75.100 of Part 75 of the Federal Aviation Regulations was republished in Handbook 7400.6A dated January 2, 1985.

The Rule

This amendment to Part 75 of the Federal Aviation Regulations realigns J-79 and establishes new J-193. These jet routes are segments of the EECP that is designed to alleviate compression and

VOL
51
ISS
40
FE
28
1986
UMI

congestion in several terminal areas. This action completes an additional segment of the EECP.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Jet routes.

Adoption of the Amendment

PART 75—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 75 of the Federal Aviation Regulations (14 CFR Part 75) is amended, as follows:

1. The authority citation for Part 75 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 75.100 [Amended]

2. § 75.100 is amended as follows:

J–79 [Amended]

By removing the words "Charleston; Wilmington, NC; Norfolk, VA; INT of Norfolk 023° and Coyle, NJ, 208° radials; Coyle; Kennedy, NY;" and substituting the words "Charleston; Tar River, NC; Franklin, VA; Salisbury, MD; Sea Isle, NJ; Kennedy, NY;"

J–198 [New]

From Wilmington, NC, via INT of Wilmington 056° and Franklin, VA 190° radials; to Franklin.

Issued in Washington, DC, on February 21, 1986.

Shelomo Wugalter,

Manager, Airspace-Rules and Aeronautical Information Division.

BILLING CODE 4910-13-M

---

14 CFR Part 97

[Docket No. 24918; Amdt. No. 1315]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: Effective: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures Standards Branch (AFO-230), Air Transportation Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 426–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4, and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the Federal Register expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number. This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for

Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Approaches, Standard instrument, Incorporation by reference.

Issued in Washington, DC on February 21, 1986.

John S. Kern,

Acting Director of Flight Standards.

Adoption of the Amendment

PART 97—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.m.t. on the dates specified, as follows:

1. The authority citation for Part 97 continues to read as follows:

Authority: 49 U.S.C. 1348, 1354(a), 1421, and 1510; 49 U.S.C.106(g) (revised, Pub. L. 97–449, January 12, 1983; and 14 CFR 11.49(b)(2)).

By amending: § 97.23 VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

Correction

In FR Doc. 85–28887, beginning on page 50118, in the issue of Friday, December 6, 1985, make the following corrections:

1. On page 50127, second column, fifth line from bottom in § 404.1579(b)(5), "lastest" should read "latest".

2. On the same page, third column, fifth line, in § 404.1579(c)(4), "medica" should read "medical".

3. On page 50131, third column, in § 404.1594(b)(3) Example 2, second paragraph, first line, "had" should read "has".

4. On page 50132, first column, twenty-fourth line in § 404.1594(b)(4), "had" should read "has". In the thirty-second line, after the word "these" insert "basic".

5. On the same page, second column, fourth line in § 404.1594(b)(4)(ii), "in" should read "is". In the eleventh line, the second "to sustained" should be removed.

6. On page 50133, first column, second line in § 404.1594(c)(3), "consideration" should read "considerations."

7. On the same page, third column, twenty-eighth line in § 404.1594(c)(3)(v), "effects" should read "efforts".

8. On page 50137, first column, first line of § 416.986(a), "you" should read "your". In the second line, "yor" should read "you". In paragraph (a)(2) of same section and column, second line, "no" should read "not".

9. On page 50139, in § 416.994(b)(1)(iv)(C), second column, first line, "evaluation" should read "evaluations".

10. On page 50140, first column, fifth line in § 416.994(b)(2)(iv)(C), "our" should read "your".

VOL 51 ISS 40 FE 28 1986 UMI

11. On the same page, third column, twentieth line in § 416.994(b)(3), before "medical" insert "any".

12. On page 50141, second column, third line in § 416.994(b)(3)(iii)(B)*(1)*, "Subchapter" should read "Subpart". In the same section, paragraph (b)(3)(iii))(B)*(2)*, first line, "or" should read "of".

13. On the same page, third column, sixth line in § 416.994(b)(3)(iv)(A), Example 1, "electroencephalogram" was misspelled.

14. On page 50142, first column, eighth line in § 416.994(b)(3)(iv)(B), Example, "original" was misspelled.

15. On page 50143, third column, third line in § 416.994(c)(1)(i) Example 1, "has" should read "had".

16. On page 50145, in § 416.994(c)(3)(i), second column, twenty-second line, "The" should read "This".

Correction

In FR Doc. 86-3005 beginning on page 5162 in the issue of Wednesday, February 12, 1986, make the following corrections:

1. On page 5162, third column, in Part 558, in the first line of the Authority, insert "82" before "Stat.".

2. On page 5163, in the table at the top of the page, under "Limitations", first line, insert "cattle" after "pasture".

BILLING CODE 1505-01-M

DEPARTMENT OF JUSTICE

Parole Commission

28 CFR Part 2

Paroling, Recommitting and Supervising Federal Prisoners

AGENCY: United States Parole Commission.

ACTION: Final rule.

SUMMARY: The Parole Commission is making procedural clarifications and revisions to its rules at 28 CFR 2.19 (Information Considered) and § 2.27 (Appeal of Original Jurisdiction Cases). The amendment to 28 CFR 2.19 provides that the procedures for submission of materials to be considered by the Commission also are applicable to preliminary interviews and the amendment to 28 CFR 2.27 revises the date at which material supporting the appeal of an original jurisdiction case must be submitted to the Commission.

EFFECTIVE DATE: March 31, 1986.

FOR FURTHER INFORMATION CONTACT: Alan J. Chaset, Deputy Director of Research and Program Development, U.S. Parole Commission, 5550 Friendship Blvd., Chevy Chase, Maryland 20815, Telephone (301) 492-4980.

SUPPLEMENTARY INFORMATION: The U.S. Parole Commission is making procedural changes to two of its rules related to the Submission by offenders of materials and information for consideration by the Commission.

First, in making a parole or reparole determination, the Commission considers a number of reports and other documents concerning the prisoner. It will also take into consideration additional information concerning the prisioner, including information submitted by the prisoner or by other interested persons. The rules governing the information so considered are at 28 CFR 2.19.

Occasionally, at the hearing, a prisoner or his representative will submit for the first time voluminous material concerning the prisoner to be considered by the panel. In such instances, it is generally impossible for the examiners to read all the material submitted without seriously disturbing the hearing schedule. To remedy this situation and to ensure that the information contained in the submitted materials receives appropriate attention and review, the Commission adopted procedures which limit the amount of material to be first submitted at a hearing, which establish the timing of that submission, which allow for summarization of the submitted material, and which provides for Commission consideration of all the material submitted as part of the review of the panel's recommendation. A final rule in this regard was published in the **Federal Register** (50 FR 36422, September 6, 1985).

The submission of voluminous materials concerning prisoners are equally problematic to the individuals who conduct preliminary interviews as part of the parole revocation process. To remedy this similar situation and again to ensure that the submitted material receives appropriate attention, the Commission is amending 28 CFR 2.19 to extend the coverage of those procedures to preliminary interviews.

Second, as part of the procedures regarding the Commission's consideration of an appeal of original jurisdiction cases, the Commission receives and reviews written information concerning prisoners as submitted by attorneys, relatives and other interested parties. Presently, these supporting materials are to be submitted at least two weeks in advance of the Commission meeting at which the appeal will be heard. 28 CFR 2.27(b). The Commission has determined that this two-week deadline does not provide ample time for the material to be reviewed, a summary prepared, typed, rechecked for accuracy, photocopied for the National and Regional Commissioners' packets and mailed out. These necessary steps take considerable time and delay review by the Commissioners beyond the two-week period.

To remedy this situation and to ensure adequate time for review, the Commission is amending 28 CFR 2.27(b) to require that the supporting materials be submitted thirty days in advance of the meeting at which the appeal will be considered.

These such changes will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

List of Subjects in 28 CFR Part 2

Administrative practice and procedures, Prisoners, Probation and parole.

PART 2—[AMENDED]

1. The authority citation for 28 CFR Part 2 continues to read as follows:

Authority: 18 U.S.C. 4203(a)(1) and (4204(a)(6).

2. 28 CFR 2.19, *Information Considered,* is amended by revising paragraph (b)(3) to read as follows:

§ 2.19 Information Considered.

* * * * *

(b) * * *

(3) If material of more than six (6), double-spaced, letter-sized pages is first submitted at the time of the hearing (or preliminary interview) and the hearing panel (or person conducting the hearing or preliminary interview) concludes that it is not feasible to read all the material at that time, the person submitting the material will be permitted to summarize it briefly at the hearing (or preliminary interview). All of the material submitted will become part of the record to be considered by the Commission in its review of the proceedings.

* * * * *

3. 28 CFR § 2.27, *Appeal of Original Jurisdiction Cases,* is amended by revising paragraph (b) to read as follows:

§ 2.27 Appeal of Original Jurisdiction Cases.

* * * * *

(b) Attorneys, relatives, and other interested parties who wish to submit written information concerning a prisoner's appeal should send such information to the National Appeals Board Analyst, United States Parole Commission, 5550 Friendship Boulevard, Chevy Chase, Maryland 20815. Appeals and all supporting material are to be submitted thirty days in advance of the meeting at which the appeals will be considered.

* * * * *

Dated: February 12, 1986.

Benjamin F. Baer,

Chairman, U.S. Parole Commission.

BILLING CODE 4410-01-M

---

28 CFR Part 2

Paroling, Recommitting and Supervising Federal Prisoners

AGENCY: United States Parole Commission.

ACTION: Final rule.

SUMMARY: The Parole Commission is making several interpretative clarifications, revisions and additions to its paroling policy guidelines contained in 28 CFR 2.20 and 2.36. These changes and additions are intended to remove ambiguities, to conform to other parts of the guidelines, and to make the guidelines more comprehensive.

EFFECTIVE DATE: March 31, 1986.

FOR FURTHER INFORMATION CONTACT: Alan J. Chaset, Deputy Director of Research and Program Development, U.S. Parole Commission, 5550 Friendship Blvd., Chevy Chase, Maryland 20815, Telephone (301) 492-4980.

SUPPLEMENTARY INFORMATION:

A. The Interim Rule and its Purposes

On October 3, 1985, the U.S. Parole Commission published in the **Federal Register** (50 FR 40368) an interim rule, with request for public comment, that made a number of amendments to the Commission's paroling policy guidelines. Among those amendments were the following:

1. A revision was made to 28 CFR 2.20(j)(1) to conform to amendments made to 28 CFR 2.21 concerning the recalculation of the salient factor score for parole violators. And a revision was made to 28 CFR 2.36(a)(1) to make it more consistent with amendments made to 28 CFR 2.21 concerning the grading of administrative violations as Category One.

2. Several changes were made to the offense examples in the Offense Severity Index of 28 CFR 2.20. These amendments were, for the most part, editorial and served to clarify the offense examples. Other revisions added new offense examples, making the offense severity index more comprehensive by including behaviors previously not specifically covered. Offense Example 211(a) was revised for clarity as were Offense Examples 212(a), 221(e), 615, and 621(b). (For consistency, an amendment was made to Definition 17 in Subchapter B of Chapter Thirteen to conform to the revision in Offense Examples 211(e) and 212(a)). The titles of Offense Examples 232 and 801 were revised for clarity and consistency and the statutory reference in the title of Offense Example 361 was removed. New subparagraph (c) was added to Offense Example 322 to clarify the relationship of extortion to non-governmental corruption. Operating video gambling machines were added to the list of gambling law violations in Offense Example 1111 and, for consitsency, Offense Example 1112 was revised for grading by reference to Offense Example 1111. Offense Example 803 was removed; the underlying statute had been repealed and involuntary manslaughter is covered elsewhere in the guidelines. New Offense Example 363 was added to make the index more comprehensive by providing coverage for "insider trading" offenses. The grading of the severity of those offenses paralleled that of the antitrust offenses in Offense Example 361. New Offense Examples 1171 and 1172, rating environmental offenses, were added. The Commission proposed the creation of a subchapter on these offenses in the proposed rule published on June 10, 1985 (50 FR 24236). No comment was received, and the Commission had developed these two offense examples pursuant to that proposal. Also, new General Note (7) was added to Subchapter A of Chapter Thirteen to clarify the grading of state offenses committed at or about the same time as the current federal offense.

3. To make the rules more comprehensive, the Commission revised several offense examples and other paragraphs by incorporating, as part of the rules, instructional material previously included in the Commission's internal Rules and Procedures Manual. These changes were also to help clarify the rules and examples. In this regard, amendments were made to Offense Examples 232(c), 331(f)(3), 331(g)(2), 362(d), and 618 (a) and (b). Similarly, Note (3) was added to the Notes to Chapter Nine; subparagraphs (a) through (e) were added to General Note (2) of Subchapter A of Chapter Thirteen; and the salient factor scoring instructions were incorporated into the rules.

B. Public Comment

With the exception of the addition of new Offense Example 363 regarding insider trading (discussed below), no public comment was received on any of the revisions, additions or clarifications contained in the interim rule.

As regards the addition of new Offense Example 363 to Chapter 3, Subchapter G of the Offense Behavior Severity Index of § 2.20, significant response was received questioning the severity ratings developed for insider trading. An amendment was attached to the Continuing Resolution (House Joint Resolution 465, Further Continuing Appropriations for Fiscal Year 1986; Pub. L. 99-190) prohibiting the Parole Commission from enforcing this offense example for a six month period, except with respect to pending offenses. Letters were forwarded by various Senators and Congressmen expressing their views on the subject. Additionally, a letter was received from the Secretary of the U.S. Securities and Exchange Commission noting that Commission's position on the matter and another received from the Deputy Attorney General passing on the comments of the Economic Crime Council.

The thrust of all the comments received was basically the same: insider trading is a very serious offense that has consequences beyond the illegal profits generated by the inside trader; as a comparative, the severity level of insider trading should be graded as similar to fraud type offenses rather than to antitrust offenses as provided for in the interim rule; the severity ratings contained in the interim rule do not adequately reflect the seriousness of the offense and the resultant harm caused and, further, do not reflect recent legislative and prosecutorial initiatives aimed at both deterring and more appropriately sanctioning this behavior.

The U.S. Parole Commission has reviewed the letters and comments received and has determined to amend the portion of the interim rule that deals with insider trading. Rather than paralleling the severity categories for insider trading offenses with violations of the antitrust laws, such offenses will be treated as similar to traditional frauds and will be rated accordingly.

VOL 51
ISS 40
FE 28
1986
UMI

C. Changes From the Interim Rule

This final rule contains several changes from the interim rule. First, a change is being made to Offense Examples 301(a) and 303(a) of Chapter Three, Subchapter A of the Offense Behavior Severity Index of § 2.20 to conform the language therein to the changes made in Offense Examples 211(a) and 212(a) of Chapter Two, Subchapter B of the Offense Behavior Severity Index of § 2.20. Second, an error was made in the interim rule whereby Offense Example 331 was identified incorrectly (in two instances) as being within Chapter 3, Subchapter F of the Offense Behavior Severity Index of § 2.20. Offense Example 331 is in Chapter 3, Subchapter D of the Offense Behavior Severity Index of § 2.20. Next, as discussed above, a revision has been made to Offense Example 363 of Chapter 3, Subchapter G of the Offense Behavior Severity Index of § 2.20. Finally, for clarification, language is being added to the instructions for the computation of the salient factor score contained in § 2.20 at A.2(b)6 and at *Special Instructions—Federal Parole Violations*, Item C and Item D.

These rule changes will not have a significant econonic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

List of Subjects in 28 CFR Part 2

Administrative practice and procedures, Prisoners, Probation and parole.

PART 2—[AMENDED]

1. The authority citation for 28 CFR Part 2 continues to read as follows:

Authority: 18 U.S.C. 4203(a)(1) and 4204(a)(6).

2. 28 CFR 2.20, *Paroling Policy Guidelines; Statement of General Policy*, is amended by revising paragraph (j)(1) to read as follows:

§ 2.20 Paroling Policy Guidelines; Statement of General Policy.

* * * * *

(j)(1) In probation revocation cases, the original federal offense behavior and any new criminal conduct on probation (federal or otherwise) is considered in assessing offense severity. The original federal conviction is also counted in the salient factor score as a prior conviction. Credit is given toward the guidelines for any time spent in confinement on any offense considered in assessing offense severity.

* * * * *

3. Offense Example 211(a) in Chapter 2, Subchapter B, in the Offense Behavior Severity Index of § 2.20 is revised to read as follows:

211 *Assault During Commission of Another Offense*

(a) If serious bodily injury* results or if 'serious bodily injury is the result intended'*, grade as Category Seven;

* * * * *

4. Offense Example 212(a) of Chapter 2, Subchapter B of the Offense Behavior Severity Index of § 2.20 is revised to read as follows:

212 *Assault*

(a) If serious bodily injury* results or if 'serious bodily injury is the result intended'*, grade as Category Seven;

* * * * *

5. Offense Example 221(e) of Chapter 2, Subchapter C of the Offense Behavior Severity Index of § 2.20 is revised to read as follows:

221 *Kidnapping*

* * * * *

(e) *Exception:* If not for ransom or terrorism, and no bodily injury to victim, and limited duration (e.g., abducting the driver of a truck during a hijacking and releasing him unharmed within an hour), grade as Category Six.

6. The title of Offense Example 232 of Chapter 2, Subchapter D in the Offense Behavior Severity Index of § 2.20 is revised to read as follows:

232 *Unlawful Sexual Conduct with Minors (e.g., carnal knowledge*)*

7. Offense Example 232 of Chapter 2, Subchapter D in the Offense Behavior Severity Index of § 2.20 is amended by revising paragraph (c) to read as follows:

232 *Unlawful Sexual Conduct with Minors (e.g., carnal knowledge*)*

* * * * *

(c) *Note:* Where the victim is less than 12 years of age at the time of the offense, the aggravating factor of an extremely vulnerable victim is presumed to exist.

8. Offense Example 301(a) of Chapter 3, Subchapter A in the Offense Behavior Severity Index of § 2.20 is revised to read as follows:

301 *Property Destruction by Arson or Explosives*

(a) If the conduct results in serious bodily injury* or if 'serious bodily injury is the result intended'*, grade as Category Seven;

* * * * *

9. Offense Example 303(a) of Chapter 3, Subchapter A in the Offense Behavior Severity Index of § 2.20 is revised to read as follows:

303 *Property Destruction Other Than Listed Above*

(a) If the conduct result in serious bodily injury* or 'serious bodily injury is the result intended'*, grade as if 'assault during commission of another offense';

* * * * *

10. Offense Example 322 of Chapter 3, Subchapter C in the Offense Behavior Severity Index of § 2.20 is revising paragraph (c) to read as follows:

322 *Extortion*

* * * * *

(c) If neither (a) nor (b) is applicable, grade under Chapter Eleven, Subchapter F;

11. Offense Example 331 of Chapter 3, Subchapter D in the Offense Behavior Severity Index of § 2.20 is amended by revising paragraph (f)(3) to read as follows:

331 *Theft, Forgery* * * *

* * * * *

(f) * * *

(3) Grade obtaining drugs for own use by a fraudulent or fraudulently obtained prescription as Category two.

* * * * *

12. Offense Example 331 of Chapter 3, Subchapter D in the Offense Behavior Severity Index of § 2.20 is amended by revising paragraph (g)(2) to read as follows:

331 *Theft, Forgery* * * *

* * * * *

(g) * * *

(2) Grade fraudulent sale of drugs (e.g., sale of sugar as heroin) as 'fraud'.

13. The title of Offense Example 361 of Chapter 3, Subchapter G in the Offense Behavior Severity Index of § 2.20 is revised to read as follows:

361 *Violation of Securities or Investment Regulations*

14. Offense Example 362 of Chapter 3, Subchapter G in the Offense Behavior Severity Index of § 2.20 is amended by revising paragraph (d) to read as follows:

362 *Antitrust Offenses*

* * * * *

(d) *Note:* The term 'economic impact' refers to the estimated loss to any victims (e.g., loss to consumers from a price fixing offense).

15. Offense Example 363 of Chapter 3, Subchapter G is revised in the Offense Behavior Severity Index of § 2.20 to read as follows:

363 *Insider Trading*

(a) If the estimated economic impact is more than $500,000, grade as Category Six;

(b) If the estimated economic impact is more than $100,000 but not more than $500,000, grade as Category Five;

(c) If the estimated economic impact is at least $20,000 but not more than $100,000, grade as Category Four;

(d) If the estimated economic impact is at least $2,000 but less than $20,000, grade as Category Three;

(e) If the estimated economic impact is less than $2,000, grade as Category Two.

(f) Note: The term 'economic impact' includes the damage sustained by the victim whose information was unlawfully used, plus any other illicit profit resulting from the offense.

16. Offense Example 615 of Chapter 6, Subchapter B in the Offense Behavior Severity Index of § 2.20 is revised to read as follows:

615 *Harboring a Fugitive*

Grade as if 'accessory after the fact' to the offense for which the fugitive is wanted, but not higher than Category Three.

17. Offense Example 618 of Chapter 6, Subchapter B in the Offense Behavior Severity Index of § 2.20 is revised to read as follows:

618 *Contempt of Court*

(a) Criminal Contempt (re: 18 U.S.C. 402). Where imposed in connecton with a prisoner serving a sentence for another offense, add <=6 months to the guidelines otherwise appropriate.

(b) *Exception:* If a criminal sentence of more than one year is imposed under 18 U.S.C. 401 for refusal to testify concerning a criminal offense, grade such conduct as if 'accessory after the fact'.

(c) Civil Contempt. See 28 CFR 2.10.

18. Offense Example 621 of Chapter 6, Subchapter C in the Offense Behavior Severity Index of § 2.20 is amended by revising paragraph (b) to read as follows:

621 *Bribery* * * *

* * * * *

(b) If the above conduct involves a pattern of corruption (e.g., multiple instances), grade as not less than Category Four.

* * * * *

19. The title of Offense Example 801 of Chapter 8, Subchapter A in the Offense Behavior Severity Index of § 2.20 is revised to read as follows:

801 *Unlawful Possession or Distribution of Explosives; or Use of Explosives During a Felony*

20. Offense Example 803 of Chapter 8, Subchapter A in the Offense Behavior Severity Index of § 2.20 is removed.

21. Note 3 to the Notes to Chapter Nine of the Offense Behavior Severity Index of § 2.20 is revised to read as follows:

—Notes to Chapter Nine

* * * * *

(3) Grade unlawful possession or distribution of precursors of illicit drugs as Category Five (i.e., aiding and abetting the manufacture of synthetic illicit drugs).

22. Offense Example 1111 of Chapter Eleven, Subchapter B of the Offense Behavior Severity Index of § 2.20 is revised to read as follows:

1111 *Gambling Law Violations—Operating or Employment in an Unlawful Business* (re: 18 U.S.C. 1955)

(a) If large scale operation [e.g., Sports books (estimated daily gross more than $15,000); Horse books (estimated daily gross more than $4,000); Numbers bankers (estimated daily gross more than $2,000); Dice or card games (estimated daily 'house cut' more than $1,000); video gambling (eight or more machines)]; grade as Category Four;

(b) If medium scale operation [e.g., Sports books (estimated daily gross $5,000—$15,000); Horse books (estimated daily gross $1,500—$4,000); Numbers bankers (estimated daily gross $750—$2,000); Dice or card games (estimated daily 'house cut' $400—$1,000); video gambling (four-seven machines)]; grade as Category Three;

(c) If small scale operation [e.g., Sports books (estimated daily gross less than $5,000); Horse books (estimated daily gross less than $1,500); Numbers bankers (estimated daily gross less than $750); Dice or card games (estimated daily 'house cut' less than $400); video gambling (three or fewer machines)]; grade as Category Two;

(d) *Exception:* Where it is established that the offender had no proprietary interest or managerial role, grade as Category One.

23. Offense Example 1112 of Chapter Eleven, Subchapter B of the Offense Behavior Severity Index of § 2.20 is revised to read as follows:

1112 *Interstate Transportation of Wagering Paraphernalia* (re: 18 U.S.C. 1953) Grade as if 'operating a gambling business'.

24. Offense Examples 1171 and 1172 of Chapter Eleven, Subchapter H to the Offense Behavior Severity Index of § 2.20 are revised to read as follows:

SUBCHAPTER H—ENVIRONMENTAL OFFENSES

1171 *Knowing Endangerment Resulting From Unlawful Treatment, Transportation, Storage, or Disposal of Hazardous Waste* [Re: 42 U.S.C. 6928(e)]

(a) If death results, grade as Category Seven;

(b) If serious bodily injury results, grade as Category Six;

(c) Otherwise, grade as Category Five.

(d) *Note:* Knowing Endangerment requires a finding that the offender knowingly transported, treated, stored, or disposed of any hazardous waste and knew that he thereby placed another person in imminent danger of death or serious bodily injury.

1172 *Knowing Disposal and/or Storage and Treatment of Hazardous Waste Without a Permit; Transportation of Hazardous Waste to an Unpermitted Facility* [Re: 42 U.S.C. 6928(d)(1–2)]

(a) If death results, grade as Category Six;

(b) If (1) serious bodily injury results; or (2) a substantial potential for death or serious bodily injury in the future results; or (3) a substantial disruption to the environment results (e.g., estimated cleanup cost exceeds $100,000, or a community is evacuated for more than 72 hours), grade as Category Five;

(c) If (1) bodily injury results, or (2) a significant disruption to the environment results (e.g., estimated cleanup costs of $20,000–$100,000, or a community is evacuated for 72 hours or less), grade as Category Four;

(d) Otherwise, grade as Category Three;

(e) *Exception:* Where the offender is a non-managerial employee (i.e., a truckdriver or loading dock worker) acting under the orders of another person, grade as two categories below the underlying offense, but not less than Category One.

25. General Note 2 to Chapter Thirteen, Subchapter A in the Offense Behavior Severity Index of § 2.20 is amended by revising paragraphs (a), (b), (c), (d), and (e) to read as follows:

SUBCHAPTER A—GENERAL NOTES

* * * * *

2. * * *

(a) In certain instances, the guidelines specify how multiple offenses are to be rated. In offenses rated by monetary loss (e.g., theft and related offenses, counterfeiting, tax evasion) or drug offenses, the total amount of the property or drugs involved is used as the basis for the offense severity rating. In instances not specifically covered in the guidelines, the decision-makers must exercise discretion as to whether or not the multiple offense behavior is sufficiently aggravating to justify increasing the severity rating. The following chart is intended to provide guidance in assessing whether the severity of multiple offenses is sufficient to raise the offense severity level; it is not intended as a mechanical rule.

MULTIPLE SEPARATE OFFENSES

Severity	Points	Severity	Points
Category One	= 1/9	Category Five	= 9
Category Two	= 1/3	Category Six	= 27
Category Three	= 1	Category Seven	= 45
Category Four	= 3		

Examples: 3 Category Five Offense [3x(9)=27]=Category Six, 5 Category Five Offenses [5x(9)=45]=Category Seven, 2 Category Six Offenses [2x(27)=54]=Category Seven

(b) The term 'multiple separate offenses' generally refers to offenses committed at different times. However, there are certain circumstances in which offenses committed at the same time are properly considered multiple separate offenses for the purpose of establishing the offense severity rating. These include (1) unrelated offenses, and (2) offenses involving the unlawful possession of weapons during commission of another offense.

(c) For offenses graded according to monetary value (e.g., theft) and drug offenses, the severity rating is based on the amount or quantity involved and not on the number of separate instances.

(d) Intervening Arrests. Where offenses ordinarily graded by aggregation of value/quantity (e.g., property or drug offenses) are separated by an intervening arrest, grade (1) by aggregation of value/quantity or (2) as multiple separate offenses, whichever results in a higher severity category.

(3) Income Tax Violations Related to Other Criminal Activity. Where the circumstances indicate that the offender's income tax violations are related to failure to report

VOL 51 ISS 40 FE 28 1986 UMI

income from other criminal activity (e.g., failure to report income from a fraud offense) grade as tax evasion or according to the underlying criminal activity established, whichever is higher. Do not grade as multiple separate offenses.

26. Chapter Thirteen, Subchapter A is amended by revising General Note 7 to the Offense Behavior Severity Index of § 2.20 to read as follows:

SUBCHAPTER A—GENERAL NOTES

* * * * *

7. Where state offense(s) are sufficiently related to the federal offense in time or nature to be considered as part of the same episode, course, or spree of criminal conduct (e.g., during a three month period an offender robs two federal banks, one state bank, and one grocery store), such conduct shall be considered as an aggravating factor by being graded on the severity scale as if part of the current federal offense behavior. Any time spent in custody on the state offense(s) shall be credited for guideline purposes.

27. Definition 17 of Chapter Thirteen, Subchapter B of the Offense Behavior Severity Index of § 2.20 is revised to read as follows:

SUBCHAPTER B—DEFINITIONS

* * * * *

17. 'Serious bodily injury is the result intended' refers to a limited category of offense behaviors where the circumstances indicate that the bodily injury intended was serious (e.g., throwing acid in a person's face, or firing a weapon at a person) but where it is not established that murder was the intended object. Where the circumstances establish that murder was the intended object, grade as an 'attempt to murder'.

* * * * *

28. 28 CFR 2.20, *Paroling Policy Guidelines; Statement of General Policy*, is amended by revising instructions for the computation of the salient factor score to read as follows:

SALIENT FACTOR SCORING MANUAL. The following instructions serve as a guide in computing the salient factor score.

ITEM A. PRIOR CONVICTIONS/ADJUDICATIONS (ADULT OR JUVENILE) [[None = 3; One = 2; Two or three = 1; Four or more. . . . = 0]]

A.1 In General. Count all convictions/adjudications (adult or juvenile) for criminal offenses (other than the current offense) that were committed prior to the present period of confinement, except as specifically noted. Convictions for prior offenses that are charged or adjudicated together (e.g., three burglaries) are counted as a single prior conviction, except when such offenses are separated by an intervening arrest (e.g., three convictions for larceny and a conviction for an additional larceny committed after the arrest for the first three larcenies would be counted as two prior convictions, even if all four offenses were adjudicated together). Do not count the current federal offense or state/local convictions resulting from the current federal offense (i.e., offenses that are considered in assessing the severity of the current offense). *Exception:* Where the first and last overt acts of the current offense behavior are separated by an intervening federal conviction (e.g., after conviction for the current federal offense, the offender commits another federal offense while on appeal bond), both offenses are counted in assessing offense severity; the earlier offense is also counted as a prior conviction in the salient factor score.

A.2 Convictions—

(a) Felony convictions are counted. Non-felony convictions are counted, except as listed under (b) and (c). Convictions for driving while intoxicated/while under the influence/while impaired, or leaving the scene of an accident involving injury or an attended vehicle are counted. For the purpose of scoring Item A of the salient factor score, use the offense of conviction.

(b) Convictions for the following offenses are counted only if the sentence resulting was a commitment of more than thirty days (as defined in item B) or probation of one year or more (as defined in Item E), or if the record indicates that the offense was classified by the jurisdiction as a felony (regardless of sentence):

1. contempt of court;
2. disorderly conduct/disorderly person/breach of the peace/disturbing the peace/uttering loud and abusive language;
3. driving without a license/with a revoked or suspended license/with a false license;
4. false information to a police officer;
5. fish and game violations;
6. gambling (e.g., betting on dice, sports, cards) [Note: Operation or promotion of or employment in an unlawful gambling business is not included herein];
7. loitering;
8. non-support;
9. prostitution;
10. resisting arrest/evade and elude;
11. trespassing;
12. reckless driving;
13. hindering/failure to obey a police officer;
14. leaving the scene of an accident (except as listed under (a)).

(c) Convictions for certain minor offenses are not counted, regardless of sentence. These include:

1. hitchhiking;
2. local regulatory violations;
3. public intoxication/possession of alcohol by a minor/possession of alcohol in an open container;
4. traffic violations (except as specifically listed);
5. vagrancy/vagabond and rogue;
6. civil contempt.

A.3 Juvenile Conduct. Count juvenile convictions/adjudications except as follows:

(a) Do not count any status offense (e.g., runaway, truancy, habitual disobedience) unless the behavior included a criminal offense which would otherwise be counted;

(b) Do not count any criminal offense committed at age 15 or less, unless it resulted in a commitment of more than 30 days.

A.4 Military Conduct. Count military convictions by general or special court-martial (not summary court-maritial or Article 15 disciplinary proceeding) for acts that are generally prohibited by civilian criminal law (e.g., assault, theft). Do not count convictions for strictly military offenses. *Note:* This does not preclude consideration of serious or repeated military misconduct as a negative indicant of parole prognosis (i.e., a possible reason for overriding the salient factor score in relation to this item).

A.5 Diversion. Conduct resulting in diversion from the judicial process without a finding of guilt (e.g., deferred prosecution, probation without plea) is not to be counted in scoring this item. However, behavior resulting in a judicial determination of guilt or an admission of guilt before a judicial body shall be counted as a conviction even if a conviction is not formally entered.

A.6 Setting Aside of Convictions/Restoration of Civil Rights Setting aside or removal of juvenile convictions/adjudications is normally for civil purposes (to remove civil penalties and stigma). Such convictions/adjudications are to be counted for purposes of assessing parole prognosis. This also applies to adult convictions/adjudications which may be set aside by various methods (including pardon). However, convictions/adjudications that were set aside or pardoned on grounds of innocence are not to be counted.

A.7 Convictions Reversed or Vacated on Grounds of Constitutional or Procedural Error. Exclude any conviction reversed or vacated for constitutional or procedural grounds, unless the prisoner has been retried and reconvicted. It is the Commission's presumption that a conviction/adjudication is valid. If a prisoner challenges such conviction he/she should be advised to petition for a reversal of such conviction in the court in which he/she was originally tried, and then to provide the Commission with evidence of such reversal. *Note:* Occasionally the presentence report documents facts clearly indicating that a conviction was unconstitutional for deprivation of counsel [this occurs only when the conviction was for a felony, or for a lesser offense for which imprisonment was actually imposed; and the record is clear that the defendant (1) was indigent, and (2) was not provided counsel, and (3) did not waive counsel]. In such case, do not count the conviction. Similarly, if the offender has applied to have a conviction vacated and provides evidence (e.g., a letter from the court clerk) that the required records are unavailable, do not count the conviction. *Note:* If a conviction found to be invalid is nonetheless supported by persuasive information that the offender committed the criminal act, this information may be considered as a negative indicant of parole prognosis (i.e., a possible reason for overriding the salient factor score).

A.8 Ancient Prior Record. If both of the following conditions are met: (1) the offender's only countable convictions under Item A occurred at least ten years prior to the commencement of the current offense behavior (the date of the last countable conviction under Item A refers to the date of the conviction, itself, not the date of the offense leading to conviction), and (2) there is at least a ten year commitment free period in the community (including time on probation or parole) between the last release from a countable commitment (under Item B) and the commencement of the current offense behavior; then convictions/commitments prior to the above ten year period are not to be counted for purposes of Item A, B, or C. *Note:* This provision does not preclude consideration of earlier behavior (e.g., repetition of particularly serious or assaultive conduct) as a negative indicant of parole prognosis (i.e., a possible reason for overriding the salient factor score). Similarly, a substantial crime free period in the community, not amounting to ten years, may, in light of other factors, indicate that the offender belongs in a better risk category than the salient factor score indicates.

A.9 Foreign Convictions. Foreign convictions (for behavior that would be criminal in the United States) are counted.

A.10 Tribal Court Convictions. Tribal court convictions are counted under the same terms and conditions as any other conviction.

A11. Forfeiture of Collateral. If the only known disposition is forfeiture of collateral, count as a conviction (if a conviction for such offense would otherwise be counted).

A.12 Conditional/Unconditional Discharge (New York State). In N.Y. State, the term "conditional discharge" refers to a conviction with a suspended sentence and unsupervised probation; the term "unconditional discharge" refers to a conviction with a suspended sentence. Thus, such N.Y. State dispositions for countable offenses are counted as convictions.

ITEM B. PRIOR COMMITMENTS OF MORE THAN THIRTY DAYS (ADULT OR JUVENILE) [[None=-2; One or two=1; Three or more=0]]

B.1 Count all prior commitments of more than thirty days (adult or juvenile) resulting from a conviction/adjudication listed under Item A, except as noted below. Also count commitments of more than thirty days imposed upon revocation of probation or parole where the original probation or parole resulted from a conviction/adjudication counted under Item A.

B.2 Count only commitments that were imposed prior to the commission of the last overt act of the current offense behavior. Commitments imposed after the current offense are not counted for purposes of this item. Concurrent or consecutive sentences (whether imposed as the same time or at different times) that result in a continuous period of confinement count as a single commitment. However, a new court commitment of more than thirty days imposed for an escape/attempted escape or for criminal behavior committed while in confinement/escape status counts as a separate commitment.

B.3 Definitions—

(a) This item only includes commitments that were actually imposed. Do not count a suspended sentence as a commitment. Do not count confinement pending trial or sentencing or for study and observation as a commitment unless the sentence is specifically to "time served". If a sentence imposed is subsequently reconsidered and reduced, do not count as a commitment if it is determined that the total time served, including jail time, was 30 days or less. Count a sentence to intermittent confinement (e.g., weekends) totalling more than 30 days.

(b) This item includes confinement in adult or juvenile institutions, and residential treatment centers. It does not include foster home placement. Count confinement in a community treatment center when part of a committed sentence. Do not count confinement in a CTC when imposed as a condition of probation or parole. Do not count self-commitment for drug or alcohol treatment.

(c) If a committed sentence of more then thirty days is imposed prior to the current offense but the offender avoids or delays service of the sentence (e.g., by absconding, escaping, bail pending appeal), count as a prior commitment. *Note:* Where the subject unlawfully avoids service of a prior commitment by escaping or failing to appear for service of sentence, this commitment is also to be considered in Items D and E. *Example:* An offender is sentenced to a term of three years confinement, released on appeal bond, and commits the current offense. Count as a previous commitment under Item B, but not under Items D and E. To be considered under Items D and E, the avoidance of sentence must have been unlawful (e.g., escape or failure to report for service or sentence).

ITEM C. AGE AT COMMENCEMENT OF THE CURRENT OFFENSE/PRIOR COMMITMENTS OF MORE THAN THIRTY DAYS (ADULT OR JUVENILE)

C.1 Score 2 if the subject was 26 years of age or more at the commencement of the current offense and has fewer than five prior commitments.

C.2 Score 1 if the subject was 20–25 years of age at the commencement of the current offense and has fewer than five prior commitments.

C.3 Score 0 if the subject was 19 years of age or less at the commencement of the current offense, or if the subject has five or more prior commitments.

C.4 Definitions—

(a) Use the age at the commencement of the subject's current federal offense behavior, except as noted under special instructions for federal probation/parole/confinement/escape status violators.

(b) Prior commitment is defined under Item B.

ITEM D. RECENT COMMITMENT FREE PERIOD (THREE YEARS)

D.1 Score 1 if the subject has no prior commitments; or if the subject was released to the community from his/her last prior commitment at least three years prior to commencement of his/her current offense behavior.

D.2 Score 0 if the subject's last release to the community from a prior commitment occurred less than three years prior to the current offense behavior; or if the subject was in confinement/escape status at the time of the current offense.

D.3 Definitions—

(a) Prior commitment is defined under Item B.

(b) Confinement/escape status is defined under Item E.

(c) Release to the community means release from confinement status (e.g., a person paroled through a CTC is released to the community when released from the CTC, not when placed in the CTC).

ITEM E. PROBATION/PAROLE/CONFINEMENT/ESCAPE STATUS VIOLATOR THIS TIME

E.1 Score 1 if the subject was not on probation or parole, nor in confinement or escape status at the time of the current offense behavior; and was not committed as a probation, parole, confinement, or escape status violator this time.

E.2 Score 0 if the subject was on probation or parole or in confinement or escape status at the time of the current offense behavior; or if the subject was committed as a probation, parole, confinement, or escape status violator this time.

E.3 Definitions

(a) The term probation/parole refers to a period of federal, state, or local probation or parole supervision. Occasionally, a court disposition such as 'summary probation' or 'unsupervised probation' will be encountered. If it is clear that this disposition involved no attempt at supervision, it will not be counted for purposes of this item. *Note:* Unsupervised probation/parole due to deportation is counted in scoring this item.

(b) The term 'parole' includes parole, mandatory parole, conditional release, or mandatory release supervision (i.e., any form of supervised release).

(c) The term 'confinement/escape status' includes institutional custody, work or study release, pass or furlough, community treatment center confinement, or escape from any of the above.

ITEM F. HISTORY OF HEROIN/OPIATE DEPENDENCE

F.1 Score 1 if the subject has no history of heroin or opiate dependence.

F.2 Score 0 if the subject has any record of heroin or opiate dependence.

F.3 Ancient Heroin/Opiate Record. If the subject has no record of heroin/opiate dependence within ten years (not counting any time spent in confinement), do not count a previous heroin/opiate record in scoring this item.

F.4 Definition. For calculation of the salient factor score, the term 'heroin/opiate dependence' is restricted to dependence on heroin, morphine, or dilaudid. Dependence refers to physical or psychological dependence, or regular or habitual usage. Abuse of other opiate or non-opiate substances is not counted in scoring this item. However, this does not preclude consideration of serious abuse of a drug not listed above as a negative indicant of parole prognosis (i.e., a possible reason for overriding the salient factor score in relation to this item).

Special Instructions—Federal Probation Violators

Item A Count the original federal offense as a prior conviction. Do not count the conduct leading to probation revocation as a prior conviction.

VOL 51
ISS 40
FE 28
1986
UMI

Item B Count all prior commitments of more than thirty days which were imposed prior to the behavior resulting in the current probation revocation. If the subject is committed as a probation violator following a 'split sentence' for which more than thirty days were served, count the confinement portion of the 'split sentence' as a prior commitment. *Note*: the prisoner is still credited with the time served toward the current commitment.

Item C Use the age at commencement of the probation violation, not the original offense.

Item D Count backwards three years from the commencement of the probation violation.

Item E By definition, no point is credited for this item. *Exception*: A case placed on unsupervised probation (other than for deportation) would not lose credit for this item.

Item F No special instructions.

Special Instructions—Federal Parole Violators

Item A The conviction from which paroled counts as a prior conviction.

Item B The commitment from which paroled counts as a prior commitment.

Item C Use the age at commencement of the new criminal behavior/parole violation behavior.

Item D Count backwards three years from the commencement of the new criminal behavior/parole violation behavior.

Item E By definition, no point is credited for this item.

Item F No special instructions.

Special Instructions—Federal Confinement/Escape Status Violators With New Criminal Behavior in the Community

Item A The conviction being served at the time of the confinement/escape status violation counts as a prior conviction.

Item B The commitment being served at the time of the confinement/escape status violation counts as a prior commitment.

Item C Use the age at commencement of the confinement/escape status violation.

Item D By definition, no point is credited for this item.

Item E By definition, no point is credited for this item.

Item F No special instructions.

29. 28 CFR 2.36(a)(1), *Rescission Guidelines*, is revised to conform to 28 CFR 2.21 concerning the grading of administrative violations as Category One. The revised paragraph reads as follows:

§ 2.36 Rescission Guidelines.

(a) * * *

(1) Administrative Rule Infraction(s) (including alcohol abuse) normally can be adequately sanctioned by postponing a presumptive or effective date by 0–60 days per instance of misconduct, or by 0–120 days in the case of use or simple possession of illicit drugs. Escape or other new criminal conduct shall be considered in accordance with the guidelines set forth below.

BILLING CODE 4410-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 286b

[OSD Administrative Instruction No. 81]

Privacy Act of 1974, as Amended; Privacy Program

AGENCY: Office of the Secretary, DOD.

ACTION: Final rule.

SUMMARY: This final rule revises the Office of the Secretary of Defense Privacy Program which implements the Privacy Act of 1974, as amended (5 U.S.C. 552a) within the Department. This revision supersedes a final rule (40 FR 55526) published on November 28, 1975, 32 CFR Part 286b—"Personal Privacy and Rights of Individuals Regarding Their Personal Records." This revision incorporates changes occasioned by DoD Directive 5400.11, June 9, 1982, and DoD Regulation 5400.11–R, August 31, 1983, both entitled: "Department of Defense Privacy Program."

EFFECTIVE DATE: January 13, 1986.

FOR FURTHER INFORMATION CONTACT: Ms Norma Cook, OSD Privacy Act Officer, Office of the Deputy Assisant Secretary of Defense (Administration), The Pentagon, Washington, D.C. 20301–1100. Telephone 202–697–2501 or AUTOVON 227–2501.

SUPPLEMENTARY INFORMATION: Subsection 3(f) of Privacy Act of 1974, as amended (Title 5 U.S.C. § 552a) requires that Federal agencies promulgate rules for implementing the Privacy Act. On November 28, 1975, the Office of the Secretary of Defense published a final rule (40 FR 55526), 32 CFR Part 286b, which implemented DoD Directive 5400.11 dated August 4, 1975 entitled: "Personal Privacy and Rights of Individuals Regarding Their Personal Records." DoD Directive 5400.11 entitled: "Department of Defense Privacy Program" was revised on June 9, 1982. This revision implements the above mentioned documents.

The Department of Defense has determined that this revision is not a major rule as defined by Executive Order 12291, is not subject to the relevant provisions of the Regulatory Flexibility Act of 1980 (Pub. L. 90–354) and does not contain reporting or recordkeeping requirements under the criteria of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

List of Subjects in 32 CFR Part 286b

Privacy.

Accordingly, Part 286b of 32 CFR is revised to read as follows:

PART 286b—PRIVACY PROGRAM

Sec.
286b.1 Reissuance and purpose.
286b.2 Applicability and scope.
286b.3 Definitions.
286b.4 Policy.
286b.5 Responsibilities.
286b.6 Procedures.
286b.7 Procedures for exemptions.
286b.8 Information requirements.

Authority: Privacy Act of 1974, Pub. L. 93–579, 88 Stat. 1896 (5 U.S.C. 552a)

§ 286b.1 Reissuance and purpose.

This part reissues Administrative Instruction No. 81 to update and implement basic policies and procedures outlined in Privacy Act of 1974, DoD 5400.11–R, OMB Circular No. A–108 (TM No. 4) and to provide guidance and procedures for use in establishing the Privacy Program in the Office of the Secretary of Defense (OSD) and those organizations assigned to OSD for administrative support.

§ 286b.2 Applicability and scope.

(a) This part applies to the OSD, Organization of the Joint Chiefs of Staff (OJCS), Inspector General of the Department of Defense (IG, DOD), Defense Advanced Research Projects Agency (DARPA), Uniformed Services University of the Health Sciences (USUHS) and other activities assigned to OSD for administrative support (hereafter referred to collectively as "OSD Components").

(b) This part covers record systems maintained by OSD Components and governs the maintenance, access, change, and release of information contained in OSD Component record systems, from which information pertaining to an individual is retrieved by a personal identifier.

§ 286b.3 Definitions.

Access. Any individual's review of a record or a copy of a record or parts of a system of records.

Disclosure. The transfer of any personal information from a system of records by any means of oral, written, electronic, mechanical, or other communication, to any person, private entity, or Government agency, other than the subject of the record, the

subject's designated agent, or the subject's legal guardian.

Individual. A living citizen of the United States or an alien lawfully admitted to the United States for permanent residence. The legal guardian of an individual has the same rights as the individual and may act on his or her behalf.

Individual Access. Access to information pertaining to the individual or his or her designated agent or legal guardian.

Maintain. Includes maintenance, collection, use or dissemination.

Personal Information. Information about an individual that is intimate or private, as distinguished from information related solely to the individual's official functions or public life.

§ 286b.4 Policy.

(a) It is DoD policy to protect the privacy of individuals involved in any phase of the personnel management process and to permit any individual to know what existing records pertain to him or her in any OSD Component covered by this part.

(b) Each office maintaining records and information about individuals shall ensure that their privacy is protected from unauthorized disclosure. These offices shall permit individuals to have access to, and to have a copy made of, all or any portion of records pertaining to them (except those referred to in Chapters 3 and 5, DoD 5400.11–R and to have an opportunity to request that such records be amended as provided by the Privacy Act of 1974. Individuals requesting access to their records shall receive concurrent consideration under the Privacy Act of 1974 and the Freedom of Information Act as amended, if appropriate.

(c) The heads of OSD Components shall maintain any record of an identifiable personal nature in a manner that is necessary and lawful. Any information collected must be as accurate, relevant, timely, and complete as is reasonable to ensure fairness to the individual. Adequate safeguards must be provided to prevent misuse or unauthorized release of such information.

§ 286b.5 Responsibilities.

(a) The Deputy Assistant Secretary of Defense (Administration) (DASD(A)), Office of the Assistant Secretary of Defense (Comptroller) OASD(c)), shall:

(1) Direct and administer the DoD Privacy Program for OSD Components.

(2) Establish standards and procedures to ensure implementation of and compliance with the Privacy Act of 1974, OMB Circular No. A–108 (TM No. 4), and DoD 5400.11–R.

(3) Serve as the appellate authority within OSD when a requester appeals a denial for amendment of a record or initiates legal action to correct a record.

(4) Evaluate and decide, in coordination with the General Counsel (GC), DoD, appeals resulting from denials of correction and/or amendments to records by OSD Components.

(5) Designate the Records Management Division, Correspondence and Directives Directorate, Washington Headquarters Services (WHS), as the office responsible for all aspects of the Privacy Act, except that portion pertaining to receiving and acting on public requests for personal records. As such, the Records Management Division, shall:

(i) Exercise oversight and administrative control of the Privacy Act Program in OSD and those organizations assigned to OSD for administrative support.

(ii) Provide guidance and training to organizational entities as required by the Privacy Act of 1974 and OMB Circular A–108 (TM No. 4).

(iii) Collect and consolidate data from OSD Components, and submit an annual report to the Defense Privacy Office, as required by the Privacy Act of 1974, OMB Circular A–108 (TM No. 4) and DoD 5400.11–R.

(iv) Coordinate and consolidate information for reporting all record systems, as well as changes to approved systems, to the Office of Management and Budget (OMB), the Congress, and the **Federal Register**, as required by the Privacy Act of 1974, OMB Circular No. A–108 (TM No. 4) and DoD 5400.11–R.

(v) Collect information from OSD Components, and prepare consolidated reports required by the Privacy Act of 1974 and DoD 5400.11–R.

(b) The Assistant Secretary of Defense (Public Affairs) (ASDC(A) shall:

(1) Designate the Director for Freedom of Information and Security Review, OASDP(A), as the point of contact for individuals requesting information or access to records and copies concerning themselves.

(2) Serve as the authority within OSD when requesters seek reconsideration of previously denied requests for access to records, and in coordination with the GC, DoD, and the DASD(A), evaluate and decide on such requests.

(c) The Director for Freedom of Information and Security Review shall:

(1) Forward requests for information or access to records to the appropriate OSD Component having primary responsibility for any pertinent system of records under the Privacy Act of 1974 or to OSD Components, under the Freedom of Information Act as amended.

(2) Maintain deadlines to ensure that responses are made within the time limits prescribed in DoD 5400.7–R, DoD Directive 5400.10 and this part.

(3) Collect fees charged and assessed for reproducing requested materials.

(4) Refer all matters concerning amendments of records and general and specific exemptions under the Privacy Act of 1974 to the proper OSD components.

(5) Authorize a specific field activity of an OSD Component to act as the point of contact for individuals requesting information or access to records or copies, under the Privacy Act of 1974 for which the field activity has primary responsibility. All authorizations by the ASD(PA) shall be coordinated with the heads of the OSD Component concerned.

(d) The General Counsel, DoD, shall:

(1) Coordinate with the Department of Justice (DoJ) on all OSD final denials of appeals for amending records, and review actions to confirm denial of access to records.

(2) Provide advice and assistance to the DASD(A) in the discharge of appellate and review responsibilities, and to the ASD(PA) on all access matters.

(3) Provide advice and assistance to OSD Components on legal matters pertaining to the Privacy Act of 1974.

(e) The Head of OSD Components shall:

(1) Designate an individual as the point of contact for Privacy Act matters; designate an official to deny initial requests for access to an individual's records or changes to records; and advise both DASD(A) and ASD(PA) of names of officials so designated.

(2) Report any new record system, or changes to an existing system, to the Records Administrator, ODASD(A), at least 90 days before the intended use of the system.

(3) Review all contracts that provide for maintaining records systems, by or on behalf of his or her office, to ensure within his or her authority, that language is included that provides that such systems shall be maintained in a manner consistent with the Privacy Act of 1974.

(4) Revise procurement guidance to ensure that any contract providing for the maintenance of a records system, by or on behalf of his or her office, includes language that ensures that such system will be maintained in accordance with the Privacy Act of 1974.

(5) Revise computer and telecommunications procurement policies to ensure that agencies review all proposed contracts for equipment and services to comply with the Privacy Act of 1974.

(6) Coordinate with Automatic Data Processing (ADP) and word processing managers providing services to ensure that an adequate risk analysis is conducted to comply with DoD 5400.11–R.

(7) Review all Directives that require forms or other methods used to collect information about individuals to ensure that the Privacy Act of 1974 is complied with.

(8) Establish administrative systems in OSD Component organizations to comply with the procedures listed in this part and DoD 5400.11–R.

(9) Coordinate with the Office of the General Counsel (OGC) on all proposed denials of access to records.

(10) Provide justification to the ASD(PA) when access to a record is denied in whole or in part.

(11) Provide the record to the ASD(PA) when the initial denial of a request for access to such record has been appealed by the requester, or at the time of initial denial when appeal seems likely.

(12) Maintain an accurate account of the actions resulting in a denial for access to a record or for the correction of a record. This account should be maintained so that it can be readily certified as the complete record of proceedings if litigation occurs.

(13) Ensure that all personnel who either have access to the system of records, of who are engaged in developing or supervising procedures for handling records in the system, are aware of their responsibilities for protecting personal information as established in the Privacy Act and DoD 5400.11–R.

(14) Forward all requests for access to records received directly from an individual to the ASD(PA) for appropriate suspense control and recording.

(15) Provide ASD(PA) with a copy of the requested record when the request is granted.

(f) The Director for Space Management and Services (SM&S), WHS, shall:

Upon request of the OSD Records Administrator, provide the necessary automated services through the OSD support system for publishing of data in the **Federal Register** as required by the Privacy Act of 1974.

(g) The Requester is responbible for:

(1) Submitting a request for access to a record or information, in person or in writing, to the Directorate for Freedom of Information and Security Review, (DFOI/SR), OASD(PA), Room 2C757, Pentagon, Washington, D.C. 20301–1155. The Requester must also:

(i) Establish his or her identity as outlined in DoD 5400.11–R.

(ii) Describe the record sought, and provide sufficient information to enable the material to be located (e.g., identification of system or records, approximate date it was initiated, originating organization, and type of document).

(iii) Comply with procedures provided in DoD 5400.11–R for inspecting and/or obtaining copies of requested records.

(2) Submitting a written request to amend the record to the system manager or to the office designated in the system notice.

§ 286b.6 Procedures.

(a) *Publication of Notice in the* **Federal Register**. (1) A notice shall be published in the **Federal Register** of any record system meeting the definition of a system of records defined in DoD 5400.11–R.

(2) Regarding new or revised records systems, each OSD Component shall provide the DASD(A) with 90 days advance notice of any anticipated new or revised system of records. This material shall be submitted to the Office of Management and Budget (OBM) and to Congress at least 60 days before use and to the **Federal Register** at least 30 days before being put into use, in order to provide an opportunity for interested persons to submit written data, views, or arguments to the OSD Components. Instructions on content and preparation are outlined in DoD Regulation 5400.11–R.

(b) *Access to Information on Records Systems.* (1) Upon request, and as provided by the Privacy Act, records shall be disclosed only to the individual they pertain to and under whose individual name or identifier they are filed, unless exempted by provisions stated in DoD 5400.11–R.

(2) There is no requirement under the Privacy Act of 1974 that a record be created or that an individual be given access to records that are not retrieved by name or other individual identifier.

(3) Granting access to a record containing personal information shall not be conditioned upon any requirement that the individual state a reason or otherwise justify the need to gain access.

(4) No verification of identity shall be required of an individual seeking access to records that are otherwise available to the public.

(5) Individuals shall not be denied access to a record in a system of records pertaining to themselves because those records are exempted from disclosure under DoD 5400.7–R. This regulation states that "an exempted record shall be made available upon request of any individual when, in the judgment of the releasing Component or higher authority, no significant, legitimate, governmental purpose would be served by withholding it under an applicable exemption."

(6) Individuals shall not be denied access to their records for refusing to disclose their Social Security Numbers (SSNs), unless disclosure of the SSN is required by statute, by regulation adopted before January 1, 1975, or if the record's filing identifier and only means of retrieval is by SSN.

(7) Any individual may request access to a record pertaining to him or her, in person or by mail, in accordance with the procedures outlined in paragraph (b)(8) of this section.

(8) Information necessary to identify a record is: the individual's name, date of birth, place of birth, identification of the records system as listed in the **Federal Register**, or sufficient information to identify the type of records being sought, and the approximate date the records might have been created. Any individual making a request for access to records in person shall come to the Directorate for Freedom of Information and Security Review, DFOI/SR, OASD(PA) Room 2C757, Pentagon, Washington, D.C. 20301–1155; and shall provide personal identification acceptable to the Director, DFOI/SR, to verify the individual's identity (e.g., driver's license, other licenses, permits, or passes used for routine identification purposes).

(9) If an individual wishes to be accompanied by a third party when seeking access to records or wishes to have the record released directly to a third party, the individual may be required to furnish a signed access authorization granting the third party access.

(10) Any individual submitting a request by mail for access to information shall address such request to the Directorate for Freedom of Information and Security Review, OASD(PA), Pentagon, Room 2C757, Washington, D.C. 20301–1155. The request shall include a signed notarized statement to verify his or her identity or an alternate verification for individuals, such as military members overseas who do not have access to notary services.

(11) The following procedures shall apply to requests for access to investigatory records:

(i) Individuals requesting access to investigatory records pertaining to themselves and for law enforcement purposes are processed under DoD 5400.11–R or DoD 5400.7–R depending on which regulation gives them the greater degree of access.

(ii) Individual requests for access to investigatory records pertaining to themselves compiled for law enforcement purposes (and in the custody of law enforcement activities) that have been incorporated into the records system, exempted from the access provisions of DoD 5400.11–R, will be processed in accordance with Section B, Chapter 5, DoD 5400.11–R. Individuals shall not be denied access to records solely because they are in the exempt system, but they will have the same access that they would receive under DoD 5400.7–R. (Also see subsection A.10., Chapter 3, DoD 5400.11–R).

(iii) Requests by individuals for access to investigatory records pertaining to themselves that are in records systems exempted from access provisions will be processed under subsection C.1. of Chapter 5, DoD 5400.11–R or DoD 5400.7–R, depending upon which regulation gives the greater degree of access. (See also subsection A.10., Chapter 3, DoD 5400.11–R).

(iv) Individual requests for access to investigatory records exempted from access under Section B, Chapter 5, DoD 5400.11–R that are temporarily in the hands of a noninvestigatory element for adjudicative or personnel actions, will be referred to the originating investigating agency. The requester will be informed in writing of these referrals.

(12) The following procedures shall apply to requests for illegible, incomplete, or partially exempt records:

(i) An individual shall not be denied access to a record or a copy of a record solely because the physical condition or format of the record does not make it readily available (e.g., deteriorated state or on magnetic tape). The document will be prepared as an extract, or it will be exactly recopied.

(ii) If a portion of the record contains information that is exempt from access, an extract or summary containing all of the information in the record that is releasable shall be prepared.

(iii) When the physical condition of the record makes it necessary to prepare an extract for release, the extract shall be prepared so that it will be understood by the requester.

(iv) The requester shall be informed of all deletions or changes to records.

(13) Medical records shall be disclosed to the individual they pertain to, unless a determination is made in consultation with a medical doctor, that the disclosure could have adverse effects on the individual's physical or mental health. Such information may be transmitted to a medical doctor named by the individual concerned.

(14) The individual may be charged reproduction fees for copies or records as outlined in DoD 5400.11–R.

(c) *Request To Amend Personal Information in Records Systems and Disputes.* (1) The Head of an OSD Component, or the designated official, shall allow individuals to request amendment to their records to the extent that such amendment does not violate existing statutes, regulations, or administrative procedures. Requests should be as brief and as simple as possible and should contain, as a minimum, identifying information to locate the record, a description of the items to be amended, and the reason for the change. A request shall not be rejected nor required to be resubmitted unless additional information is essential to process the request. Requesters shall be required to provide verification of their identity as stated in paragraph (b)(8) of this section to ensure that they are seeking to amend records pertaining to themselves, and not, inadvertently or intentionally, the records of others.

(2) The appropriate system manager shall mail a written acknowledgment to an individual's request to amend a record within 10 days after receipt, excluding Saturdays, Sundays, and legal public holidays. Such acknowledgment shall identify the request and may, if necessary, request any additional information needed to make a determination. No acknowledgment is necessary if the request can be reviewed, processed, and if the individual can be notified of compliance or denial within the 10-day period. Whenever practical, the decision shall be made within 30 working days. For requests presented in person, written acknowledgment may be provided at the time the request is presented.

(3) The Head of an OSD Component, or designated official, shall promptly take one of the following actions on requests to amend the records:

(i) If the OSD Component official agrees with any portion or all of an individual's request, he or she will proceed to amend the records in accordance with existing statutes, regulations, or administrative procedures, and inform the requester of the action taken. The OSD Component official shall also notify all previous holders of the record that the amendment has been made, and shall explain the substance of the correction.

(ii) If he or she disagrees with all or any portion of a request, the individual shall be informed promptly of the refusal to amend a record, the reason for the refusal, and the procedure established by OSD for an appeal as outlined in paragraph (c)(6) of this section.

(iii) If the request for an amendment pertains to a record controlled and maintained by another Federal agency, the request shall be referred to the appropriate agency, and the requester advised of this.

(4) The following procedures shall be used when reviewing records under dispute:

(i) In response to a request for an amendment to records, officials shall determine the accuracy, relevance, timeliness, or completeness of the requested record. The Head of an OSD Component, or designated official, shall develop tolerances for accuracy, relevance, and timeliness by giving consideration as to whether such tolerances could result in consequences adverse to the individual.

(ii) The Head of an OSD Component, or designated official, shall limit the review of a record to those items of information that clearly bear on any determination to amend the records and shall ensure that all those elements are present before determination is made.

(5) If the Head of an OSD Component, or designated official, after an initial review of a request to amend a record, disagrees with all or any portion of a record, he or she shall:

(i) Advise the individual of the denial and the reason for it.

(ii) Inform the individual that he or she may request a further review.

(iii) Describe the procedures for requesting such review including the name and address of the official to whom the request should be directed. The procedures should be as brief and simple as possible and should indicate where the individual can seek advice or assistance in obtaining such review.

(iv) Furnish a copy of the justification of any denial to amend a record to DASD(A).

(6) If an individual disagrees with the initial OSD determination, he or she may file a request for further review of the record. The request should be sent to the Deputy Assistant Secretary of Defense (Administration), Department of Defense, The Pentagon, Washington, DC 20301–1155, if the record is created and maintained by an OSD Component.

(7) If, after review, the DASD(A) further refuses to amend the record as requested, the DASD(A) shall advise the individual:

BEST COPY AVAILABLE

VOL 51
ISS 40
FE 28
1986
UMI

(i) Of the refusal and the reason for it.

(ii) Of his or her right to file a statement of the reason for disagreeing with the DASD(A)'s decision.

(iii) Of the procedures for filing a statement of disagreements.

(iv) That the statement filed shall be made available to anyone the record is disclosed to, together with a brief statement, at the discretion of the OSD Component, summarizing its reasons for refusing to amend the records.

(v) That prior recipients of copies of disputed records shall be provided a copy of any statement of dispute to the extent that an accounting of disclosure is maintained.

(vi) Of his or her right to seek judicial review of the DASD(A)'s refusal to amend a record.

(8) If, after the review, the DASD(A) determines that the record should be amended in accordance with the individual's request, the OSD Component shall amend the record, advise the individual, and inform previous recipients where an accounting of disclosure has been maintained.

(9) The final OSD determination on an individual's request for a review of the DASD(A)'s refusal to amend the record must be concluded within 30 days (excluding Saturdays, Sundays, and legal public holidays) after receipt by the proper office. If the DASD(A) determines that a fair and equitable review cannot be made within that time, the individual will be informed in writing of the reasons for the delay and of the approximate date the review is expected to be completed.

(d) *Disclosure of Disputed Information.* (1) After the DASD(A) has refused to amend a record and the individual has filed a statement under paragraph (c)(7) of this section, the OSD Component shall clearly annotate the record so that the proceeding is clear to any authorized person to whom the record is disclosed. The notation itself shall be integral to the record. Where an accounting of a disclosure has been made, the OSD Component shall advise previous recipients that the record has been disputed, and shall provide a copy of the individual's statement where requested.

(i) This statement shall be maintained to permit ready retrieval whenever the disputed portion of the record is to be disclosed.

(ii) When information that is the subject of a statement of dispute is subsequently disclosed, the OSD Component's designated official shall note which information is disputed and provide a copy of the individual's statement.

(2) The OSD Component shall include a brief summary of its reasons for not making a correction when disclosing disputed information. Such statement shall normally be limited to the reasons given to the individual for not amending the record.

(3) Copies of the OSD Component's summary will be treated as part of the individual's record; however, it will not be subject to the amendment procedure outlined in paragraph (c)(3) of this section.

(e) *Penalties*—(1) *Civil Action.* (i) An individual may file a civil suit against the United States for:

(A) Refusal to amend a record.

(B) Improper denial of the access to a record.

(C) Failure to maintain a record accurately.

(ii) An individual may also file a suit against the United States for failure to implement a provision of the Privacy Act when such failure leads to an adverse determination.

(iii) If the individual's suit is upheld, the court may direct the United States to pay the court costs and lawyer's fees.

(iv) When the individual can show that personal damage was done because an OSD officer or employee failed to comply with the provisions of the Privacy Act of 1974, the United States may be assessed damages by the court at a minimum of $1,000.

(2) *Criminal action.* (i) Criminal penalties may be imposed against an OSD officer or employee for willful unauthorized disclosure of information in the records, for failure to publish a notice of the existence of a record system in the **Federal Register**, or for gaining access to the individual's record under false pretenses (i.e., against any person who knowingly and willfully requests or obtains any record concerning another individual without legal authorization).

(ii) An OSD officer or employee may be fined up to $5,000 for a violation as outlined in paragraph (e)(2)(i) of this section.

(3) *Litigation Status Sheet.* Whenever a complaint citing the Privacy Act of 1974 is filed in a U.S. District Court against the Department of Defense, a DoD Component, or any DoD employee, the responsible system manager shall promptly notify the Defense Privacy Office. The litigation status sheet in DoD 5400.11–R provides a standard format for this notification. (The initial litigation status sheet shall, as a miniumum, provide the information required by items 1 through 6.) A revised litigation status sheet shall be provided at each stage of the litigation. When a court renders a formal opinion or judgment, copies of the judgment or opinion shall be provided to the Defense Privacy Office with the litigation status sheet reporting that judgment or opinion.

§ 286b.7 Procedures for exemptions.

(a) *General information.* The Secretary of Defense designates those Office of the Secretary of Defense (OSD) systems of records which will be exempt from certain provisions of the Privacy Act. There are two types of exemptions, general and specific. The general exemption authorizes the exemption of a system of records from all but a few requirements of the Act. The specific exemption authorizes exemption of a system of records or portion thereof, from only a few specific requirements. If an OSD Component originates a new system of records for which it proposes an exemption, or if it proposes an additional or new exemption for an existing system of records, it shall submit the recommended exemption with the records system notice as outlined in § 286b.6. No exemption of a system of records shall be considered automatic for all records in the system. The systems manager shall review each requested record and apply the exemptions only when this will serve significant and legitimate Government purpose.

(b) *General exemptions.* [Reserved]

(c) *Specific exemptions.* All systems of records maintained by any OSD Component shall be exempt from the requirements of 5 U.S.C. 552a(d) pursuant to subsection (k)(1) of that section to the extent that the system contains any information properly classified under Executive Order 11265, "National Security Information," dated June 28, 552a(d) pursuant to subsection (k)(1) of that section to the extent that the system contains any information properly classified under Executive Order 11265, "National Security Information," dated June 28, 1979, as amended, and required by the Executive Order to be kept classified in the interest of national defense or foreign policy. This exemption, which may be applicable to parts of all systems of records, is necessary because certain record systems not otherwise specifically designated for exemptions may contain isolated information which has been properly classified. The Secretary of Defense has designated the following OSD system of records described below specifically exempted from the appropriate provisions of the Privacy Act pursuant to the designated authority contained therein:

(i) *SYSID–DWHS P26, SYSNAME.* Protective Services File. Exemption.

This system of records is exempt from subsections (c)(3), (d), (e)(1), (e)(4), (G), (H), (I), and (f) of 5 U.S.C. 552a, which would require the disclosure of investigatory material compiled for law enforcement purposes; or a record maintained in connection with providing protective services to the President of the United States or other individuals pursuant to 18 U.S.C. 3056. If any individual is denied any right, privilege, or benefit that he would otherwise be entitled by Federal law, or otherwise be eligible, as a result of the maintenance of the material compiled for law enforcement purposes, the material shall be provided to that individual, except to the extent that its disclosure would reveal the identity of a source who furnished information to the Government under an express promise or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence. At the time of the request for a record, a determination will be made concerning whether a right, privilege, or benefit is denied or specific information would reveal the identity of a source.

Authority. 5 U.S.C. 552a(k) (2) and (3).

Reasons. These exemptions are necessary to maintain the confidentiality of the records compiled for the purpose of law enforcement, or protecting the President of the United States or others pursuant to 18 U.S.C. 3056.

(2) *SYSID–DWHS P28, SYSNAME.* The Office of the Secretary of Defense Clearance File:

Exemption. This system of records is exempt from subsections (c)(3) and (d) of 5 U.S.C. 552a, which would require the disclosure of investigatory material compiled solely for the purpose of determining access to classified information but only to the extent that disclosure of such material would reveal the identity of a source who furnished information to the Government under an expressed promise that the identity of the source would be held in confidence or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence. A determination will be made at the time of the request for a record concerning the specific information which would reveal the identity of the source.

Authority. 5 U.S.C. 552a(k)(5).

Reasons. This exemption is required to protect the confidentiality of the sources of information compiled for the purpose of determining access to classified information. This confidentiality helps maintain the Government's continued access to information from persons who would otherwise refuse to give it.

(3) *SYSID–DGC 04, SYSNAME.* Industrial Personnel Security Clearance Case Files.

Exemption. All portions of this system which fall under 5 U.S.C. 552a(k)(5) are exempt from the following provisions of Title 5 U.S.C. 552a: (c)(3); (d).

Authority. 5 U.S.C. 552a(k)(5).

Reasons. This system of records is exempt from subsections (c)(3) and (d) of Section 552a of 5 U.S.C. which would require the disclosure of investigatory material compiled solely for the purpose of determining access to classified information, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an expressed promise that the identity of the source would be held in confidence, or prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence. A determination will be made at the time of the request for a record concerning whether specific information would reveal the identity of a source. This exemption is required in order to protect the confidentiality of the sources of information compiled for the purpose of determining access to classified information. This confidentiality helps maintain the Government's continued access to information from persons who would otherwise refuse to give it.

(4) *SYSID–DWHS P32, SYSNAME.* Standards of Conduct Inquiry File. Exemption. This system of records is exempted from subsections (c)(3) and (d) of 5 U.S.C. 552a, which would require the disclosure of: investigatory material compiled for law enforcement purposes; or investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, or Federal contracts, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence. If any individual is denied any right, privilege, or benefit that he would otherwise be entitled by Federal law, or otherwise be eligible, as a result of the maintenance of investigatory material compiled for law enforcement purposes, the material shall be provided to that individual, except to the extent that its disclosure would reveal the identity of a source who furnished information to the Government under an express promise or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence. At the time of the request for a record, a determination will be made concerning whether a right, privilege, or benefit is denied or specific information would reveal the identity of a source.

Authority. 5 U.S.C. 552a(k) (2) and (5).

Reasons. These exemptions are necessary to protect the confidentiality of the records compiled for the purpose of: enforcement of the conflict of interest statutes by the Department of Defense Standards of Conduct Counselor, General Counsel, or their designees; and determining suitability, eligibility or qualifications for Federal civilian employment, military service, or Federal contracts of those alleged to have violated or caused others to violate the Standards of Conduct regulations of the Department of Defense.

(5) *SYSID–DUSDP 02, SYSNAME.* Special Personnel Security Cases.

Exemption. All portions of this system which fall under 5 U.S.C. 552a(k)(5) are exempt from the following provisions of 5 U.S.C. 552a: (c)(3); (d).

Authority: 5 U.S.C. 552a(k)(5).

Reasons. This system of records is exempt from subsections (c)(3) and (d) of 5 U.S.C. 552a which would require the disclosure of investigatory material compiled solely for the purpose of determining access to classified information, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an expressed promise that the identity of the source would be held in confidence or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence. A determination will be made at the time of the request for a record concerning whether specific information would reveal the identity of a source. This exemption is required in order to protect the confidentiality of the sources of information compiled for the purpose of determining access to classified information. This confidentiality helps maintain the Government's continued access to information from persons who would otherwise refuse to give it.

Proposed Rules

Federal Register
Vol. 51, No. 40
Friday, February 28, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

9 CFR Part 319

[Docket No. 84-019P]

Deletion of Certain Labeling Requirements for "Pork With Barbecue Sauce" or "Beef With Barbecue Sauce"

Correction

In FR Doc. 86-3900 beginning on page 6415 in the issue of Monday, February 24, 1986, make the following correction:

On page 6415, first column, in the "**DATE**" paragraph, "1966" should have read "1986".

BILLING CODE 1505-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 332

Powers Inconsistent With Purposes of Federal Deposit Insurance Law; Insurance and Real Estate Underwriting, etc.

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Extention of deadline for consideration, adoption, and publishing of final rule.

SUMMARY: This notice serves to extend the period of time which the FDIC may take under its internal policy statement for the consideration, adoption, and publishing of the FDIC's final rule on participation by insured banks in real estate development and insurance underwriting activities.

DATE: The deadline for final agency action on the proposed rule is extended to September 8, 1986.

FOR FURTHER INFORMATION CONTACT: Pamela E.F. LeCren, Senior Attorney, Legal Division, (202/898-3743) Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, DC 20429.

SUPPLEMENTARY INFORMATION: The FDIC's Statement of Policy on Development and Review of Rules and Regulations (44 FR 31007, 1979) states that it is the intention of the FDIC to formally withdraw any proposed regulation on which final action by the Board of Directors has not been taken within nine months from the date the regulation was last published for comment. The FDIC published on June 7, 1985 a proposed amendment to Part 332 of FDIC's regulations governing "Powers Inconsistent with the Purposes of Federal Deposit Insurance". (50 FR 23964, June 7, 1985). The proposed amendment would have, among other things, prohibited insured banks, subject to certain exceptions, from directly engaging in real estate development and insurance underwriting activities and established certain restrictions on the indirect conduct of such activities.

Pursuant to the FDIC's policy, final action on this proposed regulation should be taken by March 7, 1986 in order to avoid withdrawal of the proposed rule. Inasmuch as FDIC staff are still actively reviewing the June 7, 1985 proposal and two members of the FDIC's three member Board of Directors have changed since the regulation was published for comment, the FDIC's Board of Directors has determined that additional time is necessary for the staff to complete its review and for the Board of Directors to familiarize itself with the subject matter dealt with by the proposal. As withdrawing the proposal and initiating the rulemaking process anew will cause unnecessary delay, the Board of Directors has determined to extend the deadline for final agency action on the proposed regulation to September 8, 1986 by publication of this notice.

By order of the Board of Directors, 24th day of February, 1986.

Hoyle L. Robinson,

Executive Secretary.

[FR. Doc. 86-4397 Filed 2-27-86; 8:45 am]

BILLING CODE 6714-01-M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 121

Small Business Size Standards; Shipbuilding and Ship Repair Size Standard

AGENCY: Small Business Administration.

ACTION: Proposed rule.

SUMMARY: On June 27, 1985, SBA published in the Federal Register a Notice of Inquiry soliciting the public's views concerning the appropriateness of retaining the ship repair component of the Shipbuilding and ship repair size standard at 1,000 employees. This notice referred to a special preliminary study by the SBA which indicated that the size standard in both shipbuilding and ship repair activities should be retained at 1,000 employees. Public response to this notice has now strongly supported this point of view and SBA is now formally notifying the public that it will retain the 1,000-employee size standard for both shipbuilding and ship repair activities.

FOR FURTHER INFORMATION CONTACT: Robert N. Ray, Size Standards Staff, (202) 653-6373.

SUPPLEMENTARY INFORMATION: In the notice of June 27, 1985 (50 FR 26582), the Size Standards Staff treated the shipbuilding and ship repair industry (SIC-3731) as if it were two separate industries—the shipbuilding industry and the ship repair industry. It asked the question whether either activity, when analyzed as a distinct industry, should merit a different size standard than 1,000 employees. It took two broad elements into consideration—the industrial structure of these two "industries" and the procurement needs of the Government.

In considering the industrial structure of the two activities, the seven factors described in our regulation were considered using indexes which included the concentration ratio (percent of total sales received by the four most dominant firms in the industry), the average firm size in receipts, coverage (the proportion of firms falling under the size standard), the size distribution of Government contracts, and the proportion of Federal contract dollars awarded small firms either through the set-aside or the unrestricted process.

These factors in general supported the view that a 1,000-employee size standard is appropriate for both shipbuilding and ship repair activities. Both activities have been dominated by a few very large firms and this pattern suggests relatively high size standards. Only one factor—size of contract—seemed to imply that a lower size

VOL 51
ISS 40
FE 28
1986
UMI

standard than 1,000 employees might be appropriate for ship repair activities. However, this factor was clearly outweighed by the other factors, each suggesting that a high or very high size standard would be appropriate.

Other considerations tied to the procurement needs of the Government also argued strongly against a lower standard for either shipbuilding or ship repair activities. Updated data from the Department of Defense continued to indicate that set-aside contracts are distributed among a number of firms rather than concentrated among only a few firms. Moreover, the overall sophistication and reporting requirements of the Department of Defense would seem to imply a size standard in the 1,000-employee range to satisfy the procurement needs of the Federal Government.

The public response to the notice of June 27, 1985, also strongly supported a 1,000-employee size standard in both activities. Out of 32 commentors, 25 opposed the lower size standards, most perceiving the drive for a lower size standard as an attempt by very large firms to undercut the set-aside program by making it less attractive for the Department of Defense to set aside contracts. (A lower size standard would probably result in fewer set-aside contracts since there would be fewer eligible firms to compete for set-aside contracts).

From the seven commentors supporting the lower size standard of 500 employees in ship repair activities, only two issues were considered significant by SBA. These will each be reviewed.

Criticism: Contract data related to nuclear work awards should be separated from non-nuclear contract work for reason of analysis. Data for firms specializing in nuclear work should be separated from data for firms without nuclear capability since the two groups of firms only rarely compete for the same contracts. A separation of the data, from this perspective would show the non-nuclear component of the industry to be composed of smaller sized firms with smaller sized contracts and this in turn would suggest a lower size standard for ship repair activities.

Response: SBA believes that there is no logical basis to excluding data relating to certain firms based on their capital equipment or capabilities. Such a policy would require an additional standard for separating out acceptable data from other data simply because different equipment was involved. Moreover, the argument could be never ending with firms at every level arguing that they are not able to compete with larger sized firms because of capital equipment limitations.

Criticism: SBA should consider regional size standards for ship repair activities because the West and East Coast differ in the incidence of set-asides.

Response: The SBA has never considered varying size standards on a regional basis within particular industries as a viable alternative to a nationwide size standard. At present we have over 800 nationwide size standards and further subdivision based on regional variations could lead to thousands of different size standards with great administrative difficulties and considerable confusion. Moreover, inequities would arise since arbitrary geographical lines would define size standards and firms in one area of the nation would be treated differently from firms in another area in the same industry. There is a question whether such an unequal treatment would be legal. From an economic standpoint, firms might be motivated to change their area of operations simply because of size standard differences and this would be unfortunate from SBA's point of view. For these various reasons, SBA would be very reluctant to consider regional size standards even if it could be shown that significant regional differences exist.

The combination of SBA's internal analysis, the public's response and the strongly supportive view of the Navy has led SBA to the decision to retain the 1,000-employee size standard in both shipbuilding and ship repair activities. This size standard would appear to best meet the procurement needs of the Government as well as the needs of the small firm component of the industry at this point in time. Reinforcing the view that the ship repair size standard should be retained at 1,000 employees rather than lowered to 500 employees is the fact that only 12 percent of all Federal dollars for ship overhaul and repair work over the 1983–84 period was set aside for small firms. Accordingly the industry is now formally notified that SBA has decided to retain the size standard for both shipbuilding and ship repair activities at 1,000 employees, based on the structure of the industry and the procurement needs of the Government.

Dated: February 11, 1986.

Robert A. Turnbull,

Acting Administrator.

BILLING CODE [illegible]-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 86–NM–07–AD]

Airworthiness Directives; Lockheed-Georgia Company Model 1329 Series Airplanes (Jetstar), Equipped With Auxiliary Power Unit (APU) in Accordance With STC 1043WE or STC SA3297WE

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD) that would require the replacement of the auxiliary power unit fuel supply shutoff valve with a modified valve on Lockheed 1329 airplanes equipped with Auxiliary Power Unit (APU) in accordance with Supplemental Type Certificate (STC) 1043WE or (STC) SA3292WE. This action is prompted by several incidents of fuel fumes entering the passenger compartment through the APU air inlet and air conditioning system from APU fuel control leaks in the APU compartment. This action is necessary to minimize the potential for fuel fumes entering the passenger compartment.

DATE: Comments must be received on or before April 22, 1986.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 86–NM–07–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from Airesearch Aviation Company, Customer Support Department, 6201 West Imperial Highway, Los Angeles, California 90045, or Lockheed-Georgia Company, 86 South Cobb Drive, Marietta, Georgia 30063, Attention: J. A. Smith. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Romy Santiago, Aerospace Engineer, Propulsion Branch, ANM–140L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California 90808; telephone (213) 548–2835.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communication received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rule Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 86–NM–07–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

There have been at least seven reports of fuel fumes entering the passenger compartment through the APU air inlet and air conditioning system from APU fuel control leaks in the APU compartment on Lockheed-Georgia Model 1329 series airplanes. The FAA is aware of five incidents due to failure of components on the APU fuel control unit.

To correct this situation, Airesearch Aviation Company, the holder of the Supplemental Type Certificates (STC) on the APU installation, issued Service Bulletin No. 11.37, dated December 19, 1984, recommending replacement of the APU fuel supply shutoff value, Valcor V4700–13, with a modified value, Valcor V4700–130, having pressure relief capability, and visual inspection of the APU fuel control governor cover sealing joint for seal ring protrusion, cover distortion, or fuel leaks. Accomplishment of the inspection and modification described in Service Bulletin No. 11.37 is intended to minimize these fuel leaks and reduce the potential of fuel fumes from entering the passenger compartment.

Since this condition is likely to exist or develop in other airplanes of the same type design, an airworthiness directive is being proposed which would require the replacement of the APU fuel supply shutoff valve with a modified valve and a visual inspection and replacement, if necessary, of the APU fuel control in accordance with the service bulletin previously mentioned.

It is estimated that 77 airplanes of U.S. registry would be affected by this AD, that it would take approximately 4 manhours per airplane to accomplish the required action, and that the average labor cost would be $40 per manhour. Repair parts are estimated at $726 per airplane. Based on these figures, the total cost impact of the AD is estimated to be $68,222.

For these reasons, the FAA has determined that this document: (1) Involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because of the minimal cost of compliance per airplane ($886.). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Lockheed-California Company: Applies to Lockheed Jetstar Model 1329 and Jetstar II series airplanes, equipped with Airesearch Aviation Company Model 30–92 Auxiliary Power Unit (APU) in accordance with STC SA1043WE or STC SA3297WE. Compliance required as indicated, unless previously accomplished.

To minimize the potential for fuel fumes entering the passenger compartment, accomplish the following:

A. Within the next 600 hours time-in-service or 12 months after the effective date of this AD, whichever occurs earlier:

1. Install an improved APU fuel supply shutoff valve, Valcor P/N V4700–130, in accordance with Airesearch Aviation Company Service Bulletin No. 11.37, dated December 19, 1984, or later revisions approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region; and

2. Visually inspect and replace, if necessary before further flight, the sealing joint of the fuel control governor cover for fuel leaks, seal (O-ring) extrusion, and cover distortion, in accordance with the Airesearch Aviation Company service bulletin mentioned above.

B. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

C. Alternate means of compliance which provide an acceptable level of safety may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

All persons affected by this proposal who have not already received the appropriate service document from the manufacturer may obtain copies upon request to the Lockheed-Georgia Company, 86 South Cobb Drive, Marietta, Georgia 30063, Attention: J. A. Smith; or Airesearch Aviation Company, Customer Support Department, 6201 West Imperial Highway, Los Angeles, California 90045. This document may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at 4344 Donald Douglas Drive, Long Beach, California.

Issued in Seattle, Washington, on February 21, 1986.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

[FR Doc. 86–4306 Filed 2–27–86; 8:45 am]

[Docket No. 85–NM–158–AD]

Airworthiness Directives; McDonnell Douglas Model DC–10–10, –15, –30, –40, and KC–10A (Military) Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD) that would require replacement or modification of tank 1, 2, and 3 transfer pump check valves and associated pressure switches, and installation of additional surge relief valves. This action is prompted by numerous incidents in which failures occurred in fuel transfer lines. This action is necessary to

VOL 51
ISS 40
FE 28
1986
UMI

minimize the potential of unusable fuel being trapped in any of the wing tanks and possible fuel imbalance, resulting in a reduction of airplane control or loss of range, or both.

DATES: Comments must be received on or before April 22, 1986.

ADDRESS: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 85–NM–158–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1–750 (54–60). This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 4344 Donald Douglass Drive, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Romy L. Santiago, Aerospace Engineer, Propulsion Branch, ANM–140L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California 90808; telephone (213) 548–2835.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communication received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rule Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 85–NM–158–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

Operators have reported 22 instances of incontrolled fuel transfer to the center wing auxiliary fuel tank from wing tanks 1, 2, and 3 after refueling, caused by a fuel line break or fuel couplings separation. In one case, the fuel line break was large enough to prevent fuel transfer from the auxiliary tank. Investigation has revealed that a fuel coupling separation or a fuel line break in the center wing crossfeed manifold can allow fuel to gravity-feed from the wing tanks to the center wing tank through the wing tank transfer pumps. These pumps have a check valve at the pump outlet which opens at a relatively low pressure.

McDonnell Douglas issued DC–10 Service Bulletin 28–140 in May 1984, which describes the installation of replacement transfer pump check valves which have a higher opening pressure, and the replacement of associated doubler assemblies and pressure switches. Revision 1 of Service Bulletin 28–140, dated October 16, 1985, incorporates notes which coordinate with Service Bulletin 28–163.

In related problems, operators have reported over 80 instances of damaged fuel system check valves, broken welds, deformed flanges, and separated couplings. Investigation has revealed that these conditions were caused by excessive surge pressure being generated from the aircraft fill shutoff valves. If not corrected, these conditions could result in component and pipe failures, with a consequential inability to transfer fuel, dump fuel, or crossfeed fuel, and possible excessive unusable fuel or lateral imbalance.

Accordingly, McDonnell issued DC–10 Service Bulletin (S/B) 28–163, dated October 16, 1985, which recommends modification of the fill shutoff valve tube/tee assemblies and existing surge relief valves in tanks 1 and 3, and installation of new surge relief valves in tank 2.

The FAA intends to specify a common compliance time for the accomplishment of both DC–10 S/B 28–140 and DC–10 S/B 28–163. Since the former service bulletin was issued in May 1984 and laboratory tests by McDonnell Douglas have proved the seriousness and magnitude of the fill valve pressure surge problem, the final compliance time specified by the FAA would be 3,000 flight hours or one year, whichever occurs first. It is appropriate to assume that operators will accomplish both service bulletins at the same maintenance check.

Since this condition is likely to exist or develop on other DC–10 airplanes of the same type design, and airworthiness dircetive (AD) is being proposed which would require modification of the transfer pump check valves and associated pressure switches, and installation of additional surge relief valves in accordance with McDonnell Douglas DC–10. Service Bulletin 28–140, Revision 1, date October 16, 1985 and Service Bulletin 28–163, dated October 16, 1985, or later revision approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

It is estimated that 189 airplanes of U.S. registry would be affected by this AD. I would require approximately 21 manhours per airplane to accomplish the required repair, and the average labor charge would be $40 per manhour. The cost of parts exclusive of surge relief valves is estimated at $5,284 per airplane. Based on these figures, the total cost impact of this Ad on U.S. operators would be $1,157,436.

For this reasons, the FAA has determined that this document: (1) Involves a proposed regulations which is not major under Exectuve Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because few, if any, Model DC–10 and KC–10A (Military) series airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action in contained in the regulatory docket.

Aviation safety, Aircraft.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulation as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a); 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

McDonnell Douglas; Applies to Model DC–10–10, –15, –30, and –40 and KC–10A (Military) series airplanes, certificated in any category.

Compliance is required as indicated, unless previously accomplished.

To preclude potential fuel feed line failures and resulting unusable fuel or fuel imbalance, complete the following:

A. Within the next twelve (12) months, or 3,000 flight hours, whichever occurs first, after the effective date of this Ad, complete the modifications and installations in accordance with the accomplishment instructions of McDonnell Douglas DC–10 Service Bulletin 28–140, Revision 1, dated October 16, 1985, and Service Bulletin 28–163, dated October 16, 1985, or later revisions approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

B. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

C. Alternate means of compliance which provide an acceptable level of safety may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

All persons affected by this proposal who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to the McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1–750 (54–60). These documents also may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at 4344 Donald Douglas Drive, Long Beach, California.

Issued in Seattle, Washington, on February 21, 1986

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 85–ANM–22]

Alteration of Billings, MT, Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the size of the Billing, Montana, Control zone. During an annual review of control zones, it was determined that the billings, control zone could be reduced in size and still contain the instrument approached to the Logan Field Airport.

DATES: Comments must be received on or before May 2, 1986.

ADDRESSES: Send comments on the proposal to: Manager, Airspace & System Management Branch, ANM–530, Federal Aviation Administration, Docket No. 85-ANM 22-17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

The official docket may be examined in the Regional Counsel's office at the same address.

An informal docket may also be examined during normal business hours at the address listed above.

FOR FURTHER INFORMATION CONTACT: Katherine G. Paul, ANM–535, Federal Aviation Administration, Docket No. 85–ANM–22, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168, Telephone: (206) 431–2530.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemeking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 85–ANM–22". The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking any action on the proposed rule.

The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination at the address listed above both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Airspace & System Management Branch, 17900 Pacific Highway South, C–68966, Seattle, Washington, 98168. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR part 71) to alter the size of the Billings, Montana, control zone to contain all Instrument Flight Rule arrivals and departures.

The PAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore; (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criterea of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Control zones/Aviation safety.

PART 71—[AMENDED]

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) proposes to amend § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. By amending § 71.171 as follows:

Billings, Montana (Revised)

That airspace extending upward from the surface within a 5-mile radius of the Logan International Airport (45°48'29" N lat./108°32'25" W long.) and within 2 miles each side of the 113° bearing from the airport extending from the 5-mile radius area to 7 miles east of the airport; and that airspace between the 220° bearing clockwise to the 170° bearing from the airport extending from the 5-mile radius area to a 6-mile radius.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 85-ANM-27]

Proposed Alteration of Helena Control Zone, Helena, MT.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Withdrawal of notice of proposed rulemaking (NPRM).

SUMMARY: This document withdraws a NPRM which proposed to change the status of the Helena Control Zone from full-time to part-time. The National Weather Service modified its hours of operation and weather observations were not available from 0000 to 0400. Since the issuance of the NPRM, the National Weather Service has resumed their 24-hour operation; and therefore, the change in the status of the Helena Control Zone is not necessary. Accordingly, the NPRM is withdrawn.

DATE: This withdrawal is effective February 28, 1986.

FOR FURTHER INFORMATION CONTACT: Katherine G. Paul, Airspace Technical Specialist, Federal Aviation Administration, Docket No. 85-ANM-27, 17900 Pacific Highway South, C-68966, Seattle, WA 98168, Telephone: (206) 431-2530.

SUPPLEMENTARY INFORMATION:

History

On August 29, 1985, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to change the status of the Helena Control Zone from full-time to part-time (50 FR 35100). The National Weather Service had modified its hours of operation and weather observations were not available from 0000 to 0400. Comments were requested from the public.

Since issuing the NPRM, the National Weather Service has informed FAA that they have resumed their 24-hour operation at Helena, Montana, and weather observations are available. Therefore, the change in the control zone status is not required and the NPRM is withdrawn.

Since this action only withdraws a NPRM, it may be made effective in less than 30 days. It is neither a proposal nor final rule; and therefore, is not covered under Executive Order 12291 or the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Control zones, Aviation safety.

The Withdrawal

Accordingly, pursuant to the authority delegated to me, the FAA withdraws a proposal to amend § 71.171 or Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

By withdrawing the NPRM published in the **Federal Register** on August 29, 1985 (50 FR 35100), FR Doc. 85-20606.

Issued in Seattle, Washington, on February 20, 1986.

14 CFR Part 71

[Airspace Docket No. 86-ASW-8]

Proposed Designation of Transition Area; Madisonville, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate a transition area at Madisonville, TX. The intended effect of the proposed action is to provide additional controlled airspace for aircraft executing a new standard instrument approach procedure (SIAP) to the Madisonville Municipal Airport. This action is necessary since there is a proposed VOR/DME SIAP to the Madisonville Municipal Airport utilizing the Leona VORTAC (LOA). This proposed action will benefit aircraft conducting instrument flight rules (IFR) activity at Madisonville Municipal Airport. Coincident with this proposed action, the airport status will be changed from visual flight rules (VFR) to IFR.

DATES: Comments must be received within 45 days after publication of this notice in the **Federal Register**.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 86-ASW-8, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

The informal docket may also be examined during normal business hours at the Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Forth Worth, TX.

FOR FURTHER INFORMATION CONTACT: David J. Souder, Airspace and Procedures Branch, ASW-535, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101; telephone: (817) 877-2622.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86-ASW-8." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, P.O. Box 1689, Fort Worth, TX 76101. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by designating a 700-foot transition area at the Madisonville Municipal Airport, Madisonville, TX. To enhance airport usage, a new instrument approach procedure is being developed for the Madisonville Muncipal Airport, utilizing the Leona VORTAC as a navigational aid. The establishment of a new instrument approach procedure based on this navigational aid entails designation of a transition area at Madisonville, TX, at and above 700 feet above ground level within which aircraft are provided air traffic control service. Transition areas are designed to contain IFR operations in controlled airspace during portions of the terminal operation and while transiting between the terminal and en route environment. The intended effect of this action is to ensure segregation of aircraft using the approach procedure under IFR and other aircraft operating under VFR. This proposed action will change the airport status from VFR to IFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400-6A dated January 2, 1985.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Control zones, Transition areas.

The Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revise Pub. L. 97-449, January 12, 1983); 14 CFR 11.65.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Madisonville, TX New

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the Madisonville Municipal Airport (latitude 30°54'40" N., longitude 95°57'05" W.).

Issued in Fort Worth, TX, on February 13, 1986.

Donald R. Guempel,

Acting Manager, Air Traffic Division, Southwest Region.

14 CFR Part 75

[Airspace Docket No. 85-AWA-51]

Proposed Establishment of Jet Routes—Expanded East Coast Plan

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: This supplemental notice corrects mistakes noted in the descriptions of J-208 in which "Hopeville, VA," should read "Hopewell, VA;" in J-210, where "Vance, SC" was inadvertently omitted; and J-209 to include "Norfolk, VA" as published in the **Federal Register** on January 21, 1986 (51 FR 2721). This proposal is a segment of the Expanded East Coast Plan (EECP) designed to make optimum use of the limited airspace along the east coast corridor.

DATES: Comments must be received on or before March 6, 1986.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Southern Region, Attention: Manager, Air Traffic Division, Docket No. 85-AWA-51, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8626.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 85-AWA-51." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

VOL 51 ISS 40 FE 28 1986 UMI

The Proposal

In this supplemental notice the FAA is changing the proposed amendment to Part 75 of the Federal Aviation Regulations (14 CFR Part 75) to correct mistakes noted in the original proposal published on January 21, 1986 (51 FR 2721). Also, the FAA proposes to extend J–209 from Tar River, NC, direct to Norfolk, VA. These route segments are a part of an overall plan designed to alleviate congestion and compression of traffic in the airspace between new England and Florida. This proposal is a portion of the EECP designed to make optimum use of limited airspace along the east coast corridor. Section 75.100 of Part 75 of the Federal Aviation Regulations was republished in Handbook 7400.6A dated January 2, 1985.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 75

Aviation safety, Jet routes.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 75 of the Federal Aviation Regulations (14 CFR Part 75) as follows:

1. The authority citation for Part 75 continues to read as follows:

Authority. 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. Section 75.100 is amended as follows:

J–206 [New]

From Athens, GA, via Liberty, NC; to Hopewell, VA.

J–209 [New]

From Greenwood, SC, via Tar River, NC; to Norfolk, VA.

J–216 [New]

From INT Savannah, GA, 266° T(267° M) and Vance, SC, 221° T(223° M) radials; Vance; to Wilmington, NC.

Issued in Washington, DC on February 21, 1986.

Shelomo Wuglater,

Manager, Airspace-Rules and Aeronautical Information Division.

[MM Docket No. 85–349]

Cable Television Systems; Carriage of Television Broadcast Signals

AGENCY: Federal Communications Commission.

ACTION: Extension of time for reply comments.

SUMMARY: Action taken herein extends the time for filing reply comments in response to the Notice of Inquiry and Notice of Proposed Rule Making in MM Docket No. 85–349. This Notice requested comments and specific rule proposals regarding matters concerning carriage of television broadcast stations by cable television systems. The extension of time was requested by Adelphia Communications Corporation *et al.*

DATES: Reply comments are due March 4, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Alan Stillwell, Mass Media Bureau, (202) 632–6302.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 76

Cable television.

The Proposed Rule in this proceeding was published on November 22, 1985 (50 FR 48232).

Order Extending Time for Filing Reply Comments

In the matter of amendment of Part 76 of the Commission's Rules Concerning Carriage of Television Broadcast Signals by Cable Television Systems (MM Docket No. 85–349)

Adopted: February 20, 1986.
Released: February 21, 1986.
By the Acting Chief, Mass Media Bureau.

1. On February 18, 1986, Adelphia Communications Corporation *et al.* filed a motion requesting that the reply comment date in this proceeding be extended until March 4, 1986. The extension is said to be needed in order to review the large number of initial comments and to formulate adequate replies to the complex issues raised therein.

2. Good cause having been shown, the requested time extension will be granted.

3. Accordingly, it is ordered that the time for filing reply comments in the above-captioned proceeding is extended to and including March 4, 1986.

4. This action is taken pursuant to authority found in section 4(i) and 303(r) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's Rules.

5. For further information concerning this proceeding, contact Alan Stillwell, Mass Media Bureau (202) 632–6302.

Federal Communications Commission.

BILLING CODE 6712-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Part 655

Labor Certification Process for the Temporary Employment of Aliens in Agriculture; Adverse Effect Wage Rate for Montana; Reopening of Comment Period

AGENCY: Employment and Training Administration, Labor.

ACTION: Proposed rule; reopening of comment period.

SUMMARY: This document reopens the comment period on a proposed rule to amend the regulations for the certification of temporary employment of nonimmigrant aliens in agriculture in the United States to add Montana to the list of States for which adverse effect wage rates (AEWRs) are computed and published annually. This action is taken to permit additional time for comments from interested parties.

DATE: The public is invited to submit written comments on the proposed rule on or before March 31, 1986.

ADDRESS: Send written comments to: Assistant Secretary of Labor, Employment and Training Administration Room 8100—Patrick Henry Building, 601 D Street, NW., Washington, D.C. 20213, Attention: Mr. Richard C. Gilliland, Director, U.S. Employment Service.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas M. Bruening. Telephone: 202–376–6228.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of December 10, 1985, at 50 FR 50311, the Employment and Training Administration (ETA) of the Department of Labor (DOL) published a notice of proposed rulemaking to amend its regulations at 20 CFR Part 655 for the certification of temporary employment of nonimmigrant aliens in agriculture in the United States to add Montana to the list of States in 20 CFR § 655.207(b)(2) for which adverse effect wage rates (AEWRs) are computed and published annually. The AEWR for Montana will be established and set to prevent the employment of these aliens from having an adverse effect on the wages of similarly employed United States workers.

The public was invited to submit written comments on the proposed rule to ETA on or before January 9, 1986. Many commenters submitting comments on the proposed rule requested an extension of the comment period, in part because the comment period included public holidays. They requested an extension of time to allow the public to submit additional information which they believe DOL should consider before a final decision is reached on the rulemaking.

DOL has determined, therefore, to grant the above-referenced requests, and, in this one instance in this rulemaking, to reopen the comment period for an additional 30 days after the publication of this notice in the **Federal Register**.

Accordingly, the comment period on the proposed rule published in FR Doc. 85–29279 at 50 FR 50311 on December 10, 1985, is hereby reopened for a period concluding on the date set forth above in the "DATE" section.

Signed at Washington, D.C., this 18th day of February, 1986.

William E. Brock,

Secretary of Labor.

BILLING CODE 4510-30-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 658

[FHWA Docket No. 86–5, Notice No. 2]

Truck Size and Weight; Specialized Equipment

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Supplementary information to advance notice of proposed rulemaking; extension of comment period.

SUMMARY: The following information supplements Docket 86–5 published at 50 FR 52940 on December 27, 1985. The maxi-cube design that is discussed herein, is in addition to, not in place of, the combination of vehicles described in the December 27, 1985, notice. The petitioner has requested that this particular combination of vehicles also be designated as specialized equipment under the provisions of Section 411(d) of the Surface Transportation Assistance Act of 1982 (STAA).

DATE: The comment period on this docket has been extended to March 17, 1986.

ADDRESS: Submit written comments, preferably in triplicate, to FHWA Docket No. 86–5, Notice No. 2, Federal Highway Administration, Room 4205, HCC–10, 400 Seventh Street, SW., Washington, D.C. 20590. All comments received will be available for examination at the above address between 8:30 a.m. and 3:30 p.m., ET, Monday through Friday, except legal holidays. Those desiring notification of receipt of comments must include a self addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. J.B. Smith, Office of Motor Carrier Transportation (202) 426–5370 or Mr. David C. Oliver, Office of the Chief Counsel, (202) 426–0825, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m., ET, Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: LHT Industries has filed an amended petition seeking a determination that an additional or alternative design also be classified as "specialized equipment" within the meaning of 411(d) of the STAA, 49 U.S.C. 2311(d). The alternative maxi-cube design is primarily different in that a two-axle truck (truck tractor) will be utilized rather than a three-axle power unit; the front cargo box (semitrailer) will be equipped with a single axle rather than no axles; the forward hold-down clamps securing the cargo box (semitrailer) to the truck (truck tractor) frame are eliminated; and the rear coupling pins are increased from 2 inches to 3 inches in diameter.

The front single-axle semitrailer on the newly proposed design is coupled to the tractor by conventional methods—kingpin and fifth wheel assembly plate. The front single-axle semitrailer is also secured at the rear of the tractor frame by 3-inch coupling pins that interface with the front semitrailer and provide semitrailer lateral and vertical stability. The kingpin and fifth wheel assembly act as a coupling and not a point of articulation. The second trailing semitrailer is connected by a drawbar coupling assembly to the rear of the front semitrailer and provides a single point of articulation. The total length of the combination of vehicles will not exceed 65 feet. (See Figures 1 and 2)

The FHWA is requesting public comments relative to this request by LHT Industries. The FHWA is primarily seeking comments and information on the following issues relating to the maxi-cube: maneuvering characteristics, safety, control, offtracking, crosswind effects and the need for overall length limits on such a configuration. The FHWA would also appreciate comments on the petitioner's stated advantages to this vehicle. Finally, FHWA would appreciate comments regarding the need to preempt current State regulation of this vehicle. Any other comments and information are invited.

The FHWA has determined, at this time, that this document contains neither a major rule under Executive Order 12291, nor a significant regulation under the regulatory policies and procedures of the Department of Transportation. This determination will be reevaluated and a draft regulatory evaluation will be prepared, if necessary, based upon the data received in response to this notice.

Based upon the information available to FHWA at this time, the action taken in this rulemaking will not have significant impact on a substantial number of small entities.

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 199

[DoD 6010.8–R, Amdt. No. 37]

Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Adjunctive Dental Benefit

AGENCY: Office of the Secretary, DoD.

ACTION: Proposed Amendment of Rule.

SUMMARY: This amendment to the DoD Regulation 6010.8–R (32 CFR 199) would revise the adjunctive dental benefit to allow for payment of dental care when performed in preparation for medical treatment of a disease or disorder or required as the result of iatrogenic dental trauma or complications caused by medically necessary treatment of an injury or a disease.

EFFECTIVE DATE: Written public comments must be received on or before March 31, 1986.

ADDRESS: Office of the Civilian Health and Medical Program of the Uniformed Services, OCHAMPUS, Policy Branch, Aurora, CO 80045.

FOR FURTHER INFORMATION CONTACT: David E. Bennett, Policy Branch, OCHAMPUS, Aurora, Colorado 80045, telephone 303–361–8608.

SUPPLEMENTARY INFORMATION: In FR Doc. 77–7834, appearing in the **Federal Register** on April 4, 1977 (42 FR 17972), the Office of the Secretary of Defense published its regulation, DoD 6010.8–4, "Implementation of the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS)," as Part 199 of this Title. This regulation was issued under the authority of and in accordance with Chapter 55, Title 10, United States Code.

Our previous interpretation of the regulatory implementation of section 1079(1) of this Title limited payment to that dental care which is medically necessary in the treatment of an otherwise covered medical (not dental) condition, is an integral part of the treatment of such medical condition, and is essential to the control of the primary medical condition. This specifically excluded restoration of teeth and their supporting structures when injured or affected during the medical or surgical management of the medical condition.

In a final appeal decision the Assistant Secretary of Defense Health Affairs determined that this interpretation had unduly narrowed the intent of the adjunctive dental care benefit and that CHAMPUS should include cost sharing of medically necessary adjunctive dental care when performed in preparation for medical treatment of a disease or disorder or required as a result of dental trauma or complications caused by medically necessary treatment of an injury or disease (iatrogenic). Dental care undertaken solely for the purpose of mitigating the consequences of the damage which may be caused by necessary medical treatment of an injury or a disease should be considered an integral part of the treatment of the medical condition rather than simply a preventative measure. Preventative care is defined as that care usually consisting of relatively benign measures which have a neutral or beneficial effect on the general health of the patient.

Since general implementing provisions limiting the adjunctive dental benefit to that care which is medically necessary in the treatment of an otherwise covered medical (not dental) condition have been difficult to understand by providers and beneficiaries, a list of covered conditions has been incorporated into this proposed rule. These include those conditions which were previously covered under the program and those that will be covered under the new benefit interpretation. The treatment of these and similar conditions identified by the Director of OCHAMPUS may be paid under the adjunctive dental benefit. This will allow program flexibility in considering rare conditions or unusual situations not found on the list. The OCHAMPUS Policy Manual will contain detailed procedural guidelines for processing and adjudication of adjunctive dental claims.

This amendment is being published in the **Federal Register** for proposed rulemaking at the same time it is being coordinated within the Department of Defense, and with other interested agencies so that consideration of both internal and external comments and publication of the final rule can be expedited.

List of Subjects in 32 CFR Part 199

Claims, Handicapped, Health insurance, and Military personnel.

PART 199—[AMENDED]

Accordingly, 32 CFR Part 199 is amended as follows:

1. The authority citation for Part 199 continues to read as follows:

Authority: 10 U.S.C. 1079, 1086, 5 U.S.C. 301.

2. Section 199.8 is amended by adding definitions for "adjunctive dental care" and "dental care" in the proper alphabetical order as follows:

§ 199.8 Definitions.

* * * * *

(b) * * *

Adjunctive Dental Care. Dental care which is medically necessary in the treatment of an otherwise covered medical (not dental) condition, is an integral part of the treatment of such medical condition and is essential to the control of the primary medical condition; or, is required in preparation for or as the result of dental trauma which may be or is caused by medically necessary treatment of an injury or disease (iatrogenic).

* * * * *

Dental Care. Services relating to the teeth and their supporting structures.

* * * * *

§ 199.10 [Amended]

3. Section 119.10 is amended by revising paragraphs (e)(10)(i), (e)(10)(ii) and the Note following paragraph (e)(10)(iv)(*h*) to read as follows:

* * * * *

(e) * * *

(10) * * *

(i) *Adjunctive Dental Care: Limited.* Adjunctive dental care is limited to those services and supplies provided under the following conditions:

(*a*) Dental care which is medically necessary in the treatment of an otherwise covered medical (not dental) condition, is an integral part of the treatment of such medical condition and is essential to the control of the primary medical condition. The following is a list of conditions for which CHAMPUS benefits are payable under this provision:

(*1*) Intraoral abscesses which extend beyond the dental alveolus.

(*2*) Extraoral abscesses.

(*3*) Cellulitis and osteitis which is clearly exacerbating and directly affecting a medical condition currently under treatment.

(*4*) Removal of teeth and tooth fragments in order to treat and repair facial trauma resulting from an accidental injury.

(*5*) Myofacial Pain Dysfunction Syndrome.

(*6*) Ankyloglossia.

(*7*) Adjunctive dental and orthodontic support for cleft palate.

(*8*) The prosthetic replacement of either the maxilla or the mandible due to the reduction of body tissues associated with traumatic injury (e.g., impact, gun shot wound), in addition to services related to treating neoplasms or iatrogenic dental trauma.

Note.—The test of whether dental trauma is covered is whether the trauma is solely

VOL
51

1986
UMI

dental trauma. Dental trauma, in order to be covered, must be related to, and an integral part of medical trauma; or a result of medically necessary treatment of an injury or disease.

(*b*) Dental care required in preparation for medical treatment of a disease or disorder or required as the result of dental trauma caused by the medically necessary treatment of an injury or disease (iatrogenic).

(*1*) Necessary dental care including prophylaxis and extractions when performed in preparation for or as a result of in-line radiation therapy for oral or facial cancer.

(*2*) Treatment of gingival hyperplasia, with or without periodontal disease, as a direct result of prolonged therapy with Dilantin (diphenylhydantoin) or related compounds.

(*c*) Dental care is limited to the above and similar conditions specifically prescribed by the Director, OCHAMPUS, as meeting the requirements for coverage under the provisions of this section.

(ii) *General Exclusions.*

(*a*) Dental care which is routine, preventative, restorative, prosthodontic, periodontic or emergency does not qualify as adjunctive dental care for the purposes of CHAMPUS except when performed in preparation for or as a result of dental trauma caused by medically necessary treatment of an injury or disease.

(*b*) The adding or modifying of bridgework and dentures.

(*c*) Orthodontia, except when directly related to and an integral part of the medical or surgical correction of a cleft palate or when required in preparation for, or as a result of, trauma to the teeth and supporting structures caused by medically necessary treatment of an injury or disease.

* * * * *

(e) * * *

(10) * * *

(iv) * * *

(*h*) * * *

Note.—Extraction of unerupted or partially erupted, malposed or impacted teeth, with or without the attached follicular or development tissues, is not a covered oral surgery procedure except when the care is indicated in preparation for medical treatment of a disease or disorder or required as a result of dental trauma caused by the necessary medical treatment of an injury or illness. Surgical preparation of the mouth for dentures is not covered by CHAMPUS.

Department of the Navy

32 CFR Part 701

Availability of Department of Navy Records and Publications of the Navy Documents Affecting the Public

AGENCY: Department of the Navy, DOD.

ACTION: Amendment to proposed rule.

SUMMARY: The Department of the Navy proposes to establish a specific exemption from certain provisions of the Privacy Act for a system of records.

DATES: Comments must be received on or before March 31, 1986.

ADDRESS: Send any comments to Mrs. Gwendolyn R. Aitken, Privacy Act Coordinator, Office of the Chief of Naval Operations (OP-09B30), Department of the Navy, The Pentagon, Washington, DC 20350.

FOR FURTHER INFORMATION CONTACT: Mrs. Aitken at the above address or telephone: 202/697-1459.

SUPPLEMENTARY INFORMATION: The Department of the Navy proposes to exempt certain provisions of system of records N05300-3, "Faculty Professional Files" under the provisions of 5 U.S.C. 552a (k)(5).

List of Subjects in 32 CFR Part 701

Privacy, Exemption, Investigative information, Records.

Accordingly, it is proposed to amend Subpart G of 32 CFR Part 701 as follows:

1. The authority citation for Part 701 continues to read as follows:

Authority: 5 U.S.C. 552, as amended by Pub. L. 93-502, 32 CFR Part 286 (40 FR 6190). Subpart E also issued under 32 CFR Part 296 (40 FR 4911), unless otherwise noted.

2. Add paragraph (n) to § 701.117.

PART 701—[AMENDED]

Subpart G—Privacy Act Exemptions

* * * * *

§ 701.117 Exemptions for specific Navy record systems.

* * * * *

(n) Naval Postgraduate School—(1) ID-N05300-3.

System name: Faculty Professional Files

Exemption: Portions of this system of records are exempt from the following subsections of Title 5 U.S.C. 552a: (c)(3), (d), e(4) (G) and (H), and (f).

Authority: 5 U.S.C. 552a (k)(5).

Reason: Exempted portions of this system contain information considered relevant and necessary to make a determination as to the qualifications, eligibility, or suitability for Federal employment, and was obtained by providing an express or implied promise to the source that his/her identity would not be revealed to the subject of the record.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 51 and 52

[AD-FRL-2903-8]

Requirements for Implementation Plans: Surface Coal Mines and Fugitive Emissions; Reopening of Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Reopening of public comment period.

SUMMARY: On October 26, 1984, EPA proposed rulemaking which would cause the fugitive emissions from surface coal mines to be considered in determinations of whether construction involving those entities would be required to obtain major source new source review (NSR) permits (49 FR 43211). In that notice, EPA announced that it was preparing a Regulatory Impact Analysis (RIA) of the subject proposal and would make that document available for public comment. By this notice, EPA announces that the RIA is available for review and that the public comment period is reopened.

The previous notice also prompted special concerns on the part of the mining industry with respect to certain generic issues arising from the review of fugitive emissions. The comment period is hereby reopened to receive further comment on those specific issues.

DATES: The comment period will remain open until April 29, 1986. The public hearing will be held on April 9, 1986, at 10:00 a.m.

ADDRESSES: Comments should be submitted (triplicate, if possible) to: Central Docket Section (LE-131A), EPA, 401 M Street, SW., Washington, D.C. 20460, Attention: Docket No. A-84-33.

Public hearing: Room 239, Federal Building, Corner of 20th Stout St., Denver, Colorado.

Docket: The EPA established a docket for this rulemaking, Docket No. A-84-33, in accordance with Section 307(d) of the Clean Air Act (Act), 42 U.S.C. 7607(d), and its contents will serve as the record in case of judicial review under that section. The docket is available for public inspection and copying between 8:00 a.m. and 4:00 p.m., Monday through Friday, at EPA's Central Docket Section, West Tower Lobby, Gallery I, 401 M Street, SW., Washington, D.C. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Mr. Kirt Cox, New Source Review Section, Office of Air Quality Planning and Standards, Research Triangle Park, North Carolina 27711 (telephone 919-541-5591, FTS-629-5591).

SUPPLEMENTARY INFORMATION:

I. Background

Pursuant to section 302(j) of the Act, fugitive emissions are included in determining whether a source is "major," for NSR purposes, "as determined by rule by the Administrator." On October 26, 1984, EPA proposed that surface coal mines be added to the list of 30 source categories for which fugitive emissions are included in determining whether a source is "major" (49 FR 43211).

The EPA based its proposal on the interpretation that Congress intended that the Agency make only two determinations before requiring that fugitive emissions be included in applicability determinations pursuant to Section 302(j) of the Act. The first of these is that the sources have the potential to degrade air quality significantly; the second is that no unreasonable socioeconomic impacts relative to benefits would result from subjecting the sources to NSR. The first finding is adequate to support a proposal to list. The EPA will promulgate a proposed listing unless public comment affirmatively demonstrates that unreasonable socioeconomic impacts would result. It was pursuant to this model that EPA made the subject proposal with respect to mines. The EPA has been collecting the rulemaking record relevant to the second finding.

In the proposal, EPA reported that it was preparing an RIA, as described in Executive Order 12291, in order to aid in the evaluation of special issues related to the proposed action. The EPA indicated that it would make the results of the analysis available to the public for comment before taking final action on the proposal (49 FR at 43212). This procedure was further described in EPA's notice of December 17, 1984 (49 FR 48948). In that notice EPA reported that, upon completion of the analysis, it would announce the RIA's availability by a **Federal Register** notice and reopen the public comment period.

II. Reopening of the Public Comment Period

By this notice, EPA announces the availability of the RIA and the reopening of the public comment period for comment on it. Copies of the study may be obtained, subject to available supplies, from EPA's Office of Air Quality Planning and Standards by contacting Mr. Cox at the address noted above. The analysis has also been placed in the official rulemaking docket (Docket No. A-84-33) and is available for inspection and copying at the time and place indicated above. Although the focus of this reopening of the comment period is on the RIA, further comment on the proposal with respect to surface coal mines and the generic fugitive emissions issues discussed below in Part IV, will be accepted. The public comment period with respect to the existing list of 30 source categories and to the relevance of section 302(j) to review of modifications has closed and is not being reopened.

III. The Regulatory Impact Analysis

A. Summary

The analysis evaluates the projected consequences of alternative approaches to regulating new and modified surface coal mines as major construction projects under new source review. It considers benefits, costs, and general environmental and economic impacts.

Four regulatory alternatives are examined:

1. Do not list surface coal mines (the status quo).
2. List all new surface coal mines, grandfather increment consumption.
3. List all new surface coal mines, do not grandfather increment consumption.
4. IV. List only surface coal mines impacting Class I and Mandatory Class II areas.

Five important coal basins are investigated for Alternative II: Powder River, San Juan, Fort Union, Illinois, and Appalachian. Powder River serves as a case study for Alternative III; Bryce Canyon National Park and Chaco Culture National Historic Park are reviewed relative to Alternative IV. These areas are evaluated for the year 1995.[1] The costs evaluated arise from application of best available control technology and, more importantly, from size limitations in surface coal mines because of ambient constraints. Benefit categories include mortality, morbidity, and soiling for Alternatives II and III, and visibility for Alternative IV. The study also examines national impacts involving coal price and production, and the cost of electricity

The costs determined under Alternative II and III, considerably exceed the benefits. The reason for this is that the modeling techniques employed indicate varying, but often significant, constraints on mine size as a result of prevention of significant deterioration (PSD) increment limitations. By contrast, relatively few people live in most mining basins; thus the benefits of cleaner air in those places are extremely limited. The results regarding Alternative IV are significantly different. Since less than 1 percent of the nation's coal reserves lie near Class I and Mandatory Class II areas, societal costs of regulation are expected to be relatively small. Benefits from protecting these areas of special scenic and ecologic importance can, however, be appreciable, although difficult to quantify.

It should be noted that the analysis of costs and benefits for Alternative IV is conducted with an assumption that no other regulatory program would protest Class I and Mandatory Class II areas from surface coal mines. It is possible, however, that other programs, notably the one operated by the Department of the Interior (DOI) pursuant to the Surface Mining Control and Reclamation Act, 30 U.S.C. 1201 *et seq.* could address similar problems. EPA therefore seeks comment on the effectiveness of such programs in protecting Class I and Mandatory Class II areas. EPA has requested an analysis of this issue from DOI. Responses will be placed in the rulemaking docket.

B. Role of the Study

This RIA has been prepared for two reasons. First, it satisfies the Executive Order 12291 requirement that major rulemakings consider economic consequences. Second, it was prepared for use in assisting the Administrator in making his decision on the final action on the October 26, 1984, proposal to list surface coal mines.

---

[1] For Alternative IV. Chaco Culture National Historic Park is evaluated for 1989 and Bryce Canyon is evaluated for 1996.

VOL 51 ISS 40 FE 28 1986 UMI

Legally, EPA has broad discretion in its use of the study. The Act allows economics to be taken into account in making this decision but does not mandate any specific test or standard.

The EPA sees this study as an important source of information for this decision-making process. Nonetheless, the Administrator will rely on the entire rulemaking record in making his final decision on this matter; no single document has a determinative role. The inherent imprecision in any such economic analysis makes it unwise to give conclusive weight to any finding that a particular alternative is simply economically more desirable than another. Also, a study cannot quantify in monetary terms all factors germane to the final decision. These more subjective concerns are explained briefly below.

Several factors limit the precision of the RIA. First, mines are unconventional sources that are not as readily evaluated as traditional industrial sources. They can appropriately be described as having a series of temporary, relocating emissions activities at one large, fixed location. Controversy also surrounds the application of many technical aspects of the review process. Modeling procedures are highly contested, as are certain emissions factor issues such as pit retention. Because the Act does not directly address the particular problems which mines may have but which are not experienced by most other sources of fugitive emissions, EPA had to make difficult policy assumptions which significantly affect the review of certain fugitive emissions points. Similarly, certain simplifying assumptions, such as basing the analysis on review of prototypical mines, are used in the analysis. All of the above factors have made preparation of the RIA more difficult, limit the precision of the analysis, and militate against relying solely on it.

A decision on a rulemaking involving important national issues should also consider issues beyond the scope of an economic study. For example, one or more of the regulatory options might have a pronounced effect upon national coal price or supply. Such an impact on the nation's energy supply could have ramifications to national security, trade balances, or international relations. Such factors are beyond the scope of regulatory analysis, and could be addressed with only limited precision in any case. Additionally, certain other factors, even though more traditionally economic in nature, are not evaluated by the study. For example, the study does not quantify costs of additional rail lines and other transportation systems required because the proposed regulations would potentially create more, smaller, surface mines. Nonetheless, such factors would add to the cost estimates and should be considered in the final decision.

Selection of the most reasonable option is thus not a simple process. The net benefit figures projected for various regulatory strategies by the RIA do not conclusively determine the relative values of these strategies. Instead, the final decision of whether to list will take into account many more factors than the numerical results of the study, most notably the record established by the commenters.

IV. Other Fugitive Emissions Issues

The October 26, 1984, proposal also reopened the public comment period on the existing list of 30 source categories for which fugitive emissions are included in determination of major source status. Further, the notice solicited comment on an interpretive ruling involving section 302(j) of the Act in relation to the review of modifications involving fugitive emissions at sources that are already "major."

Public comment on these matters was generally limited. However, representatives of the mining industry have expressed special additional concerns involving, generally, the definition of "source" which EPA uses in NSR applicability determinations. The essence of their argument is that some mines could be made subject to major preconstruction review even if EPA does not promulgate the proposed listing of surface coal mines. The EPA hereby solicits further comment on these matters.

At first look, the issue appears straightforward: if EPA list mines, fugitive emissions will be counted in future applicability determinations; if mines are not listed, fugitive emissions would not be counted. Since mines emit predominantly fugitive particulate matter, mines would not be subject to NSR because, without being listed pursuant to section 302(j) rulemaking, their potential to emit does not reach "major" status. That is, indeed, the case for isolated operations that engage solely in mining. However, mining associated with more conventional industrial activity may trigger NSR even if mines are not listed. This can arise from the definition of "source," as it pertains to standard industrial classification (SIC) groupings, to the concept of "support facility," or to EPA's requirements for modifications at sources already "major." These matters, described below, are vigorously addressed by some industry commenters, notably the American Mining Congress and National Coal Association.

The NSR regulations use the SIC code as the fundamental definitional tool for identifying the types of activities that are grouped together as a "source." This approach generally works well but poses a potential problem to the mining industry. For example, SIC 12, "bituminous coal and lignite mining," includes not only the mine proper but also coal preparation plants. Coal preparation plants are sometimes subject to NSR, especially since they are already listed with respect to the inclusion of fugitive emissions. "Coal cleaning plants (with thermal dryers)," a subset of coal preparation plants, is on the list of 30 for which fugitive emissions are counted in applicability determinations. In addition, there is a new source performance standard for coal preparation plants (40 CFR Part 60, Subpart Y). This standard was created prior to August 7, 1980, thereby rendering these sources as listed (*see e.g.*, 40 CFR 52.21(8)(4)(vii)(aa)).

These facts have two ramifications. First, stack and fugitive emissions at the coal cleaning plant would, of course, be summed in determining whether it would be a major stationary source. If the coal cleaning plant were "major," then the mine would also be brought into NSR, regardless of whether mines are listed. The reason for this is that these operations are typically aggregated as one source, since they belong to the same SIC, are adjacent and contiguous, and are under common control. Parties such as the National Coal Association indicate that coal cleaning plants are often not 100 tons-per-year sources, and, therefore, would not bring affiliated mines into review unless the fugitive emissions of the affected mines are taken into account. An additional issue arises, however, from the fact that strict construction of the regulations with respect to the SIC could result in the entire operation being a "listed" source. If this were the case, the *fugitive* emissions from the *mine* would be included in applicability determinations. This would result in PSD review in many such situations. The same issues can apply in cases involving other listed activities that may be operated with mines.

Second, a "support facility" for a source is considered as part of the primary source, even if it belongs to a different two-digit SIC code. "Support facilities" are defined by the 1980 preamble as "typically those which convey, store or otherwise assist in the production of the principal product" (45 FR 52695). Physical proximity is generally a key part of such a determination. It is possible to conclude that operations such as mine mouth power plants are a single source, thus bringing the mine into PSD review.

Mining industry commenters also expressed concern about the operation of the interpretation set forth for comment in the October 26, 1984, **Federal Register**. This interpretation is that section 302(j) of the Act, the definition of "major stationary source," focuses its rulemaking requirement with respect to fugitive emissions on whether a *source* is "major," not on the review of modifications involving fugitive emissions at sources already "major." Generally this would have no effect on mines. Since mines are not listed and since they do not have sufficient stack emissions to qualify as "major," this interpretive ruling would not affect them. (If mines were listed, this interpretive ruling would have no bearing on their review.) Once again, however, the aggregation of mines with industrial facilities could produce results which the mining industry contends are unreasonable unless EPA has first completed a listing under section 302(j). Modifications at a mine associated with a coal preparation plant, for example, could trigger NSR of the modification, even if its emissions increase consisted totally of fugitive emissions. Of course, if one of the approaches to source definition enunciated above is adopted, fugitives from mines at such aggregated sources would be reviewed directly. The interpretive ruling would not come into play. Thus, the definition of "source" is expected to remain the primary issue.

These issues present essentially the same concern as the more prominent issue of listing: how to provide any appropriate relief from review to the mining industry while not jeopardizing the more important general review of fugitive emissions from all other sources. This is an especially challenging task in view of the fact that the Act does not expressly provide for special treatment of this somewhat unconventional source category. Because this rulemaking addresses mining issues broadly, and also includes responses to the reopening of the public comment period on the list of 30 source categories,[8] EPA is addressing these new concerns in this rulemaking.

The American Mining Congress and other mining groups, after presenting comment on these specific matters, conclude by arguing that surface coal mines "simply are not the kinds" of sources and emissions which Congress intended to be subject to NSR. Their recommended solution is to change the definition of "building, structure, facility, or installation" in all NSR regulations—e.g., 40 CFR 52.21(b)(6)—so as to create an exemption from the standard aggregation of pollutant-emitting activities based on proximity, ownership, and SIC code. This exemption would be created "where the agency has designated a separate source category or grouping."

The EPA concludes that the current approach to "source" definition appears reasonable for virtually all sources. It is possible, however, that it may produce an untoward effect in the case of mines, for reasons argued by industry, if mines are found to be inappropriate for listing. The EPA, therefore, seeks comment on whether such an exemption, or any crafting of the section 302(j) rulemaking having similar effect, is justified for surface coal mines. The EPA anticipates that any such exemption would be granted only after a detailed examination of the nature of a particular source category and a finding that unusual circumstances justify this special treatment. It is also important that any such procedure for exemptions be crafted in a way so as not be jeopardize review of fugitive emissions from the great majority of sources for which an exemption would not be appropriate. The EPA, therefore, also solicits comment on what administrative procedures and safeguards might be appropriate for creating such an exemption.

V. Miscellaneous

A. Public Hearing

The EPA will hold a public hearing on April 9, 1986 at 10:00 a.m. in Room 239, Federal Building, Corner of 20th and Stout St., Denver, Colorado. The hearing will be informal. A panel of EPA staff will hear the oral presentations. There will be no cross-examination and no requirement that any person be under oath. Each member of the panel may seek clarification or amplification of any presentation. The presiding officer of the panel may set a time limit for each presentation and may restrict any presentation that would be irrelevant or repetitious. A transcript of the hearing will be made and placed in the rulemaking docket.

Any person who wishes to speak at the hearing should as soon as possible send written notice of this to EPA, give name, address, telephone number, and the length of the presentation. Anyone stating that this his or her presentation would be longer than 20 minutes should also state why it need be longer. Each notice should be sent to Mr. Kirt Cox at the address given at the beginning of this notice. The EPA will develop a schedule for presentations based on the notices it receives. Each speaker should bring extra copies of his or her presentation for the convenience of the hearing panel, the hearing reporter, the press, and other participants. The hearings will be open to the public.

B. Economic Impact Assessment

Section 307 of the Clean Air Act, 42 U.S.C. 7607, requires EPA to prepare an economic impact assessment in connection with proposal of any substantial revisions to existing regulations. This notice announces the availability of the economic analysis that EPA prepared in order to comply with Executive Order 12291 and which also satisfies the requirement for preparation of an economic impact assessment on the proposal to list strip mines. The EPA did not prepare an economic analysis of the new interpretation of section 302(j) as it relates to modifications because this is not a substantial revision. As discussed above, this interpretation will not bring many additional modifications under review.

Dated: February 18, 1986.

Charles L. Elkins,

Acting Assistant Administrator for Air and Radiation.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 86–003]

Scrapie Research on U.S. Army Dugway Proving Ground, UT; Finding of No Significant Impact

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of Finding of No Significant Impact.

SUMMARY: The Animal and Plant Health Inspection Service (APHIS) has prepared an environmental assessment for scrapie research using goats and sheep on the U.S. Army Dugway Proving Ground, Utah (DPG). On the basis of the assessment, the APHIS has determined no significant adverse effect on the environment will result from implementation of the selected alternative. Therefore, an environmental impact statement (EIS) on this program will not be prepared.

ADDRESS: A copy of the environmental assessment may be obtained from Dr. Chester A. Gipson, Special Diseases Staff, Veterinary Services, APHIS, USDA, Room 824, Federal Building, 6505 Belcrest Road, Hyattsville, Maryland 20782.

The environmental assessment is available for public inspection at this same address between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Chester A. Gipson, Special Diseases Staff, Veterinary Services, APHIS, USDA, Room 824, Federal Building, 6505 Belcrest Road, Hyattsville, Maryland 20782, (301) 436–8231.

SUPPLEMENTARY INFORMATION:

Scrapie has been recognized as a serious threat to the sheep and goat industries in both the United States and Canada. The USDA has prepared an environmental assessment for conducting research using goats and sheep on U.S. Army Proving Ground in Utah.

The purpose of this action is to determine whether or not a procedure called embryonic transfer could be used in greatly reducing or eliminating the risk of introducing scrapie into domestic flocks. In this procedure, an embryo would be taken from a scrapie infected sheep or goat and transferred to the uterus of a recipient sheep or goat. Upon parturition, the newborn lamb or kid would represent a new genetic line.

The results of this action will yield information on if and how scrapie is transmitted vertically (from parent to progeny in utero). Scrapie-free sheep and goats might then be obtained from scrapie-exposed or affected flocks. The procedure might also provide a way to control or eradicate the disease in the United States and facilitate the import and export of genetic lines to strengthen the U.S. sheep and goat industry.

A number of alternatives were considered in selecting the recommended course of action: (1) No action; (2) Using a contained facility on DPG; (3) Performing scrapie research elsewhere; (4) Using the proposed corral facilities on the DPG.

Alternative one was disregarded because it would require that no scrapie research be performed. The need for this type of scrapie research is necessary to control or possibly eradicate this disease.

Alternative two was disregarded because the only such building available on the DPG which is qualified to operate at biosafety levels one, two, or three is Building 2028, Baker Laboratory. However, this building is not large enough to support both its ongoing military testing and the proposed scrapie research. Construction of a new building would be prohibitively expensive.

Alternative three is not feasible since performing scrapie research elsewhere would entail accomplishing a number of functions prior to its commencement. The time lost and additional money spent as well as the low probability of finding a site which matches DPG's complement of isolation, security, and available facilities makes this course of action inferior.

APHIS has selected four. The location of DPG is ideal for performing studies of this nature. It is relatively isolated from any large areas of population. This would ensure no possibility of spreading diseases. Also, a physical buffer zone will isolate the animals being tested from the natural fauna. Precautions have been made to assure that the water which has come in contact with the research area will evaporate before it could reach any major sources of water. These precautions will guarantee no contact would be made with the natural fauna, eliminating the possibility of the spread of disease. Most importantly, the use of this research facility is consistent with its past and intended uses.

APHIS, after considering the cumulative effects of implementing the selected alternative, has concluded there will be no primary, secondary, or cumulative adverse effects on the quality of the environment.

The environment assessment evaluated the uniqueness or rareness of resources affected and has concluded the selected alternative will neither have an effect on the continued existence of any endangered or threatened species nor will it result in destruction or adverse modifications of the habitats of such species.

This action has been reviewed under the requirements of the National Environmental Policy Act (NEPA), as amended (42 U.S.C. 4321, et seq.), the Council on Environmental Qualities (CEQ), NEPA Regulations (40 CFR, Parts 1500–1508), and the APHIS guidelines concerning implementation of NEPA procedures.

Done at Washington, DC, this 24th day of February.

J.K. Atwell,

Deputy Administrator, Veterinary Services.

Committee of State Foresters; Meeting

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Committee of State Foresters will meet in Albuquerque, New Mexico, on March 6, 1986. The meeting will be held in the Santa Fe Room of the Continental Inn, 6000 Pan American Freeway, NE, beginning at 8 a.m.

The Committee is comprised of the seven members of the Executive Committee of the National Association of State Foresters. The purpose of the meeting is for the Committee of State Foresters to consult with the Secretary of Agriculture regarding the administration and application of various portions of the Cooperative Forestry Assistance Act of 1978 (Pub. L. 95-313). Peter Myers, Assistant Secretary for Natural Resources and Environment, will chair this meeting. The meeting will be open to the public. Written statements may be filed with the Committee before or after the meeting.

DEPARTMENT OF COMMERCE

Office of the Secretary

Federal Coal Export Commission Meeting

AGENCY: Office of the Secretary.

ACTION: Notice.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (1976), as amended, notice is hereby given that the Federal Coal Export Commission (Commission) established on November 5, 1985 (50 FR 227 (1985)), will hold its initial meeting on Monday, March 17, 1986 at 10:00 a.m.-4:00 p.m. in Room 4830, U.S. Department of Commerce, Herbert C. Hoover Building, 14th and Constitution Avenue, NW., Washington, D.C. The initial meeting of a committee established by the Commission to review the state of the industry will be held on the same date, at the same address and room as the Commission meeting, between 2:00 p.m. and 4:00 p.m.

The Commission, consisting of 30 members invited to participate from among organized labor, coal exporters, transporters, financial institutions and government, will address problems affecting the U.S. coal export industry.

The agenda for this initial meeting emphasizes Commission/committee organization, membership and preliminary work plan. For further information contact Robert H. Brumley, Executive Director of the Commission, at (202) 377-4772.

The public is welcome to attend this initial meeting and will be admitted to the extent that seating is available. Public comments are welcome and persons wishing to make formal statements must notify the Executive Director of the Commission in advance of the meeting. The Chair retains the right to place reasonable limits on the duration of the public comments. Written statements may be submitted before or after each session.

Dated: February 25, 1986.

Robert H. Brumley,

Executive Director, Federal Coal Export Commission.

BILLING CODE 3510-22-M

Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce..

The Pacific Fishery Management Council and its advisory bodies will convene public meetings, March 10-13, 1986, at the Holiday Inn Portland-Airport, 8439 NE. Columbia Boulevard, Portland, OR, as follows:

On March 10, the Council meeting will convene at 1 p.m. with a closed session (not open to the public), to discuss litigation and personnel matters. The open session will begin at 2 p.m. with administrative matters, including appointment of a new member to the Groundfish Management Team and the status of the FY 86 budget. The Council will review the 1985 salmon fisheries and the status of the stocks, as well as hear recommendations from the Scientific and Statistical Committee (SSC), the Salmon Advisory Subpanel (SAS), the public, the states, and the National Marine Fisheries Service on the 1985 fisheries and the 1986 stock abundance.

On March 11, the Council will tentatively adopt 1986 salmon management options for analysis by the Salmon Plan Development Team (SPDT), and receive a summary of 1987 salmon plan amendment issues. The Council will also review groundfish management issues and take action on experimental fishing permit applications, drafts of the groundfish plan amendment package, and foreign fishing applications. There will be a public comment period at 4:30 p.m.

On March 12, the Council will continue consideration of administrative matters including the FY 87 data collection needs for Council-related activities and the Council/National Oceanic and Atmospheric Administration Task Group evaluation of the Magnuson Fishery Conservation and Management Act implementation. The Council will also hear a report of its Habitat Committee and public comments on a habitat policy prior to final adoption.

On March 13, the Council will hear the analysis and comments of the SPDT, SSC, SAS, public, and states on the provisonal 1986 salmon management options before final adoption of management options for public hearings.

Meetings of the Council's SSC, SAS, SPDT, habitat, foreign fishing, and budget committees will be held in the same location commencing the afternoon of March 9 through the evening of March 13. Detailed agendas of all meetings will be available for the public on February 21. For further information contact Joseph C. Greenley, Executive Director, Pacific Fishery Management Council, Metro Center, 2000 SW. First Avenue, Portland, OR 97201; telephone: (503) 221-6352.

Dated: February 20, 1986.

Richard B. Roe,

Director, Office of Fisheries Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Intent To Prepare a Draft Environmental Impact Statement and Management Plan for a Possible National Marine Sanctuary of Norfolk Canyon; Announcement of Norfolk Canyon as an Active Candidate and Suspension of Ten Fathom Ledge/Big Rock From Consideration as a National Marine Sanctuary

AGENCY: National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: NOAA is announcing Norfolk Canyon (60 miles off the coast of Virginia) as an Active Candidate for designation as a National Marine Sanctuary, and its intent to prepare an environmental impact statement on the proposal to designate. A notice scheduling a scoping meeting will be published at a later date.

On September 17, 1985, NOAA initiated preliminary consultation on two sites as potential national marine sanctuaries. (Preliminary Consultation is the first step toward designation of a national marine sanctuary.) The sites were Norfolk Canyon and Ten Fathom Ledge/Big Rock. On November 18, 1985 the period for public comment ended. NOA has reviewed and considered public comments on both sites and is continuing the process for designating Norfolk Canyon. A draft management plan and draft environmental impact statement will be prepared. NOAA is also announcing that due to a backlog of Active Candidates it will not proceed with further evaluation of Ten Fathom Ledge/Big Rock at this time. The site will remain on the Site Evaluation List for future consideration.

FOR FURTHER INFORMATION CONTACT: Mr. Edward Lindelof, Senior Policy Analyst, Sanctuary Programs Division, Office of Ocean and Coastal Resource Management, National Oceanic and Atmospheric Administration, 3300 Whitehaven Street NW., Washington, DC 20235 (202) 634-4236.

SUPPLEMENTARY INFORMATION:

I. Background

Title III of the Marine Protection, Research, and Sanctuaries Act of 1972 as amended, 16 U.S.C. 1431 *et seq.* (the Act), authorizes the Secretary of Commerce to designate ocean waters, as far seaward as the outer edge of the continental shelf and over which the United States exercises jurisdiction, consistent with international law, as national marine sanctuaries. The purpose of designating national marine sanctuaries is to protect and manage distinctive areas of the marine environment for those conservation, recreational, ecological, historical, research, educational or aesthetic values which give these areas special national significance. The Act is administered by the National Oceanic and Atmospheric Administration (NOAA) through the Office of Ocean and Coastal Resource Management (OCRM), Sanctuary Program Division (SPD).

The 1984 amendments to the Act (Title I of Pub. L. 98-498, codified to 16 U.S.C. 1431-1439), made several changes in the process for designating National Marine Sanctuaries. NOAA is currently modifying its program operating regulations at 15 CFR Part 922 to reflect these changes. In the interim, where there is a conflict between the current regulations and the 1984 amendments, NOAA will rely on the statutory amendments. Since the 1984 amendments do not require the Preliminary Consultation or Active Candidate stages in the marine sanctuary designation process, NOAA will no longer conduct a formal Preliminary Consultation or Active Candidate review. Instead, NOAA will issue a notice informing the public of its

VOL 51
ISS 40
FE 28
1986
UMI

intent to prepare an EIS on a proposed designation of an Active Candidate selected from the Site Evaluation List (SEL).

NOAA began its consideration of Norfolk Canyon and Ten Fathom Ledge/Big Rock under its current operating regulations at 15 CFR 922.30(1). On September 17, 1985, NOAA published a notice (50 FR 37760) announcing preliminary consultation and seeking public comment for these two sites. The public comment period closed on November 18, 1985.

II. Selection of Norfolk Canyon as an Active Candidate

Norfolk Canyon is located approximately 60 miles off the coast of Virginia. The center of the Canyon head is approximately latitude 37°03.3′ W, longitude 74°38.4′ W. The Canyon head is about 16 to 19 km long and 6 km wide near the shelf break.

Natural Resources

Norfolk Canyon is the southern-most submarine canyon is a series of the prominent deep water features along the eastern continental margin of the United States. It is an excellent biogeographic representation of this habitat and has two distinguishing features which other East Coast canyon sites lack: (1) The physiographic location is in a non-glaciated area that is influenced by a major drainage system (Chesapeake Bay), and (2) the site is the habitat of several alcyonarid and scleractinid corals, including *Primnoe reseda.*

The geology of the Canyon is characterized by deep V-shaped valleys and steep, rocky and often unstable walls and swift current. Despite these physical features, Norfolk Canyon supports an abundance of marine life, of which its huge Alcyanarian tree corals and "pueblo villages" (i.e., areas along the canyon wall where large invertebrates and some finfish dig extensive depressions, caves and burrows for their lodging) are especially prominent. For a more detailed discussion of the site's natural resources, please see 50 FR 37760 announcing Prelimary Consultation.

Human Uses

Major human activities pursued on the eastern continental margin include commercial and recreational fisheries, mineral resources development, ocean dumping and military operations. Norfolk Canyon is not heavily fished for commercial purposes but the area is used by recreational fishermen who fish for white marlin (*Teptrapturus albidus*).

No mineral resources are currently mined in the vicinity of Norfolk Canyon. Those resources with the greatest near-term potential for development are oil and gas. Upcoming lease sale number 111 in the Mid-Atlantic area is tentatively scheduled for November 1986.

Although no ocean disposal of wastes is occuring at present in Norfolk Canyon, the area has been used previously for the dumping of radioactive wastes. There are two former dumpsites, one located at about the 1000-meter isobath, the other, more extensive, lying at depths between about 2000 and 2500 meters. Both occur on or near the axis of the Canyon.

Summary of Comments

A total of eight comments were received on the September 12, 1985 notice. Reviewers included Federal and state agencies, representatives of the oil and gas industry, representatives of the fishing industry, environmental and public interest groups, and members of the public. All comments received are on file at the Sanctuary Programs Division, Office of Ocean and Coastal Resource Management, 2001 Wisconsin Avenue NW., Washington, DC 20235. The comments are available for review at that office.

All reviewers supported listing the Norfolk Canyon as an Active Candidate and proceeding with our evaluation. Amoco Corporation and the Offshore Operators Committee noted that until a boudary has been determined it was difficult to determine the significance of the proposal and that this information should be provided prior to selection as an active candidate. The Department of the Interior questioned how Norfolk Canyon was selected when it is not on NOAA's Site Evaluation List.

NOAA's Response.

In response to the boundary comment, at this early stage in reviewing a site as a potential national marine sanctuary, NOAA does not have sufficient information to formulate specific boundary alternatives. As part of developing a draft environmental impact statement and management plan, NOAA will identify several boundary alternatives, including its preferred alternative, for public review and comment.

In response to the Department of the Interior comment, as explained in the original notice for comment, Norfolk Canyon is eligible for consideration because it had already been under consideration for designation by NOAA at the time of development of the SEL and therefore was grandfathered into the SEL process. At the time of development of the SEL the following sites were under consideration for designation by NOAA: Cordell Bank (California); Norfolk Canyon (South Atlantic); La Parguera (Puerto Rico); Monterey Bay (California); Hawaiian waters; and Fagatele Bay (American Samoa). The scientific teams responsible for making SEL Recommendations were instructed not to consider these sites for SEL listing since they had already been selected by NOAA for further evaluation. At that time a contract had been awarded to synthesize information on the physical and biological features of Norfolk Canyon. This site is therefore the last of the pre-SEL Candidates to be actively considered.

Subsequent Actions

NOAA intends to prepare a draft environmental impact statement (DEIS) including a resource assessment report and draft management plan on the designation of the area as a National Marine Sanctuary. A scoping meeting will be held prior to preparation of the draft management plan and DEIS and a notice of its date, time and location will be published in the **Federal Register**. A public hearing on the DEIS Will be conducted. A final environmental impact statement and management plan will be prepared. In undertaking the analysis for the DEIS, NOAA will consider the factors required in determining if a site meets the Designation Standards outlined in section 303(a) of the 1984 amendments to the Act and will consult with Congress, other affected agencies and the appropriate Regional Fishery Management Council(s).

After the final environmental impact statement, subsequent steps include a determination by the Secretary of Commerce that the site meets the Designation Standards, and designation by the Secretary. Congress then has the opportunity to disapprove the designation. Opportunities for public comment exist throughout this process and will be advertised in the local media, and other appropriate channels.

III. Suspension of Ten Fathom Ledge/Big Rock From Further Consideration as a Potential National Marine Sanctuary.

The September 17, 1985 notice of Preliminary Consultation included the Ten Fathom Ledge/Big Rock site. NOAA received ten letters and petitions. Reviewers included Federal and state agencies, representatives of the fishing industry, environmental and public interest groups, dive groups and members of the public. All comments received are on file at the Sanctuary Programs Division, Office of Ocean and

Coastal Resource Management, 2001 Wisconsin Avenue NW., Washington, DC 20235. The comments are available for review at that office. Only representatives of the commercial fishing industry who use the area objected to proceeding to evaluate the site for designation. The commercial fishing interests expressed concern that there might be restrictions on fishing activities. The Department of the Interior suggested that the site may be needed for mining strategic nonenergy minerals and that more information should be provided to evaluate the site.

NOAA has decided not to proceed with designation of Ten Fathom Ledge/Big Rock at this time. The Sanctuary Programs Division currently has two active candidates, Flower Garden Banks in the Gulf of Mexico and Cordell Bank off the coast of California. The level of staff time and costs involved in marine sanctuary designation preclude the processing of more than two or three Active Candidates simultaneously. Given these constraints, it is not reasonable or likely that NOAA can process both Ten Fathom Ledge/Big Rock and Norfolk Canyon in the 3 year time span required by 15 CFR 922.31(a). Accordingly, NOAA has decided to continue the process it began several years ago for designating Norfolk Canyon and to leave Ten Fathom Ledge/Big Rock on the SEL for future consideration.

Federal Domestic Assistance Catalog No. 11.429.

Dated: February 24, 1986.

Peter L. Tweedt,

Director, Office of Ocean and Coastal Resource Management.

Government-Owned Inventions; Availability for Licensing

The inventions listed below are owned by agencies of the U.S. Government and are available for licensing in the U.S. in accordance with 35 U.S.C. 207 to achieve expeditious commercialization of results of federally funded research and development. Foreign patents are filed on selected inventions to extend market coverage for U.S. companies and may also be available for licensing.

Technical and licensing information on specific inventions may be obtained by writing to: Office of Federal Patent Licensing, U.S. Department of Commerce, P.O. Box 1423, Springfield, Virginia 22151.

Please cite the number and title of inventions of interest.

BILLING CODE 3610-04-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Establishing an Import Restraint Limit for Certain Man-Made Fiber Textile Products Produced or Manufactured in the Republic of Korea

February 25, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 3, 1986. For further information contact Eve Anderson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

The Governments of the United States and the Republic of Korea have agreed, under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 1, 1982, as amended, to establish a specific limit for braided and non-braided luggage of man-made fibers in Category 670pt. (only T.S.U.S.A. numbers 706.3420, 706.4144 and 706.4152) with sublimits for braided (T.S.U.S.A. number 706.3420) and non-braided luggage (T.S.U.S.A. numbers 706.4152 and 705.4144), produced or manufactured in Korea and exported during the period which began on January 1, 1986 and extends through December 31, 1986. Accordingly, in the letter which follows this notice the Chairman of CITA directs the Commissioner of Customs to prohibit entry for consumption, or withdrawal from warehouse for consumption, of man-made fiber textile products in Category 670 in excess of the designated restraint limits. Growth amounting to 2.5 percent per year will be applied for the duration of the agreement. Swing will not be available.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), Novmeber 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1985).

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

February 25, 1986.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 18, 1985, which directed you to prohibit entry for consumption and withdrawal from warehouse for consumption of certain specified categories of cotton, wool and man-made fiber textile products, produced or manufactured in the Republic of Korea and exported during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986.

Effective on March 3, 1986, the directive of December 18, 1985 is hereby amended to include the following import restraint limits for man-made fiber textile products in Category 670:

Category	12-Mo restraint limit [1]
670 pt [2]	26,000,000 pounds of which not more than 24,750,000 pounds shall be in T.S.U.S.A. numbers 706.4152 and 706.4144 and not more than 1,250,000 pounds shall be in T.S.U.S.A. number 706.3420.

[1] The limit has not been adjusted to reflect any imports exported after December 31, 1985.

[2] For Category 670, only TSUSA numbers 706.3420, 706.4144, and 706.4152.

Man-made fiber textile products in TSUSA 706.3420 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Adjusting the Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Sri Lanka

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on February 24, 1986. For further information contact Nathaniel Cohen, Trade Reference Assistant, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

A CITA directive dated May 24, 1985 (See 50 FR 21923) established restraint limits for specified categories of cotton, wool and man-made fiber textile products, including women's girls' and infants' cotton shirts and blouses in Category 341, men's and boys' other coats of man-made fibers in Category 634, and women's, girls' and infants' man-made fiber coats in Category 635, produced or manufactured in Sri Lanka and exported during the twelve-month period which began on June 1, 1985 an extends through May 31, 1986. In the CITA directive published below the limit for Category 341 is being increased to 526,939 dozen to account for carryover and swing according to the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 10, 1983 between the Governments of the United States and Sri Lanka. The limits for Categories 634 and 635 are being reduced to 110,867 dozen and 173,072 dozen, respectively, to account for the swing applied to Category 341.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175) May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397, June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5,

Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

February 24, 1986.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of May 24, 1985 from the Chairman of the Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in Sri Lank.

Effective on February 24, 1986, you are directed to adjust the restraint limits established for the following categories in the directive of May 24, 1985 to the limits indicated, according to the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 10, 1983 between the Governments of the United States and Sri Lanka:[1]

Category	Adjusted 12-mo limit (dozen) [1]
341	526,939
634	110,867
635	173,072

[1] The limits have not been aduated to account for any imports exported after May 31, 1985.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Summer Study on Theater Air Defense; Meetings

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Summer Study on Theater Air Defense will meet closed session on 20-21 March, 15-16 April, 13 May 1986 and 11-12 June in the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Summer Study will examine current U.S. air defense capabilities in Europe, joint plans and organizations, and relevant new technology and equipment.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5 U.S.C. App. II, (1982)), it has been determined that this DSB Panel meeting, concerns matter listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly this meeting will be closed to the public.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

February 24, 1986.

BILLING CODE 3810-01-M

Defense Science Board Task Force on Electronic Warfare; Meetings

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on Electronic Combat will meet in closed session on 27 March, 23 April and 7 May 1986 in the Pentagon, Arlington, Virginia

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Task Force will examine current electronic warfare technical issues, vulnerabilities of U.S. systems, and the means of countering the effects of these technologies.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5 U.S.C. App. II, (1982)), it has been determined that this DSB Panel meeting, concerns matter listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly this meeting will be closed to the public.

Defense Science Board Task Force on FOFA (Defensive Systems, Subgroup); Meetings

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on FOFA (Defensive Systems Subgroup) will meet in closed session on 26 March 1986 in the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense. At the meeting on 26 March 1986 the Subgroup will discuss the application of technology to systems designed to improve future U.S. air defense capabilities.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5 U.S.C. App. II, (1982)), it has been determined that this DSB Panel meeting, concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly this meeting will be closed to the public.

Renewal of Advisory Committees

Under the provisions of Pub. L. 92-463, "Federal Advisory Committee Act," notice is hereby given that the Department of Defense Advisory Committees listed below have been found to be in the public interest in connection with the performance of duties imposed on the Department of Defense by law. These committees are being renewed for two years effective February 28, 1986.

Office of the Secretary of Defense

Advisory Group of Electron Devices; Board of Visitors, Defense Systems Management College; Board of Visitors, Equal Opportunity Management Institute; Defense Advisory Committee on Military Personnel Testing; Defense Advisory Committee on Women in the Services; Defense Science Board; DoD Wage Committee.

Organization of the Joint Chiefs of Staff

Board of Visitors, National Defense University; Scientific Advisory Group of the Joint Strategic Target Planning Staff.

Army

Armed Forces Epidemiological Board; Army Advisory Panel on ROTC Affairs; Army Science Board; Command and General Staff College Advisory Committee; Department of the Army Historical Advisory Committee; Environmental Advisory Board, Chief of Engineers; Scientific Advisory Board, Armed Forces Institute of Pathology; US Army Medical Research and Development Advisory Committee.

Navy

Academic Advisory Board to the Superintendent, US Naval Academy; Board of Advisors to the President, Naval War College; Board of Advisors to the Superintendent, Naval Postgraduate School; Chief of Naval Operations Executive Panel Advisory Committee; Naval Research Advisory Committee; Navy Resale System Advisory Committee; Secretary of the Navy's Advisory Board on Education and Training; Secretary of the Navy's Advisory Committee on Naval History.

Air Force

Advisory Committee on the Air Force Historical Program; Air University Board of Visitors; Community College of the Air Force Advisory Committee; USAF Scientific Advisory Board.

Defense Nuclear Agency

Scientific Advisory Group of Effects.

Defense Intelligence Agency

Defense Intelligence Agency Advisory Committee.

Defense Communications Agency

Defense Communications Agency Scientific Advisory Group.

National Security Agency

National Security Agency Advisory Board; Public Cryptography Advisory Committee (PCAC).

Patricia Means,
OSD Federal Register Liaison Officer, Department of Defense.

Agency Information Collection Under OMB Review

ACTION: Public Information Collection Requirement Submitted to OMB for Review.

SUMMARY: The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of Submission; (2) Title of Information Collection and Form Number if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; and (8) The point of contact from whom a copy of the information proposal may be obtained.

REVISION OF A CURRENTLY APPROVED COLLECTION

Youth Attitude Tracking Study II (YATS II)

Determines/evaluates knowledge of and attitudes toward military service of Americans, 16-24 years of age. Provides annual cross-sectional data on propensity to serve and on other key issues for trend analyses. Used by DoD Components to develop recruiting strategies, incentive programs, advertising strategies, Congressional testimony, resource allocation and special studies. Responses, 10,000; Burden hours, 5,050.

ADDRESSES: Comments are to be forwarded to Mr. Edward Springer, Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building Washington, DC 20503, and Mr. Daniel Vitiello, DOD Clearance Officer, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, telephone (202) 746-0933.

FOR FURTHER INFORMATION CONTACT: A copy of the information collection proposal may be obtained from Mr. Robert L. Newhart, OASD (FM&P), Room 3C200, Pentagon, Washington, DC 20301-4000, telephone (202) 695-0643. This collection is not for contract.

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB)
Dates of Meeting: Monday & Tuesday, 17-18 March 1986
Times of Meeting: 0830-1630 hours (Mon), 0830-1200 hours (Tue)
Places: Ballistic Research Laboratory, APG, Maryland
Agenda: The Army Science Board AHSG on Ballistic Research Laboratory Effectiveness Review will visit the cite for the purpose of gathering data for conducting the effectiveness review of that facility. Briefings will be presented by each directorate covering their work program. The panel will meet in executive session to discuss the methodology for conducting the review and to discuss observations as a result of the briefings. This meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 1, subsection 10(d). The classified and nonclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695-3039 or 695-7046.

Sally A. Warner,
Administrative Officer, Army Science Board.

DEPARTMENT OF EDUCATION

Office of Educational Research and Improvement

Advisory Council on Education Statistics (ACES); Meeting

ACTION: Notice of Meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Advisory Council on Education Statistics. This notice also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATE: March 17-18, 1986.

ADDRESS: 1200 19th Street, NW., Room 823, Washington, D.C., 20208.

FOR FURTHER INFORMATION CONTACT: Iris Silverman, Executive Director, Advisory Council on Education Statistics, 1200 19th Street, NW. (Brown Building), Room 600-D, Washington, D.C. 20208. Telephone: (202) 254-5284.

SUPPLEMENTARY INFORMATION: The Advisory Council on Education Statistics is established under section 406(c)(1) of the Education Amendments of 1974, Pub. L. 93-380. The Council is established to review general policies for the operation of the Center for Statistics (CS) in the Office of Educational Research and Improvement and is responsible for establishing standards to insure that statistics and analyses disseminated by the Center are of high quality and are not subject to political influence.

The meeting of the Council is open to the public. The proposed agenda includes the following:

- A symposium on standards.
- A discussion of elementary and secondary school data redesign.
- A discussion of *The Condition of Education,* 1986 Edition.
- Such old and new business as the Chairman or membership may put before the Council.

Records are kept of all Council proceedings and are available for public inspection at the Office of the Executive Director, Advisory Council on Education Statistics, 1200 19th Street, NW. (Brown Building), Room 600-D, Washington, D.C. 20208.

Dated: February 21, 1986.

Chester E. Finn, Jr.,

Assistant Secretary for Educational Research and Improvement.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[Docket No. ERA C&E-85-035; OFP Case No. 65003-8294-01,02-12]

Exemption From the Prohibitions of the Powerplant and Industrial Fuel Use Act of 1978; Occidental Chemical Corp.

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Order Granting to Occidental Chemical Corporation an Exemption from the Prohibitions of the Powerplant and Industrial Fuel Use Act of 1978.

SUMMARY: On September 30, 1985, Occidental Chemical Corporation (Occidental) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) seeking a permanent exemption for a major fuel burning installation (MFBI) from the provisions of the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8301 *et seq.*, (FUA or the Act), which prohibit the use of petroleum and natural gas as a primary energy source in certain new MFBI's. The procedure for petitioning and criteria for an exemption from the prohibitions of FUA are contained in 10 CFR Parts 500, 501 and 503 published on June 6, 1980, at 45 FR 38276 and 38302.

Occidental requested a permanent fuels mixture exemption in order to burn petroleum and natural gas in a mixture with a methane-rich by-product stream. The stream will be an unavoidable by-product of the cracking process used to produce ethylene and propylene from the feedstocks ethane and propane. The mixture will be utilized in two (2) new package boilers to be erected at Occidental's Lake Charles, Louisiana, plant which is part of a petrochemical complex acquired from Cities Service Company and inactive since the beginning of 1982.

Pursuant to section 212(d) of the Act, and 10 CFR 503.38, and subject to specified terms and conditions stated herein, ERA hereby issues this order granting a permanent fuels mixture exemption to Occidental to permit the use of petroleum and natural gas in a mixture with a methane-rich by-product stream in their two (2) new boilers designated as Boiler #1 and Boiler #2. As specified in the terms and conditions, the amount of petroleum and natural gas used in the exempted units shall not exceed 25 percent of the total annual Btu heat input of the primary energy sources used in each unit.

In accordance with section 702(a) of FUA, this order shall take effect on April 29, 1986.

FOR FURTHER INFORMATION CONTACT:

George C. Blackmore, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW, Room GA-045, Washington, D.C. 20585, Telephone: (202) 252-1774

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Forrestal Building, Room 6A-113, 1000 Independence Avenue, SW, Washington, D.C. 20585, Telephone: (202) 252-6947

The public file containing a copy of this Order as well as other documents and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW, Room 1E-190, Washington, D.C. 20585, Monday through Friday, 9:00 a.m. to 4:00 p.m. except Federal holidays.

SUPPLEMENTARY INFORMATION: Under the authority of section 212(d) of the Act, 10 CFR 503.38 sets forth eligibility criteria and evidentiary requirements governing a permanent exemption for the use of petroleum or natural gas in a mixture with alternate fuels. Under 10 CFR 503.38(d), a certification alternative is available for MFBI's which will not burn more than 25 percent petroleum or natural gas in a mixture with an alternate fuel. Occidental utilized the certification alternative in its permanent fuels mixture exemption petition.

In accordance with the procedural requirements of FUA and 10 CFR 503.3(d), ERA published notice of its acceptance of Occidental's petition in the Federal Register on November 15, 1985, at 50 FR 47252. The notice of acceptance provided a 45-day comment period during which interested persons could submit written comments on the petition for exemption or could request that a public hearing be convened. The period expired on December 30, 1985.

No comments were received on ERA's acceptance of Occidental's petition nor was a public hearing requested.

As required by section 701 (f) and (g) of the Act, ERA provided copies of Occidental's petition to the Environmental Protection Agency and the Federal Trade Commission for their comments. No comments were received from those agencies.

Decision and Order

Based upon review of the entire record of this proceeding, ERA has determined that Occidental has satisfied the certification requirements of 10 CFR 503.38(d). Therefore, pursuant to section 212(d) of the Act, and subject to the terms and conditions stated below, ERA hereby grants Occidental a permanent fuels mixture exemption to permit the use of petroleum and natural gas in a mixture with methane-rich by-product stream. The total amount of petroleum and natural gas used in the exempted units shall not exceed 25 percent of the total annual Btu heat input of the primary energy sources used in each unit.

Terms and Conditions

Section 214(a) of FUA and 10 CFR 503.12(a) provide ERA the authority to attach terms and conditions to any order granting an exemption. Accordingly, this order is granted subject to the following terms and conditions.

(1) The amount of petroleum and/or natural gas to be used in a mixture with an alternate fuel in Boiler #1 and Boiler #2 will not exceed 25 percent of the total annual Btu heat input of the primary energy sources of those units.

(2) Prior to operating the boilders under this exemption, Occidental will secure applicable environmental permits and approvals pursuant to, but not limited to, the following: Clean Air Act, Clean Water Act, Rivers and Harbors Act, Coastal Zone Management Act and the Resource Conservation and Recovery Act.

Effectiveness of Order

This order shall take effect on April 29, 1986.

Judicial Review

Pursuant to section 702(c) of the Act and 10 CFR 501.69, any person aggrieved by this order may petition for judicial review in the United States Court of Appeals for the circuit wherein such person resides, or has his principal place of business, at any time before the 60th day after the date of publication of this order in the Federal Register.

Issued in Washington, D.C. on February 14, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Eton Trading Corp. and Eton Enterprises, Inc.; Amended Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of an Amended Proposed Remedial order which was issued to Eton Trading Corporation and Eton Enterprises, Inc. This Proposed Remedial Order alleges pricing violations in the amount of $9,182,412.70 plus interest in connection with the purchase and resale of crude oil during the period June 1980 through December 1980.

A copy of the Amended Proposed Remedial Order, with confidential information deleted, may be obtained from the Office of Freedom of Information Reading Room; U.S. Department of Energy; Forrestal Building, Room 1E-190; 1000 Independence Avenue SW.; Washington, DC 20585.

Within fifteen (15) days of publication of this Notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals; U.S. Department of Energy; Forrestal Building, Room 6F-078; 1000 Independence Avenue SW.; Washington, DC 20585, in accordance with 10 CFR 205.193.

Issued in Dallas, Texas, on the 14th day of January, 1986.

Ben Lemos,

Director, Office of Field Operations, Dallas Economic Regulatory Administration.

BILLING CODE 6450-01-M

[Docket No. ERA-FC-85-029; OFP Case No. 55080-9299-20-24]

Powerplant and Industrial Fuel Use; Crown Zellerbach Corp.

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Order Granting to Crown Zellerbach Corporation, Exemption from the Prohibitions of the Powerplant and Industrial Fuel Use Act of 1978.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives notice that it has granted a permanent cogeneration exemption from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8301 *et seq.* ("FUA" or "the Act"), to Crown Zellerbach Corporation (Crown) ("the petitioner"). The permanent cogeneration exemption permits the use of natural gas or No. 2 fuel oil as the primary energy source for a 45 MW combined cycle cogeneration facility designed to produce electricity and process steam at the Crown papermill facility located in St. Francisville, Louisiana. The final exemption order and detailed information on the proceeding are provided in the SUPPLEMENTARY INFORMATION section, below.

DATES: The order shall take effect on April 29, 1986.

The public file containing a copy of the order, other documents, and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E-190, Washington, D.C. 20585, Monday through Friday, 9:00 a.m. to 4:00 p.m., except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Steven Mintz, Coal and Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW., Room GA-045, Washington, D.C. 20585, Telephone (202)252-9506

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Forrestal Building, Room 6A-113, 1000 Independence Avenue, SW., Washington, D.C. 20585, Telephone (202)252-6947

VOL 51
ISS 40
FE 28
1986
UMI

SUPPLEMENTARY INFORMATION: On August 6, 1985, Crown petitioned ERA under section 212(c) of FUA and 10 CFR 503.37 for a permanent cogeneration exemption to permit the use of natural gas and petroleum in a 45 MW combined cycle cogeneration facility consisting of gas turbine and generator, a heat recovery steam generator and ancillary equipment.

Basis for Permanent Exemption Order

The permanent exemption order is based upon evidence in the record including Crown's certification to ERA, in accordance with 10 CFR 503.37(a)(1), that:

1. The oil or natural gas to be consumed by the cogeneration facility will be less than that which would otherwise be consumed in the absence of such cogeneration facility, in accordance with 10 CFR 503.37(a)(1)(i); and

2. The use of a mixture of natural gas and coal or oil and coal in the cogeneration facility will not be technically feasible, in accordance with 10 CFR 503.37(a)(1)(ii).

Procedural Requirements

In accordance with the procedural requirements of section 701(c) of FUA and 10 CFR 501.3(b), ERA published its Notice of Acceptance of Petition and Availability of Certification in the **Federal Register** on September 30, 1985 (50 FR 39754), commencing a 45–day public comment period.

A copy of the petition was provided to the Environmental Protection Agency for comments as required by section 701(f) of the Act. During the comment period, interested persons were afforded an opportunity to request a public hearing. The comment period closed on November 14, 1985; no comments were received and no hearing was requested.

NEPA compliance

After review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemption does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act (NEPA).

Order Granting Permanent Cogeneration Exemption

Based upon the entire record of this proceeding, ERA has determined that Crown has satisfied the eligibility requirements for the requested permanent cogeneration exemption, as set forth in 10 CFR 503.37. Therefore, pursuant to section 212(c) of FUA, ERA hereby grants a permanent cogeneration exemption to Crown to permit the use of natural gas or No. 2 fuel oil as the primary energy source for its papermill cogeneration facility in St. Francisville, Louisiana.

Pursuant to section 702(c) of the Act and 10 CFR 501.69, any person aggrieved by this order may petition for judicial review thereof at any time before the 60th day following the publication of this order in the **Federal Register**.

Issued in Washington, D.C., on February 21, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 86–4426 Filed 2–27–86; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. ERA C&E–86–30; OFP Case No. 51209–9300–20, 21–24]

Powerplant and Industrial Fuel Use; Gulf States Utilities Co

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of acceptance of petition for exemption and availability of certification by Gulf States Utilities Company, for its Louisiana station, Baton Rouge, Louisiana, and a proposed rescission of an order granting a permanent peakload exemption for a prior use portion of that facility.

SUMMARY: On January 14, 1986, Gulf States Utilities Company (GSU), filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent cogeneration exemption for a proposed electric powerplant to be located at its Louisiana Station, Baton Rouge, Louisiana, from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. § 8301 *et seq.*) ("FUA" or "the Act"). Title II of FUA prohibits both the use of petroleum and natural gas as a primary energy source in any new powerplant and the construction of any such facility without the capability to use an alternate fuel as a primary energy source. Final rules setting forth criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA are found in 10 CFR Parts 500, 501, and 503. Final rules governing the cogeneration exemption were revised on June 25, 1982 (47 FR 29209, July 6, 1982), and are found at 10 CFR 503.37.

The proposed powerplant, for which the petition was filed and GSU is planning to construct, is a cogeneration facility at the existing Louisiana Station powerplant in Baton Rouge, Louisiana. The facility will consist of two gas turbine electric generating units, each with an associated heat recovery steam generator (HRSG). The fuels for the gas turbine/HSRG units will be natural gas and process gas from the adjacent Exxon refinery/chemical plant complex. The units will provide electric energy and steam to the Exxon Complex. The cogeneration facility is referred to as the "Gas Turbine/HRSG Project".

One of the gas turbine units for the project will be an existing Westinghouse Model 501D5 gas turbine unit, which will be moved from its current location at GSU's Roy S. Nelson Station in Westlake, Calcasieu Parish, Louisiana. This turbine was installed in 1982 as a new peakload powerplant and was granted a Permanent Peakload Exemption under the Fuel Use Act (Docket No. ERA–FC–80–043; ERA Case No. 51209–1393–27–22). At this time, the second turbine unit has not been selected but is expected to be similar in size and configuration. The Gas Turbine/HRSG Project will generate up to 258 megawatts (MW) of electric power (two units, each generating 129 MW) and up to 1,200,000 lb/hr of steam for use at the Exxon Baton Rouge complex. Preliminary engineering for the project has begun, and on site construction is scheduled to begin in October 1986. Disassembly and movement of the existing Westinghouse turbine from Nelson Station to Louisiana Station is expected to begin in mid-1986. Start of operation is scheduled for March 1987.

The petition for exemption was filed with a request that ERA, pursuant to 10 CFR 501.100 *et seq.*, rescind a permanent peakload exemption granted by ERA to GSU on May 18, 1981, applicable to their Roy S. Nelson Station in Westlake, Louisiana. GSU's Request for Rescission is contingent upon the granting by ERA of the permanent exemption for its Louisiana Station pursuant to 10 CFR 501.32. Thus, if ERA determines to deny GSU's petition pursuant to 10 CFR 502.32, ERA will treat the Request for Rescission as withdrawn. However, if ERA grants the petition pursuant to 10 CFR 503.32, the Rescission Order will be effective contemporaneously.

ERA has determined that the petition appears to include sufficient evidence to support an ERA determination of the exemption request and it is therefore accepted pursuant to 10 CFR 501.3. A review of the petition is provided in the **SUPPLEMENTARY INFORMATION** section below.

As provided for in sections 701 (c) and (d) of FUA and 10 CFR 501.31 and 501.33, interested persons are invited to submit written comments in regard to this petition and any interested person may submit a written request that ERA convene a public hearing.

The public file containing a copy of this Notice of Acceptance and Availability of Certification as well as other documents and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW, Room 1E–190, Washington, D.C. 20585, from 9:00 a.m. to 4:00 p.m., Monday through Friday, except Federal holidays.

ERA will issue a final order granting or denying the petition for exemption from the prohibitions of the Act within six months after the end of the period for public comment and hearing, unless ERA extends such period. Notice of any such extension, together with a statement of reasons therefor, would be published in the **Federal Register**.

DATES: Written comments are due on or before April 14, 1986. A request for a public hearing must be made within this same 45-day period.

ADDRESSES: Fifteen copies of written comments or a request for a public hearing shall be submitted to: Case Control Unit, Office of Fuels Programs, Room GA–045, Forrestal Building, 1000 Independence Avenue, SW, Washington, D.C. 20585.

Docket No. ERA–C&E–86–30 should be printed on the outside of the envelope and the document contained therein.

FOR FURTHER INFORMATION CONTACT:

George G. Blackmore, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW, Room GA–045, Washington, D.C. 20585, Phone (202) 252–1774

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Forrestal Building, Room 6A–113, 1000 Independence Avenue, SW, Washington, D.C. 20585, Phone (202) 252–6947

SUPPLEMENTAL INFORMATION: GSU proposes to install a cogeneration system at their Louisiana Station, Baton Rouge, Louisiana, which will generate electrical power and produce steam for sale to Exxon's nearby refinery complex. The proposed cogeneration system will be operated by GSU.

The cogeneration facility is classified as an electric powerplant unde FUA because more than 50 percent of its net annual electric generation will be sold.

Section 212(c) of the Act and 10 CFR 503.37 provide for a permanent cogeneration exemption from the prohibitions of Title II of FUA. In accordance with the requirements of §503.37(a)(1), GSU has certified to ERA that:

1. The oil or gas to be consumed by the cogeneration facility will be less than that which would otherwise be consumed in the absence of the proposed powerplant, where the calculation of savings is in accordance with 10 CFR 503.37(b); and

2. The use of a mixture of petroleum or natural gas and an alternate fuel in the cogeneration facility, for which an exemption under 10 CFR 503.38 would be available, would not be economically or technically feasible.

In accordance with the evidentiary requirements of § 503.37(c) (and in addition to the certifications discussed above), GSU has included as part of its petition:

1. Exhibits containing the basis for the certifications described above; and

2. An environmental impact anaylsis, as required under 10 CFR 503.13.

Rescission Request: ERA hereby accepts GSU's Request for Rescission of Permanent Peakload Exemption granted May 18, 1981. GSU's request for rescission is based on its determination that significantly changed circumstances as defined in 10 CFR 501.102(b) exist with respect to the applicability of the Peakload exemption to GSU. Accordingly, pursuant to 10 CFR 501.101(f), GSU has submitted documentation supporting its Request for Rescission.

NEPA Compliance: In processing this exemption request, ERA will comply with the requirements of the National Environmental Policy Act of 1969 (NEPA); the Council on Environmental Quality's implementing regulations, 40 CFR Part 1500 *et seq.;* and DOE guidelines implementing those regulations, published at 45 FR 20694, March 28, 1980. NEPA compliance may involve the preparation of (1) an Environmental Impact Statement (EIS); (2) and Environmental Assessment; or (3) a memorandum to the file finding that the grant of the requested exemption would not be considered a major Federal action significantly affecting the quality of the environment. If an EIS is determined to be required, ERA will publish a Notice of Intent to prepare an EIS in the **Federal Register** as soon as practicable. No final action will be taken on the exemption petition until ERA's NEPA compliance has been completed.

The acceptance of the petition by ERA does not constitute a determination that GSU is entitiled to the exemption requested. That determination will be based on the entire record of this proceeding, including any comments received during the public comment period provided for in this notice.

Issued in Washington, D.C., on February 14, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[Docket No. ERA–C&E–86–13; OFP Case No. 64012–9295–22–24]

Powerplant and Industrial Fuel Use; Klondike Equity Enterprises, Inc.; Exemption

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Order Granting to Klondike Equity Enterprises, Inc. Exemption from the Prohibitions of the Powerplant and Industrial Fuel Use Act of 1978.

SUMMARY: The Economic Regulatory Adminstration (ERA) of the Department of Energy (DOE) hereby gives notice that it has granted a permanent cogeneration exemption from the prohibitions of Title II of the Powerplant and Industrial Fuel Act of 1978, 42 U.S.C. 8301 *et seq.* ("FUA" or "the Act"), to Klondike Equity Enterprises, Inc. (KEE or "the petitioner"). The permanent cogeneration exemption permits the use of natural gas as the primary energy source for a 27.6 MW (net, approximate) combined cycle cogeneration facility designed to produce electricity and process steam at the Klondike III facility located in Orange County, California. The final exemption order and detailed information on the proceeding are provided in the **SUPPLEMENTARY INFORMATION** section, below.

DATES: The order shall take effect on April 29, 1986.

The public file containing a copy of the order, other documents, and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E–190, Washington, DC 20585, Monday through Friday, 9:00 a.m. to 4:00 p.m., except Federal holidays.

Washington, DC 20585, Telephone (202) 252-6947.

SUPPLEMENTARY INFORMATION: On October 21, 1985, KEE petitioned ERA under section 212(c) of FUA and 10 CFR 503.37 for a permanent cogeneration exemption to permit the use of natural gas in a 27.6 MW (net, approximate) combined cycle cogeneration facility consisting of a gas turbine and generator, a heat recovery steam generator, a steam turbine and generator, an absorption refrigeration package, and ancillary equipment. It is expected that more than 50 percent of the net annual electric power produced by KEE will be sold to San Diego Gas & Electric, making the cogeneration facility an electric powerplant pursuant to the definitions contained in 10 CFR 500.2. The facility will also produce thermal energy for an absorption refrigeration system, water heating, and comfort heating system at the adjoining recreational complex.

Basis for Permanent Exemption Order

The permanent exemption order is based upon evidence in the record including KEE's certification to ERA, in accordance with 10 CFR 503.37(a)(1), that:

1. The oil or natural gas to be consumed by the cogeneration facility will be less than that which would otherwise be consumed in the absence of such cogeneration facility, in accordance with 10 CFR 503.37(a)(1)(i); and

2. The use of a mixture of natural gas and coal or oil and coal in the cogeneration facility will not be technically feasible, in accordance with 10 CFR 503.37(a)(1)(ii).

Procedural Requirements

In accordance with the procedural requirements of section 701(c) of FUA and 10 CFR 501.3(b), ERA published its Notice of Acceptance of Petition and Availability of Certification in the **Federal Register** on November 25, 1985 (50 FR 48459), commencing a 45-day public comment period.

A copy of the petition was provided to the Environmental Protection Agency for comments as required by section 701(f) of the Act. During the comment period, interested persons were afforded an opportunity to request a public hearing. The comment period closed on January 9, 1986; no comments were received and no hearing was requested.

Nepa Compliance

After review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemption does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act (NEPA).

Order Granting Permanent Cogeneration Exemption

Based upon the entire record of this proceeding, ERA has determined that KEE has satisfied the eligibility requirements for the requested permanent cogeneration exemption, as set forth in 10 CFR 503.37. Therefore, pursuant to section 212(c) of FUA, ERA hereby grants a permanent cogeneration exemption to KEE to permit the use of natural gas as the primary energy source for its cogeneration facility at Klondike III in Orange County, California.

Pursuant to section 702(c) of the Act and 10 CFR 501.69, any person aggrieved by this order may petition for judicial review thereof at any time before the 60th day following the publication of this order in the Federal Register.

Issued in Washington, DC, on February 21, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[Docket No. ERA-C&E-86-18; OFP Case No. 64012-9295-23-24]

Powerplant and Industrial Fuel Use; Klondike Equity Enterprises, Inc.; Exemption

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Order granting to Klondike Equity Enterprises, Inc., exemption from the prohibitions of the Powerplant and Industrial Fuel Use Act of 1978.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives notice that it has granted a permanent cogeneration exemption from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8301 *et seq.* ("FUA" or "the Act"), to Klondike Equity Enterprises, Inc. (KEE or "the petitioner"). The permanent cogeneration exemption permits the use of natural gas as the primary energy source for 27.6 MW (net, approximate) combined cycle cogeneration facility designed to produce electricity and process steam at the Klondike V facility located in Santa Ana, California. The final exemption order and detailed information on the proceeding are provided in the SUPPLEMENTARY INFORMATION section, below.

DATES: The order shall take effect on April 29, 1986.

The public file containing a copy of the order, other documents, and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue SW., Room 1E-190, Washington, DC 20585, Monday through Friday, 9:00 a.m. to 4:00 p.m., except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Steven Mintz, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue SW., Room GA-045, Washington, DC 20585, Telephone (202) 252-9506

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Forrestal Building, Room 6A-113, 1000 Independence Avenue SW., Washington, DC 20585, Telephone (202) 252-6947.

SUPPLEMENTARY INFORMATION: On October 28, 1985, KEE petitioned ERA under section 212(c) of FUA and 10 CFR 503.37 for a permanent cogeneration exemption to permit the use of natural gas in a 27.6 MW (net, approximate) combined cycle cogeneration facility consisting of a gas turbine and generator, a heat recovery steam generator, a steam turbine and generator, an absorption refrigeration package, and ancillary equipment. It is expected that more than 50 percent of the net annual electric power produced by KEE will be sold to Southern California Edison Company, making the cogeneration facility an electric powerplant pursuant to the definitions contained in 10 CFR 500.2. The facility will also produce thermal energy for an absorption refrigeration system, water heating, and comfort heating system at the adjoining recreational complex.

Basis For Permanent Exemption Order

The permanent exemption order is based upon evidence in the record including KEE's certification to ERA, in accordance with 10 CFR 503.37(a)(1), that:

1. The oil and natural gas to be consumed by the cogeneration facility will be less than that which would otherwise be consumed in the absence of such cogeneration facility, in accordance with 10 CFR 503.37(a)(1)(i); and

2. The use of a mixture of natural gas and coal or oil and coal in the cogeneration facility will not be technically feasible, in accordance with 10 CFR 503.37(a)(1)(ii).

Procedural Requirements

In accordance with the procedural requirements of section 701(c) of FUA and 10 CFR 501.3(b), ERA published its Notice of Acceptance of Petition and Availability of Certification in the **Federal Register** on December 9, 1985 (50 FR 50197), commencing a 45-day public comment period.

A copy of the petition was provided to the Environmental Protection Agency for comments as required by section 701(f) of the Act. During the comment period, interested persons were afforded an opportunity to request a public hearing. The comment period closed on January 23, 1986; no comments were received and no hearing was requested.

NEPA Compliance

After review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemption does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act (NEPA).

Order Granting Permanent Cogeneration Exemption

Based upon the entire record of this proceeding, ERA has determined that KEE has satisfied the eligibility requirements for the requested permanent cogeneration exemption, as set forth in 10 CFR 503.37. Therefore, pursuant to section 212(c) of FUA, ERA hereby grants a permanent cogeneration exemption to KEE to permit the use of natural gas as the primary energy source for its cogeneration facility at Klondike V in Santa Ana, California.

Pursuant to section 702(c) of the Act and 10 CFR 501.69, any person aggrieved by this order may petition for judicial review thereof at any time before the 60th day following the publication of this order in the **Federal Register**.

Issued in Washington, DC, on February 13, 1986.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Project No. 9063-001]

Fluid Energy Systems, Inc.; Surrender of Preliminary Permit

February 21, 1986.

Take notice that Fluid Energy Systems, Inc., Permittee for the proposed West Walker River Power Project No. 9063, has requested that its preliminary permit be terminated. The preliminary permit was issued on August 22, 1985, and would have expired on July 31, 1988. The project would have been located on West Walker River in Mono County, California.

The Permittee filed the request on January 22, 1986, and the preliminary permit for Project No. 9063 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007, in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project Nos. 7182-000 and 5865-000]

Jerald & Lois Simms, David Cereghino, Availability of Environmental Assessment And Finding of No Significant Impact

February 21, 1986

In accordance with the National Environmental Policy Act of 1969, the Office of Hydropower Licensing, Federal Energy Regulatory Commission, (Commission), has reviewed the applications for major and minor licenses (or exemptions) listed below and has assessed the environmental impacts of the proposed developments.

EXEMPTIONS

Project No.	Project name	State	Water body	Nearest town	Applicant
7182-000	Davis Creek	WA	Davis Creek	Packwood	Jerald & Lois Simms.
5865-000	John Day Creek	ID	John Day Creek	Riggins	David Cereghino.

Environmental assessments (EA's) were prepared for the above proposed projects. Based on independent analyses of the above actions as set forth in the EA's, the Commission's staff concludes that these projects would not have significant effects on the quality of the human environment. Therefore, environmental impact statements for these projects will not be prepared.

Copies of the EA's are available for review in the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, DC 20426.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Long Lake Energy Corp.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

[Docket No. QF86-515-000 et al.]

February 21, 1986.

On February 4, 1986, Long Lake Energy Corporation (Applicant), of 420 Lexington Avenue, Suite 440, New York, New York 10170 submitted for filing five (5) applications for certification of facilities as qualifying small power production facilities pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

Each of the hydroelectric small power production facilities location, water resources, FERC project number and electric power production capacity are listed below.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to

VOL
51
ISS

UMI

become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

A separate application is required for a hydroelectric project license, preliminary permit or exemption from licensing. Comments on such applications are requested by separate public notice. Qualifying status serves only to establish eligibility for benefits provided by PURPA, as implemented by the Commission's regulations, 18 CFR Part 292. It does not relieve a facility of any other requirements of local, State or Federal law, including those regarding siting, construction, operation, licensing and pollution abatement.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. ER86-145-000, et al.]

Electric Rate and Corporate Regulation Filings; Bangor Hydro-Electric Co. et al.

February 21, 1986.

Take notice that the following filings have been made with the Commission:

1. Bangor Hydro-Electric Company

[Docket No. ER86-145-000]

Take notice that on February 13, 1986, Bangor Hydro-Electric Company (BH) tendered for filing notice of a revised rate schedule. The revision affects the rate schedule filed by BH on November 1, 1985 between BH and Central Vermont Public Service Corporation (CVPS) providing for the sale of non-firm energy by BH to CVPS.

Comment date: March 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

2. Boston Edison Company

[Docket No. ER86-290-000]

Take notice that on *February 14, 1986*, Boston Edison Company (Edison) tendered for filing a supplemental Exhibit A to a Service Agreement for Cambridge Electric Light Company (CEL), under its FERC Electric Tariff, Original Volume No. III, Non-Firm Transmission Service (the Tariff). The Exhibit A specifies the amount and duration of transmission service required by CEL under the Tariff.

Edison requests waiver of the Commission's notice requirements to permit the Exhibit A to become effective as of the commencement date of the transaction to which it relates, December 1, 1985.

Edison states that it has served the filing on Cambridge Electric Light Company and the Massachusetts Department of Public Utilities.

Comment date: March 6, 1986, in accordance with Standard Paragraph E at the end of this notice.

3. Central Hudson Gas & Electric Corporation

[Docket No. ER86-308-000]

Take notice that Central Hudson Gas & Electric Corporation (Central Hudson) on Feb. 18, 1986 tendered for filing as a supplement to its Rate Schedule FERC No. 22 a letter of agreement and notification dated January 27, 1986 between Central Hudson and New York State Electric and Gas Corporation. Central Hudson states that this letter provides for a decrease in the monthly facilities charge from $6,981.25 to $6,903.08 in accordance with Article IV.1 of its Rate Schedule FERC No. 22, a decrease in the monthly Transmission Charge from $5,868.55 to $5,675.81 in accordance with Articles V and VI of its Rate Schedule FERC No. 22 and an increase in the annual Operation and Maintenance Charge from $3,237.42 to $3,402.53 in accordance with Article IV.2. of its Rate Schedule FERC No. 22. Central Hudson requests waiver of the notice requirement of Subsection 35.3 of the Commission's Regulations to permit this proposed increase to become effective January 1, 1986.

Copies of filing by Central Hudson were served upon: New York State Electric and Gas Corporation, 4500 Vestal Parkway, East, Binghamton, NY 13902.

Comment date: March 6, 1986, in accordance with Standard Paragraph E at the end of this notice.

4. Commonwealth Edison Company

[Docket No. ER86-163-001]

Take notice that on January 30, 1986, Commonwealth Edison Company (Edison) tendered for filing six copies of the previously filed Rate 78B, Wholesale Service and Rider 8A, Allowance for Customer-owned Transformers and Rider 19, Industrial Development, as currently available to qualifying industrial customers in its retail service area. This filing was made pursuant to Commission order dated January 3, 1986 in Docket No. ER86-163-000.

Comment date: March 5, 1986, in accordance with Standard Paragraph H at the end of this notice.

5. Montaup Electric Company

[Docket No. ER86-288-000]

Take notice that on Feb. 14, 1986 Montaup Electric Company ("Montaup" or "the Company") tendered for filing amendments to its fuel adjustment clause applicable to all-requirements service to its affiliates Eastern Edison Company ("Eastern Edison") in Massachusetts and Blackstone Valley Electric Company ("Blackstone") in Rhode Island and contract demand service to three non-affiliated customers: The Town of Middleborough in Massachusetts and Pascoag Fire District and Newport Electric Corporation in Rhode Island. The amendments provide for treatment of test power from the Millstone No. 3 and Seabrook No. 1 generating units in accordance with *Pennsylvania Power & Light Company*, Docket Nos. ER82-493-000 and ER82-494-000, Opinion No. 170, 23 F.E.R.C. ¶ 61,395 (June 22, 1983). The effect of this treatment and associated accounting is to defer the flow-through of fuel cost savings from each unit until the unit goes into commercial service and, thereafter, to pass the savings through to ratepayers over the service life of the unit. The customers, however, receive a current pass through of savings to the extent construction work in progress ("CWIP") in each unit is included in rate base.

The savings will begin to occur at Millstone No. 3 and Seabrook No. 1 whenever net positive amounts of test energy are generated. This is expected to occur for a period of a month or more preceding the commercial operation

date of each unit. Millstone No. 3 is currently scheduled to enter commercial service on May 1, 1986 but the schedule may be advanced. Seabrook No. 1 is presently scheduled to enter commercial service on November 1, 1986.

The Company requests that the present filing be made effective whenever net positive test generation occurs at Millstone No. 3. The Company will notify the Commission promptly when that event occurs.

The Company's filing has been served on the affected customers, the Massachusetts Department of Public Utilities and the Rhode Island Department of Public Utilities and Carriers.

Comment date: March 6, 1986, in accordance with Standard Paragraph E at the end of this notice.

6. Niagara Mohawk Power Corporation

[Docket No. ER86-298-000]

Take notice that Niagara Mohawk Power Corporation (Niagara), February 14, 1986, on tendered for filing as a rate schedule, an agreement between Niagara and the Power Authority of the State of New York (PASNY) dated December 12, 1985.

Niagara presently has on file an agreement with PASNY dated January 25, 1956. This agreement is designated as Niagara Mohawk Power Corporation Rate Schedule F.E.R.C. No. 38. This new agreement is being transmitted as a supplement to the existing agreement.

The original January 25, 1956, agreement states that Niagara will provide transmission for the Power Authority of the State of New York to effect the delivery of electric power and energy to the State of Vermont, the city of Plattsburg, and the U.S. Air Force base at Plattsburgh.

This supplement revises the rate for transmission as provided for in terms of the original agreement. Niagara requests waiver of the Commission's prior notice requirements in order to allow said agreement to become effective as of January 1, 1986.

Copies of the filing were served upon the following:

Power Authority of the State of New York, 10 Columbus Circle, New York, NY 10019

Public Service Commission, State of New York, Three Rockefeller State Plaza, Albany, NY 12223

Comment date: March 6, 1986, in accordance with Standard Paragraph E at the end of this document.

Niagara Mohawk Power Corporation

[Docket No. ER86-308-000]

Take notice that Niagara Mohawk Power Corporation (Niagara), on February 18, 1986 tendered for filing as a rate schedule, an agreement between Niagara and Long Island Lighting Co. (LILCO) dated May 15, 1985.

Niagara presently has on file an agreement with LILCO dated February 14, 1975 last amended October 1, 1984. This agreement is designated as Niagara Mohawk Power Corporation Rate Schedule F.E.R.C. No. 91 with Supplement 6. The new agreement is being transmitted as a supplement to the existing agreement.

This supplement revises the transmission rate for transmitting FitzPatrick powes and energy from the Power Authority of the State of New York to Long Island as provided for in the terms of the original agreement. Niagara requests the Commission to allow said agreement to become effective as of September 1, 1985.

Copies of this filing were served upon the following:

Long Island Lighting Company, 250 Old Country Road, Mineola, NY 11501

Public Service Commission, State of New York, Three Rockefeller State Plaza, Albany, NY 12223.

Comment date: March 6, 1986, in accordance with Standard Paragraph E at the end of this notice.

8. Southwestern Electric Power Company

[Docket No. ER86-306-000]

Take notice that on February 18, 1986, Southwestern Electric Power Company ("SWEPCO"), with the concurrence of the City of Siloam Springs, Arkansas ("Siloam Springs"), tendered for filing proposed rate increases applicable to Siloam Springs. The proposed changes would increase revenues from jurisdictional sales by $53,000 based on a test year ended March 31, 1986. The rate increase is intended to compensate SWEPCO for its investment and expenses with respect to placing SWEPCO's new generating plant, Dolet Hills Unit No. 1 in rate base in the spring of 1986. SWEPCO requests an effective date of March 1, 1986, and accordingly, seeks waiver of the notice requirements of the Federal Power Act.

Copies of the filing have been served on Siloam Springs and on the Arkansas Public Service Commission.

Comment date: March 6, 1986, in accodance with Standard Paragraph E at the end of this document.

9. Southern California Edison Company

[Docket No. ER86-307-000]

Take notice that, on February 18, 1986, Southern California Edison Company ("Edison") tendered for filing, as an initial rate schedule, the following agreement, which has been executed by Edison and Deseret Generation and Transmission Co-operative ("Deseret").

EDISON–DESERET
ECONOMY ENERGY AGREEMENT
("AGREEMENT")

Under the terms of the Agreement, Economy Energy may be sold by one Party and purchased by the other Party to make more efficient use of the Parties' electrical systems.

Edison requests, to the extent necessary, Waiver of Notice requirements.

Copies of this filing were served upon the Public Utilities Commission of the State of California and all interested parties.

Comment date: March 6, 1986, in accordance with Standard Paragraph E at the end of this document.

10. Public Service Company of Colorado

[Docket No. ER86-296-000]

Take notice that Public Service Company of Colorado (Public Service), on February 6, 1986 tendered for filing a proposed change in its Power Purchase and Interchange Agreement (Agreement) with Colorado-Ute Electric Association, Inc. (Colorado-Ute). Public Service states that the proposed change is a Supplement to Public Service's Agreement with Colorado-Ute, dated April 30, 1982, on file with the Commission under Public Service's FERC Rate Schedule No. 37.

Public Service states that the Supplement to the Agreement with Colorado-Ute provides for the elimination of the Stockade delivery point and for various increases and reductions in load at the other delivery points.

Public Service states that copies of the filing were served upon all parties to the Agreement and affected state commissions.

Comment date: March 6, 1986, in accordance with Standard Paragraph E at the end of this notice.

11. Puget Sound Power and Light Company

[Docket No. ER86-303-000]

Take notice that Puget Sound Power & Light Company of Bellevue, Washington (Puget Power), on February 14, 1986, tendered for filing a change in rates applicable to electric service rendered to nine wholesale customers under its

BEST COPY AVAILABLE

VOL 51
ISS 40
FE 28
1986
UMI

existing Wholesale for Resale Power Contracts. Puget Power's filing would change both of its wholesale rate schedules, one for large customers and the other for small customers. Puget Power states that the proposed changes would increase revenues from the nine wholesale customers by $215,313 based on the twelve-month period ending December 31, 1984.

Puget Power states that proposed rate increase is necessary in order to recover a portion of the $464,934 overall revenue deficiency which exists.

Copies of the filing were served upon Puget's wholesale customers.

Comment date: March 6, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

H. Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before the comment date. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CP86-286-000, et al.]

Natural Gas Certification Filings; Northwest Central Pipeline Corp. et al.

February 21, 1986.

Take notice that the following filings have been made with the Commission:

1. Northwest Central Pipeline Corporation

[Docket No. CP86-286-000]

Take notice that on January 23, 1986, Northwest Central Pipeline Corpration (Application), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP86-286-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange of up to 25,000 Mcf of gas per day with Pacific Gas and Electric Company (PG&E), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Applicant proposes to exchange up to 25,000 Mcf of gas per day which it proposes to gather for PG&E in the Northeast Wamsutter area in Sweetwater and Carbon Counties, Wyoming, by causing thermally equivalent volumes of gas to be delivered to Northwest Pipeline Corporation in the Moxa area in Lincoln County, Wyoming, for redelivery to PG&E.

It is explained that Applicant and PG&E have entered a twenty-year gas gathering and exchange agreement dated December 31, 1979, as amended, and that the exchange of gas would be made on a thermally equivalent basis, free of transportation charges to either party. It is stated that under the agreement PG&E would pay applicant its cost of service for gathering such gas.

It is further explained that Applicant would have Northwest gather gas for it in the Moxa area and that, after being gathered, such gas would be transported by Northwest for PG&E and delivered to its market area. It is stated that PG&E has entered into such a transportation agreement with Northwest.

Applicant further requests authorization to file annually tariff revisions by January 31 of each year reflecting any changes, additions or deletions, of delivery points.

Comment date: March 14, 1986, in accordance with Standard Paragraph F at the end of this notice.

2. Panhandle Eastern Pipe Line Company

[Docket No. CP86-296-000]

Take notice that on January 30, 1986, Panhandle Eastern Pipe Line Company (Panhandle), 3000 Bissonnet, Houston, Texas 77251-1642, filed in Docket No. CP86-296-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale of natural gas to a small local general service customer, the City of Sunray Utilities (Sunray), in Texas and the construction and operation of certain related facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Sunray currently is purchasing gas from Panhandle pursuant to an emergency sale initiated December 12, 1985, for sixty days, it is explained. Panhandle further states that such sale is concurrently being extended from February 11, 1986, to April 10, 1986. Panhandle contends that Sunray is experiencing a rapid decline in production from its well supply and has requested to purchase up to 1,500 Mcf maximum daily quantity of gas on a long-term basis, as an alternative source of gas supply to avoid any interruption of service to its customers upon expiration of the emergency sale. Sunray would purchase the gas from Panhandle under its Rate Schedule SG-3, for a primary term ending October 31, 1993, it is asserted.

Panhandle also requests authorization to construct and operate measuring and regulating facilities at an estimated cost of $15,000, to effectuate the proposed deliveries. Panhandle also indicates that the volumes requested would not have substantial impact on its other customers.

Comment date: March 14, 1986, in accordance with Standard Paragraph F at the end of this notice.

3. Tennessee Gas Pipeline Company, a Division of Tenneco Inc.

[Docket No. CP86-251-001]

Take notice that on February 3, 1986, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Applicant), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP86-251-001 an amendment to its pending application filed in Docket No. CP86-251-000 pursuant to section 7(c) of the Natural Gas Act so as to request authorization to (1) increase sales of natural gas on an interim daily basis to two of Applicant's existing resale customers, Consolidated Edison Company of New York, Inc. (Con Ed), and Boston Gas Company (Boston Gas), and/or transport of identical volumes at the resale customers' option and (2) construct and operate facilities necessary to deliver these volumes, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Applicant states that the increased natural gas service obligation for these resale customers would total 15.460 million cubic feet of natural gas per day (Mcfd). It is explained that the resale customers proposed associated sales/transportation volumes are 5,000 Mcfd for Con Ed and 10,460 Mcfd for Boston

Gas. Applicant states these resale customers are currently stockholders/members of Boundary Gas, Inc. (Boundary), and that all deliveries would be made at its existing delivery points.

Applicant states that the proposed service would be provided under the same terms and conditions as proposed in Docket No. CP86-251-000. Specifically, Applicant proposes that interim sales and/or transportation service would continue only until firm deliveries commence of Canadian gas to these customers from Boundary through facilities for which authorization is sought in Docket No. CP81-107-000, *et al.* Applicant states that the sales would be made at its existing Rate Schedule CD-5 or CD-6 rates and asserts that these rates would not materially change as a result of this application. It is further stated that rates for interim transportation service charged in lieu of sales service rates would be Applicant's generally applicable transportation rates for comparable service, but not less than the sum of the demand and non-gas commodity components of Applicant's Rate Schedule CD-5 or CD-6 rates (plus fuel). After the proposed interim service ends, Applicant proposes that the facilities constructed for the interim sales and/or transportation service would be used to transport Boundary gas volumes. Applicant explains that transportation rates for the firm transportation of Boundary gas volumes would be calculated to return the incremental cost of the facilities constructed to perform it, including the undepreciated cost of facilities constructed for the interim natural gas service proposed herein.

To accomplish the proposed increased deliveries, Applicant proposes to construct and operate 13.7 miles of 30-inch mainline loop in New York, Pennsylvania and Massachusetts and to replace 5.1 miles of lateral or delivery pipeline in Massachusetts. Applicant says that no additional compression is required to perform the service. Applicant estimates the total costs of these facilities to be $17,456,000.

Comment date: March 14, 1986, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

4. Wisconsin Gas Company

[Docket No. CP86-297-000]

Take notice that on January 30, 1986, Wisconsin Gas Company (Applicant), 626 East Wisconsin Avenue, Milwaukee, Wisconsin 53202, filed in Docket No. CP86-297-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon an arrangement to sell to and exchange natural gas with Northern States Power Company—Wisconsin (NSP-Wisconsin) in return for half the equivalent volume of liquefied natural gas (LNG), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant reports that it entered into a sale and exchange agreement with NSP-Wisconsin on July 16, 1973, whereunder Applicant would take LNG from NSP-Wisconsin and would deliver twice the equivalent volumes of vaporous natural gas back to NSP-Wisconsin in exchange, using the facilities of Midwestern Gas Transmission Company (Midwestern) and ANR Pipeline Company (ANR) to ship the gas. It is explained that to perform its own portion of this exchange arrangement, ANR executed a separate contract with Midwestern and ANR on August 30, 1973, as amended on June 1, 1978, and on March 31, 1983.

Applicant reports that on September 18, 1985, it entered into a new agreement with NSP-Wisconsin, which provided that Applicant would now purchase LNG from NSP-Wisconsin for cash in lieu of vaporous natural gas. This new arrangement would replace the previously-certificated sale and exchange arrangement, which expired of its own terms on March 31, 1984, says Applicant.

Applicant states that in conformity with the above transactions, it also executed an agreement with Midwestern and ANR on December 2, 1985, terminating their own extant exchanges as of that date.

Applicant notes that NSP-Wisconsin filed an application on October 23, 1985, in Docket No. CP76-84-002, requesting authorization to sell LNG to Applicant for cash in accordance with their new contract. It is further indicated that on January 14, 1986, Midwestern filed a petition in Docket No. CP86-287-000 for permission and approval to abandon its gas exchange arrangement with Wisconsin Gas and ANR.

Applicant also requests that its operations continue to be declared exempt from the provisions of the Natural Gas Act, pursuant to section 1(c) thereof.

Comment date: March 14, 1986, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP86-47-000]

Northwest Alaskan Pipeline; Tariff Changes

February 21, 1986.

Take notice that on February 11, 1986, Northwest Alaskan Pipeline Company ("Northwest Alaskan"), 295 Chipeta Way, Salt Lake City, Utah 84108-0999, tendered for filing in Docket No. RP86-47 the following tariff sheets to its FERC Gas Tariff Original Volume No. 2:

Second Revised Sheet No. 100
Second Revised Sheet No. 108
Second Revised Sheet No. 110
First Revised Sheet No. 114B
First Revised Sheet No. 114C
First Revised Sheet No. 114D
First Revised Sheet No. 114E
First Revised Sheet No. 114F
First Revised Sheet No. 114G

Original Sheet No. 114H
Original Sheet No. 114I
Second Revised Sheet No. 115
Second Revised Sheet No. 123
Second Revised Sheet No. 150
Second Revised Sheet No. 160
Second Revised Sheet No. 173
Original Sheet No. 173A
Original Sheet No. 173B
Second Revised Sheet No. 176
Second Revised Sheet No. 176A
Original Sheet No. 176B
First Revised Sheet No. 186A

Northwest Alaskan states that it is submitting these sheets to reflect changes in the commodity charges for Canadian gas purchased by Northwest Alaskan from Pan-Alberta Gas Ltd. ("Pan-Alberta") and resold to Northern Natural Gas Company ("Northern") under Rate Schedule X–1.

Northwest Alaskan states that it is submitting the above tariff sheets pursuant to the provisions of the amended purchase agreement dated February 1, 1986, between Northwest Alaskan and Northern.

These changes are beneficial to Northern in that the commodity charges for gas purchased in excess of the minimum daily volume will be substantially reduced.

Northwest Alaskan requests that the above sheets become effective on the date on which all necessary Canadian regulatory approvals have been obtained.

Northwest Alaskan states that a copy of this filing is being served on Northwest Alaskan's customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before February 28, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717–01–M

[Docket Nos. TA86–5–20–002 and TA86–6–20–003]

Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

February 21, 1986.

Take notice that Algonquin Gas Transmission Company ("Algonquin Gas") on February 12, 1986, tendered for filing the following tariff sheets to its FERC Gas Tariff, Second Revised Volume No. 1:

Substitute Eighth Revised Sheet No. 211
Second Substitute Nineteenth Revised Sheet No. 213
Second Substitute Twentieth Revised Sheet No. 213

Algonquin Gas states that such tariff sheets are being filed to reflect a decrease in its Rate Schedule STB and S–IS Space Charges as reflected in Texas Eastern Transmission Corporation's ("Texas Eastern") underlying Rate Schedule SS–II and ISS–III.

Algonquin Gas requests that the Commission accept Substitute Eighth Revised Sheet No. 211 and Second Substitute Nineteenth Revised Sheet No. 213 to be effective January 1, 1986; and that the Commission accept Second Substitute Twentieth Revised Sheet No. 213 to be effective February 1, 1986.

Algonquin Gas requests that the Commission grant such special permission as may be necessary to adjust the next month's billing subsequent to Commission approval to effectuate the results of the proposed rate changes as of January 1, 1986.

Algonquin Gas notes that a copy of this filing is being served upon each affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before February 28, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Project No. 5080–002]

Donnie McFadden dba Buckeye Land Co.; Surrender of Exemption

February 21, 1986.

Take notice that Donnie McFadden dba Buckeye Land Company, Exemptee for the Billingsley Creek Project No. 5080, has requested that his exemption be terminated. The exemption for Project No. 5080 was issued December 15, 1981. The project would have been located on Billingsley Creek in Gooding County, Idaho.

The Exemptee filed the request on January 31, 1986, and the exemption for Project No. 5080 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007, in which case the exemption shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

BILLING CODE 6717–01–M

[Docket No. TA86–4–37–000, 001]

Northwest Pipeline Corp.; Change in Rates Pursuant to Purchased Gas Cost Adjustment

Take notice that on February 14, 1986, Northwest Pipeline Corporation ("Northwest") submitted for filing a proposed change in rates applicable to service rendered under rate schedules affected by and subject to Article 16, Purchased Gas Cost Adjustment Provision ("PGA"), of its FERC Gas Tariff, First Revised Volume No. 1. Such change in rates is for the purpose of: (1) Reflecting the changes in Northwest's estimated cost of purchased gas; (2) reflecting the change in unrecovered purchased gas costs since Northwest's PGA filing dated February 14, 1985; and (3) projecting incremental surcharges to be assessed Northwest's affected direct and sales for resale customers pursuant to Order No. 49.

The current PGA adjustment, for which notice is given herein, aggregates to a decrease of 2.689¢ per therm (including the special surcharge of 0.319¢ (not applicable to Rate Schedule PL–1)) in the commodity rate for all rate schedules, unless noted above, affected by and subject to the PGA. There is no change in the demand rate. The annual jurisdictional change in the Northwest's

rates is a decrease of approximately $63,292,772. Northwest proposes to refund through its twelve-month surcharge the adjusted balance of $28,751,562 in its current deferral subaccount of FERC Account No. 191 as of December 31, 1985. The proposed rate changes have been reflected on Twenty-Sixth Revised Sheet No. 10 and Eighth Amended Substitute Nineteeth Revised Sheet No. 10 applicable to consenting and nonconsenting parties respectively.

Northwest also tendered for filing and acceptance Twelfth Revised Sheet No. 10–B reflecting revised projected incremental surcharges and Fifth Revised Sheet No. 127–A reflecting revised tariff language to allow for the elimination of the effects of concurrent exchange imbalance. Northwest requests an effective date of April 1, 1986 for all tendered tariff sheets.

A copy of this filing has been mailed to all parties of record in Docket No. RP72–154–000 to all jurisdcational customers, and to affected state regulatory commissions.

Any persons desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE. Washington DC 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before February 28, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717–01–M

[Docket No. RP–86–38–000]

Southern Natural Gas Co.; Refund Report

February 21, 1986.

Take notice that on January 13, 1986, Southern Natural Gas Company (Southern) tendered for filing a refund report in accordance with section 17.4 of its FERC Gas Tariff, Sixth Revised Volume No. 1. Southern reports that it has refunded $7,795,273.05 in lump sum payment to its jurisdictional customers representing their proportionate share of certain refunds received by Southern from Chevron U.S.A., Inc., Exxon Company, U.S.A. and Terra Resources, Inc., for overcollections by those suppliers attributable to periods prior to January 1, 1980.

Southern indicates that copies of this filing have been sent to each customer receiving a refund and to each interested state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20406, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1985)). All such motions or protests should be filed on or before February 28, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TA86–1–42–004]

Transwestern Pipeline Co.; Proposed Changes in FERC Gas Tariff

February 21, 1986.

Take notice that Transwestern Pipeline Company (Transwestern) on February 10, 1986 tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets:

Substitute 9th Revised Sheet No. 74
Substitute 4th Revised Sheet No. 75

On January 30, 1986, Transwestern filed with the Federal Energy Regulatory Commission (Commission) revised tariff sheets incorporating the new methodology for treating monthly concurrent exchange imbalances as adopted by the Commission in orders issued January 15, 1986 in Docket Nos. TA85–2–11–002, *et al.*, and TA85–2–15–000, –002 and –003. Subsequent to the filing of January 20, 1986, Transwestern became aware of certain typographical errors contined on such tariff sheets. The instant filing is being made for the sole purpose of correcting such typographical errors.

The proposed effective date of the above tariff sheets is March 1, 1986.

Copies of this filing were served on Transwestern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before February 28, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[FR Doc. 86–4379 Filed 2–27–86; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. TA85–2–11–003, TA86–1–11–002, and TA86–2–11–002]

United Gas Pipe Line Co.; Filing of Revised Tariff Sheets

February 21, 1986.

Take notice that on February 6, 1986, United Gas Pipe Line Company (United) tendered for filing the following tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1:

Seventy-Second Revised Sheet No. 4
Fifth Revised Sheet No. 74–B
Sixth Revised Sheet No. 74–F
First Revised Sheet No. 74–F1

According to § 381.103(b)(2)(iii) of the Commission's regulations (18 CFR 381.103(b)(2)(iii)), the date of filing is the date on which the Commission receives the appropriate filing fee, which in the instant case was not until February 13, 1986.

United states that the tariff sheets are being filed pursuant to the requirements of the Commission's January 22, 1986, order on rehearing in the captioned dockets.

United reports that it mailed copies of the proposed tariff sheets to its jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1985)) All such motions or protests should be filed on or before February 28, 1986. Protests will be

VOL 51
ISS 40
FE 28
1986
UMI

considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-59754 FRL-2975-6]

Polyester of Benzenedicarboxylic Acids and Alkanepolyols; Certain Chemical Premanufacture Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) permanufacture notices are discussed in EPA statements of the final rule published in the Federal Register of May 13, 1983 (48 FR 21722). In the Federal Register of November 11, 1984, (49 FR 46066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. PMNs for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of one such PMN and provides a summary of it.

DATE: Close of Review Period: for Y 86-82: March 11, 1986.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-611, 401 M Street, SW., Washington, DC 20460, (202) 382-3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission by the manufacturer on the exemption received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, exlcuding legal holidays.

Y 86-82

Manufacturer. Confidential.

Chemical. (G)] Polyester of benzenedicarboxylic acids and alkanepolyols.

Use/Production. (G) Resin for industrial enamels. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture: dermal, a total of 12 workers, up to 10 hrs/da, up to 50 day/yr.

Environmental Release/Disposal. No release. Disposal by publicly owned treatment works (POTW).

Dated: February 21, 1986.

Denise Devoe,
Acting Director, Information Management Division.

Certain Chemical Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the Federal Register of May 13, 1983 (48 FR 21722). This notice announces receipt of twenty-one PMNs and provides a summary of each.

DATES: Close of Review Period:

P 86-541, 86-542, 86-543 and 86-544, May 18, 1986

P 86-545, 86-546, 86-547, 86-548, 86-549, 86-550, 86-551, 86-552, 86-553, 86-554, 86-555, 86-556, 86-557, 86-558, and 86-559, May 19, 1986

P 86-560 and 86-561, May 20, 1986.

Written comments by:

P 86-541, 86-542, 86-543, and 86-544, April 18, 1986

P 86-545, 86-546, 86-547, 86-548, 86-549, 86-550, 86-551, 86-552, 86-553, 86-554, 86-555, 86-556, 86-557, 86-558, and 86-559, April 19, 1986

P 86-560 and 86-561, April 20, 1986.

ADDRESS: Written comments, identified by the document control number "[OPTS-51612]" and the specific PMN number should be sent to: Document Control Officer (TS-793), Confidential Data Branch, Information Management Division, Office of Toxic Substances, Environmental Protection Agency, Room E-201, 401 M Street SW., Washington, DC 20460, (202) 382-3532.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Room E-611, 401 M Street SW., Washington, DC 20460, (202) 382-3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

Comprehensive Assessment Information Rule; Extension of Participation Deadline for CAIR Form Pretest

AGENCY: Environmental Protection Agency (EPA).

ACTION: Extension of CAIR form pretest participation deadline.

SUMMARY: EPA is extending the period in which persons may volunteer to participate in the Comprehensive Assessment Information Rule (CAIR) form pretest. This is being done to ensure that all persons interested have adequate time to contact EPA's contractor, Science Applications International Corporation (SAIC), for information on the conduct of the pretest.

DATE: Persons wishing to participate in this pretest should notify SAIC no later than March 14, 1986.

ADDRESS: Send written requests to participate, or call SAIC at the following location: Ms. Carolyn Bosserman, Science Applications International Corporation, 8400 Westpark Drive, McLean, VA 22102 (703-821-4812).

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Room E-543, 401 M Street SW., Washington, DC 20460. Toll free: (800-424-9065). In Washington, DC: (554-1404). Outside the USA: (Operator-202-554-1404).

SUPPLEMENTARY INFORMATION: The Notice of the CAIR form pretest was published in the Federal Register of January 24, 1986 (51 FR 3251). EPA is conducting this pretest to determine potential problems with the form and provide EPA with an opportunity to improve the form before the CAIR is promulgated. In order to develop a pretest which will be representative of the industry as a whole, EPA is interested in having the widest variety of companies participate. To ensure this, EPA has decided to extend the deadline for requesting participation in the pretest. EPA's contractor, SAIC, who is approved to receive confidential business information, will be conducting the pretest, and any data received during the pretest will not be revealed either to EPA or the public. EPA encourages all companies interested in participating to contact SAIC. However, the selection of companies will be made at random by SAIC, so EPA cannot guarantee that all volunteers will be able to participate in the pretest due to limitations on the number of total participants. SAIC will be accepting responses to this notice until March 14, 1986.

Dated: February 25, 1986.

Joseph J. Merenda,

Director, Existing Chemical Assessment Division.

[ER-FRL-2975-6]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared February 10, 1986 through February 14, 1986 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382-5075/76. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated February 7, 1986 (51 *FR* 4804).

Draft EISs

ERP No. DS-COE-C34032-TX, Rating EC2, Galveston Multipurpose Deepwater Port and Crude Oil Distribution System Construction, Additional Information on Worst Case Oil Spill Analysis and Environmental Impacts of Bulk Commodities Activities, Permit Applications, TX. Summary: EPA has environmental concerns regarding the proposed actions compliance with the Prevention of Significant Deterioration (PSD) regulations exemption and conditions established on September 21, 1981. EPA requests that clarifying information be included in the final supplemental EIS to more fully assess the PSD compliance issue under applicable Federal and State air quality pollution control regulations.

ERP No. D-FHW-B40063-00, Rating LO=Alter. 1, 2, and Truck Diversion Alter.; EO=Alter. 3, 4, 5, A, B, F; DEIS=2; US 6 Improvement, I-52/I-395 in Killingly, CT to I-295 in Johnston, RI, 404 Permit, CT and RI. Summary: EPA recommends that the proposed alternative consist of diversion of hazardous trucks from the Scituate Reservoir watershed in conjunction with construction of drainage and safety improvements on Route 6. From the standpoint of public health, EPA strongly objects to alternatives that involve a major widening and upgrading of Route 6 or new alignments. EPA objects to the lack of consideration of alternatives outside the watershed; and in addition has asked for more information on secondary impacts, mitigation, and air quality.

ERP No. D-FHW-K40115-CA, Rating EC2, CA-4 Freeway Construction, Wilson Way to CA-99, CA. Summary: EPA is concerned that the air quality analysis was limited to carbon monoxide emissions and did not provide other baseline air quality data or a mitigation plan.

ERP No. D-SFW-L64032-AK, Rating EO2, Yukon Flats Nat'l Wildlife Refuge, Comprehensive Conservation Plan and Wilderness Designation, AK. Summary: EPA is concerned that Alternatives B and C could result in serious adverse impacts, including significant restrictions to subsistence uses; significant long-term water quality degradation; and significant adverse effects on wetlands and associated fish and wildlife species. Implementation of either Alternative D or Alternative E would substantially reduce these concerns.

ERP No. DS-UNS-C11004-00, Rating EC2, Stapleton—Ft. Wadsworth Complex Surface Action Group Homeporting Facility, Development Plans Modification and Family Housing Alternatives at Staten Island, NY, RI, and MA. Summary: EPA is concerned that the proposed project modifications may cause adverse impacts to air quality and environmentally sensitive resources. EPA requests that additional information be presented in the final supplemental EIS to address these issues.

Final EISs

ERP No. F-AFS-E65063-FL, Florida Nat'l Forests, Land and Resource Mgmt. Plan, FL. Summary: EPA has no serious overall objections to the preferred plan. Specific concerns were expressed, however, relative to the potential impacts of timber management in wetlands areas, restoration of titi acreage to pine plantation, and reconstruction of road 13.

ERP No. F-BLM-L92007-00, Northwest Area Noxious Weed Control Program, ID, WA, MT, OR, and WY. Summary: Revisions to the final EIS document adequately respond to EPA concerns.

ERP No. F-COE-E36137-MS, Pearl River Basin Flood Control Plan, MS. Summary: EPA has reviewed the final EIS and has no objections to the project.

ERP No. F-COE-K36085-HI, Kahawainui Stream Flood Damage Reduction Plan, HI. Summary: EPA believes that the selected alternative does not comply with Clean Water Act 404(b)(1) guidelines, and requests that alternative plans #1 and #3 be considered. EPA also requests that design phase planning address impacts to water quality, and incorporate mitigation to address water quality impacts.

Dated: February 25, 1986.

FARM CREDIT ADMINISTRATION

Organization; Farm Credit System Capital Corporation

AGENCY: Farm Credit Administration.

ACTION: Notice; Charter and Articles of Incorporation of the Farm Credit System Capital Corporation.

SUMMARY: On February 24, 1986, the Farm Credit Administration ("FCA") chartered the FARM CREDIT SYSTEM CAPITAL CORPORATION ("CORPORATION") pursuant to Title IV, Part D1, section 4.28A of the Farm Credit Act of 1971, as amended ("Act"), to supersede and succeed the assets and liabilities of the Farm Credit System Capital Corporation ("Predecessor Corporation") a service corporation chartered by the Farm Credit Administration on June 6, 1985, pursuant to Title IV, Part D, sections 4.25 to 4.27 of the Act. Congress established the CORPORATION under the Farm Credit Amendments Act of 1985, Pub. L. 99-205 (1985), to carry out a program of financial and technical assistance to Farm Credit System institutions experiencing financial difficulties. The Chairman also dissolved and revoked the charter of the Predecessor Corporation. The texts of the Charter and Articles of Incorporation of the CORPORATION and Certificate of Dissolution of the Predecessor Corporation are set forth below:

McLean, Virginia

Charter

Farm Credit System Capital Corporation

The Chairman of the Farm Credit Administration Board hereby charters a corporation pursuant to section 4.28A, Title IV, Part D1 of the Farm Credit Act of 1971, as amended ("the Act"), to be known as the FARM CREDIT SYSTEM CAPITAL CORPORATION ("CORPORATION"). The CORPORATION hereby supersedes, succeeds to the assets of, and shall be

VOL

liable for and assume all debts, obligations, contracts, and other liabilities of the Farm Credit System Capital Corporation ("Predecessor Corporation") chartered by the Governor of the Farm Credit Administration under Title IV, Part D of the Act on June 6, 1985, matured or unmatured, accrued, absolute, contingent or otherwise, and whether or not reflected or reserved against on balance sheets, books of account, or records of the Predecessor Corporation. All officers, employees, and agents of the Predecessor Corporation shall be employees and agents of the said CORPORATION and continue to perform the same duties in managing the business and assets of the Predecessor Corporation as set forth in the Articles of Incorporation until directed otherwise by the board of directors of the CORPORATION or the new chief executive officer.

The Chairman of the Farm Credit Administration Board grants this Federal charter to the FARM CREDIT SYSTEM CAPITAL CORPORATION, incorporating an attached original of the Articles of Incorporation of same, and said CORPORATION is hereby authorized to exercise all powers duly conferred under the Act, and the regulations of the Farm Credit Administration promulgated thereunder, and the Articles of Incorporation of the CORPORATION, as same shall be in effect. All capital stock and other equities of the Predecessor Corporation shall be converted into Class D stock of the CORPORATION in a like value and amount as provided in the Articles of Incorporation and bylaws of the CORPORATION.

IN WITNESS WHEREOF, the Chairman has executed this charter and caused the seal of the Farm Credit Administration to be affixed hereto this 24th day of February 1986.

Farm Credit Administration Board.

By: Donald E. Wilkinson,

Acting Chairman.

Attest: Marvin Duncan.

ARTICLES OF INCORPORATION OF FARM CREDIT SYSTEM CAPITAL CORPORATION

Article I—Name

The name of the Corporation shall be "Farm Credit System Capital Corporation" (hereinafter "Corporation").

Article II—Statutory Authority

The Corporation is established pursuant to Title IV, Part D1 of the Farm Credit Act of 1971, as amended ("Act"), as an institution of the Farm Credit System ("System") and an instrumentality of the United States to the same extent as the Federal land banks, the Federal intermediate credit banks, and the banks for cooperatives (collectively "System banks") and subject to the same examination and regulation by the FCA. All powers and authorities stated in these Articles of Incorporation and the bylaws adopted by the board of directors of the Corporation can only be exercised in accordance with any limitations or restrictions herein stated or in FCA regulations or the Act then in effect.

Article III—Duration and Office

Section 1. Duration. The corporate existence of the Corporation shall commence on the issuance of charter by the Chairman of the Farm Credit Administration Board ("FCA Board") of the Farm Credit Administration ("FCA") and shall continue until liquidated in accordance with ARTICLE IX of these Articles of Incorporation.

Section 2. Principal Office. The principal office of the Corporation and such other offices shall be located in such place(s) as designated by the board of directors ("Board").

Article IV—Successor Corporation

Section 1. Succession. As provided in section 4.28H of the Act, the Corporation succeeds to assets and liabilities of the Farm Credit System Capital Corporation ("Predecessor Corporation"), chartered by the FCA on June 6, 1985 pursuant to Title IV, Part D, sections 4.25 to 4.27 of the Act, which charter was revoked on the date of the chartering of the Corporation. The Corporation shall continue all existing contractual obligations, security instruments, and title instruments as obligations and instruments of the Corporation. All stocks in the Predecessor Corporation shall be converted in like value and amount of a special class of Corporation stock provided therefor in the Corporation bylaws and FCA regulations. The Corporation shall account separately for the instruments and obligations assumed from the Predecessor Corporation. Any surplus funds available after the obligations and instruments have been fully performed shall be distributed pro rata to the stockholders of the Predecessor Corporation based on their relative contribution to the Predecessor Corporation. Any losses occurring from these instruments and obligations shall be borne by the stockholders of the Predecessor Corporation up to the amount of investment in such stock and any remaining losses borne by the Corporation.

Section 2. Initial Management. The chief executive officer of the Predecessor Corporation shall become a manager of the Corporation and shall report to, and be subject to the supervision and direction of, the FCA until such time as the Board meets and directs the operations of the Corporation. At that time, the Board shall appoint an acting or a chief executive officer, as soon as practicable, at which point the position and functions of the manager shall terminate.

Article V—Purposes and Powers

1. Purposes. The Corporation is formed for the sole purpose of implementing a program of financial and technical assistance to System institutions and their borrowers which are experiencing financial difficulties as provided in section 4.28B of the Act and the FCA regulations.

2. Powers. The Corporation shall have the following powers, including those provided in the Act and FCA regulations, to effectuate the purposes of the Corporation.

(a) To operate under the direction of its Board; and

(b) To adopt, alter, and use a corporate seal, which shall be judicially noted; and

(c) To provide for a president, one or more vice presidents, a secretary, a treasurer, and such other officers, employers, employees, and agents, as may be necessary, define their duties, and require surety bonds or make other provisions against losses occasioned by acts of such persons; and adopt a salary scale for officers and employees of the Corporation in accordance with the directives of the Board; and

(d) To prescribe by the Board its bylaws, not inconsistent with law, which shall provide for the classes of its stock and the manner in which its stock shall be issued, transferred, and retired; the manner in which its officers, employees, and agents are selected; its property is acquired, held, and transferred; its loans, commitments, and other financial assistance are made; its general business is conducted; and the privileges granted by law are exercised and enjoyed; and

(e) To enter into contracts and make advance, progress, or other payments with respect to such contracts; and

(f) To contract with System institutions for local administration, servicing, and restructuring of loan and loan-related assets and management of acquired properties of the Corporation; and

(g) To sue and be sued in its corporate name and complain and defend, in any court of competent jurisdiction, State or Federal; and

(h) To acquire, hold, lease, mortgage, exchange, improve, manage, operate, maintain, or dispose of, at public or private sale, real and personal property, and guarantee, sell, or exchange any securities or obligations, and otherwise exercise all the usual incidents of ownership or property necessary and convenient to its business; and

(i) To authorize, through the Board, the issuance and sale of obligations, including notes, bonds, debentures, capital notes, and voting or nonvoting securities, to the Secretary of the Treasury or the Farm Credit Administration, under such terms and conditions as shall be determined; and

(j) To obtain insurance against loss; and

(k) To modify or consent to modification with respect to the rate of interest, time or payment of any installment of principal or interest, security, or any other term of any contract or agreement to which it is a party or in which it has an interest under the Act; and

(l) To borrow from any commercial bank on its own individual responsibility on such terms and conditions as it may determine with the approval of the FCA; and

(m) To join with System banks in the issuance of Systemwide obligations, assume liability of Systemwide obligations, be jointly and severally liable with System banks on Systemwide obligations, and satisfy the collateral requirements with respect thereto, in accordance with the Act and FCA regulations; and

(n) To require other institutions of the System through purchase of stock, in, or obligations of, the Corporation, to make funds available to the Corporation to enable it to make financial assistance available to System institutions as provided in paragraph (o) below. The Corporation may also assess at such times and under such circumstances as it deems appropriate, System institutions for the purpose of covering its operating expenses not to include interest costs. The guidelines to be used by the Corporation in obtaining funds from System institutions for the purpose of aggregating resources to assist other System institutions, to the extent practicable, shall give priority to obtaining funds through the use of transactions that require the Corporation, on reasonable terms, to repay the contributed funds from surpluses accumulated by the Corporation, and otherwise shall be in conformity with FCA regulations; and

(o) To administer financial assistance under regulations of the FCA; and

(p) To purchase at fair market value from any other System institution, on the request of such institution, loans (or interests in loans) that have been placed in nonaccrual status and assets (or interests in assets) in the account for acquired property; and

(q) To require System institutions to sell to the Corporation loans, assets, and interests described in paragraph (p) as a condition to receiving financial assistance from the Corporation; and

(r) To exercise all the rights and privileges of any System institution with respect to any loan which it has acquired or in which it has participated, including the adjustment of interest rates, compromise of indebtedness, waiver of default, and other such rights and privileges; and

(s) To assume debt or other liabilities from System institutions in connection with the acquisition of loans or interests therein or other assets from such institutions; and

(t) To refinance, reamortise, guarantee, or compromise indebtedness, and otherwise provide debt adjustment assistance, with respect to any loan to a borrower or a System institution purchased under paragraph (p) or participated in by the Corporation, and, after a determination by the Corporation that the borrower could not reasonably be anticipated to meet loan servicing charges under a refinanced, reamortized, or otherwise restructured loan under reasonable terms and conditions acceptable to the Corporation, liquidate any such loan; and

(u) To purchase from associations undergoing liquidation all assets which are performing loans not voluntarily purchased by other associations; and

(v) To deposit its securities and its current funds with any member of the Federal Reserve System or any insured State nonmember bank as defined in section 2 of the Federal Deposit Insurance Act and pay fees therefor and receive interest thereon as may be agreed; and

(w) To render or provide financial or technical or other related assistance to System institutions experiencing financial difficulties; and

(x) To exercise such incidental powers as may be necessary to carry out its powers, duties, and functions in accordance with the Act and FCA regulations.

Article VI—Stockholders and Stock

Section 1. Qualifications and Liability of Stockholders. All System banks shall be holders of Class A voting stock as provided in the Bylaws and the FCA regulations. The Corporation shall also be authorized to issue nonvoting stock to the FCA and the Secretary of the Treasury of the United States in accordance with the Act and FCA regulations. All other classes of stock shall be nonvoting and may be held by eligible System institutions as shall subscribe to, or are assessed for, such stock in accordance with the Bylaws, the FCA regulations, and the Act. The liability of each of the stockholders of the Corporation for the debts and obligations of the Corporation shall be limited to the subscription price for the shares of stock purchased by such stockholder and no stockholder by reason of its status as such shall be responsible for the claims of creditors of the Corporation.

Section 2. Capital Stock. The Corporation is authorized to issue classes of stock, as provided in the Bylaws, in such numbers and at such times as the Board may determines. The Board is also authorized to fix and establish the following in relations to any issuance of stock under the Bylaws in accordance with the FCA regulations:

(a) The maximum number of shares of that class or series, the distinctive designation of that class or series, and the par or stated value thereof;

(b) Whether shares of that class or series shall be entitled to receive dividends (which shall be noncumulative), the rate or rates of such dividends, the conditions and the times of such dividends and the preference to, or relation to, the dividends payable on any other class or classes, or any other series of the same or any other class or classes, of capital stock of the Corporation.

(c) The rights of the shares of that class or series in the event of voluntary or involuntary liquidation, dissolution or winding up of the Corporation, or upon any distribution of assets;

(d) Whether the shares of that class or series shall have conversion privileges and, if so, the terms and conditions of such conversion privileges;

(e) Whether the shares of that class or series shall be redeemable, and, if so, the price at and the terms and conditions upon which such shares be redeemable;

(f) Such other preferences and relative, paticipating, optional or other special rights and qualifications, limitations or restrictions thereof.

VOL
51
ISS
40
FE
28
1986
UMI

Notwithstanding the fixing of the maximum number of shares constituting a particular class or series upon the issuance thereof, the Board may at any time thereafter authorize the issuance of additional shares of the same class or series or may reduce the maximum number of shares constituting such class or series.

Section 3. Earnings. The Board, in its discretion, may determine that all activities of the Corporation shall be conducted on a cooperative basis for the mutual benefit of its stockholders as patrons or on a non-cooperative basis, or that certain activities of the Corporation shall be conducted on a cooperative basis and other activities shall be conducted on a non-cooperative basis. The Board may declare dividends from earnings available therefor payable to the holders of any one or more classes or series of capital stock of the Corporation in such amounts, at such times, upon such conditions, with such qualifications and on such other terms as may be determined by the Board subject to the FCA regulations relating thereto, but any dividends declared on any class or series shall be payable ratably on each share of such class or series outstanding.

Section 4. Book entry form. Any or all classes and series of capital stock shall be in book entry form, and ownership shall be confirmed by the Corporation upon the request of the holder.

Section 5. Repurchases. Subject to the FCA regulations, the Corporation may repurchase from surplus available therefor any or all shares of capital stock of the Corporation at such times, for such consideration and on such other terms as the Board may determine and, if the terms of the stock do not permit otherwise, the holders of such shares may agree.

Article VII—Board of Directors

Section 1. Authority. Subject to the limitations expressed in these Articles of Incorporation, the FCA regulations, the Act, and other applicable law, the business and affairs of the Corporation shall be directed by the Board.

Section 2. Membership. As provided in the Act and the FCA regulations, the initial Board shall be comprised of two (2) members appointed by the Chairman of the FCA Board and three (3) members elected by all of the System banks from each of the following categories:

(a) one member from an institution and a Farm Credit district that, at the time of the election, is or is projected by the FCA Board to be a net contributor to the Corporation;

(b) one number from an institution and a Farm Credit district that, at the time of the election, is or is projected by the FCA Board to be a net recipient to the Corporation;

(c) one member without regard to the restriction of paragraphs (a) or (b).

Section 3. Expanded Membership. In the event the Secretary of the Treasury purchases any obligation of the Corporation under section 4.28J of the Act, and for so long as such obligation remains outstanding, the Board shall be expanded by two members. One member shall be appointed by the Secretary of Agriculture, and one member shall be selected by the other members of the Board, including the appointee of the Secretary of Agriculture. The latter selection shall not be a borrower from, shareholder in, or employee or agent of any System institution, or a government employee.

Section 4. Term. The initial term of the first appointed director and the director elected to the position in section 2(c) above shall be one year. The terms for every other elected or appointed director shall be two years. Thereafter, each elected or appointed director shall serve two years. All directors shall serve until his or her successor becomes appointed or elected and qualified, unless the office becomes vacant or the director is removed, dies, resigns, or is otherwise unable to serve in accordance with the Bylaws or the FCA regulations. Any appointed or elected director may serve any number of terms, unless removed.

Section 5. Bylaw provision. Bylaws from time to time in affect may contain provisions, not inconsistent with these Articles of incorporation, the FCA regulations, and the Act, regarding the election or appointment, classification, resignation or removal, qualifications, indemnification, procedures and conduct, management and control of the business of, or the rights, powers, and duties of the Board. The authority of the Board to act through committees and the notice, quorum, and vote required for action by the Board may also be as provided in the Bylaws.

Article VIII—Nominating Committee

Section 1. There shall be a Nominating Committee composed of the Chairman, or the Vice Chairman, of each System bank board of directors. The Committee shall meet as soon as practicable following the chartering of the Corporation to nominate candidates for the three Corporation directors to be elected by the voting stockholders. The Committee shall first elect a Chairman and a Vice Chairman to conduct the business of the Committee. After the initial meeting, the Committee shall meet prior to any annual or special meeting of the stockholders at which directors are to be elected.

The Committee may participate in a meeting of the Committee by means of conference telephone or similar communications equipment by means of which all persons participating in the meeting can hear each other.

Section 2. Quorum. A majority of the Committee shall constitute a quorum for transacting business of the Committee.

Section 3. Minutes. The Committee shall keep minutes of its proceedings which shall be maintained with the corporate records of the Corporation.

Article IX—Termination of Certain Powers; Liquidation

After December 31, 1990, all powers of the Corporation to increase the amount of direct financial assistance or the purchase of nonaccrual and related assets, directly or indirectly, to any System institution or its borrowers shall terminate. However, the Corporation shall continue to exercise those powers necessary for the management and orderly liquidation of commitments made and obligations incurred in providing such assistance. Thereafter, the Corporation shall be placed in an inactive status or liquidated upon a plan adopted by the Board of the Corporation and approved by the FCA.

Article X—Amendments

These Articles of Incorporation may be amended from time to time by the FCA Board in accordance with the Act.

FARM CREDIT ADMINISTRATION

McLean, Virginia

Certificate of Dissolution of Farm Credit System Capital Corporation

The Chairman of the Farm Credit Administration Board hereby dissolves and revokes the charter of the FARM CREDIT SYSTEM CAPITAL CORPORATION ("Predecessor Corporation") chartered by the Farm Credit Administration ("FCA") on June 6, 1985, pursuant to Title IV, Part D, sections 4.25 to 4.27 of the Farm Credit Act of 1971, as amended ("Act"). The Predecessor Corporation is superseded by the FARM CREDIT SYSTEM CAPITAL CORPORATION ("Corporation") chartered by the Chairman on this day with such powers as are provided in the Articles of Incorporation of the Corporation and the Act, and on such terms and conditions as shall be provided in the regulations of the Farm Credit Administration.

IN WITNESS HEREOF, the Chairman has executed this certificate of dissolution and caused the seal of the Farm Credit Administration to be affixed hereto this 24th day of February 1986.

Farm Credit Administration Board.

Dominion Bankshares Corp. et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than March 22, 1986.

A. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Dominion Bankshares Corporation*, Roanoke, Virginia; to acquire 100 percent of the voting shares of State National Bank of Maryland, Rockville, Maryland.

B. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Charter 17 Bancorp, Inc.*, Richmond, Indiana; to acquire 11.9 percent of the voting shares of PTC Financial Corporation, Peru, Indiana, thereby indirectly acquiring The Peru Trust Company, Peru, Illinois.

2. *Citizens Community Bankshares, Inc.*, Wittenberg, Wisconsin; to acquire 99.06 percent of the voting shares of Iron Exchange Bank, Hurley, Wisconsin. Comments on this application must be received not later than March 21, 1986.

3. *Independent Community Bancshares, Inc.*, Kiel, Wisconsin; to acquire 100 percent of the voting shares of Newton State Bank, Newton, Wisconsin. Comments on this application must be received not later than March 21, 1986.

4. *M&I Stevens Point Corp.*, Stevens Point, Wisconsin; to become a bank holding company by acquiring 100 percent of the voting shares of First Affiliated Bancorporation, Inc., Stevens Point, Wisconsin, thereby indirectly acquiring Bank of Park Ridge, Park Ridge, Wisconsin and The First National Bank of Stevens Point, Stevens Point, Wisconsin.

5. *Marshall & Illsley Corporation*, Milwaukee, Wisconsin; to acquire 100 percent of the voting shares of M&I Stevens Point Corp., Stevens Point, Wisconsin, thereby indirectly acquiring Bank of Park Ridge, Park Ridge, Wisconsin and The First National Bank of Stevens Point, Stevens Point, Wisconsin.

C. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Lafayette Bancshares, Inc.*, Lafayette, Minnesota; to become a bank holding company by acquiring 86.33 percent of the voting shares of Citizens State Bank of Lafayette, Lafayette, Minnesota.

D. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Fredonia Bancshares, Inc.*, Nacogdoches, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of Fredonia State Bank, Nacogdoches, Texas.

Board of Governors of the Federal Reserve System, March 21, 1986.

BILLING CODE 6210-01-M

Consumer Advisory Council Meeting

The Consumer Advisory Council will meet on Thursday, March 20, and Friday, March 21. The meeting, which will be open to public observation, will take place in Terrace Room E of the Martin Building. The March 20 session is expected to begin at 1:00 p.m. and to continue until 5:00 p.m. The March 21 session is expected to begin at 9:00 a.m. and to continue until 1:00 p.m. The Martin Building is on C Street, Northwest, between 20th and 21st Streets in Washington, DC.

The Council's function is to advise the Board on the exercise of the Board's responsibilities under the Consumer Credit Protection Act and on other matters on which the Board seeks its advice. Time permitting, the Council will discuss the following topics:

1. *Board's Proposal to Revise Advertising Rules of Regulation Q.*—Report by the Council's Ad Hoc Committee on Service Charges on the Board's proposed revisions to Regulation Q's advertising rules and on other matters relating to disclosures in connection with deposit accounts.

VOL 51 ISS 40 FE 28 1986 UMI

2. *Tie-Ins in the Granting of Consumer Credit.*—Discussion of (1) the sale of credit-related insurance in consumer credit transactions, (2) the rates charged for credit-related insurance and a recent state regulation requiring certain creditors to engage in competitive bidding for credit-related insurance and (3) the results of a Board-sponsored survey to determine consumer attitudes about credit-related insurance.

3. *Delayed Availability of Funds.*—Discussion of (1) the practice by financial institutions of delaying a consumer's access to funds deposited by check and (2) two approaches being considered by the Congress to alleviate consumer concerns about this practice, one involving disclosure of hold policies to consumers and the other setting a series of availability schedules.

4. *Credit Card Interest Rates.*—Discussion of congressional proposals to establish nationwide ceilings on credit card interest rates.

5. *Reduced-Rate Financing.*—Discussion of whether recent programs offering consumers reduced-rate financing for automobile purchases lessen the value of the annual percentage rate as a tool for consumers' use in credit shopping.

6. *Disclosures for Adjustable Rate Mortgages (Tentative).*—Discussion of the usefulness of uniform disclosure requirements for adjustable rate mortgage programs.

7. *Legislative Briefing.*—Presentation to inform Council members about the legislative outlook for 1986.

8. *Regulatory Update.*—Status of recent Board regulatory actions in the area of consumer financial services.

Other matters previously considered by the Council or initiated by Council members also may be discussed.

Persons wishing to submit to the Council their views regarding any of the above topics may do so by sending written statements to Ms. Ann Marie Bray, Secretary, Consumer Advisory Council, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551. Comments must be received no later than close of business Monday, March 17, and must be of a quality suitable for reproduction.

Information with regard to this meeting may be obtained from Ms. Bedelia Calhoun, Staff Specialist, at (202) 452-3305.

Board of Governors of the Federal Reserve System, February 24, 1986.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

Federal Open Market Committee; Domestic Policy Directive of December 16-17, 1985

In accordance with § 271.5 of its rules regarding availability of information, there is set forth below the Committee's Policy Directive issued at its meeting held on December 16-17, 1985.[1]

The following domestic policy directive was issued to the Federal Reserve Bank of New York:

The information reviewed at this meeting suggests that economic activity is expanding at a relatively modest pace in the current quarter. Total nonfarm payroll employment increased further in November, though less than in October, and the civilian unemployment rate edged down to 7.0 percent. Retail sales and industrial production picked up in November after declining in October. After strengthening in October, housing starts fell appreciably in November. Incoming information generally suggests relatively sluggish business capital spending. Revised merchandise trade data for the third quarter confirm that the deficit widened further, as non-oil imports continued to increase and exports fell somewhat. Broad measures of prices and wages appear to be rising at rates close to those recorded earlier in the year.

After declining in October, M1 grew substantially in November while growth in M2 and M3 continued quite moderate. Expansion in total domestic nonfinancial debt has remained rapid. Through November, M1 expanded at a rate well above the long-run range set by the Committee, M2 grew at a rate a bit below the upper end of its range for the year, and M3 expanded at a rate near the midpoint of its range for 1985. Treasury bill rates have fallen somewhat while other short-term market interest rates have changed little on balance since the November meeting of the Committee; long-term rates have moved appreciably lower over the period. The trade-weighted value of the dollar against major foreign currencies has declined on balance since the Committee's meeting in early November, though the dollar has tended to stabilize more recently.

The Federal Open Market Committee seeks to foster monetary and financial conditions that will help to reduce inflation further, promote growth in output on a substantial basis, and contribute to an improved pattern of international transactions. In furtherance of these objectives the Committee at the July meeting reaffirmed ranges for the year of 6 to 9 percent for M2 and 6 to 9½ percent for M3. The associated range for total domestic nonfinancial debt was reaffirmed at 9 to 12 percent. With respect to M1, the base was moved forward to the second quarter of 1985 and a range was established at an annual growth rate of 3 to 8 percent. The range takes account of expectations of a return of velocity growth toward more usual patterns, following the sharp decline in velocity during the first half of the year, while also recognizing a higher degree of uncertainty regarding that behavior. The appropriateness of the new range will continue to be reexamined in the light of evidence with respect to economic and financial developments including developments in foreign exchange markets. More generally, the Committee agreed that growth in the aggregates may be in the upper parts of their ranges, depending on continuing developments with respect to velocity and provided that inflationary pressures remain subdued.

For 1986 the Committee agreed on tentative ranges of monetary growth, measured from the fourth quarter of 1985, of 4 to 7 percent for M1, 6 to 9 percent for M2, and 6 to 9 percent for M3. The associated range for growth in total domestic nonfinancial debt was provisionally set at 8 to 11 percent for 1986. With respect to M1 particularly, the Committee recognized that uncertainties surrounding recent behavior of velocity would require careful reappraisal of the target range at the beginning of 1986. Moreover, in establishing ranges for next year, the Committee also recognized that account would need to be taken of experience with institutional and depository behavior in response to the completion of deposit rate deregulation early in the year.

In the implementation of policy for the immediate future, the Committee seeks to decrease somewhat the existing degree of pressure on reserve positions. This action is expected to be consistent with growth in M2 and M3 over the period from November to March at annual rates of about 6 to 8 percent; while the behavior of M1 continues to be subject to unusual uncertainty, growth at an annual rate of 7 to 9 percent over the period is anticipated. Somewhat greater reserve restraint might, and somewhat lesser reserve restraint would, be acceptable depending on behavior of the aggregates, the strength of the business expansion, developments in foreign exchange markets, progress against inflation, and conditions in domestic and international credit markets. The Chairman may call for Committee consultation if it appears to the Manager for Domestic Operations that reserve conditions during the period before the next meeting are likely to be associated with a federal funds rate persistently outside a range of 6 to 10 percent.

By order of the Federal Open Market Committee, February 20, 1986.

Stephen H. Axilrod,

Secretary.

BILLING CODE 4150-04-M

Food and Drug Administration

[Docket No. 85N-0474]

Federation of American Societies for Experimental Biology; Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announced in the **Federal Register** of November 13, 1985 (50 FR 46832), that the Life Sciences Research Office of the Federation of American Societies for Experimental Biology (FASEB), under its contract with FDA, was undertaking a study on dietary characteristics and cancer. The notice announced that an open meeting of the Scientific Steering Group, established by FASEB under the contract, would be scheduled in March 1986 and that the date and location of the meeting would be announced in the **Federal Register**. This notice announces that the meeting will be held on March 26, 1986.

DATE: The open meeting will be held on Wednesday, March 26, 1986, at 9 a.m. The executive session will be held after the open meeting.

ADDRESS: The open and executive session meetings will be held in the Milton O. Lee Bldg. at FASEB, 9650 Rockville Pike, Bethesda, MD 20814.

FOR FURTHER INFORMATION CONTACT: Kenneth D. Fisher, Life Sciences Research Office, Federation of American Societies for Experimental Biology, 9650 Rockville Pike, Bethesda, MD 20814, 301-530-7030.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of November 13, 1985 (50 FR 46832), FDA announced that FASEB, under its contract with FDA (No. 223-83-2020), was undertaking a study on dietary characteristics and cancer. FASEB's Scientific Steering Group, established under the contract, recommended that the Life Sciences Research Office study the available information and data being generated by a major study on dietary characteristics and cancer. For complete information about this study, see 50 FR 46833. FASEB also invited submission of scientific data and information on certain specific questions related to this subject (50 FR 46833) for consideration by the Scientific Steering Group.

In accordance with 21 CFR 14.15(b)(1), notice is given that the Scientific Steering Group will hold an open meeting on March 26, 1986, during which an opportunity will be provided for the public to present written and oral views, information, and data on dietary characteristics and cancer. If time permits, after the conclusion of the open meeting the Scientific Steering Group will meet in executive session to review task orders under the contract initiated since June 1, 1984.

The conference room in which the open meeting is being held has limited seating. Therefore, advance registration is strongly encouraged (contact Kenneth Fisher—address above). Additionally, because parking space is limited, use of public transportation is encouraged.

Dated: February 24, 1986.

Adam J. Trujillo,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

[Docket No. 86M-0031]

W.L. Gore & Associates, Inc.; Premarket Approval of GORE-TEX™ Suture ePTFE Nonabsorbable Monofilament

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by W. L.

VOL 51
ISS 40
FE 28
1986
UMI

Gore Associates, Inc., Flagstaff, AZ, for premarket approval, under the Medical Device Amendments of 1976, of the GORE-TEX™ Suture ePTFE NONABSORBABLE MONOFILAMENT. After reviewing the recommendation of the General and Plastic Surgery Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant of the approval of the application.

DATE: Petitions for administrative review by March 31, 1986.

ADDRESS: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, Room 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Palmer, Center for Devices and Radiological Health (HFZ-410), Food and Drug Administration, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION: On April 11, 1983, W.L. Gore and Associates, Inc., Flagstaff, AZ 86002, submitted to CDRH an application for premarket approval of the GORE-TEX™ Suture ePTFE NONABSORBABLE MONOFILAMENT. The device is an expanded polytetrafluoroethylene nonabsorbable monofilament surgical suture that is not dyed. The GORE-TEX™ Suture ePTFE NONABSORBABLE MONOFILAMENT is indicated for use in all types of soft tissue approximation, including use in cardiovascular surgery, but not in ophthalmic surgery, microsurgery, and neural tissue. It is recommended for use where reduced suture-line bleeding during cardiovascular anastomotic procedures is desired. The device is available in sizes designated by the applicant as CV-2 through CV-7, with and without permanently attached needles.

On June 25, 1984, the General and Plastic Surgery Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application.

On December 30, 1985, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Kenneth A. Palmer (HFZ-410), address above.

Opportunity for Administrative Review

Section 515(d)(3) of the act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and of CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the Federal Register. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before March 31, 1986, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h), 90 Stat. 554-555, 571 (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: February 21, 1986.

John C. Villforth,

Director, Center for Devices and Radiological Health.

[FR Doc. 86-4315 Filed 2-27-86; 8:45 am]

BILLING CODE 4160-01-M

Health Resources and Services Administration

Availability of Funds for Community and Migrant Health Activities

AGENCY: Public Health Service, HHS.

ACTION: Notice.

SUMMARY: The Health Resources and Services Administration (HRSA) is announcing: (1) The availability of approximately $360 million for community health (CH) activities and approximately $45 million for migrant health (MH) activities funded under sections 330 and 329 of the Public Health Service Act (42 U.S.C. 254c and 254b) respectively; (2) within the aforementioned funding, the availability of up to $12 million, targeted to high need areas, for new starts and new expansion activities; (3) within the $400 million, the availability of up to $3 million for grants to provide technical and other non-financial assistance under section 330(f)(1) of the Act; and (4) the criteria that will be used in evaluating applications in FY 1986.

DATE: With the exception of 330(f)(1) applications, continuation funding applications are due 120 days to the expiration of the current grant award; applications for new starts, expansions and new and continuation 330(f)(1) awards must be delivered or postmarked by June 1, 1986, and received in time to process.

FOR FURTHER INFORMATION CONTACT: Application kits and additional information may be obtained from, and completed applications should be sent to, the appropriate Regional Administrator (see Appendix).

SUPPLEMENTARY INFORMATION:

Critieria for Evaluating CH/MH Continuation Applications

As is the practice every year, compliance with standard criteria stipulated in the regulations (42 CFR Part 51c for CH and Part 56 for MH activities) and the performance of grant recipients in using previously awarded section 330 and 329 funds will be carefully reviewed in determining whether continued Federal support will be made available. This year's reviews of Community and Migrant Health Centers (CHC/MHC) will emphasize governance, clinical and financial/administrative expectations as set out below:

- *Governance* (42 CFR 31c.304 ad 56.304)—Each governing borad must represent the population of the catchment area, with center users comprising a majority of membership of

the board. Governing boards are expected to be responsive to the communities that they serve, fulfilling all of the functions and responsibilities specified in the legislation and implementing regulations.

- *Clinical* (42 CFR 51c.102(c)(1)(i), 51c.303 (a) and (p), 56.303 (a) and (p), 56.603 (a) and (n), and 56.102(g)(1)(i)).—CHCs and MH centers and programs must provide health services so that such services are available and accessible promptly, as appropriate, and in a manner which will assure continuity of service to the residents of the center's catchment area. Primary health services must be provided for all residents of the catchment area; such services include, but are not limited to, the diagnostic, treatment, and other services rendered by physicians and physician's extenders, perinatal services, and other preventive health services. In addition, a center must provide sufficient staff, qualified by training and experience, to carry out the activities of the center. In considering which projects to fund, the Secretary will consider whether a center has an appropriate number of full-time providers on staff who provide after hours coverage, have admitting privileges and hospitalize their patients.
- *Financial/Administrative* (42 CFR 51c.303(g), 56.303 (r) ad (s), and 56.305 (a)(3))—CHCs and MH centers and programs must seek to develop and utilize to the greatest extent possible other Federal, State, and local, and private resources, and must seek to maximize non-grant revenues. In considering which projects to fund, the Secretary will consider applicants' plans to secure maximum self-sufficiency and minimize dependence upon and need for subsequent CHC and MH grants.

To determine the level of funding to be awarded, each grantee's entire section 330 and/or 329 financed program will be reviewed using a zero-based assessment process. These zero-based assessments will be used to ascertain the need for the services and to assure that costs of providing the services and the revenues generated are acceptable. The reviews will incorporate all of the considerations listed in 42 CFR 51c.305 for CH grantees and 42 CFR 56.305 or 56.604, as appropriate, for MH grantees. In order to be funded, grantees will be expected to demonstrate: (1) The need and demand for services to be funded, with special attention given to the low birth weight and infant mortality rates in the catchment area; (2) financial and administrative efficiency in the provision of services; and, (3) a clinical system consistent with the priorities mentioned above.

Criteria for Evaluating New and Expansion CH/MH Applications

Applications for funding of "new starts" for CHCs and MH centers and programs will be evaluated in accordance with the criteria set forth in 42 CFR 51c.305 for CH and 56.305 and 56.604 for MH activities. Emphasis during grant evaluation will be placed on the extent to which the need for health services will be addressed, particularly for areas in need of improved perinatal systems. It should be noted that migrant health "centers" and "programs" have different requirements under the authorizing legislation and the regulations: migrant health centers must offer a full range of specified primary and supplemental services and serve a high impact area (section 329(d)(1)(A) of the PHS Act and 42 CFR Part 56, Subpart C); migrant health "programs" may be funded in areas where there is no migrant health center and in which not more than 4,000 migratory agricultural workers and their families reside for more than two months, with a more limited range of services required than offered by migrant health centers (section 329(d)(1)(B) of the PHS Act and 42 CFR Part 56, Subpart F).

The expansion of activities for existing grantees includes, but is not limited to, the establishment of satellite clinics, the expansion of service capacity, and related activities directed toward the expansion and the improvement of the delivery of services, such as improved financial management, planning, marketing, outreach activities, and perinatal systems. The extent to which applicants for expansion funds have or plan to develop cooperative linkages and arrangements with other health care organizations, such as through rural consortia and urban networks, will be considered as applications are reviewed. See 42 CFR 51c.305 (i) and (j), 56.305(a) (6) and (7) and 56.604(a)(2) (iii) and (iv).

Criteria for Evaluating Applications To Provide Technical and Other Non-financial Assistance Under Section 330(f)(1)

A full explanation of the basis on which application will be reviewed is included in the Federal Register Notice, Volume 50, Number 130, Monday, July 8, 1985, page 27851. In addition, the performance of grant recipients in using previously awarded section 330(f)(1) funds will be considered in determining whether Federal support will be made available to continuation applicants.

Other Award Information

Under the terms of the Primary Care Block Grant legislation (section 1923 of the PHS Act, 42 U.S.C. 300y-2), the Department is required to solicit comments from the Governor of the State and the appropriate local officials prior to awarding CHC grants. Since these comments are an essential part of a grant application's review, CHC applicants are advised to request that such comments be sent to the appropriate regional office prior to the due date of their application.

Furthermore, all grants to be awarded under this notice are subject to the provisions of Executive Order 12372, as implemented by 45 CFR Part 100, which allows States the option of setting up a system for reviewing applications from within their States for assistance under certain Federal programs. The application packages to be made available by DHHS (standard DHHS Form No. 424) will contain a listing of States which have chosen to set up such a review system and will provide a point of contact in the States for the review. At the latest, States should receive applications from grantees at the same time that they are due in the Regional Office.

In the OMB *Catalog of Federal Domestic Assistance*, the Community Health Center program is listed as Number 13.224; the Migrant Health Center program is Number 13.246, and; the Technical and Other Non-financial Assistance to Community Health Centers is Number 13.129.

Dated: February 24, 1986

John H. Kelso,

Acting Administrator.

BILLING CODE 4160-16-M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Wild Horse and Burro Advisory Board; Notice of Establishment

This notice is published in accordance with Section 9(a)(2) of the Federal Advisory Committee Act of 1972 (Public Law 92-463). Following consultation with the General Services Administration, notice is hereby given that the Secretaries of the Interior and of Agriculture are establishing a wild horse and burro advisory board to provide advice concerning policy issues related to the management, protection, and control of wild free-roaming horses and burros on public lands administered by the Department of the Interior through the Bureau of Land Management and by the Department of Agriculture through the Forest Service.

Further information concerning the advisory board may be obtained from the Director, Bureau of Land Management (250), U.S. Department of the Interior, Premier Building, Room 901, Washington, D.C. 20240.

The certification of establishment is published below.

Certification

We hereby certify that the establishment of the Wild Horse and Burro Advisory Board is necessary and in the public interest in connection with the performance of duties imposed on the Departments of the Interior and Agriculture by the Wild Free-Roaming Horse and Burro Act (Public Law 92-195, as amended).

Donald Paul Hodel,
Secretary of the Interior.

Date Signed: February 12, 1986.

John R. Block,
Secretary of Agriculture.

[FR Doc. 86-4258 Filed 2-27-86; 8:45 am]

BILLING CODE 3410-01-M, 4310-10-M

Bureau of Land Management

Wild Horse and Burro Advisory Board; Call for Nominations

AGENCY: Bureau of Land Management, Interior.

ACTION: Call for nominations for the Wild Horse and Burro Advisory Board.

SUMMARY: The purpose of this notice is to solicit public nominations for the appointment of members to the Wild Horse and Burro Advisory Board.

The Board will comprise 9 members. Terms of appointment will be for 2 years, or until the Board has been terminated.

Members of the Board shall not be employees of the Federal or State Governments. To ensure Board membership that is balanced in terms of categories of interest represented and functions performed, nominees must be persons who, as a result of training, experience, and attainment, have scientific knowledge or special expertise which qualifies them to represent and provide advise on at least one of the following categories of interest: protection of wild horses and burros, wild horse and burro populations dynamics, management of wildlife, animal husbandry (as it relates to rangeland management).

At least one member will be a representative of a recognized wild horse and burro protection advocacy organization and will be appointed from among those individuals recommended by such organizations.

One member will be chosen from each of the nine categories listed below:

Wild horse and burro research
Wild horse and burro management
Wildlife management
Rangeland management
Livestock management
Animal husbandry: veterinary medicine
Animal husbandry: humane organizations
Conservation
Public at large.

The purpose of the Board will be to provide informed advice to the Secretary of the Interior, the Director, Bureau of Land Management, the Secretary of Agriculture, and the Chief, Forest Service, on matters pertaining to management and protection of wild free-roaming horses and burros on the Nation's public lands.

Members will serve without salary, but will be reimbursed for travel and per diem expenses at current rates for Government employees.

The Board will normally meet three times annually. Additional meetings may be called by the Director, Bureau of Land Management, or his designee in connnection with special needs for advice.

Persons wishing to nominate individuals or to be nominated to serve on the Wild Horse and Burro Advisory Board should forward the names, addresses, professions, and other biographic data on qualified nominees to the address below.

ADDRESS: The mailing address is as follows: Chief, Division of Wild Horses and Burros (250), Bureau of Land Management, Premier Building, Room 901, Washington, DC 20240.

DATE: All nominations must be received by March 28, 1986.

FOR FURTHER INFORMATION CONTACT: Chief, Division of Wild Horses and Burros.

Robert F. Burford,
Director.

[FR Doc. 86-4259 Filed 2-27-86; 8:45 am]

BILLING CODE 4310-10-M

Environmental Impact Statement; Oregon Wilderness Study Area

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent to Prepare a Supplement to the Draft Oregon Wilderness Environmental Impact Statement (DEIS).

DATE: Comments on issues and alternatives to be addressed in the Supplemental DEIS must be received at the address listed below by April 14, 1986. Protests regarding the wilderness inventory decisions included in this notice must be received no later than March 31, 1986.

ADDRESS: Comments should be sent to: Wilderness Studies (935), Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208. Protests should be sent to: State Director, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

FOR FURTHER INFORMATION CONTACT: Jerry Magee (935), Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208. Telephone: (503) 231-6256.

SUPPLEMENTARY INFORMATION: The Draft Oregon Wilderness Environmental Impact Statement (DEIS) was released for public review on April 30, 1985, as announced through a Federal Register notice of availability (50 FR 18321). The document addressed wilderness suitability and nonsuitability recommendations for 77 Wilderness Study Areas (WSAs) totaling 2,304,142 acres. The DEIS analyzed the impacts of seven alternatives ranging from All Wilderness to No Wilderness/No Action. The comment period ended August 31, 1985.

The Bureau of Land Management intends to prepare a supplement to the Oregon Wilderness DEIS to consider additional lands that are being restored or added to WSA status.

On April 18, 1985, the U.S. District Court for the Eastern District of California issued a decision in *Sierra Club* v. *Watt* concerning certain lands that were deleted from wilderness review in 1982 and 1983. The decision restored split-estate lands (where the Federal Government owns the surface and another entity owns the mineral estate) to wilderness study area (WSA) status under section 603 of the Federal Land Policy and Management Act of 1976 (FLPMA). The court also held that the Secretary of the Interior has discretionary authority to study (under section 202 of FLPMA) or remove from study those areas less than 5,000 acres that were deleted from WSA status through Federal Register notices between December 30, 1982 and August 9, 1983. Subsequently, the Secretary of the Interior has directed that these areas be retained as section 202 WSAs unless changes in status of the adjacent lands (upon which most of the BLM areas under 5,000 acres depended for identification as WSAs) no longer justify such WSA status.

In addition, the Department of the Interior has agreed to re-inventory lands over 5,000 acres that are contiguous to lands under wilderness review by other agencies, but which were deleted from WSA status as a result of a determination that they did not possess wilderness characteristics on their own.

As a result of an Interior Board of Land Appeals decision, Oregon and Idaho Inventory Unit OR-3-194A/ID-16-48A, Lookout Butte, was reinventoried and subsequently designated as a WSA on August 28, 1985, through publication of a Federal Register notice (50 FR 34917).

The final category of lands to be incorporated into the Supplemental DEIS includes split-estate and full fee-estate lands, acquired since completion of the wilderness inventory phase, that are either within or adjacent to the outer boundaries of an existing WSA and within the same roadless area. The decision to add any such lands to the wilderness review effort is within BLM's discretionary authority under sections 202 and 302 of FLPMA. In some places, these acquired lands form a bridge ot other BLM-administered public lands within these same roadless area. Only those acquired lands, and any adjoining public lands, which have been found through inventory, to possess wilderness characteristics in association with the adjacent WSAs will be considered in the Supplemental DEIS.

Overall, the supplement to the DEIS will address eight WSAs containing 113,065 acres not addressed in the original DEIS, plus modifications adding a total of 213,007 acres to 58 WSAs which appeared in the DEIS. The additions bring the combined total of WSAs and acres studied in the DEIS and Supplement to 85 WSAs and 2,640,214 acres.

As a supplement to the DEIS, it is expected that the document will address the same mix of site-specific alternatives defined and analyzed in the DEIS: All Wilderness (Entire WSA recommended suitable for wilderness designation), Enhanced Wilderness (Opportunities to enhance wilderness manageability considered), Partial (Opportunities to resolve or minimize resource conflicts considered), No Wilderness/No Action (Current levels of use and management continued), and the Preferred Alternative (usually one of the four preceding alternatives, but in some cases different from all of them). For some WSAs the document may address only the All Wilderness and No Wilderness/No Action alternatives. The other alternatives will be addressed for those WSAs where such options are considered relevant for analysis. The statewide alternatives will again incorporated all of the site-specific alternatives developed for the individual WSAs.

The Supplement will address the general issue topics discussed in the DEIS (wilderness values, ecosystems and vegetation, economic value and local personal income, livestock grazing, energy and mineral development, utility corridor routing, timber production, recreation use, wildlife and management of adjacent lands). The site-specific analyses will address those relevant site-specific issues identified by BLM staff and those raised by the public either previously or during the comment period established in this notice.

The Supplement is not intended to substantially modify the DEIS to respond to public comments on the DEIS, although some revisions may be made in respond to public comments to improve clarity. Any revisions not related to either clarity or the additional study lands identified above will be defered until the final EIS, including any adjustments to the preferred alternative for individual WSAs.

Table 1 lists the study areas to be addressed in the Supplemental DEIS. It identifies by study area the acres addressed in the original DEIS, those added under section 603 of FLPMA (split-estate lands previously deleted from WSA status and the new Lookout Butte WSA), and those added under Section 202 of FLPMA (areas under 5,000 acres previously deleted from WSA status; areas over 5,000 acres that do not possess wilderness characteristics when considered apart from adjacent lands under study by another agency; and certain split-estate and full fee-estate lands acquired after the passage of FLPMA, along with adjoining public lands, found through inventory to possess wilderness characteristics warranting further study). The final column lists acreages of acquired and associated public lands, within the same roadless areas as existing WSAs, that were inventoried and found to not meet wilderness criteria for WSA status.

This announcement constitutes a final inventory decision for the acquired and associated public lands listed in Table 1. This inventory decision is subject to protest. Unless a protest is received during the 30-day protest period, which ends on March 31, 1986, this inventory decision will become final on that date.

Dated: February 21, 1986.

William G. Leavell,
State Director.

	TOTALS	2,015,844	227,900 2/	107,652 2/	2,359,916	18,137

1/ The study areas and acreages added under Section 202 of FLPMA fall into the following categories:

Under 5,000 acres: Pine Creek (OR-2-98A) - 200 acres, Sheep Gulch (OR-2-98C) - 720 acres, Indian Creek (OR-2-98D) - 208 acres, Upper Leslie Gulch (OR-3-74) - 3,000 acres, McGraw Creek (OR-6-1) - 497 acres and Mountain Lakes (OR-11-1) - 320 acres.

Over 5,000 acres: Possibly Sage Hen Hills (OR-1-146B) - 8,520 acres, if further inventory determines that the area does not possess wilderness characteristics when considered apart from adjacent U.S. Fish and Wildlife Service lands under wilderness consideration.

Acquired and Adjacent Lands: The remaining study areas listed in the table.

2/ Further inventory and a separate public review period are necessary to determine whether the Sage Hen Hills WSA will be studied under Section 603 or Section 202 of FLPMA. When determined, the 8,520 acres would be added to the appropriate column.

3/ Includes 215 acres erroneously omitted from the DEIS due to records which incorrectly depicted the lands as split-estate rather than public lands.

4/ Includes 34,400 acres in Idaho.

BILLING CODE 4310-33-C

Federal-State Coal Advisory Board; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice is to inform the public that the Federal-State Coal Advisory Board (Board) will meet in Denver, Colorado, on April 1, 1986. The public is invited to attend. The Board will (1) discuss the Secretary's coal program decisions, (2) the timing and proposed means of implmentation of the decisions, and (3) review the Board charter with respect to its renewal.

DATE: The Board will meet at 9:00 a.m. on April 1, 1986.

ADDRESS: The Board meeting will be held at the Clarion Hotel, 3203 Quebec Street, Denver, Colorado 80207, telephone 1-800-252-7466.

FOR FURTHER INFORMATION CONTACT: Walt Rewinski or Tom Walker, Division of Solid Mineral Leasing, Bureau of Land Management (650), 18th and C Streets NW., Washington, DC 20240, telephone (202/FTS) 343-4636.

SUPPLEMENTARY INFORMATION: The Board will meet to hear a presentation on the Secretary's coal leasing decisions and the specific changes developed to improve the leasing process and increase public confidence in the program. These changes culminate a comprehensive program review which included the 1983-1984 examination of fair market value policy for Federal coal leasing by an independent commission established by the Secretary; the Office of Technology Assessment's investigation of environmental protection in the Federal coal leasing program; and the Secretary's commitment to re-examine the basis for a Federal coal leasing program.

Board members will also be briefed on the Department's proposal to restart the regional activity planning process and the implementation of the program changes. Additionally, the Board will review its charter, which expires in October 1986, and discuss possible changes in anticipation of charter renewal, which is required every two years.

The public will have an opportunity to address the Board on agenda topics during the public comment period, as noted on the agenda, below. Written copies of a speaker's remarks would be appreciated. Any comments will become a part of the record of the Board meeting. The Chairperson may impose a time limit on speakers' comments to ensure that all those wishing to address the Board are heard.

Agenda—Federal-State Coal Advisory Board Meeting

April 1, 1986

Denver, Colorado

Welcome and Introductions
- —BLM Director
- —Deputy Director for Energy and Mineral Resources
- —Board Members

Review and Approval of Meeting Agenda
Approval of 1985 Meeting Minutes
Director's Remark
Coal Program Developments
- —Summary of Secretary's coal program
- —Extent to which program changes apply
  - Existing activity planning
  - New activity planning
- —Program restart
  - BLM conferences on program changes
  - RCT meetings
  - Long-range schedule and market analysis
- —FSCAB recommendation on data adequacy
- —RCT reports

BILLING CODE 4310-84-M

[Serial No. I-14881 et al.]

Idaho; Proposed Continuation of Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Forest Service, Department of Agriculture proposes that 332.74 acres of withdrawals for the Warm Springs Administrative Site, Snake River Administrative Site and the Swan Valley Administrative Site continue for an additional 30 years, which is the anticipated time the sites will continue to be used as administrative sites. These lands will remain closed to surface entry, and mining, but not mineral leasing.

DATE: Comments should be received within 90 days of the date of publication of this notice.

ADDRESS: Comments should be sent to; Bureau of Land Management, 3380 Americana Terrace, Boise, Idaho 83706.

FOR FURTHER INFORMATION CONTACT: Larry R. Lievsay, Idaho State Office, 208-334-1735.

The Forest Service proposes that the existing land withdrawals made by the Secretarial Order of October 19, 1906, Executive Order 2221, of July 19, 1915, Executive Order 4951, of August 17, 1928, Public Land Order No. 107, of March 31, 1943, and Public Land Order 2970, of March 18, 1963, be continued for a period of 30 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714. The land is described as follows:

I-14878

Secretarial Order of October 19, 1906

Boise Meridian

T. 2 N., R. 43 E.
Sec. 32, lots 6, 7, E½SE¼.

I-14884

Executive Order 2221, dated July 19, 1915

Boise Meridian

T. 11 N., R. 32 E.
Sec. 25, SE¼SW¼, W½SE¼;
Sec. 36, NE¼NW¼.

I-14882

Executive Order 4951, dated August 17, 1928

Boise Meridian

T. 2 N., R. 43 E.
Sec. 33, lots 4, 5, SW¼SW¼.

I-14881

Public Land Order No. 107, dated March 31, 1943

Boise Meridian

T. 1 N., R. 43 E.
Sec. 1, lots 5, 6, 11, 77, 78, 91, 92.

I-012083

Public Land Order No. 2970, dated March 18, 1963

Boise Meridian

T. 1 N., R. 43 E.
Sec. 1, lots 80, 81, 82, 83.

The area involved totals 332.74 acres in Clark County.

The withdrawals are essential for protection of substantial capital improvements on the Administrative Sites. The withdrawals closed the described lands to surface entry, and mining but not mineral leasing. No change in the segregative effect or use of the land is proposed by this action.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuations may present their views in writing to the Idaho State Director at the above address.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the

BEST COPY AVAILABLE

Interior, the President and Congress, who will determine whether or not the withdrawals will be continued, and if so, for how long. The final determination on continuation of the withdrawals will be published in the Federal Register. The existing withdrawals will continue until such final determination is made.

Dated: February 20, 1986.

William E. Ireland,

Chief, Realty Operations Section.

BILLING CODE 4310-[illegible]

North Dakota; Resource Management Plan Alternatives

AGENCY: Bureau of Land Management, Montana State Office, Interior.

ACTION: Supplement to Notice of Intent for the Initiation of Planning Activity in Dickinson District, North Dakota.

SUMMARY: This notice supplements the "Notice of Intent for the Initiation of a Planning Activity for the North Dakota Resource Management Plan (RMP)," published in the Federal Register, Volume 49, Number 245, Pages 49382 and 49383, on Wednesday, December 19, 1984. This supplement identifies four alternatives to be considered in detail during the preparation of the RMP and accompanying Environmental Impact Statement (EIS). The four alternatives will be based on the general themes of no action, commodity resource production, balanced multiple use, and protection of natural resource amenities.

SUPPLEMENTARY INFORMATION: Alternatives to be considered in detail were not identified in the original "Notice of Intent" for the North Dakota RMP. Four alternatives have been designed to present a range of feasible management actions which address the resource management issues of coal leasing, land pattern adjustment, oil and gas leasing, and offroad vehicle use.

The "No Action Alternative" is included in accordance with 43 CFR 1502.14(d). The theme of commodity resource production will be represented by maximizing commodity production subject to legal requirements. The balanced multiple use theme will be represented by maximizing commodity production within legal requirements and resource constraints identified through consultation with state and federal resource management agencies, interest groups, and the general public. The fourth alternative emphasizes maintaining or improving amenity values. This alternative would allow development of commodity resources, but only to a level which would not adversely impact other resource values.

FOR FURTHER INFORMATION CONTACT: William F. Krech, District Manager, P.O. Box 1229, Dickinson, North Dakota 58602, Telephone: (701) 225-9148.

Dean Stepanek,

State Director.

February 21, 1986.

BILLING CODE 4310-DN-M

[NM 59439-OK and NM 59433-OK]

Public Lands Sale in Woods and Woodward Counties, OK

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Sale Notice.

SUMMARY: The Tulsa District proposes to dispose of 197.27 acres of public land in Woods and Woodward Counties, Oklahoma. The proposed sale is consistent with the Bureau's planning system and the Federal Land Policy and Management Act (FLPMA) of 1976. Public interest will be served by disposition of these isolated tracts that are difficult and uneconomical to manage as part of the public lands, and are not suitable for management by another Federal department or agency.

DATE: For a period of 45 days after the date of publication of this Notice in the Federal Register, all persons who wish to submit comments may do so in writing to the District Manager, Bureau of Land Management, 9522-H East 47th Place, Tulsa, Oklahoma, 74145. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Hans Sallani, Oklahoma Resource Area Headquarters, 405-231-5491.

The following described lands have been examined and identified as suitable for disposal by sale under Section 203 of the FLPMA of 1976 (90 Stat. 2743, 43 U.S.C. 1701) at no less than the appraised fair market value:

Tract	Legal description	Acres	Value
	Woods County (WD)		
WD-2	T. 24 N., R. 16 W., I.M., sec. 21: NE¼SW¼ and NE¼NE¼.	80.00	$16,000
WD-3	T. 24 N., R. 16 W., I.M., sec. 22: NW¼NW¼.	40.00	8,000
WD-5	T. 25 N., R. 14 W., I.M., sec. 18: Lot 3.	37.27	11,200
	Woodward County (WW)		
WW-1	T. 21 N., R. 17 W., I.M., sec. 30: NE¼SW¼.	40.00	8,000

(Containing 197.27 acres)

Patents, when issued, will contain the following reservations: 1. All minerals (or partial or specific mineral interests, where applicable) shall be reserved to the United States, together with the right to prospect for, mine, and remove the minerals. A more detailed description of this reservation, which will be incorporated in the patent document, is available for review at this Bureau of Land Management office.

2. The sale of the lands will be subject to all valid existing rights and reservations of record.

Tracts WD-2, WD-3, and WW-1 do not have legal access and the Bureau of Land Management will not guarantee access.

The identified tracts will be sold by sealed bid under competitive bidding procedures. Sealed written bids will be considered only if received by the Bureau of Land Management, Oklahoma Resource Area Headquarters, 200 N.W. Fifth Street, Room 548, Oklahoma City, Oklahoma, 73102, prior to 10:00 a.m., Monday, May 5, 1986. The tract numbers should be printed on the lower left hand corner (example: Land Sale—Tract WD-5). Each written sealed bid must be accompanied by a certified check, postal money order, bank draft, or cashiers check made payable to the Department of the Interior, Bureau of Land Management, for at least twenty percent of the amount bid. The written, sealed bids will be opened and publicly declared at the beginning of each sale. If two or more envelopes containing valid bids of the same amount are received, the determination of which is to be the highest bid shall be by supplemental sealed bids.

Once a high bid price is accepted, the successful bidder shall submit the remainder of the full bid price within 180 days of the sale. Failure to pay the full bid price shall result in cancellation of the sale for the tract, and the deposit shall be forfeited and disposed of as other receipts of sale. All bids will be either returned, accepted, or rejected within 30 days of the sale date.

If the identified tracts are not sold, they will be available for sale by sealed bid on the first Monday of each month for six months as follows: (1) June 2, 1986; (2) July 7, 1986; (3) August 4, 1986;

(4) September 8, 1986; (5) October 6, 1986; and, (6) November 3, 1986.

Jim Sims,

District Manager.

[FR Doc. 86-4285 Filed 2-27-86; 8:45 am]

BILLING CODE 4310-FB-M

[W-86514]

Realty Action; Sale of Public Lands; Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action—FLPMA Sale; Public Lands, Lincoln and Sweetwater Counties, Wyoming.

SUMMARY: The following public lands have been examined and found suitable for Direct Sale under section 203 of the Federal Land Policy and Management Act of 1976, at not less than the appraised fair market value of $640,000.00. The lands will not be offered for sale until sixty (60) days after the date of this notice:

6th Principal Meridian

T. 22 N., R. 111 W.,
  Sec. 18: Lot 8, SE¼SW¼, S½SE¼.
T. 22 N., R. 112 W.,
  Sec. 14: S½N½, S½.

The lands are proposed to be offered for sale to Exxon Corporation to be used for the operation of a natural gas processing plant and related facilities.

The sale is consistent with the Bureau's planning system. At this time, the lands are not suitable for management by the Bureau or another federal agency. It has been determined through the Riley Ridge Natural Gas Project EIS process that the public interest would be best served by offering the lands for sale.

This land sale will not be completed, and patent will not be issued until Exxon has finished and the Bureau of Land Management has approved the cultural resources mitigation reports for this sale.

The patent, when issued, will contain certain reservations to the United States and will be subject to all valid existing rights and reservations of record. Detailed information concerning these reservations, as well as conditions of the sale, are available for review at the Kemmerer Resource Area Office, Bureau of Land Management, P.O. Box 632, Kemmerer, Wyoming 83101.

Publication of this notice in the Federal Register segregates the public lands from the operation of the public land laws and the mining laws. The segregative effort will end upon issuance of the patent or 270 days from the date of the publication, whichever occurs first.

For a period of 45 days from the date of publication of this notice in the Federal Register, interested parties may submit comments to the District Manager, Bureau of Land Management, P.O. Box 1869, Rock Springs, Wyoming 82902-1869. Objections will be reviewed by the State Director who may sustain, vacate or modify the realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Donald H. Sweep,

District Manager.

[FR Doc. 86-4284 Filed 2-27-86; 8:45 am]

BILLING CODE 4310-22-M

Resource Management Plans; Medicine Bow and Divide Resource Areas, WY

AGENCY: Bureau of Land Management, Rawlins District Office, Rawlins, Wyoming, Interior.

ACTION: Initiation of a Resource Management Plan (RMP), request and invitation for public participation, request for coal and other resource information, and request for identification of areas of interest in federal coal leasing and development for the Medicine Bow and Divide Resource Areas, Rawlins District, Wyoming.

SUMMARY: The Rawlins District is initiating a land use planning effort to guide future management actions on approximatley 3.9 million acres of public lands and 5.1 million acres of Federal mineral estate administered by the Bureau of Land Management (BLM) within the Medicine Bow and Divide Resource Areas. The two adjacent resource areas are located in south-central and southeastern Wyoming and include Carbon, Albany and Laramie counties and eastern Sweetwater county. The single planning effort will result in two comprehensive land-use plans that will identify allowable land and resource uses and general management practices for each resource area.

An interdisciplinary team has been formed to develop the RMP. Disciplines to be represented include geology, petroleum and mining engineering, range conservation, wildlife biology, forestry, economics, recreation, lands, hydrology, soils, air quality, sociology, and archaeology.

Public participation will be solicited and provided throughout the planning process by: Federal Register announcements, discussions with interested and affected parties, press releases and notices, individual mailings to all parties who have expressed an interest, and public meetings and hearings. Anyone interested in having his or her name placed on the mailing list should contact the Team Leader at the address listed below.

The BLM initiated the scoping process for this planning effort in September 1985 by conducting an assessment of the current management in the two Resource Areas. This assessment has substantiated that an RMP must be developed for each of the resource areas and has identified several problems, concerns and conflicts among the following resource and resource use categories:

1. Mineral exploration and development,
2. Livestock grazing management and wild horse management,
3. Scenic and recreation values and recreational uses,
4. Special management area designation for areas with unique resource values, inlcuding wilderness study areas,
5. Wildlife habitat,
6. Forestry management activities,
7. Fire management activities.

The various problem areas identified relate to three general preliminary issues that each plan should address:

1. Management of vegetative resources for both consumptive (e.g., grazing including wild horses, timber harvesting, mineral development activities, etc.) and nonconsumptive uses (e.g., watershed protection, maintenance of cover for wildlife, etc.);
2. Special management determinations to protect environmentally sensitive areas of unique resource values, including Wilderness Study Areas; and
3. Management determinations to protect or improve water and air resource values.

To complete the scoping, the BLM is requesting the public to help (1) identify additional problems, concerns, conflicts, and management opportunities that should also be addressed in the planning process; and (2) to participate throughout the planning process.

This notice includes a request for any available resource information and data pertaining to the two resource areas and the above mentioned disciplines. The purposes of this request are:

1. To assure that the Environmental Impact Statement (EIS) and subsequent RMP's cover the fullest possible range of consideration for resource and land uses and management alternatives.
2. To fulfill the "call for coal resource information" requirement in 43 CFR

VOL 51
ISS 40
FE 28
1986
UMI

3420.1–2. This call is issued to (a) obtain any available data on the location quality and quantity of Federal coal with development potential, and (b) identify areas where there is substantiated interest in future leasing and development of Federal coal, and the interested parties. Parties interested in future leasing and development of Federal coal in the two resource areas will be expected to provide coal resource data (and other resource data, regarding item 3 below) for their areas of interest. This particularly concerns areas where there is little or inadequate existing data, which would require inventory and data collection during the early planning stages. The lack of participation by interested parties may result in the omission of their areas of interest from further consideration for coal leasing.

3. To obtain any available information and resource data pertinent to conducting the coal screening requirements in 43 CFR 3420.1–4(e). Specifically, this concerns information needed for adequate application of the 20 coal unsuitability criteria (43 CFR 3461.1) and for adequate evaluation of any other multiple use resource values that would be in conflict with coal development (43 CFR 3420.1–4(e)(3)).

4. To identify any apparent "qualified surface owners" as defined in section 714 of the Surface Mining Control and Reclamation Act and in 43 CFR 3400.0–5(gg). This will help to initiate any necessary consultation with surface owners as required by 43 CFR 3420.1–4(e)(4).

DATES: Identification of problems, conflicts, concerns, and management opportunities and development of planning criteria for this planning effort began in September 1985. Commencing immediately, the BLM is requesting any information and resource data that can be provided relative to all items discussed above. The BLM is also requesting all parties interested in or who wish to participate in the planning effort, particularly in the ongoing scoping of the plans, to contact the planning Team Leader at the address and phone number below. This should be done as soon as possible to help assure timely notification of the upcoming scoping meetings to be held at various locations in and around the planning areas. Public meetings will be announced through the Federal Register, local news media and public mailings.

ADDRESS: Medicine Bow and Divide RMP Team Leader, P.O. Box 670, Rawlins, Wyoming 82301, (307) 324–7171.

FOR FURTHER INFORMATION CONTACT: Steve Howell, Team Leader, at the above address.

SUPPLEMENTARY INFORMATION: Copies of the preliminary problems, concerns, conflicts, management opportunities, issues and planning criteria are available at the BLM District Office, P.O. Box 670, 1300 N. 3rd Street, Rawlins, Wyoming 82301.

Hillary A. Oden,

State Director.

Realty Action; Noncompetitive Sale of Public Land in Los Angeles County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Realty Action—Noncompetitive sale of public land in Los Angeles County, California to the city of Los Angeles.

SUMMARY: The following described public land has been examined and found suitable for disposal by noncompetitive sale under section 203 (a)(1) and section 209 (a) and (b) of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750 and 2757; 43 U.S.C. 1713 and 1719):

San Bernardino Meridian, California

T. 2S., R. 15W., SBM

Sec. 4, Lots 3 & 4.

Containing 4.00 acres more or less.

The subject land is located in the City of Los Angeles, California. The land is being offered by direct sale to the City of Los Angeles for not less than the appraised fair market value of $343,000.

Purpose

The sale of this land will provide clear title to numerous innocent purchasers of private property by removing a cloud from their titles. This sale is consistent with Federal and local government planning.

The subject land is to be sold directly to the City of Los Angeles for the appraised market value of $343,000 by direct sale pursuant to 43 CFR 2711.3–3(a)(5).

A certified check, postal money order, bank draft or cashier's check, made payable to the Department of the Interior, Bureau of Land Management for the entire amount of $343,000 shall be received at the place of sale, California Desert District Office, 1695 Spruce Street, Riverside, California 92507, by 1:00 p.m. on May 30, 1986. The payment shall be enclosed in a sealed envelope clearly marked "Public Land Sale, CA–15531, Los Angeles County, California".

Failure to submit the full purchase price as specified above shall result in cancellation of the sale of the above described land.

The subject land is prospectively valuable for oil and gas. It has been determined that this land contains no other known mineral values. Therefore, as a condition of sale, a $50.00 nonrefundable fee for conveyance of the remaining mineral estate is required.

The patent, when issued, will contain the following reservations:

1. A right-of-way shall be reserved to the United States for ditches and canals constructed by the authority of the United States, Act of August 30, 1890 (26 Stat. 391; 43 U.S.C. 945).

2. (a) The United States reserves all oil and gas in the land so patented subject to disposition under the general leasing laws.

(b) The United States reserves to itself, its permittees, licensees, and lessees the right to prospect for, mine and remove the oil and gas owned by the United States udner applicable law and such regulations as the Secretary of the Interior may prescribe. This reservation includes all necesary and incidental activities conducted in accordance with the provisions of the mineral leasing laws in effect at the time such activities are undertaken, including, without limitation, necessary access and exit rights, all drilling and storage and transportation facilities deemed necessary and authorized under law and implementing regulations.

(c) Unless otherwise provided by separate agreement with the surface owner, permittees, licensees and lessees of the United States shall reclaim disturbed areas to the extent prescribed by regulations issued by the Secretary of the Interior.

(d) All causes of action brought to enforce the rights of the surface owner under the regulations above referred to shall be instituted against permittees, licensees, and lessees of the United States; and the United States shall not be liable for the acts or omissions of its permittees, licensees and lessees.

Publication of this Notice of Realty Action in the Federal Register shall segregate the subject public land from appropriation under the public land laws, including the mining laws. The segregative effect of this Notice of Realty Action shall terminate upon issuance of patent or other document of conveyance to such lands upon publication in the Federal Register of a termination of the segregation or 270

days from the date of publication, whichever occurs first.

Further information concerning this sale, including the land report, environmental assessment and appraisal, is available for review at the Indio Resource Area Office, 1695 Spruce Street, Riverside, California 92507.

For a period of 45 days from the date of publication of this notice in the Federal Register, interested parties may submit comments to the District Manager, California Desert District, at the above address. Objections will be reviewed by the State Director who may sustain, vacate or modify this realty action. In the absence of any objections by the State Director, this realty action will become the final determination of the Department of the Interior.

Dated: February 21, 1986.

Richard M. Barber,

Acting District Manager.

BILLING CODE 4310-40-M

Minerals Management Service

Development Operations Coordination Document; Texaco USA

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Texaco USA has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 4993, Block 30, Main Pass Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from onshore bases located at Venice and Morgan City, Louisiana.

DATE: The subject DOCD was deemed submitted on February 14, 1986. Comments must be received within 15 days of the date of this Notice or 15 days after the Coastal Management Section receives a copy of the DOCD from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44396, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Rules and Production, Plans, Platform and Pipeline Section; Exploration/Development Plans Unit, Phone (504) 838–0875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685).

Those practices and procedures are set out in revised Section 250.34 of Title 30 of the CFR.

Dated: February 20, 1986.

J. Rogers Pearcy,

Acting Regional Director, Gulf of Mexico OCS Region.

INTERNATIONAL TRADE COMMISSION

Import Investigations; Certain Dried Salted Codfish From Canada; Request for Comments Concerning the Institution of a Section 751(b) Review Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Request for comments regarding the institution of a section 751(b) review investigation concerning the Commission's affirmative determination in investigation No. 731–TA–199 (Final), Certain Dried Salted Codfish from Canada.

SUMMARY: The Commission invites comments from the public on whether changed circumstances exist which warrant the institution of an investigation pursuant to section 751(b) of the Tariff Act of 1930 (19 U.S.C. 1675(b)) to review the Commission's affirmative determination in investigation No. 731–TA–199 (Final) regarding certain dried salted codfish from Canada, provided for in item 111.22 of the Tariff Schedules of the United States. The purpose of the proposed section 751(b) review investigation, if instituted, would be to determine whether an industry in the United States would be materially injured, would be threatened with material injury, or the establishment of an industry would be materially retarded, by reason of imports of certain dried salted codfish from Canada if the antidumping duty order is modified or revoked with respect to such merchandise, provided for in item 111.22 of the Tariff Schedules of the United States.

FOR FURTHER INFORMATION CONTACT: David Coombs, Office of Investigations, U.S. International Trade Commission (202–523–1376). Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

SUPPLEMENTARY INFORMATION: On June 27, 1985, the Commission determined pursuant to section 735(b) of the Tariff Act of 1930, that the establishment of an industry in the United States is threatened with material injury by reason of imports of certain dried salted codfish from Canada which have been found by the Department of Commerce to be sold at less than fair value.

On February 6, 1986, the Commission received a request to review its affirmative determination in investigation No. 731–TA–199 (Final). The request was filed pursuant to section 751(b) of the Tariff Act of 1930 by Freeman, Wasserman, & Schneider on behalf of BMT Commodity Corp. and Delca Distributors, Inc., an importer and seller, respectively, of certain dried salted codfish from Canada.

Written comments requested: Pursuant § 207.45(b)(2) of the Commission's rules of practice and procedure (19 CFR 207.45(b)(2)), the Commission requests public comments concerning whether the following changed circumstances alleged in the request for review are sufficient to warrant institution of a review investigation: (1) Codfish Corp., the only known potential producer, ceased production in November 1984, has not recommenced production, and filed for bankruptcy on November 18, 1985, (2) the continuing unavailability of a domestic source of supply has resulted in American consumers paying higher prices for imported codfish as a result of the dumping duties and in a decline in demand for codfish in Puerto Rico as the competitive gap widens between dried salted codfish and other less expensive sources of protein such as chicken and pork, and (3) even if Codfish Corp. were producing, it could not attain the level of production necessary to be a viable producer.

Additional information: Under § 201.8 of the Commission's rules of practice and procedure (19 CFR 201.8), the signed original and 14 true copies of all written submission must be filed with the Secretary to the Commission, 701 E Street, NW., Washington, DC 20436. All comments must be filed no later than 30 days after the date of publication of this notice in the **Federal Register**. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request business confidential treatment under § 201.6 of the Commission's rules of practice and procedure (19 CFR 201.6). Such request should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. Each sheet must be clearly marked at the top "Confidential Business Data." The Commission will either accept the submission in confidence or return it. All nonconfidential written submissions will be available for public inspection in the Office of the Secretary.

Copies of the request for review of the injury determination and any other public documents in this matter are available to the public during official working hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, DC 20436; telephone 202–523–0161.

Issued: February 25, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB-28 (Sub-10x)]

Central of Georgia Railroad Co. Abandonment Exemption in Barbour County, Al; Exemption

Applicant has filed a notice of exemption under 49 CFR Part 1152 Subpart F—Exempt Abandonments to abandon its 6.1-mile line of railroad between milepost L-349.0 near White Oak and milepost L-355.1 near Clayton in Barbour County, Al.

Applicant, has certified (1) that no local traffic has moved over the line for at least 2 years and that overhead traffic is not moved over the line, and (2) that no formal complaint filed by a user of rail serice on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment will be protected pursuant to *Oregon Short Line R. Co.-Abandonment-Goshen,* 360 I.C.C. 91 (1979).

The exemption will be effective March 30, 1986, (unless stayed pending reconsideration). Petitions to stay must be filed by March 20, 1986, and petitions for reconsideration, including environmental, energy, and public use concerns, must be filed by March 20, 1986, with: Office of the Secretary, Case Control Branch Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Nancy S. Fleischman, 1050 Connecticut Avenue, NW, Suite 740, Washington, DC 20036.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio.*

A notice to the parties will be issued if use of the exemption is conditioned on environmental or public use conditions.

Decided: February 24, 1986.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

James H. Bayne,
Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 30300]

CSX Corp.; Control; American Commercial Lines, Inc.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Oversight proceeding.

SUMMARY: The Commission is instituting the oversight proceeding ordered in Finance Docket No. 30300, *CSX Corporation—Control—American Commercial Lines, Inc.,* —— I.C.C.2d —— (September 7, 1984). Comments are invited regarding any adverse or beneficial effects of the acquisition.

DATE: Comments must be filed with the Commission and served on CSX Corporation no later than April 30, 1986.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275-7245.

ADDRESSES: Send and original and 10 copies of all pleadings, referring to Finance Docket No. 30300, to: Office of the Secretary Case Control Branch, Interstate Commerce Commission Washington, DC 20423.

Send 1 copy to applicant's representative: R. Eden Martin, 1722 Eye Street, NW., Washington, DC 20006.

A copy of applicant's report to the Commission on this transaction is available from applicant's representative.

SUPPLEMENTARY INFORMATION: In *CSX Corporation—Control—American Commercial Lines, Inc., supra, (CSX/ACL),* we authorized the acquisition of control by CSX Corporation (CSX), a non-carrier holding company that controls serveral class I railroads, of American Commercial Lines, Inc. (ACL) and its water carrier subsidiary, American Commercial Barge Lines Company (ACBL). The acquisition was consummated on October 12, 1984.

We imposed reporting and oversight conditions on our authorization to monitor the impact of the acquisition on competition. This notice impact of the acquisition on competition. This notice institutes the first proceeding under the oversight condition.

As noted in Appendix E to *CSX/ACL,* after receipt of public comments, the proceeding will be assigned to an Administrative Law Judge (ALJ).

The ALJ shall prepare a report to the Commission on the oversight proceeding. The Commission will issue a decision by August 31, 1986, on whether to reopen the proceeding or take any other action based on the ALJ's report.

Decided: February 24, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley.

James H. Bayne,
Secretary.

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to Clean Air Act and Clean Water Act; Lowell, IN et al.

In accordance with Department policy, 28 CFR 50.7, notice is hereby given that on February 11, 1986, a proposed consent decree in *United States* v. *Town of Lowell, et al.,* Civ. No. H83-0425, was lodged with the United States District Court for the Northern District of Indiana. This agreement resolves a judicial enforcement action brought by the United States against the Towns of Lowell and Cedar Lake for violations of the Clean Air Act and Clean Water Act at the Town of Lowell's wastewater treatment plant in Lowell, Indiana.

The proposed Consent Decree provides that the Towns of Lowell and Cedar Lake will implement several immediate modifications to the operation of the Lowell wastewater treatment plant to assure that as much wastewater as possible receives at least primary treatment. By May 31, 1986, the defendants will complete a sewer system evaluation study as well as a study of the feasibility of installing temporary storage facilities for excess wastewater. By September 1, 1986, the defendants will submit a program for eliminating bypasses around the wastewater treatment plant and for achieving compliance with the plant's NPDES permit. Final compliance with the terms and conditions of the NPDES permit is required by June 30, 1988. Finally, the agreement provides that the Towns of Lowell and Cedar Lake will each pay a $20,000 civil penalty.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Town of Lowell, et al.,* D.J. Ref. 90-5-1-1-1957.

The proposed consent decree may be examined at the office of the United States Attorney or the regional office of the Environmental Protection Agency as follows:

U.S. Attorney: U.S. Attorney, Northern District of Indiana, Federal Building, Fourth Floor, 507 State Street, Hammond, Indiana 46320

EPA: Office of Regional Counsel, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

A copy of the consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $2.20 (.10 per page reproduction fee) payable to the Treasurer of the United States.

F. Henry Habicht II,
Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extension, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirements.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the recordkeeping/reporting requirements may be obtained by calling the Department of Labor, Jim Rhodes and/or Jim Lemke on AC 202-523-6308. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW, Room N-1301, Washington, DC 20210. Comments should also be sent to the OMB

VOL 51
ISS 40
FE 28
1986
UMI

reviewer, Nancy Wentzler, Telephone 202 395–6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, Washington, DC 20503.

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Extension

Occupational Safety and Health Administration

Maritime—Material Handling Hooks and Unfired Pressure Vessels 1218–0052; OSHA 237
Recordkeeping
Businesses or other for profit; Federal agencies or employees; small businesses or organizations
900 respondents; 1,350 hours; 0 forms

To ensure that hooks that are used for materials handling and unfired pressure vessels that have not been rated by the manufacturers or a standards organization and are used by shipyard personnel are examined and tested before use.

This information collection was approved by OMB for a period of two months which was extended for an additional three months at OSHA's request. This submission is a request for extension of the clearance with no change in either the collection of information or in the clearance package originally submitted in August, 1985 and approved by OMB in September, 1985.

Occupational Safety and Health Administration

Manlifts
1218–0055; OSHA 200
On occasion
Businesses or other for profit; small businesses or organizations
3,000 respondents; 52,500 hours; 0 forms

OSHA is requiring this information to be collected by employers for determining the cumulative maintenance status of a manlift and for taking the necessary preventive action to assure employee safety.

This information collection was approved by OMB for a period of two months which was extended for an additional three months at OSHA's request. This submission is a request for extension of the clearance with no change in either the collection of information or in the clearance package originally submitted in August, 1985 and approved by OMB in September, 1985.

Occupational Safety and Health Administration

Installation and Operation of Resistance Welding Equipment
29 CFR 1916.252(c)(6)
29 CFR 1910.252(c)(6)
1218–0056; OSHA 219
Recordkeeping
Businesses or others for profit; non-profit institutions; small businesses or organizations
150,000 respondents; 50,000 hours; 0 forms

The information is needed to assure the effectiveness of the regulation. The recordkeeping provides the Agency with adequate information to indicate the equipment is maintained properly and may prevent severe physical harm or death.

This information collection was approved by OMB for a period of two months which was extended for an additional three months at OSHA's request. This submission is a request for extension of the clearance with no change in either the collection of information or in the clearance package originally submitted in August, 1985 and approved by OMB in September, 1985.

Occupational Safety and Health Administration

Portable Fire Extinguishers; Hydrostatic Test Record
1218–0114; OSHA 205
On occasion
State or local governments; businesses or other for profit; federal agencies or employees; small businesses or organizations
7,058,824 respondentes; 2,964,706 hours; 0 forms

Requires that portable fire extinguishers be hydrostatically tested every 5 to 12 years depending upon the type of shell construction. A record of the test containing the date of test, the test pressure, and the name of the individual or agency doing the test.

This information collection was approved by OMB for a period of two months which was extended for an additional three months at OSHA's request. This submission is a request for extension of the clearance with no change in either the collection of information or in the clearance package originally submitted in August, 1985 and approved by OMB in September, 1985.

Occupational Safety and Health Administration

Records of Inspection of Critical Components on Cranes
1218–0116; OSHA 206
Recordkeeping
Businesses or other for profit; small businesses or organizations
660,000 responses; 330,000 hours; 0 forms

OSHA requires a record of periodic thorough inspection of overhead and gantry cranes and mobile cranes. The inspections are to determine the condition of hooks, hoist chains and brakes to prevent injury to employees due to component failure during use.

This information collection was approved by OMB for a period of two months which was extended for an additional three months at OSHA's request. This submission is a request for extension of the clearance with no change in either the collection of information or in the clearance package originally submitted in August, 1985 and approved by OMB in September, 1985.

Occupational Safety and Health Administration

Record of Inspection and Maintenance of Presses
1218–0117; OSHA 215
Recordkeeping
State or local governments; businesses or other for profit; small businesses or organizations
1,517,240 hours, 0 forms

In order to ensure workplace safety it is the responsibility of the employer to establish and follow a program of regular inspections of power presses and forging machines. The parts, equipment and safeguards must be in a safe operating condition. The employer shall maintain records of these inspections and the maintenance work performed.

This information collection was approved by OMB for a period ot two months which was extended for an additional three months at OSHA's request. This submission is a request for extension of the clearance with no change in either the collection of information or in the clearance package originally submitted in August, 1985 and approved by OMB in September, 1985.

Occupational Safety and Health Administration

Records of Inspection of Running Ropes on Cranes and Derricks
1218–0120; OSHA 209
Recordkeeping
Businesses or other for profit; small businesses or organizations
780,000 responses; 390,000 hours; 0 forms

OSHA requires a record of periodic thorough inspection of running ropes on cranes, mobile cranes, and derricks. The inspections are to determine the condition of the wire ropes to prevent injury due to rope failure during use.

This information collection was approved by OMB for a period of two months which was extended for an additional three months at OSHA's request. This submissain is a request for extension of the clearance with no change in either the collection of information or in the clearance package originally submitted in August 1985 and approved by OMB in September 1985.

Occupational Safety and Health Administration

Records of Inspection of Idle Ropes on Cranes and Derricks
1218–0118; OSHA 208
Recordkeeping
Businesses or other for profit; small businesses or organizations
6,800 responses; 3,400 hours; 0 forms

OSHA requires a record of periodic thorough inspection of idle ropes on overhead and gantry cranes, mobile cranes, and derricks. The inspections are to determine the condition of the wire ropes to prevent injury to employees due to rope failure during use.

This information collection was approved by OMB for a period of two months which was extended for an additional three months at OSHA's request. This submission is a request for extension of the clearance with no change in either the collection of information or in the clearance package originally submitted in August 1985 and approved by OMB in September 1985.

This information collection was approved by OMB for a period of two months which was extended for an additional three months at OSHA's request. This submission is a request for extension of the clearance with no change in either the collection of information or in the clearance package orignally submitted in August 1985 and approved by OMB in September 1985.

Occupational Safety and Health Administration

Electrical Component Inspection (explosives haulage trucks used underground)
1218–0122; OSHA 236
Recordkeeping
Businesses or other for profit; small businesses or organizations
1 respondent; 8 hours; 0 forms

A record of electrical system checks on explosives haulage trucks is required to ensure elimination of ignition sources that would cause fires or explosions when employees are underground.

This information collection was approved by OMB for a period of two months which was extended for an additional three months at OSHA's request. This submission is a request for extension of the clearance with no change in either the collection of information or in the clearance package originally submitted in Auguest 1985 and approved by OMB in September 1985.

Occupational Safety and Health Administration

Inspection Report (Critical Components for Cranes)
1218–0123; OSHA 231
Recordkeeping

Occupational Safety and Health Administration

Service Station Inventory Records for Flammable Liquids Tanks
1218–0119; OSHA 203
Recordkeeping
State or local governments; businesses or other for profit; federal agencies or employees; small businesses or organizations
11,133 respondents; 2,371,329 hours; 0 forms

Requires the maintenance and reconciliation of inventory records for Class I liquid storage tanks to detect underground leaks to avoid fires and explosions.

This information collection was approved by OMB for a period of two months which was extended for an additional three months at OSHA's request. This submission is a request for extension of the clearance with no change in either the collection of information or in the clearance package originally submitted in August 1985 and approved by OMB in September 1985.

Occupational Safety and Health Administration

Powered Platforms for Exterior Maintenance
1218–0121; OSHA 201
On occasion
Businesses or other for profit; small businesses or organizations
19,500 respondents; 243,750 hours, 0 forms

OSHA is requiring this information to be collected by employers for determining the cumulative maintenance status of powered platform and for taking the necessary preventive action to assure employee safety.

Businesses or other for profit; small businesses or organizations
110,000 responses; 660,000 hours; 0 forms

The employer is required to record the condition of items critical to the continued safe use of mobile cranes observed during monthly inspections. Use of the records to determine service and maintenance schedules ensures a safer workplace.

This information collection was approved by OMB for a period of two months which was extended for an additional three months at OSHA's request. This submission is a request for extension of the clearance with no change in either the collection of information or in the clearance package originally submitted in August, 1985 and approved by OMB in September, 1985.

Occupational Safety and Health Administration

Hoist Inspection Record
1218–0124; OSHA 232
Recordkeeping
Businesses or other for profit; small businesses or organizations
1,200 respondents; 9,600 hours; 0 forms

Records of inspections and test of hoist facility are required to ensure corrective procedures in a timely manner to minimize hazards to employees while in, on, or around the hoist and its proximity.

This information collection was approved by OMB for a period of two months which was extended for an additional three months at OSHA's request. This submission is a request for extension of the clearance with no change in either the collection of information or in the clearance package originally submitted in August, 1985 and approved by OMB in September, 1985.

Signed at Washington, DC, this 25th day of February 1986.

Paul E. Larson,
Departmental Clearance Officer.

BILLING CODE 4510-26-M

Employment Standards Administration Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29

VOL 51 ISS 40 FE 28 1986 UMI

CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register** or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S-3504, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 80 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. The subscription cost is $277 per volume. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 21st day of February 1986.

James L. Valin,

Assistant Administrator.

BILLING CODE 4510-27-M

Pension and Welfare Benefits Administration

[Application No. D-3684]

Employee Benefit Plans; Prohibited Transactions/Exemptions; Pooled Pension Fund Management Corp. (PPFMC) in Baton Rouge, LA

In the **Federal Register** dated March 16, 1984 (49 FR 9978), the Department of Labor (the Department) published a notice of pendency of a proposed exemption from the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 and from certain taxes imposed by the Internal Revenue Code of 1954. The notice of pendency concerned an application filed on behalf of PPFMC, the sponsor of a number of pooled mortgage funds.

Notice is hereby given that the Department does not, at this time, contemplate granting the requested exemption.

Accordingly, the notice of pendency is hereby withdrawn.

If the Department proposes, at a future date, to grant the exemption, notice of the pendency thereof will be published in the **Federal Register** giving interested persons an opportunity to comment on the proposal and, if appropriate, to request a hearing thereon.

Signed at Washington, DC, this 24th day of February, 1986.

Elliot I. Daniel,

Assistant Administrator for Regulations and Interpretations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 86-4398 Filed 2-27-86; 8:45 am]

BILLING CODE 4510-29-M

[Application No. D-5914 et al.]

Proposed Exemptions; Tuohy, Wells, Kimble, Goolsbee, Hardy, Hervey & Associates, Inc. Profit Sharing Plan et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this Federal Register Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Regulations and Interpretations, Room N-5669, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue NW., Washington, D.C. 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of pendency of the exemption as published in the Federal Register and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below.

Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Tuohy, Wells, Kimble, Goolsbee, Hardy, Hervey & Associates, Inc., Profit Sharing Plan (the Profit Sharing Plan) and Tuohy, Wells, Kimble, Goolsbee, Hardy, Hervey & Associates, Inc., Pension Plan (the Pension Plan; Together, the Plans) Located in Kansas City, Missouri

[Application No. D-5914]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale by the Plans of certain improved real property (the Property) to Westport Management Services, Inc. (the Buyer), a party in interest with respect to the Plans, provided that the sale price is at least fair market value on the date of sale; and (2) the concurrent extension of credit from the Plans to the Buyer, provided that the terms are no less favorable to the Plans than those obtainable in an arm's-length transaction with an unrelated third party.

Summary of Facts and Representations

1. The Buyer is a wholly-owned subsidiary of Tuohy, Wells, Kimble, Goolsbee, Hardy, Hervey & Associates, Inc., doing business as Westport Anesthesia Services, Inc. (the Employer). The primary business of the Employer is providing medical services in the field of anesthesiology. The primary business of the Buyer is providing management, billing and accounting services to the Employer. As of July 31, 1985, the Employer had net assets of approximately $257,000, and the Buyer had net assets of approximately $270,000.

2. As of July 31, 1985, the Profit Sharing Plan had approximately 39 participants and total assets of approximately $4,451,340. As of March 12, 1985, the Pension Plan had approximately 34 participants and total assets of approximately $1,093,836. Investment decisions on behalf of both Plans are made by the Plans' four trustees (the Trustees), two of whom are shareholders of the Employer. The Trustees are Timothy F. Cussen, William H. Hervey, II, M.D., James A. Wells, M.D., and Earl L. Williams. Both Plans provide for participant directed accounts at the participant's option. In each Plan, accounts not so directed are placed in a pooled fund invested by the Trustees (the Pooled Funds). As of July 31, 1985, 1985, the Pooled Fund of the Profit Sharing Plan had assets of $779,127, and the Pooled Fund of the Pension Plan had assets of $496,100.

3. Among the assets of the Pooled Funds is the Property, of which the Profit Sharing Plan owns 75 percent and the Pension Plan owns 25 percent. The Property is a condominium located in Vail, Colorado. The Plans purchased the Property on behalf of the Pooled Funds for $235,000 on April 15, 1983 from Vail Investment Fund and Development Limited, an unrelated party.

4. The applicants represent that the income from rents has exceeded the expenses incurred by the Plans in maintaining and holding the Property, and that the value of the Property has declined since it was purchased by the Plans. An independent appraisal of the Property performed on July 23, 1984 by R.H. Reeves of Vail, Colorado established a fair market value of $215,000. Mr. Reeves represents that the value of most vacation home properties in Vail, Colorado have declined since 1980, because there has been a greater supply of such homes than there is demand for them.

5. The Buyer and the Trustees request an exemption for the sale by the Plans

VOL 51
ISS 40
FE 28
1986
UMI

of the Property to the Buyer. The purchase price will be $258,500 or fair market value at the time of sale, whichever is greater, but in no event will it be less than the Plans' total net cost of acquiring and holding the Property. Of this amount, $115,167 will be paid in cash. The remainder of the purchase price will be paid pursuant to a promissory note (the Note). The Note will be secured by a first mortgage on the Property, and the Plans will have full recourse to the Employer. The Note will be payable in monthly installments of principal and interest over a period of twenty-five years, and will initially bear interest at a rate equal to the published prime rate of Chase Manhattan Bank at the time the sale is consummated. Thereafter, the interest rate will be adjusted annually in accordance with Chase Manhattan Bank's prime rate, with a floor of no more than 3% variance from the initial interest rate.

6. The Employer has retained Olathe State Bank of Olathe, Kansas to act as the independent fiduciary (the Independent Fiduciary) for the Plans. The Independent Fiduciary represents that it is unrelated to and has no business relationship with the Employer or the Buyer. The Independent Fiduciary has agreed to supervise and effectuate the sale of the Property, to collect all funds due under the Note, to ensure that the value of the Collateral is always equal to at least 150% of the outstanding balance of the Note, and to take any steps necessary or advisable in connection with enforcing and carrying out the terms of the Note and the mortgage on behalf of the Plans.[1]

7. The Independent Fiduciary represents that it would have been willing to enter into the Note with the Buyer on the same terms. It further repesents that it has examined the financial statement of the Employer and the loan to value ratio of the Note, and it has determined that the Note is well secured. Further, it represents that the floating interest rate protects the Plans from a below-market return. Finally, the Independent Fiduciary represents that the sale would improve the liquidity of the Plans, and that the pruchase price of $43,500 over appraised value should offset any potential future appreciation lost to the Plans by virtue of the sale.

8. In summary, the applicants represented that the proposed transaction meets the statutory criteria for section 408(a) of the Act because:

(a) The sale will relieve the Plans of an unprofitable and illiquid investment;

(b) The sale price of the Property will be at or above its appraised fair market value;

(c) The Note will be secured by a first mostgage on the Property, which has an appraised fair market value of at least 150% of the amount of the Note; and

(d) The Independent Fiduciary has determined that the proposed transaction is in the best interests and protective of the Plans and their participants and will take all appropriate actions to enforce the rights of the Plans.

Gay Plumbing & Heating Company Profit Sharing Plan (the Plan) Located in Albany, Georgia

[Application No. D-6098]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of sections 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed cash sale by the Plan of its entire interest in Ledo Properties Company (Ledo), a partnership under Georgia Law, to John L. Gay and Annette H. Gay (Mr. and Mrs. Gay), parties in interest with respect to the Plan, for the greater of $313,424 or the fair market value of the Plan's interest in Ledo as of the date of the sale.

Summary of Facts and Representations

1. The Plan is a defined contribution (profit sharing) individual account plan sponored by Gay Plumbing and Heating Co. (the Plan Sponsor), a plumbing contractor doing business in Albany, Georgia. As of May 14, 1985, the Plan had 91 participants, and as of December 31, 1984 it has assets of $334,284. The trustees of the Plan are Mrs. and Mrs. Gay.

2. On August 30, 1972 the Plan made an initial capital contribution of $100,000 to Ledo, constituting a 24.75% capital interest in the partnership. As the result of Ledo's subsequent buying out the interests of three partners, the Plan currently owns a 28.27% capital interest in Ledo (Ledo is, in practice, a general partnership, and each partner is a general partner with respect to the partnership.) Ledo owns several tracts of real property, both improved and unimproved, including a farm located in Lee and Dougherty Counties, Georgia, consisting of 577.54 acres and a separate tract consisting of 110.16 acres in Dougherty County, Georgia (the Property).

3. The Property was appraised on August 31, 1982 by Paul A. Jones, Jr., SRA (the Independent Appraiser), as having a fair market value of $1,455,000. Subsequently, the Independent Appraiser opined that the fair market value of the Property as of October 31, 1984 was $1,114,000. The Independent Appraiser states that he has no present or contemplated interest in the Property, and that neither his employment to make the appraisal nor his compensation is contingent upon the appraised value of the Property. The Independent Appraiser states that in investigating farm sales in Lee County in 1984 he found the market almost non-existent; of the four farm sales he located, two were foreclosures. The applicant represents that the lower 1984 appraised value of the Property is testimony to the condition of the farm economy in south Georgia generally. Extreme drought has been common, and the foreign investment which was a significant factor in maintaining property values for agricultural property in 1982 is today reduced considerably because of the strength of the United States dollar abroad. The applicant represents that the principal Ledo property, the farm located in Lee and Dougherty Counties, has experienced significant depreciation in recent years and does not offer the prospect for appreciation in the near future. The applicant further states that the proposed purchase price is in excess of that currently being received for comparable farmland.

4. The applicant represents that Ledo's farm property is leased to Oakland Farm, an unrelated third party, for $10,000 per annum, and that a 60 acre pecan grove is leased to Pippin Pecan Company, another unrelated third party, for $11,111 per annum. The applicant represents that the lease payments approximate the real estate taxes due annually or Ledo's farm property.

5. The applicant seeks an administrative exemption to permit the

---

[1] The applicants represent that the Independent Fiduciary has undertaken an investigation to determine whether the Property has been used by any parties in interest with respect to the Plans and will ensure that the Plans received or will receive at least fair market rental value for such use, plus interest at an appropriate rate. The applicants further represent that that they will file the required forms with the Internal Revenue Service and pay the applicable excise tax within 60 days of the date this exemption is granted.

Plan to sell its entire interest in Ledo to Mr. and Mrs. Gay for a total purchase price of $313,424, provided that such price is not less than the fair market value of the Plan's interest in Ledo as of the date of the sale. This purchase price was determined by adding $12,997 in current assets (cash) and $12,777 in deferred construction interest to the appraised value of $1,114,000 and subtracting the total current liabilities of $35,000. The resulting figure, $1,104,774, was then multiplied by the Plan's interest in Ledo, 28.37%, resulting in $313,424 as the fair market value of the Plan's interest as of December 31, 1984. No discount has been taken because of the lack of a potential sale of the farm property which constitutes the greater part of Ledo's holdings, nor, for the same reason, has a premium been attached to the value of the Plan's interest in Ledo, even though upon consummation of the proposed sale Mr. and Mrs. Gay will own approximately one-third of Ledo.

6. Upon the sale of the Plan's interest in Ledo, the Plan will be terminated and all the Plan assets will be distributed to the Plan participants. The applicant represents that the Plan Sponsor has significantly reduced its business activities in recent years, and that although there are 91 Plan participants, the Plan Sponsor has only 5 current employees, and finds the Plan quite costly to maintain. The Plan Sponsor represents that it will be liquidated upon termination of the Plan.

7. In summary, the applicant represents that the proposed transaction will meet the statutory criteria of section 408(a) of the Act because: (a) The Plan's interest in Ledo will be sold for no less than its fair market value at the time of the sale as determined by an independent appraiser; (b) the proposed sale represents a one-time transaction for cash which can be easily verified; (c) the proposed sale will not require the payment of any commissions by the Plan; (d) the proposed sale will enable the Plan to dispose of a non-marketable asset which produces no income, thus, facilitating the distribution of assets upon Plan termination; and (e) Mr. and Mrs. Gay, the Plan's trustees, have determined that the proposed transaction would be in the best interests and protective of the Plan and its participants and beneficiaries.

For Further Information Contact: Joseph L. Roberts III of the Department, telephone (202) 523-8194. (This is not a toll-free number.)

Marprowear Corporation Profit Sharing Plan and Trust (the Plan) Located in West Orange, New Jersey

[Application No. D-6330]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of sections 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed cash sale by the Plan of certain improved commercial real property to Martin Riback, Charles Riback and Joseph Weinberg, the trustees of the Plan (the Trustees), provided that such sale is on terms not less favorable to the Plan than those which the Plan could obtain in an arm's-length transaction with an unrelated party.

Summary of Facts and Representations

1. The Plan is a defined contribution profit-sharing pension plan with seven participants and total assets of $6,984,231.23 as of December 31, 1984. Each of the Trustees is an officer and owner of more than ten percent of the stock of the Marprowear Corporation (the Employer), the sponsor of the Plan. The Employer is a closely-held New Jersey corporation engaged in the wholesale of casual clothing. All investment decisions on behalf of the Plan are made by the Trustees.

2. Among the assets of the Plan is the Ledgemont Circle Shopping Center (the Property). The Property consists of 8.58 acres of commercially-zoned land improved with a retail shopping center of approximately 60,000 square feet, located on Route 46 in Ledgewood, New Jersey. The Plan acquired the Property on May 30, 1973 for $450,000 and leased approximately 20,000 square feet (the Leased Space) of the Property to the Employer until June 30, 1984, at which time the Employer vacated such premises. The Employer represents that its lease of the Leased Space from the Plan until June 30, 1984 was exempt from the prohibitions of section 406 of the Act by virtue of section 414(c)(2) of the Act.[2] The Trustees represent that despite their best good-faith efforts a new tenant for the Leased Space has not been located and the Leased Space has remained vacant since the Employer vacated the premises on June 30, 1984. Thus, since June 30, 1984, the Plan has not earned any income from the Leased Space, which constitutes approximately one-third of the leaseable space in the Property. Since the Property constitutes approximately 26 percent of the assets of the Plan, the lack of income from the Leased Space represents a substantial loss of potential income to the Plan's participants and beneficiaries. This substantial deficiency of performance of a major Plan asset will continue as long as the Leased Space remains vacant, which the Trustees represent is the likely future under current and foreseeable market conditions, or until the Plan disposes of the Property by selling it and investing the proceeds in alternative investments. The Trustees represent that they are not likely to locate an unrelated purchaser of the Property who would be willing to pay the Plan the full appraised fair market value of the Property because (1) outstanding leases of the remaining space in the Property would prevent a potential purchaser's control of two-thirds of the Property's space, and (2) a potential purchaser would face the same loss of income of the Leased Space until a suitable tenant could be found.

3. In order to alleviate this deficiency of the Property's performance as a major Plan asset, and to avoid the costs and problems in locating an unrelated purchaser willing to pay the full appraised fair market value of the Property, the Trustees propose to purchase the Property from the Plan in their individual capacities and are requesting an exemption to permit this transaction. The Trustees propose to pay the Plan cash in the amount of the Property's full appraised fair market value. The Property has been appraised by Irwin J. Steinberg, MAI (Steinberg), an independent professional real estate appraiser with the firm of Appraisal Group International in East Orange, New Jersey. In an update of his full narrative appraisal of September 6, 1984, Steinberg states that as of June 11, 1985 the Property had a fair market value of $1,800,000. All costs and expenses related to the sale will be borne by the Trustees. The Trustees represent that their proposed purchase of the Property from the Plan will be in the best interests and protective of the participants and beneficiaries of the Plan in that it will not only alleviate the Plan of an unproductive asset but will

---

[2] In this proposed exemption, the Department expresses no opinion as to whether the Employer's lease of the Leased Space was exempt until June 30, 1984 from the prohibitions of section 406 of the Act by virtue of section 414(c)(2) of the Act.

VOL 51 ISS 40 FE 28 1986 UMI

also allow the Plan's assets to achieve better diversification, since the Property represents about one-fourth of the Plan's assets.

4. In summary, the applicant represents that the proposed transaction satisfies the criteria of section 408 of the Act for the following reasons: (1) The purchase price paid by the Trustees to the Plan will be the Property's fair market value according to Steinberg; (2) the proposed sale is a one-time transaction for cash; (3) all costs and expenses related to the proposed transaction will be borne by the Trustees; and (4) the proposed transaction will enable the Plan to dispose of a poorly-performing asset and to achieve better diversification of its assets.

For Further Information Contact: Mr. Ronald Willett of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Wynne Building Corporation Employees Pension Trust (the Plan) Located in Miami, Florida

[Application No. D–6425]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to a proposed loan of $750,000 (the Loan), secured by a first mortgage on certain real property (the Property), by the Plan to Wynne Building Corporation, a Florida corporation, (the Employer), provided that the terms of the Loan are and remain at least as favorable to the Plan as an arm's-length transaction with an unrelated party.

Summary of Facts and Representations

1. The Employer is a Florida corporation, organized on April 1, 1983, by the merger of its two predecessor corporations. The Employer had total assets of $22,670,534, as of March 31, 1985. It is a closely held corporation with 45 percent of its outstanding shares owned by Mr. Joel F. Wynne, President; 22.5 percent of its shares owned by Mr. Chester C. Wynne, Executive Vice President; 22.5 percent of its shares owned by Mrs. Dorothy Wynne, Director; and the remaining 10 percent of its shares owned by Mr. Harvey A. Newman, Vice President of the Employer. Mr. Chester C. Wynne and Mrs. Dorothy Wynne are married and parents of Mr. Joel F. Wynne. Since July 9, 1964, the Employer, and its predecessors, have acquired, developed, and managed income producing real estate. In this 21-year period, they developed 75 rental properties in Dade County, Florida, which include apartments, warehouses, and duplexes, and 4 manufactured home communities in St. Lucie County, Florida. Most of these properties are owned by the Employer and all are managed by the approximately 120 employees of the Employer. Financing for development of these properties has been obtained from either banks and savings and loan associations or from working capital and profits of the Employer.

2. The Plan is a defined benefit plan with approximately 70 participants and total assets of $3,027,827, as of June 30, 1985. Most of the Plan assets consist of 318 corporate bonds, maturing at various dates, with a total face value of $3,514,750. The trustee for the Plan, Mr. Joel F. Wynne, is also the president, a principal shareholder of the Employer. However, for the duration of the proposed loan transaction, Mr. Leo Levy, 10400 S.W. 98th Street Miami, Florida, has been retained, at the expense of the Employer, to be the independent fiduciary with respect to the funding and servicing of the proposed loan transaction. Mr. Levy, as the independent fiduciary, has been given full authority to monitor the loan transaction throughout its duration and to take any action necessary to safeguard the interests of the Plan and its participants and beneficiaries. The Loan will not be disbursed until Mr. Levy has determined that all the terms and conditions of the transaction have been fulfilled and that the transaction is in the best interests of the Plan and its participants and beneficiaries. Mr. Levy's qualifications include more than 25 years experience with an insurance company and several banks, involving investments, consulting and administering employee benefit plans.

3. The Employer and the Plan request an exemption from the prohibited transaction provisions of the Act which would permit the Plan to loan the sum of $750,000 to the Employer for its use as working capital in the acquisition and development of additional real properties. The Loan represents less than 25% of the assets of the Plan. The Loan will be evidenced by a promissory note for the principal sum of $750,000, excuted by the Employer and payable monthly to the Plan together with interest at the rate of 13.875 percent per annum until maturity in 10 years. The monthly payments of principal and interest on the Loan will be in the sum of $11,588.68 with no penalty for acceleration of payments in part or full. The Loan will be secured by a first mortgage on the Property which has the following legal description:

> East half of lot 13, all of lots 14 and 15, Block 1, CORTLAND INDUSTRIAL PARK, according to the plat thereof as recorded in Plat Book 113 at Page 52 of the Public Records of Dade County, Florida.

The street address of the Property is 12800–12811 SW. 122nd Avenue and 12210–12228 SW. 128th Street, Miami, Florida. The Property consists of 3.33 acres, which includes a 20 bay warehouse building with a gross buildable area of 51,098 square feet and a net rentable area of 49,994 square feet. The Property is fully rented, generating annual revenues of approximately $190,000. These improvements were completed in 1981 and are considered to be in good condition as attested to by a qualified independent appraiser, Mr. Phillip G. Spool, A.S.A., Real Estate Appraiser, P.O. Box 013655, Miami, Florida 33103. As of August 23, 1985, Mr. Spool determined that the Property had a market value of $1,300,000. Furthermore, the mortgage provides that the Property will have a value at all times which equals or exceeds the amount of the Loan by 150 percent. If the value of the Property should fall below 150 percent of the outstanding principal balance of the Loan, the mortgagor will have 30 days within which to repay enough of the outstanding principal balance so that the current value of the Property will again equal or exceed 150 percent of the outstanding principal balance of the Loan.

4. Mr. Levy, the independent fiduciary, represents that he is not related in any way to the Employer or its principals and that he has a thorough familiarity with requirements of the Act, having functioned under its provisions since 1974.

Further, he represents that he fully understands and acknowledges his duties, responsibilities, and liabilities in performing as a fiduciary with respect to the Plan. He represents that his qualifications to act as a fiduciary in the proposed transaction are evidenced by his experience of over 25 years in all phases of employee benefit plans, including administration, investment and consulting. Mr. Levy, after examining the Plan's investment portfolio and recognizing that it stresses safety of its principal coupled with a reasonable rate of return, finds the

proposed transaction satisfies this criterion. He also agrees to monitor the proposed transaction on behalf of the Plan and take any necessary action to foreclose in case of default. Mr. Levy states that, because of the high interest rate and the ample security involved, the proposed transaction is in the best interests of the Plan and its participants and beneficiaries.

5. In summary, the applicants represent that the proposed Loan satisfies the statutory criteria of section 408(a) of the Act because (a) the independent fiduciary with respect to the Plan has determined that the proposed transaction is in the best interests of the Plan and its participants and beneficiaries; (b) the terms of the Loan will produce a better than average rate of return; (c) the Loan will be secured at all times by collateral with a value of at least 150 percent of the outstanding principal balance of the Loan; (d) the independent fiduciary with respect to the Plan will pursue the rights of the Plan and its participants and beneficiaries in the event of default, including foreclosure on the security of the Loan; and (e) the collateral will be appraised at any time the independent fiduciary with respect to the Plan deems necessary.

For Further Information Contact: Mr. C.E. Beaver of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Medford Radiological Group E. Doyle Profit Sharing Plan Trust (the Plan) Located in Medford Oregon

[Application No. D–6443]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed cash sale of certain works of art (the Artworks) by the Plan to Edward J. Doyle, M.D. (Dr. Doyle), a disqualified person with respect to the Plan, provided that the cash received by the Plan from the proposed sale is the higher of either $5,350 or the fair market value of the Artworks of the date of the sale.[3]

Summary of Facts and Representations

1. The Plan is a Keogh profit sharing plan in which Dr. Doyle is the sole participant, sponsor, and trustee. After Dr. Doyle incorporated his medical practice and established another employee benefit plan for his new professional corporation, the Plan ceased to be funded and was "frozen". As of December 12, 1985, the Plan had total assets of $48,000.

2. The Artworks consist of five pieces of graphic art in the form of etchings by three different artists. These include (a) two by Boulanger entitled *Single Girl on Bicycle,* valued at $850 and *La Bergere,* valued at $1,300; (b) two by Tamayo entitled *Cabeza en Rojo* valued at $1,000 and *Hombre con Baston,* valued at $1,000; and (c) one by Dali entitled *Diane de Poitiers* valued at $1,200. The Artworks were purchased from unrelated parties in June 1980 as an investment for the Plan and have remained in the possession of The Art Show, an art gallery in Bend, Oregon. These five pieces since their purchase have been on display by The Art Show in its gallery as well as at various art shows for the purpose of selling the Artworks.

3. Since there has been no success in selling the Artworks for the past five and one-half years at their appraised value, Dr. Doyle is seeking an exemption from the prohibited transactions of the Act which would permit him to purchase the Art works for cash from the Plan for their appraised value in order to permit the Plan to invest the proceeds of the sale in income producing assets. The Artworks have been appraised by Caro Hakala of the Art Show, as of November 15, 1985, to have a total current market value of $5,350.

4. In summary, the applicant represents that the proposed transaction satisifies the criteria for exemption under section 4975(c)(2) of the Code because (a) the sale will be a one-time transaction for cash with no expense incurred by the Plan; (b) the Plan will sell the Artworks at their fair market value as detemined by an independent appraiser; (c) The Art Show has been unsuccessful in its attempts to sell the Artworks on behalf of the Plan; and (d) the Plan will be able to invest the proceeds of the sale in income producing assets.

Notice to Interested Persons: Because Dr. Doyle is the applicant as well as the Plan sponsor, trustee, and sole participant, it has been determined that there is no need to distribute the notice of pendency to interested persons. Comments and requests for a hearing must be received by the Department within 30 days of the date of publication of this notice of proposed exemption.

For Further Information Contact: Mr. C.E. Beaver of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

The Birr, Wilson, & Co., Inc. Employee's Profit Sharing Plan (the Profit Sharing Plan) and The Birr, Wilson & Co., Inc. Financial Security Plan for Account Executives (the Security Plan collectively, the Plans) Located in San Francisco, CA

[Application Nos. D–6477 and D–6478]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to: (1) The proposed exercise of stock options (the Options) by the Plans to purchase from Birr, Wilson & Co., Inc. (the Employer) stock in unrelated companies; and (2) the potential repurchase of the Options from the Plans by the Employer, for a period of five years from the date this proposed exemption becomes final, provided that the terms and conditions of the transactions are at least as favorable to the Plans as those obtainable in similar transactions with an unrelated party.

Temporary Nature of Exemption: This exemption, if granted, shall be effective for a period of five years commencing with the date on which the exemption becomes final.

Summary of Facts and Representations

1. The Employer is a closely held regional stock brokerage firm with its principal place of business in San Francisco, California. It also has offices in other cities in California and in New York, Idaho, Oregon, Nevada and Washington. It has seats on the New York and Pacific Stock Exchanges and is a member of the National Association of Securities Dealers, Inc. The Employer is also subject to the Securities Act of 1933, the Securities Exchange Act of 1934, and the rules and regulations promulgated thereunder, and is a registered investment adviser under the

---

[3] Pursuant to 29 CFR 2510.3–3(b), there is no jurisdiction under Title I of the Act for the proposed sale because Dr. Doyle is the sole participant of the Plan. However, there is jurisidiction under Title II of the Act: therefore the Department may grant an administrative exemption under section 4975(c)(2) of the Code.

FE 28
1986
UMI

Investment Advisers Act of 1940. The Employer has no obligation to pay dividents and the last cash dividend paid was $.08 per share paid in March, 1977.

2. The Profit Sharing Plan is a profit sharing plan covering employees of the Employer who are not account executives or account executive trainees. As of November 30, 1984, it has 221 participants and assets of $1,804,711.74.

3. The Security Plan is a profit sharing plan covering account executives of the Employer who are compensated primarily on a commission basis. As of November 30, 1984, it had 135 participants and assets of $4,522,837.29.

4. The trustee of both Plans is Security Pacific National Bank (the Trustee). Most investment decisions are made by the Employee Plan Committee (the Committee), which is currently comprised of officers and/or directors of the Employer.

5. As an underwriter, the Employer frequently purchases and will continue to purchase warrants (the Warrants) to acquire shares of stock in issuers for whom it is performing underwriting services. The Employer acquires these Warrants for a cash purchase price equal to what it believes to be the fair market value of the Warrants.

6. The Employer has recently declared and will continue to declare dividends in the form of options (the Options) to purchase shares of stock in the companies from which the Employer has acquired the Warrants. The Plans, as shareholders of the Employer, have been, and will be granted the Options.

7. The Options become exercisable on the dates on which the Option holder receives notification from the Employer that the Options are exerciseable. The Options will remain exercisable for a period of thirty days following the dates of the original exercise notices. The Options may be exercised only by purchasing all of the stock which the Option holder has a right to purchase. The Employer may, in its absolute discretion, give the Option holder the exercise notice any time during the exercise notice period, but in any event must give such exercise notice not later than the final date of the exercise notice period.

8. The applicant represents that the decision of when to give the exercise notice to Option holders will be based on the Employer's evaluation of factors which will include, but not be limited to, the current market price of the shares which could be acquired pursuant to the Options, the time remaining on the Options and the expectation of market performance in relation to the time remaining on the Options.

9. The applicant represents that the Employer may exercise its Warrants at a price generally equal to 100% to 120% of the initial offering price for the shares of stock involved. The Options may be exercised by the Trustee at a price equal to the price at which the Employer may acquire its shares pursuant to its Warrants.

10. No commissions will be paid by the Plans in connection with their acquisition of shares pursuant to the Options.

11. The purchase price under each Option is subject to adjustment if the issuing company pays a dividend in shares of its common stock, subdivides (split) its outstanding shares of common stock, combines (reverse split) its outstanding shares of common stock, or issues by reclassification of its shares of common stock any shares or other securities, or distributes to holders of its common stock any securities of itself or of any other entity. If any of the foregoing events were to occur, the number of shares of common stock or other securities which the Trustee is entitled to purchase pursuant to the Option immediately prior to the occurrence of any of the foregoing events shall be adjusted so that the Trustee will be entitled to receive upon exercise the number of shares of common stock or other securities which it would have owned or would have been entitled to receive after the occurrence of any of the events described above had the Option been exercised immediately prior to the happening of such event, and the exercise price per share shall be correspondingly adjusted. No adjustment in the number of shares and/or the exercise price shall take place unless such adjustment would require an increase or decrease of at least 1% in the exercise price or the number of shares which could otherwise be acquired pursuant to the Option. Notwithstanding the foregoing, any adjustment which is not required pursuant to the terms of the Option agreements shall be carried forward and taken into account in the event of any subsequent adjustment.

An adjustment made pursuant to the Option agreements shall become effective immediately after the record date in the case of a stock dividend, or other distribution, subdivision, combination or reclassification of the shares. If the issuing company is consolidated or merged with or into another corporation or if all or substantially all of its assets are conveyed to another corporation, each Option holder will be permitted to purchase the kind and number of shares of stock or other securities receivable upon such consolidation, merger or conveyance based on the number of shares of common stock which could have been purchased under the Option immediately prior to such consolidation, merger or conveyance.

12. The Employer, at any time prior to the exercise of the Options, may repurchase the Options from the Trustee in the event the Employer sells or otherwise disposes of its Warrants or the Employer exercises the Warrants and sells or otherwise disposes of all of the shares acquired pursuant to the Warrants. In the event the Employer exercises its repurchase rights as described above, it will pay each Option holder cash in an amount determined in accordance with a formula contained in the Option agreements, which assures that the Plans receive their proportionate share of the proceeds of the sale or other disposition of either the Warrants or the shares. The Plan will bear no expenses with respect to such a repurchase.

13. The decision of whether or not the Plans will exercise the Options will be made by the investment advisor(s) appointed by the Committee. The Employer currently anticipates that the investment advisor will be Roger E. Engemann & Associates, Inc. (Engemann) of Pasadena, California. Engemann is a registered investment advisor under the Investment Advisors Act of 1940 and is not related to the Company in any respect other than in its capacity as investment advisor to the Plan. The applicant represents however, that Engemann may, in certain cases, choose to have the Employer execute brokerage transactions on behalf of his clients. In determining whether the Options should be exercised, Engemann will give appropriate consideration to those facts and circumstances which Engemann knows or should know are relevant to the exercise of the Options in question. This consideration will include, but will not necessarily be limited to, a determination that the exercise of the Options is reasonably designed, as part of the portfolio of the Plans, to further the purposes of the Plans, taking into consideration the risk of loss and the opportunity for gain or other return associated with the exercise of the Options and the effect that the exercise of the Options will have on the portfolio with regard to diversification; the liquidity and current return of the portfolio relative to the anticipated cash flow requirements of the Plans; and the projected return of the portfolio relative to the funding objectives of the Plans.

14. The applicant represents that the value of the Options currently held is less than .1% of the value of the aggregate assets of the Plans as of November 30, 1984, and if the Options are exercised and the exercise price equals the fair market value of the stock purchased, that the value of such stock would equal no more than 1% of the value of the Plans' assets.

15. In summary, the applicant represents that the criteria of section 408(a) of the Act are satisfied in the subject transactions because: (a) The terms of the Options granted to the Plans are and will be the same as those granted to all shareholders of the Employer; (b) the Plans will be able to exercise the Options at the same price at which the Employer exercises its Warrants; (c) an independent fiduciary, Engemann, will decide whether it is in the Plans' interests to exercise the Options; (d) in the event the Employer repurchases any Option, the Plans will receive their full share of the proceeds and bear no expense with respect to such resale; and (e) failure to grant the exemption will prevent the Plans from benefitting from these and future dividends issued to stock holders of the Employer or from the repurchase of the Options by the Employer.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interest of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an adminstrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, D.C., this 25th day of February, 1986.

Elliot I. Daniel,

Assistant Administrator for Regulations and Interpretations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 86-4399 Filed 2-27-86; 8:45 am]

BILLING CODE 4510-29-M

[Prohibited Transaction Exemption 86-23; Exemption Application No. D-5413 et al.]

Grant of Individual Exemptions; UPS Company Defined Benefit Pension Plan and Trust et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Grant of Individual Exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, D.C. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of pendency were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

UPS Company Defined Benefit Pension Plan and Trust (the Plan) Located in Torrance, CA

[Prohibited Transaction Exemption 86-23; Exemption Application No. D-5413]

Exemption

The restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to (1) the periodic purchases by the Plan of undivided interests in a parcel of property (the Property) located in Malibu, California from Mr. Hiram C. Sloan (Mr. Sloan), provided the Plan pays no more for such interests in the Property than their fair market value on the date of the purchase; and (2) the leasing of the Plan's interest in the Property by the Plan to Mr. Sloan, UPS Company or Malibu Paradigm, under the terms set forth in the notice of proposed exemption, provided such terms are not less favorable to the Plan than those obtainable in an arm's length transaction with an unrelated party.
